PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES—*Thursday, October 10, 1985*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Almighty God, as we reflect on the blessings of life we remember those individuals who used their power or position, their words and deeds, in the interests of helping people know justice and mercy and peace. We salute those prophets of righteousness who, not counting the personal cost, did what was right and good and true. Even as we honor those heroes of other days, so may our faith encourage us in our day and time to speak and to act for the welfare of all Your creation that in all things we may do justice, love, mercy, and even walk humbly with You. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

A BARBARIC ACT OF TERRORISM

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, Leon Klinghoffer is dead and the American people are filled with bitterness and outrage. A 69-year-old American, wheelchair-bound, half of his body paralyzed by stroke, is executed and dumped into the sea. His brutal and barbaric murderers cannot be allowed to go unpunished.

It is clearly within the power of Yasser Arafat, the PLO, the Governments of Egypt and those of other Arab nations to hunt the four terrorists down and to do it quickly and urgently.

Mr. Speaker, I am sure I speak for every Member of this House as I express my deepest condolences to Mrs. Marilyn Klinghoffer, who was with her husband when he was killed, to their daughters, Lisa and Elso, and to the entire family.

Leon Klinghoffer lived in the 17th District of New York, but all of America shares his loss and the demand that justice be done.

Mr. Speaker, out of this tragedy there must grow a final resolve by the nations of the world that hijacking and hostage-taking on land or sea or in the air will no longer be tolerated. In Leon Klinghoffer's memory, we must insist on it.

I urge the President of the United States to convene an international meeting to determine the steps which must be taken to resolve this issue once and for all.

HISPANIC CONTRACTOR NAMED MINORITY SMALL BUSINESS PERSON OF THE YEAR

(Mr. FIELDS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. FIELDS. Mr. Speaker, a Hispanic building contractor who came to the United States from Mexico 24 years ago, at age 17, and then started his own business 1 year after becoming a U.S. citizen, yesterday was named National Minority Small Business Person of the Year.

That person is Jose Edward deSantiago, president of Desco Steel Products, Inc., of Houston. This recognition by Vice President BUSH at a White House ceremony highlighting National Minority Enterprise Development [MED] Week.

The week was proclaimed by President Reagan as a way of paying special tribute to the Nation's more than 700,000 minority-owned businesses.

DeSantiago, 41, was selected from among outstanding minority small business owners chosen by their peers in the States, the District of Columbia and Puerto Rico. DeSantiago's selection was made by the U.S. Small Business Administration, which coordinates Minority Enterprise Development [MED] Week.

Desco Steel Products manufactures and sells metal buildings. Its sales during the first year of operation totaled $250,000; sales this fiscal year are expected to exceed $3 million.

Mr. deSantiago was born in Veracruz, Mexico. His father was a street vendor; his mother was a maid. When he came to the United States, leaving his family in Veracruz, deSantiago knew no English.

He first got a job making doughnuts at a bakery in Donna, TX. He worked 12 hours a day, 6 days a week, for $20 a week.

He moved to Houston in 1965 with his new bride, Gloria. He had exactly $1 in his pocket. To buy food, the couple sold their blood to a local blood bank.

Mr. deSantiago then got a job as a welder's helper.

In 1979, a year after he became a U.S. citizen, deSantiago started Desco Steel Products. His first jobs involved helping to erect metal buildings for a friend. Today, Desco Steel Products builds more than 250 buildings a year. deSantiago employs 20 persons, most of whom are Hispanics.

Mr. and Mrs. deSantiago have three children.

AMERICA MUST PROTECT ITS PEOPLE FROM TERRORISM

(Mr. MAVROULES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAVROULES. Mr. Speaker, we have reached our limit.

President Reagan, it is time to start moving against the coldblooded, terrorist threat. It must be treaded as the cancer it is.

We can no longer simply watch while people are held defenseless and an innocent American murdered.

Mr. President, our country must step forward and offer leadership.

First, we must join with our allies in developing clear policies and proce-

dures for preventing and policing these incidents. Collectively, the free world can and should respond.

And second, it must be made clear to any nation, friend or foe, that allowing these international criminals to escape the administration of justice will result in the end of U.S. foreign assistance to that country.

Mr. President, America must protect its people.

MR. PRESIDENT: TAKE ACTION AGAINST TERRORISM

(Mr. ROBINSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROBINSON. Mr. President, once again an American citizen is murdered, and once again your State Department issues statements that we are going to bring them to justice. Let me remind you that your whole administration is words and more words and more words.

Recently when the Israelis retaliated, one terrorist was quoted as saying it was so terrifying to see the Star of David emblem on the jet peeling off and bombing the PLO headquarters.

Mr. President, it is time you do something. You have got the B-1B bomber to come over low, the B-52 to come over high. You have got the FB-11A and F-4 Phantom. You have the F-15 Eagle and on and on and on.

These people only understand one thing, and that is force. It is time to take names and kick rear ends. Or rename your State Department the Capitulation Department.

Get off your stick, Mr. President. The American people are sick and tired of being kicked around. It is on your back now.

You talk tough. Let us see you use some of these billions and billions and billions of dollars' worth of weapons that you have asked us to approve.

Your words are cheap talk.

CONDEMNATION OF SOVIET UNION FOR BRUTAL KILLING OF CHARLES THORNTON

(Mr. McCAIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCAIN. Mr. Speaker, today I am introducing a resolution which condemns the Soviet Union for the brutal killing of Charles Thornton, an Arizona Republic reporter who was on assignment in Afghanistan. On September 19, without warning or provocation, Soviet soldiers ambushed and opened fire on his party, killing Thornton instantly.

He was in Afghanistan to report on medical teams working in that country. His stories, no doubt, would have revealed many horrors—children maimed by booby-trapped toys, thousands of innocent men and women crippled or killed when their villages were bombed. Evidently, the Soviets did not want Charles Thornton's stories read. Nor do they want the world to know that such heinous acts are standard Soviet practice in Afghanistan. For over 5 years, the Soviets have occupied that country, killing tens of thousands of people. Afghanistan now rivals Guernica and Pnom Penh in the annals of 20th century terror.

Perhaps Charles Thornton's death will not be completely in vain. Perhaps his colleagues will now feel compelled to cover all the Soviet atrocities in Afghanistan—the "migratory genocide," the "scorched earth policy".

Charles Thornton died trying to cover a story he thought was important. Thousands of Afghans have died fighting for what John Kennedy called the most powerful force in the world—"man's desire to be free and independent." The greatest tribute to Charles Thornton would be to tell the story he never could.

THE BUDGET CRISIS DEMANDS ACTION

(Mr. KOLBE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOLBE. Mr. Speaker, the budget crisis has come home to roost. The attention of the Nation's media, and the people, is focused, right now, on this body.

We may postpone the issue a few days more, but not much more. Our day of reckoning is at hand.

Fortunately, the "Balanced Budget and Emergency Deficit Control Act of 1985" will allow us to do something about this problem. It will impose on Congress—and the executive branch—the discipline that we are unwilling to impose on ourselves.

We need to reduce the mounting deficit; we need a balanced budget. And we can only do it—in the long run—with a constitutional amendment. But as an interim measure, the legislation which is now squarely before this House will begin to bring order out of chaos, and discipline to an unruly budget process.

Mr. Speaker, all the arguments that are advanced on the Hill and downtown—that it may impede the President's defense buildup, that it may cut into needed domestic programs, that it is too tough and too firm—those are exactly the arguments as to why we need this law.

We need it today. I would suggest that we ought not to leave this Chamber today until and unless we have acted on the legislation that is before us.

PROPOSAL TO REPEAL STATE AND LOCAL TAX DEDUCTIONS WOULD AFFECT HALF OF ALL TAXPAYERS

(Mr. NOWAK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NOWAK. Mr. Speaker, it is evident that there is general sympathy throughout the Nation as a whole for some type of tax reform. The overall tax proposal contains numerous benefits designed to simplify the Federal Tax Code and make it more fair and economically efficient. But elimination of the provision that allows taxpayers to deduct State and local taxes on their Federal tax returns is not one of those benefits.

The President has repeatedly contended that the change would impact adversely on only a few high-tax States, such as New York, and that it is unfair for other States to subsidize them.

However, a recently released study by the Coalition Against Double Taxation found, contrary to the administration's assertions, that the proposal to repeal the Federal deduction for State and local taxes would affect more than half of all taxpayers. Of the 51 percent of the taxpayers who itemize on their Federal returns, 99 percent deduct their State and local tax payments. It is also clear from the data that deductibility is not a special break for the privileged few. About 51 percent of households who itemize State and local taxes report incomes of less than $30,000, and 87 percent were from households whose incomes were less than $50,000.

We in Congress, must recognize that deductibility benefits homeowners, schools, and State and local governments throughout the entire country, and should insist on preserving it.

COMMON SENSE FROM A SPEAKER OF THE HOUSE

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, today I would like to share with you a statement made by an honorable gentleman from the great State of Texas, Mr. Sam Rayburn.

Several years ago Speaker Sam stated that, and I quote: "The system of protective tariff built up under the Republican misrule has worked to make the rich richer and the poor poorer."

He went on to say, "The protective tariff has been justly called the mother of trusts. It takes from the pockets of those least able to pay and puts it into the pockets of those most able to pay."

H.R. 1562, the Textile and Apparel Protection Act, illustrates the unfair nature of protectionism pointed out by Sam Rayburn.

In fact, the MFA, as amended by H.R. 1562, will cost Americans approximately the same as all Federal housing assistance, all food and nutrition assistance including food stamps, and AFDC.

Because of finite Federal resources, H.R. 1562 transfers wealth from lower income Americans to the special interests of textile and apparel workers.

Why the Democrats today want to repeat a Republican mistake of the past is beyond me. The textile and apparel bill is truly a tax on the poor. I suggest they listen to the wisdom of their former leader, Mr. Rayburn, and end the folly of protectionism by rejecting the textile and apparel bailout.

PRESIDENT DEFIES CONGRESS AND THE AMERICAN PEOPLE IN THE WAR IN NICARAGUA

(Mr. BONIOR of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONIOR of Michigan. Mr. Speaker, a report in yesterday's Washington Post reveals that, in early 1984, the President himself, knowing that Congress was about to cut off funding for the Contras, approved a secret plan to continue aid through private groups and U.S. allies.

The President is so determined to continue the war against Nicaragua that, to avoid congressional restrictions, he moved the command from the CIA to the National Security Council, inside the White House itself.

He is so determined to circumvent the will of Congress that, when he could not legally use entities of the U.S. Government, he turned to outside groups to implement his unpopular policies.

This is a war that America does not want. Poll after poll shows that the American people do not favor U.S. aid to the Contras. And Member after Member of this body who voted for limited, nonlethal aid has insisted that the United States wants no military role in the Contra war.

Yet, the President has shown that he will defy the wishes of the American people and the law to continue this war. And we in Congress have not yet been able to stop him. I ask my colleagues, When the time comes, will we be able to restrain him from sending American troops?

HIGH VALUE OF THE DOLLAR MUST BE DEALT WITH IN THE HOUSE

(Mr. CRAIG asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. CRAIG. Mr. Speaker, today, yesterday, and the day before, articles in the Wall Street Journal read something like this:

The Dollar Strengthens Against Major Foreign Currencies Despite the Central Bank of Japan's Attempting to Bring it Down.

The Dollar Rose Against Intervention by the West German Central Bank.

This is what we are reading now, 2 weeks after a group of five attempted to, in an artificial way, tinker with the value of the dollar to bring it down to try to begin to solve the massive problems that this country is experiencing.

What does it say to us? It says it will not work. It says the only way we are really going to bring down the value of the dollar is to do it here in this body; and that is to get that deficit under control and begin to tell the American people and the economy of this country and the economy of the world that we are going to be fiscally responsible.

That is the only real way the value of the dollar will come down and stay down.

Now, the other body acted yesterday. They said deficits are a problem and we are going to do something about them. What have we heard here in the House? "Well, we've got to have at least 10 days to think about it." We've got to have at least 10 days to do what the American people, by nearly 80 percent, said should have been done yesterday, the day before; and that is get the deficit down, bring the value of the dollar down, put people back to work.

A VOTE FOR FAIR TRADE

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, the vote today on the Textile Trade Enforcement Act is a vote that says to our friends and allies: "Stop. We can't take it anymore. We can't take any more attitudes that give us unfair dumping practices, unfair subsidization, that bar access to our products."

Mr. Speaker, the vote today is probably one of the many that will be salvos directed at our friends and allies. Not saying that we want to engage in a trade war; saying that we want fair trade, that we want reciprocity. Textiles will be today. Soon it will be natural resources, telecommunications, agricultural products.

The American people want jobs and American industry protected. We do not want special privileges; we just want equity.

An overwhelming vote today means that, to our friends and allies we are saying, "Stop. We can't take it anymore."

PROPOSAL TO BRING STATE AND MUNICIPAL EMPLOYEES INTO MEDICARE IS UNWISE AND UNFAIR

(Mr. KINDNESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KINDNESS. Mr. Speaker, State and municipal employees in the State of Ohio are upset, and I can't say I blame them. Very soon, the House is expected to take up the Deficit Reduction Amendments of 1985. This legislation includes a provision which would bring State and municipal employees hired after January 1, 1986, under the Medicare system. Obviously, this action is being taken to shore up the overburdened Medicare system. I wonder though, if adequate consideration has been given to the effects this proposal may have on the fiscally sound health care plans of States which have chosen not to participate in Medicare.

And if the Congress can use a legislative broom to sweep State and municipal employees into the Medicare system, what's to stop us from sweeping them into the Social Security system, too?

This Medicare proposal is unwise and unfair, but more than that, Mr. Speaker, I believe it's unconstitutional. Medicare is funded through taxes paid in equal part by the employee and employer. The involuntary imposition of a tax on the States does violence to the basic structure of our Republic under the U.S. Constitution. The power to tax is the power to control, and to destroy. I am not willing to remain silent while the Congress assumes the power to destroy the basic rights of the States and to threaten the destruction of our Republic as we know it today.

I take issue with those who would use a faulted interpretation of the recent Supreme Court decision in Garcia versus San Antonio Metropolitan Transit Authority to justify bringing State and local government employees under Medicare, although a majority of the U.S. Supreme Court seems to have indicated the willingness to sit back while the 10th amendment is subjected to further attack by the Congress. That case did not deal with the most basic power of governments—the power to tax. It dealt with the applicability of the Fair Labor Standards Act to municipal employees, and its effect should be changed by legislation.

□ 1025

IN SUPPORT OF STATE AND LOCAL TAX DEDUCTIBILITY

(Mr. MITCHELL asked and was given permission to address the House

for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL. Mr. Speaker, I come before the Members of this body today to express my sincere concern about an issue of fundamental importance to not only my constituents, but to the Nation as a whole. So critical is this issue that it has clearly become one of the most controversial provisions of the President's tax proposal—that issue being the Federal deduction for State and local taxes.

When Congress enacted the Revenue Act of 1913, which we have come to recognize as the inception of the Federal income tax system, it set out standards regarding the imposition of the individual income tax and deductions which were to be allowed. Then, as now, the fairness debates were protracted and intense, but in the end, the decision to include a deduction from Federal income tax for tax payments made to State and local governments was agreed to by the Congress and the President. That decision to include tax payments as a deduction must have been made, in my estimation, with the intent to preserve State and local revenue-raising sovereignty and, to protect the individual from double taxation. The latter being based on the principles of equity. That is, the amount of taxes levied should be based on an ability to pay. Clearly, the amount of taxes required of an individual by State and local government, has critical effect on how much that individual can afford to pay to the Federal Government.

Perhaps more fundamental to this debate is the absence of an examination of the economic nature of State and local taxes to see if they indeed fit into a proper concept of the Federal tax base. While most will agree on the proposition on which the administration contends that we need the money, in the absence of critically necessary analysis, the simple fact that $150 billion must be discovered somewhere hardly provides justification to raise it by eliminating deductibility of State and local taxes.

We have heard the argument that eliminating deductibility will harm relatively few taxpayers. Since that assessment includes a large number of tax returns from people with minimal amounts of income such as teenagers with summer jobs, the figures used by the administration are somewhat misleading. In any event, the fact that only a minority of taxpayers would be directly affected by ill-conceived or just plain bad tax policy hardly makes it a good tax policy.

It is also a bit ironic, although irony is not totally unexpected, that this President would even put forth such a proposal when only 2 short years ago, he opposed the same idea when he conceded that repeal of the State and local tax deduction means "you'd pay tax on a tax." It is a simple fact that when an authority wishes to impose an income tax, any tax which has been paid to another authority must be deducted before the tax rate is applied or both the individual's income and the tax which he paid to the first authority will be taxed.

Because my time is limited, I am not permitted to delve into the constitutional implications of such a policy nor will I be able to refute other erroneous arguments made by proponents of this provision. In closing, I would like to make one final point, and that is, a tax cannot properly be considered part of one's income. Therefore, an income tax, cannot under that premise, include in its base any taxes to which the taxpayer has already been subjected.

Whether one's view is based on a historic, economic, or a political perspective, the proposed State and local tax deduction is wantonly and profoundly too costly.

RAISING THE JEWISH EMIGRATION ISSUE AT GENEVA

(Mr. COURTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, the Kremlin does not always honor that which it signs. Today, Jews in the Soviet Union are reaping no advantages from the signature Leonid Brezhnev put on the Helsinki Accords, which pledge conformity to the U.N. Declaration of Human Rights, including the right to emigrate.

As many as 400,000 Jewish people would leave the U.S.S.R. if they could. Thousands of them have taken the dangerous and irreversible step of formally applying to do so. But fewer persons—not more—are being permitted to leave. And every refused application represents a broken Soviet promise and a broken individual dream.

I command the President's announced intention to raise the emigration issue at Geneva. General Secretary Gorbachev should be made to understand that his proposals for agreements in 1985 will be received in a more favorable light if he begins living up to the agreements of 1975.

We cannot have détente with the Soviet Union until the Soviet Union has détente with its own people.

A CURIOUS INTERPRETATION OF THE CONSTITUTIONAL PRESUMPTION OF INNOCENCE

(Mr. KOSTMAYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. KOSTMAYER. Mr. Speaker, in the October 14 issue of U.S. News & World Report, Attorney General Edwin Meese, in response to a question on suspect's right to counsel, says, "You don't have many suspects who are innocent of a crime. That's contradictory. If a person is innocent of a crime, then he is not a suspect."

Extraordinary.

The constitutional presumption of innocence is not one Attorney General Meese makes. In his book, to be suspect, is to be guilty.

This curious interpretation of one of the most central doctrines of American jurisprudence would not sound so startling in Iran, East Germany, or South Africa.

In fact, it's not entirely unexpected coming from Mr. Meese.

Such a remark from the Nation's chief law enforcement officer would normally attract considerable attention.

But in the unhappy case of Mr. Meese, our senses have become so dulled by his Department's shabby and tawdry record, that such remarks, more usually forthcoming from the village simpleton, are not the least unexpected coming from him.

INCIDENTS OF TERRORISM AGAINST AMERICANS

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, April 18, 1983, U.S. Embassy attacked, 63 dead, 17 Americans killed by terrorists; October 23, 1983, truck bombing, 241 American marines killed, Beirut Airport.

December 12, 1983, five Embassy officals killed by terrorists; March 24, 1985, Major Nicholson shot and left to bleed to death; June 19, 1985, four marines and two other Americans killed by Salvadoran terrorists; flight 847, 39 hostages held and Robert Stethem, an American Navy man, killed; yesterday, another American killed by terrorists.

Mr. President, we have no policy for terrorism. Attack after attack takes place, and Americans die.

We talk strong, and then business as usual.

The State Department has asked for $5 billion to reinforce our Embassies, but that is purely defensive. Terrorism goes on. We must come up with a policy of preemption and retribution.

Yesterday, Egypt let four of the terrorists go, and we give them $2.3 billion in aid every year. They knew that these were terrorists, and yet they let them go.

We ought to suspend aid to Egypt until they give us a response. A 1975 Executive order, which is in effect, prohibits any killing of these terrorists, and it must be reevaluated. I have been told our intelligence sources

know where these attacks are originating, and we should go get them.

How many Americans have to die before we act?

No more stong talk, Mr. President; we want action.

A TRIBUTE TO GORDON WOOD, WINNINGEST COACH IN THE HISTORY OF FOOTBALL

(Mr. LEATH of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEATH of Texas. Mr. Speaker, on Friday, October 4, Gordon Wood became the winningest coach in the history of football. Brownwood High School, at the western end of Texas' 11th District, won its conference opener and handed Gordon Wood his 400th victory.

This remarkable career began in 1938 at Spur, TX. Over the next two decades, Gordon coached in several small Texas towns, including Stamford, where he picked up his first two State championships. Our colleague, CHARLIE STENHOLM, played for Gordon those 2 years. When Gordon came to Brownwood in 1960, he didn't find a lot of enthusiasm, but he turned things around quickly and won State for Brownwood that first year. He added six more State championships over the years.

In Texas, high school football is every bit as popular as pro ball, so Gordon Wood's achievement last week has attracted a lot of attention all over the State, as well as nationally. We're proud of his winning record, but we're even more proud of our friend Gordon Wood. He loves our children and has touched more lives than we will ever know. I wish he would keep on coaching forever.

SUPREME COURT ANTAGONIZES RELIGION

(Mr. SMITH of New Hampshire asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Hampshire. Mr. Speaker, much reliance has been placed on the principle of separation between church and state as the justification for not allowing prayer in our public schools.

Mr. Speaker, the fact of the matter is, that for 170 years after the adoption of the first amendment prayer was permitted in our public schools.

In a series of landmark rulings in 1962 and 1963, the Supreme Court chose to antagonize religion by reversing its previous decisions on this issue. The right to religious expression in our public schools has been progressively eroded by the Supreme Court of the United States.

In those years, 1962 and 1963, in such cases as Wallace against Jaffree, the Court went out of its way to suppress religious expression. Since 1962, the Court's actions must certainly be seen as hostile toward religion.

As Members of Congress, we have a responsibility to end such hostility, either by removing court jurisdiction over school prayer, or by amending the Constitution to preserve the right of public expression.

Mr. Speaker, as Justice Potter Stewart wrote in his 1962 dissent, "We are a religious people whose institutions presuppose a supreme being."

Justice Stewart pointed out that permitting schoolchildren to participate voluntarily in prayer is a far cry from designating a particular religion to which citizens must subscribe. The proper interpretation of the U.S. Constitution demands that we defend voluntary prayer in our public schools.

FUNDING OF CONTRAS IN DIRECT CONFLICT WITH WILL AND INTENT OF CONGRESS

(Mr. EDWARDS of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDWARDS of California. Mr. Speaker, I am deeply concerned at reports that the Reagan administration involved itself in the development of a plan to continue funding the Contras even after the Boland amendment had been enacted in 1984, knowing full well this would be in direct conflict with the established will and intent of Congress.

Recent disclosures suggest that President Reagan himself approved a "secret plan" to replace CIA funds with assistance from U.S. citizens and U.S. allies. In fact, it appears that White House officials may have actually advised on how to structure this fundraising campaign so that it was narrowly within the limits of the Neutrality Act and other similar laws.

I applaud Congressman MIKE BARNES, in his capacity as chairman of the Western Hemisphere Subcommittee, for his announced plans to conduct a full investigation of these charges.

I urge the National Security Council to comply with Chairman BARNES' request for all the documents pertaining to this scheme. In addition, I urge Lt. Col. Oliver North—deputy director for political-military affairs on the National Security Council staff—to agree to appear before the subcommittee to explain his involvement with this plan, as well as his troubling relationship to retired Army Maj. Gen. John Singlaub.

The administration must explain its apparent purposeful violation of congressional intent.

THAILAND IS A SPECIAL FRIEND

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, Thailand is a small nation in Southeast Asia about the size of Texas with a population of 52 million people. Since 1975 when all three Indochinese nations fell into Communist hands, Thailand has granted asylum to over 650,000 refugees. This year, in addition to that, over 250,000, or a quarter of a million, Cambodians have been driven across the border by the Vietnamese, and Thailand has allowed them to stay temporarily in camps operated by the U.N. Border Relief Organization.

The unfailing generosity shown in these matters by Thailand is truly special and deserving of recognition by this body.

The Thais have also engaged in a highly successful program of eradicating poppy growing and have closed heroin producers operating along the Burmese border. A major blow has been struck against narcotics trafficking.

It is a striking example of how narcotics trafficking in Southeast Asia can be controlled.

Thailand is a long and valued ally of the United States. They are special friends, and we should renew our accords and strengthen our relationships at every opportunity. Under no circumstances should we pass protectionist trade legislation that would hurt their economy such as the textile bill that is up today.

I urge my colleagues to vote "no" on that bill.

THE TERRORISTS HAVE STRUCK AGAIN

(Mr. MICA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICA. Mr. Speaker, the terrorists have struck again. It has been Americans in Beirut, Israelis at Larnaca, a Soviet citizen, and now a crippled American on an Italian liner. We do not have an effective policy or response, and we need to come together with the administration and the Congress.

As chairman of the Subcommittee on International Operations, we are awaiting the President's decision on support of the Inman Commission, and we need that as quickly as possible.

I might also add that as a temporary ambassador during this term to the United Nations I was appalled that the United Nations would condemn an act of self-defense when it comes to terrorism.

I intend to offer a resolution and try to get it before the Security Council to condemn the acts of terrorism that have taken place and get a rollcall in the Security Council against terrorism by those nations who voted to condemn the United States and its allies time after time when we have been the subject and target of attacks by terrorists around the world.

NORTH CAROLINIANS FAVOR TEXTILE BILL

(Mr. COBEY asked and was given permission to address the House for 1 minute.)

Mr. COBEY. Mr. Speaker, North Carolina textile workers, their friends and relatives, just recently gathered and mailed to the President many, many letters in support of the textile bill, H.R. 1562.

Mr. John Nance, a worker in the Allied plant in Moncure, NC, gathered over 11,000 letters himself from friends and relatives, which have already been sent to the President.

In our district alone in North Carolina, 138,571 letters have already been sent to the President.

From the State of North Carolina over 700,000 letters have already been sent to the President, and only 40 percent of the plants in North Carolina have sent their letters in. We expect that there will be well over 1 million letters sent to the President by the time all these workers, their friends, and relatives have responded.

Mr. Speaker, this shows the level of concern in our State, in our country, for this basic industry of textiles and the jobs that will be affected and have already been affected.

I urge my colleagues to give support of this bill.

□ 1040

ETHNIC AMERICANS

(Mr. LIPINSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIPINSKI. Mr. Speaker, yesterday the House approved legislation which, among other things, calls for a study of whether the Federal Government's hiring and promotion practices are consistent with the applicable provisions of law prohibiting discrimination on the basis of sex, race, or national origin. The understood meaning of the term "national origin" in this legislation includes individuals of all ethnic backgrounds that have historically suffered discrimination such as those with Italian, Polish, German, Irish, Lithuanian, Ukrainian, Yugoslavian, Czechoslovakian, or other ethnic backgrounds.

What is noteworthy here, Mr. Speaker, is the long awaited official recognition and concern for persons of different ethnic backgrounds. These individuals are commonly known as ethnic Americans. They represent the main stream of our great country, and for too long they have been taken for granted. Their interests have been badly neglected, especially at the Federal level.

Mr. Speaker, individuals of different ethnic backgrounds must no longer be overlooked. Our effort yesterday on behalf of ethnic Americans is only the beginning of a movement to insure further recognition of their concerns.

INTERNATIONAL TERRORISM

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. BENTLEY. Mr. Speaker, we should give thanks this morning for the safe return of all the hostages—except one—and the ship. All the facts are not in, but it appears safe to say that it was the prompt intercession of Egypt, and in particular, President Mubarak, that led to the almost totally successful conclusion to this tragic event.

But in the euphoria of the moment, we should not forget Mr. Klinghoffer, nor the other Americans killed this year by terrorists, nor should we forget the ever continuing war waged by terrorists against civilized society.

We, the Congress should call on the President to work with us to establish a clear policy against this pandemic of international violence directed against American citizens. If the facts in a particular case warrant it, and if the terrorists are beyond the arms of responsible justice, this policy should include a measured and certain form of retribution.

Because the perpetrators of these vile acts are beyond the border does not mean they should be beyond the law.

With all Americans, I hope those responsible for the death of Mr. Klinghoffer are brought to trial.

The regime that turns these terrorists over will not only be indicating it is a friend to the United States and to Italy, but will be demonstrating it is a friend to the world. Travel lanes must remain open to promote the interchange of people, of ideas, and of cultures.

THE BUDGET DEFICIT

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, yesterday, the Senate voted on a Gramm-Rudman-Hollings alternative to the budget deficit problem. I have a question I would like to ask all the Members of this House when we discuss that amendment. Why is it that the Gramm amendment allows the deficit in 1986 to go up $15 billion? The deficit is now $177 billion. Under the Gramm alternative, in 1986, the deficit can go up to $192.6 billion before any of the empoundment motions that Gramm would put into action would apply.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I only have 1 minute. I will not yield.

Mr. WALKER. I can answer the gentleman's question if he wants an answer.

Mr. SCHUMER. I would like to continue.

Could it be that there is some other motive here? I think we need deficit reduction. I think we need a plan. But why should the deficit in 1986 be allowed to go up $15 billion, particularly when crafted by the people who seem most concerned about it?

CURRENT DEFICIT PROJECTIONS

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, I think maybe the gentleman who just made his statement deserves an answer. The answer is that because he is basing his estimates upon the March CBO figures. And there has been a recent CBO projection that raises the deficit level to the point that the gentleman has now mentioned. The Gramm proposal is attempting to stick with current deficit projections.

The Gramm proposal is an attempt to take what the House——

Mr. SCHUMER. Mr. Speaker, will the gentleman yield?

Mr. WALKER. In just a moment I will, if the gentleman will allow me to finish. I am trying to answer the gentleman's question. He evidently does not want to listen, because the gentleman does not want to hear the truth.

Mr. SCHUMER. Will the gentleman yield?

Mr. WALKER. So what happened is that the budget level has gone up, based upon our own budget projection; based upon our own budget, it has gone up in the most recent CBO figures.

I will be very glad to yield to the gentleman.

Mr. SCHUMER. I would ask the gentleman, does he consider in 1986 to have a deficit of $192.6 billion an adequate measure of deficit reduction? Or would he prefer a measure that would actually make the deficit reduction figures in 1986 real and lower? And does the gentleman——

Mr. WALKER. I would say to the gentleman, if the gentleman will let

me reclaim my time, we ought to face reality and then start moving back toward a balanced budget, which is what Gramm does and you do not want to do.

DEFICIT REDUCTION

(Mr. COLEMAN of Texas asked and was given permission to address the House for 1 minute.)

Mr. COLEMAN of Texas. Mr. Speaker, I would be happy to yield to the gentleman from New York to make a point.

Mr. SCHUMER. I would simply reiterate the point that seems to have gotten under the skin of the gentleman from Pennsylvania about this Gramm amendment. Let us repeat, let us not look at projections—and OMB projections have not worked out very well in the past—let us look at numbers. Right now, what is our deficit projected at? $177 billion. What is the deficit under the Gramm amendment before impoundment takes effect? $192.6 billion.

I am asking the gentlemen on both sides of the aisle, because we are all concerned with deficit reduction, why should we vote for an amendment that actually allows the deficit to go up next year? Is this not the thing that the gentleman from Pennsylvania has always accused people on this side of the aisle of doing, passing a lot of verbiage but doing nothing real about deficit reduction?

I thank the gentleman for yielding time.

Mr. COLEMAN of Texas. Mr. Speaker, I yield back the balance of my time.

GRAMM PROPOSAL ATTEMPTS TO DEAL WITH REALITY ON BUDGET FIGURES

(Mr. McCANDLESS asked and was given permission to address the House for 1 minute.)

Mr. McCANDLESS. Mr. Speaker, I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding, because I think it is very important to try to get the record straight. The budget passed by this House for 1986 is now projected to cause a $192.6 billion figure. What happens is that we pass these budgets around here and then we go along and we spend and we spend and we spend, just as we are going to do under the rule that we are going to have up here in a 1 minute, where we bust the Budget Act for new spending authority. And so now CBO is taking a look at that budget and they are saying that the real deficit figure for the next year is 192.6. So the Gramm proposal attempts to deal with reality rather than the phony budget that we passed in August. And what the gentleman from New York wants us to do is stick with the phony budget figures in order to do our estimates.

Mr. SCHUMER. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I think it is better to start with reality and move back to a balanced budget from reality. I realize that the gentlemen always want to talk about phony budgets because their phony budgeting has caused us to overspend our own budgets around here by $150 billion over 5 years. But you never hear about that.

Mr. SCHUMER. Will the gentleman yield?

Mr. WALKER. I do not have the time.

Mr. SCHUMER. Will the gentleman from California yield?

Mr. McCANDLESS. I only have 1 minute.

Mr. WALKER. And I would say to the gentleman that this is the first time that we have had an oppportunity, maybe under Gramm, to get away from phony budgeting.

The SPEAKER pro tempore. The time of the gentleman from California [Mr. McCANDLESS] has expired.

PROVIDING FOR CONSIDERATION OF H.R. 1562, TEXTILE AND APPAREL TRADE ENFORCEMENT ACT OF 1985

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 286 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 286

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of Rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1562) to achieve the objectives of the Multi-Fiber Arrangement and to promote the economic recovery of the United States textile and apparel industry, and its workers, and the first reading of the bill shall be dispensed with. All points of order against the consideration of the bill for failure to comply with the provisions of section 311(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment under the five-minute rule. No amendment to the bill shall be in order except: (1) an amendment to strike out the blanks and the comma on page 20, line 4 and the date "1985" on page 20, line 5 of the bill and to insert in lieu thereof "the date of enactment of this Act", and said amendment shall be considered to have been adopted in the House and in the Committee of the Whole; and (2) amendments recommended by the Committee on Ways and Means, which shall not be subject to amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore (Mr. MILLER of California). The gentleman from South Carolina [Mr. DERRICK] is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, I yield the customary 30 minutes, for the purpose of debate only, to the gentleman from Tennessee [Mr. QUILLEN], and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 286 is a modified closed rule providing for consideration of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985. The only amendments made in order under this rule are an amendment to establish the effective date of the act, as well as Ways and Means Committee amendments. The rule provides for 2 hours of general debate, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means. This rule also waives all points of order against the bill for failure to comply with section 311(a) of the Congressional Budget Act. Finally, Mr. Speaker, the rule makes in order a motion to recommit.

The first amendment made in order under this rule is an amendment to insert language at the end of the bill specifying that the effective date of the provisions of the bill will be the date of enactment. This amendment is necessary since the effective date was inadvertently omitted from the bill as reported from the Ways and Means Committee. Under the rule, this amendment will be considered as adopted, in the House and in the Committee of the Whole, as soon as it is designated following general debate on the bill. Finally, this amendment is not subject to amendment.

The rule also makes in order amendments recommended by the Committee on Ways and Means. Under the rule, these committee amendments are not subject to amendment. As is often the case with bills reported from the Ways and Means Committee, this legislation is complex and technical in nature, and will be considered under a modified closed rule. Ways and Means Committee amendments are therefore made in order to allow the Ways and Means Committee to accomplish what other committees can easily accomplish under an open rule: An opportunity to offer amendments to make technical and other nonsubstantive improvements to the bill that are necessary but only discovered after the bill has been reported from committee.

Mr. Speaker, I would note that it is the clear understanding of the Committee on Rules that any amendments offered by the Committee on Ways and Means will be technical or conforming in nature, and that no amendments affecting the substantive provisions or general policy objectives of this bill will be offered.

Mr. Speaker, this rule also waives section 311(a) of the Congressional Budget Act. Section 311(a) provides, in pertinent part, that after Congress has completed action on the concurrent resolution on the budget, it shall not be in order to consider legislation which will cause either the outlay ceiling or revenue floor contained in the budget resolution to be breached.

With adoption of the first concurrent resolution on the budget for fiscal year 1986 on August 1, a revenue floor for the current fiscal year was established. At the present time, we are approximately $2.7 billion below the revenue floor set in the budget resolution. Although the budget resolution assumed passage of legislation to raise sufficient revenues to bring us up to the level contained in the budget resolution, Congress has not enacted any new revenue raising measures for fiscal year 1986 as of this date.

Several revenue raising measures are likely to be considered by the House of Representatives in the near future. H.R. 3128, the deficit reduction amendments of 1985, as well as Superfund legislation, will both raise considerable amounts of revenue.

Therefore, until and unless new revenue raising legislation is enacted, any bill which results in a loss of revenue would be subject to a point of order under section 311(a). The Textile and Apparel Trade Enforcement Act of 1985 will result in the loss of very modest amounts of revenue as a result of the estimated decrease in collection of customs duties.

Specifically, Mr. Speaker, the Congressional Budget Office estimates the revenue loss resulting from enactment of this bill to amount to $267 million in 1986, $322 million in 1987, and $381 million in 1988. In light of these revenue loss projections, therefore, it is necessary to waive section 311(a) of the Congressional Budget Act if the membership of the House is to have an opportunity to vote on this important issue.

I would also like to advise my colleagues that the revenue loss attributable to decreased customs duties collections is not the only budgetary impact that can be expected from enactment of this legislation. While the CBO can only consider direct budgetary implications for purposes of considering a waiver of section 311 of the Budget Act, if the bill has the effect we think it will, this legislation will actually have significant and positive secondary budgetary impacts. Moreover, the CBO estimate only examines one side of the ledger.

Data Resources, Inc. has estimated that if this bill is enacted, the positive change in total employment next year would be a gain of 320,000 jobs. By 1990, the annual employment gain would reach 1.9 million. Obviously, this job creation will have a indirect impact in increasing Federal revenues from income tax receipts and Social Security taxes, as well as decreasing Federal outlays in assistance programs such as unemployment benefits, AFDC, food stamps, Medicaid, trade adjustment assistance, and others. This study also concludes that failure to enact this bill will result in a loss of 1.9 million jobs.

On the basis of this Data Resources study, which estimates a gain of about three-fourths of 1 percentage point in gross national product per year if this bill is enacted, the Congressional Budget Office, at my request, has estimated that the bill could reduce the deficit by roughly $4 billion in fiscal year 1986, $14 billion in fiscal year 1987, $30 billion in fiscal year 1988, $48 billion in fiscal year 1989, and $70 billion in fiscal year 1990.

Mr. Speaker, this is simply not an issue that can wait until the Congress enacts new revenue raising legislation. The textile and apparel industries in this country are under assault. As the committee report accompanying this legislation accurately points out, employment in the textile mill product sector stands at its lowest level since 1939. Forty plants have closed in South Carolina since January 1984, resulting in the loss of over 9,000 jobs. Nationwide, more than 300,000 jobs have been lost and more than 250 plants have closed in the last 5 years; 100,000 jobs have been lost nationwide in the last 12 months alone.

H.R. 1562 is a modest proposal. It seeks merely to establish import levels that we agreed to under the Multi-Fiber Arrangement, which was last extended in 1981. Under that agreement, U.S. import growth was to increase at 6 percent per year. Unfortunately, the objectives of the Multi-Fiber Arrangement were never achieved. From 1981 to 1984, imports of textiles and textile products into the United States grew at an annual rate of 19 percent.

In fact, a report recently approved by the House Government Operations Committee concludes that the Multi-Fiber Arrangement is ineffective because it contains excessively high import quota levels, it is not comprehensive in scope or coverage, and it contains unduly generous flexibility provisions. Moreover, this report endorses the concepts contained in this legislation.

This bill applies to all exporting nations except Canada and the European Economic Community. It will roll back import quotas for major exporting nations to a level that should be in place had the Multi-Fiber Arrangement been enforced. Future imports from these nations would be permitted to grow at no more than 1 percent per year. Other nonmajor exporting nations will be allowed to increase their exports to the United States at 15 percent in 1985, and 6 percent per year thereafter. Certain import sensitive categories would be limited to 1 percent per year growth.

Mr. Speaker, I take exception with any of my colleagues who seek to characterize this legislation as "protectionist." This bill only seeks to implement the import levels that we agreed to under the Multi-Fiber Arrangement.

Mr. Speaker, over 290 of our colleagues are cosponsors of this legislation. We cannot wait to provide some measure of relief to this beleaguered industry. The toll textile plant closings have taken on the hard working citizens of my district has been nothing short of devastating.

In the interest of responsible legislating, I believe it is imperative that we consider this legislation on its own merits, and resist the impulse to have extraneous trade legislation attached to it. The modified closed rule reported from the Committee on Rules will accomplish that objective. Members of the House will have an up or down vote, and will have an opportunity to send an unmistakably clear signal to the White House that the hemorrhage resulting from unchecked textile and apparel import penetration must be stemmed. Passage of this bill is the very least we can do.

Mr. Speaker, I urge adoption of this rule and the Textile and Apparel Trade Enforcement Act of 1985.

□ 1055

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge adoption of the rule and passage of this most important trade bill.

As an original cosponsor of H.R. 1562, I am pleased that at last, this bill has been brought to the House floor for debate and passage. It is desperately needed, not only for the almost 2 million Americans working in the domestic textile and apparel industry, but also because it means the Congress is stepping forward with relief for American industries being driven out of business by unfair foreign trade practices. Such congressional action is long overdue, but we are now responding forcefully at long last.

As this textile bill has moved forward in the House, the cries of those opposed to the bill have increased to a high pitch. We are bombarded daily with predictions of terrible things that will descend on us if we enact this bill into law.

Now I am no expert on international trade, but I would like to point out that it has been a long time since America emerged from the Second World War with few international trade competitors standing out there to challenge us. Over the years we have opened our domestic market and we have exerted every effort to assist the trading nations of the world to recover economically and expand their export markets. Our policy has achieved its purpose.

I believe that we must now proceed to a new international trading arrangement because America can no longer afford to tolerate our trading partner's unfair trade practices which are destroying our own industries. It is now time to write a new chapter in the book of American trade policy, and the theme of this new American trade policy must be fair trade with the interests of American industries and American workers first.

The American textile and apparel industry is a good place to start putting American trading interests first. This is an industry employing almost 2 million workers found in all 50 States. That is more workers than the steel and auto assembly industries combined. And this industry is going under, in my judgment, unless we step forward to save it. What has happened in the past several years is frightening. Listen to a few facts:

Since 1980, annual import growth has averaged 19 percent. There has been a 65 percent surge in imports in the past 2 years, 300,000 jobs have been lost since 1979. Imports now control over 50 percent of the American clothing market. Our textile and apparel trade deficit now stands at $16 billion.

This bill provides a lifeline to save our textile and apparel industry. It will limit import growth to the growth of the domestic market. It will set 1985 import levels where they would be if our trade agreements had been properly enforced. It allows 1 percent per year growth for major exporting countries. It allows 6 percent per year growth for less developed countries. It grants favorable trading status to Mexico and Caribbean countries and it excludes Canada and European Community nations from coverage.

Mr. Speaker, this is not a radical or a dangerous bill. It is, however, a bill that will put the legitimate trading interests of America first. And it will, I believe, save the American textile and apparel industry from certain destruction.

Let us step forward with courage and confidence to reform our outdated trading practices. Let us put America first in this effort. Let us adopt this rule and pass this most important trade bill.

□ 1105

Mr. Speaker, years after World War II, I was in the Philippines. I was told by the government there:

You Americans have created a desperate situation internationally. After the war that you won, you sent your American dollars into Japan and other countries and built up giant industries, and they are now taking away from those Americans who fought and died for victory their economic ability to compete.

And that is so true. Take Japan alone. After winning the war, we sent American dollars in there to build it up economically. We built up their industry. Not only did we do that, but we opened up our borders for them to ship their goods into the United States.

That is true with other countries. We ended up winning the war, losing hundreds of thousands of brave Americans, and then in the end losing it economically. It simply does not make sense.

This is a good rule. It should be adopted. There are those who will say that it is a budget-buster. There is a waiver of the Budget Act. But the only thing that it does is to take into consideration, when it becomes law, the custom duties on the imports entering into this country. Now, who can object to that?

Mr. Speaker, I urge adoption of the rule and this bill when it is debated on the floor.

Mr. Speaker, I would like to advise the gentleman from South Carolina [Mr. DERRICK] that I have five more requests for time, and I will be happy to yield time to them at any time.

The SPEAKER pro tempore. The gentleman from Tennessee [Mr. QUILLEN] has consumed 7 minutes.

The Chair recognizes the gentleman from South Carolina [Mr. DERRICK].

Mr. DERRICK. Mr. Speaker, I yield 3 minutes, for the purposes of debate only, to the gentleman from Virginia [Mr. DANIEL].

Mr. DANIEL. Mr. Speaker, like our colleagues who are sponsors of the Textile and Apparel Trade Enforcement Act, I have waited long for this day.

Unlike most of our colleagues, I am a product of the textile industry. My three decades so employed spanned the Great Depression and World War II.

I have seen feast and famine, and in my later years as an executive of a textile company, I saw the havoc wrought in the postwar years, as first Japan, then other nations, primarily in the western Pacific, attacked and penetrated the American textile industry.

At first, only fabric was affected. The imports were crude, by American standards, and their only virtue was their price.

Times have changed; they stole our designed patterns, formulas, methods and now the fabric and the garments which wash our shores are equal to American-made in terms of quality and of style. And still their price is an advantage.

It may well be asked why a majority of Congress is exercised about this matter. Surely we would want to see the American consumer provided with textiles and garments at the best possible price.

Regrettably, that is not the whole story—not by a long shot. There is far more at stake today than the price of a shirt.

There is a more than ample significance to the national economy of a strong and healthy textile industry, a significance which relates directly to the ability of the Armed Forces of the United States to fulfill the national security interests of the Nation.

The best hardware in the world will do us no good at all, if we have lost our capability to clothe and shelter the men and women who serve in the military forces. And if no action is taken, it is not farfetched to say that we will lose our capacity to meet one of life's three basic needs.

Employers in the textile and apparel industries have not stood idle while their markets have been stolen away. They have sought to improve efficiency and to modernize in every conceivable way, and to the tune of more than $1 billion a year have upgraded their products and their methods.

Employees have made enormous concessions, in a brave and fruitless effort to retain their places in the work force.

All this has been to no avail, in the face of competition engendered and protected by governments bent on destruction of this segment of American industry.

Right here, I would like to share with you some estimates provided by Data Resources, Inc., a nationally respected firm.

An annual 15-percent increase in textiles and apparel will, by 1990, translate to a job loss of almost 1 million, and a loss of supporting jobs almost as high.

Forty billion dollars will be lost in the GNP. The Federal deficit will increase by $24 billion, and the trade deficit will rise by $21 billion.

The executive branch of Government views the textile and apparel industries as expendable, in its efforts to woo Third World countries, and it has been a courtship which has failed miserably.

I do not know whether it is more hypocritical or tragic that the administration and the Congress have thus far refused to take action regarding textiles and apparel. For these industries employ large numbers of women

and blacks, two groups both branches of Government profess to support.

Yet by their actions—or inaction—they would demand the sacrifice of their jobs from these two groups who are struggling to hang on to a foothold on the economic ladder.

Textile and apparel industries in other parts of the world have prospered enormously, at the expense of American workers, but their governments are no more friendly to our interests today than they were 20 years ago.

For years, the United States, by maintaining the only truly free market, has been the engine which has pulled the rest of the world into an era of prosperity. The rest of the world must now accept the fact that, should this engine become exhausted, there is no way for them to go but backward.

It is in the world's interest that our economy not be strained beyond its means by destroying its industrial capability. Yet it asks too much to seek restraint on their exports, when we seem so unwilling to impose that restraint ourselves.

It is long past time for the Federal Government to do what it can do and must do to see that these industries do not disappear forever from the industrial landscape.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I thank the gentleman very much for yielding time to me.

Mr. Speaker, I do want to point out that whatever the merits of the bill, whatever the merits of this rule, the fact is that this rule is a budget-buster. Now if this were the only rule that were a budget-buster, maybe all these explanations would be fine, but virtually every rule that comes out of the Rules Committee these days busts the budget. Every rule that we have had on this floor—save one, I think—since we came back from our August recess has had a provision in it to bust the budget.

This one is a major budget-buster. This waives section 311 of the Budget Act. That is the section that deals with new budget authority, new spending authority, and revenue collection. The total budget-busting authority included in this particular rule is something on the order, I am told by the committee report, of $2 billion.

We are talking about a major breach of the budget here. If people wonder why some of us think that we have to go to a Gramm-Mack approach to try to get control of the budget, here is a good example. We simply cannot live within our own budget. Why have budgets gone from $177 billion to $192 billion? Because we overspend. We spend too much money.

This rule is a good example. We are going to bust the budget with this rule. Everybody who votes for this rule is voting for a rule to bust the budget. This is a budget-busting rule. And so, therefore, it seems to me that a "no" vote will at least send a signal that we are tired of having the budget busted each and every time that the Rules Committee comes out.

The Rules Committee and the Budget Committee ought to get together one of these days and talk to each other. The Budget Committee has a budget; the Rules Committee simply says that it is not effective and not operative on every rule that they pass.

Mr. DERRICK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I might just say that the gentleman from Pennsylvania [Mr. WALKER] is looking at the negative side of this bill. The gentleman is right; there is a loss in 1988, for example, of $381 million because of the lack of customs receipts, but also, because of the increase in jobs in that particular year, there is a $30 billion additional cut in the budget deficit, so that comes out to something like a $29.7 billion increase.

Mr. Speaker, I yield 10 minutes to the gentleman from Georgia [Mr. JENKINS].

Mr. HEFNER. Mr. Speaker, will the gentleman yield?

Mr. JENKINS. I am happy to yield to my friend, the gentleman from North Carolina.

Mr. HEFNER. Mr. Speaker, we talk about what this costs in terms of the budget. I, like the gentleman, have done some research to find out what it has cost the Treasury in unemployment with all the thousands of thousands of jobs we have lost in these textile areas, in the plants that have closed in my district and all across the country. It cuts both ways. We have lost all these jobs, it has cost us tremendous amounts of money, and on top of that there is the human suffering that is caused because of the loss of these jobs. So let us look at the whole picture. Let us not get completely off the track.

Mr. Speaker, I thank the gentleman for yielding.

Mr. JENKINS. Mr. Speaker, I thank my friend, the gentleman from South Carolina.

Mr. Speaker, I want to take a few moments to discuss this bill because it is probably the only trade bill we will get an opportunity to vote on during this session of the Congress.

For 8 years I have served on the Subcommittee on Trade. I have served under two administrations, one Republican and one Democratic. I understand the makeup of the Trade Subcommittee, and I understand the makeup of the bureaucrats down in the executive branch. I want to talk today about reality. This is the only opportunity we will have to act if we want a level playing field. If we want fair trade, this is our opportunity to vote for that.

I am speaking on behalf of 2 million employees in 49 States in an industry that is bigger than steel and automobiles combined. This is no small industry. And I am speaking also on behalf of industry beyond textiles and beyond apparel.

□ 1115

I am speaking for all domestic industry. For the 8 years that I have served on the Trade Subcommittee I have been America's industrial base eroded.

You can look at steel, automobiles, machine tools, televisions, pork, cotton, now on the way out, everything across the board. This committee and this Congress is the only avenue of relief, because you can engage in dialog from now to eternity and you will get no relief.

If there is any message that is going to be sent to the American people and to the White House, it will have to come from this floor today.

So I want to take a few minutes to show you exactly what has happened.

Back in 1980 when the European Community, Canada, and Japan saw the onslaught coming from the developing countries. They recognized that the developing countries had problems trying to get hard dollars to make interest payments on debt. They began to restrict their marketplace. They have not taken an increase, the developed countries. Japan has not. Canada has not. The European Community has not. These charts will show that those levels have been constant except for America.

This Nation has said not only will we accept our burden, but we will take the burden for Europe. We will take the burden for Canada. We will take the burden for Japan. And today as a result of that policy, 65 percent, as you can see from this chart, of every piece of clothing manufactured by every developing country in the world finds its way into our marketplace.

Now, we can take some of the burden, but we cannot take it all; and it is not because of the high value of the dollar.

I want you to look at the chart on the far right. During the same period of time, 1981-84, the average percentage rate in the exchange rate with these countries and most of the countries we are getting our exports from has been less than 5 percent. During that same time we have Malaysia increasing its exports in apparel 226 percent. We have all of them in the double-digit figures.

Well, it is time for this House to speak out for domestic industry. It is time for us to say we can take a rea-

sonable increase, but if we are to have stability in our markets, we cannot take it all unless you want to wreck the entire industry. By your vote, you will decide this today; unless you want to simply say "I believe that all of us can sell hamburgers to each other and we do not need a basic industry."

I know that there are many figures floating around, some erroneous. I want to explain to the Members of this House the ordeal that these cosponsors have had in even bringing this bill to the House floor. Do you realize that I had to agree, and I did, in order to get the bill to the House floor, that I could not even make a technical amendment. I had to bring it just as it was written without any input from anyone. Why? Simply because the opponents of this bill felt that they could flake off a few supporters for little insignificant parts of the bill. But that is what I have had to do. I have had to do that on behalf of all the Members who are trying to pass this legislation.

I say to my colleagues in the House that whatever happens today, I want you to go back into your districts and I want you to talk to the working people. I want you to talk to those people, whether they work in textiles or steel or automobiles or coal or copper. We are losing them all. I want you to say to that worker, "Yes, I know you are having a hard time. I know your job is in jeopardy and you will probably be on unemployment if you are not already. But, you see, it is important for Members of Congress to make sure that we have low unemployment in all of the rest of the world. You see, that is the reason I couldn't support you. That's the reason. You see, I have to look after the Thailands and the Singapores. I have to look after all these other countries of the world. In addition to all that, we have to spend $16 billion, $18 billion a year in getting them into the business of competing with basic industry." Is that what you intend to say?

I say to you, my colleagues, this is a more serious matter than most people acknowledge.

Consumer cost, that will be addressed in a few moments, but I want to tell you if you pass this bill intact, if it is not changed by the Senate by one word or one comma, and if it is signed into law, the foreign countries will still have 40 percent of our marketplace in textiles and apparel. Is that generous enough?

Not only that, but this bill would permit their share to grow each year. Are we being so terrible to these foreign countries?

I have a responsibility to my people. I do not have the largest textile district in the Nation. It is fast going away, but it is important.

Consumer cost—this is the biggest farce in the world. This week, I sent down to a department store and purchased from the same shelf these two towels, one made in China and one made in the United States. The original price was $3.49 for the one from China, $3.49 cents for the one made in the United States; discounted, $2.49 for the one from China, $2.49 for the one made in this country. The identical price for the washcloths. They were marked down exactly the same. It makes no difference where it is made, the price to the consumer is the same. It is a fallacious argument that the consumer is going to pay more for domestic goods.

I will tell you who is going to get hurt by this bill. It will be the importers. It will be those droves of importers that have been swarming on this Hill. Every lobbyist in town that has not been employed by an importer has not been looking for a job, because they are all over this Hill.

You can say today with your vote—either I am going to vote with those importers who are distorting the facts, or I am going to vote for basic industry. That is the bottom line. Do not go back home to your districts and say, "Yes, I'm for fair trade. I'm for a level playing field," because I hope somebody will point out that your vote did not correspond with your speech.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina [Mr. BROYHILL] who cosponsored this measure with the gentleman from Georgia [Mr. JENKINS].

Mr. BROYHILL. Mr. Speaker, I thank the gentleman from Tennessee for yielding to me at this time.

We want to join in strong support of this legislation.

I want to just take a moment, and I wish we did have a lot more time on this bill, but I wanted to address one or two points that have been brought up by the opponents of this bill as they have been undertaking a frenzied effort to defeat this bill, a bill that is sponsored by over 290 Members of this House of Representatives, which should indicate the strong and broad support that this bill has.

One of the charges that the opponents are leveling at this bill is that this is already a protected industry, that it is one of the most protected industries in the United States.

Well, Mr. Speaker, that argument just does not fly in the face of the facts. In fact, that argument falls with a thud. Imports of textiles and apparel have been increasing at an astronomical rate over the last 4 or 5 years. In fact, imports into the United States account for 50 percent of the U.S. market, that is in apparel, and with all the agreements that are in place imports went up 32 percent in 1984 and 25 percent in 1983.

Another fact is that the big five exporters control the lion's share of the U.S. domestic market at the expense of the developing countries who are supposed to benefit from the program that was put into effect back in 1981; so simply stated, the agreements are not working.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. BROYHILL. Yes.

Mr. GIBBONS. Mr. Speaker, may I say to my friend, the gentleman from North Carolina [Mr. BROYHILL] that I hate to rise and throw a monkey wrench into some of these statistics, but these are figures I am quoting now from the Department of Commerce that is headed by Mr. Baldrige, for whom I have great respect and who is a staunch member of the gentleman's political party.

Now, by dollar volume, the apparel imports last year as a percent of market share were 20.6 percent of the market share, not 50 percent.

By square yard equivalence, they were 33 percent, not 50 percent.

Mr. BROYHILL. Well, Mr. Speaker, unless I can get some more time, I am not going to be able to yield further.

Mr. GIBBONS. Well, I will give the gentleman all the time I have got. I would like to hear the gentleman explain Mr. Baldrige's figures.

Mr. BROYHILL. I think that any survey that the gentleman has of any retail shelf will show you that over half the apparel that are on the retail shelves are coming from overseas. I have made my own spot checks. I have had other people do them. The textile industry has commissioned studies of this kind and it is a fact that over half of the apparel that is offered to the American market today is coming from overseas.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield further?

Mr. QUILLEN. Mr. Speaker, I would like to advise the gentleman from North Carolina that the time on this side has been allocated.

Perhaps the gentleman from South Carolina could yield some time.

Mr. BROYHILL. We do not have any more time.

Mr. GIBBONS. All right, I thank the gentleman.

Mr. BROYHILL. Mr. Speaker, I cannot yield any more at this point.

On the average of one textile or apparel plant has closed on the average of once every 11 days in the Carolinas alone in the past 4 years. The gentleman from South Carolina can attest to that.

Now, that certainly is sad and bad economic news to that section of the country, but it is also happening all across this country. The agreements are not working. They are full of loopholes. We have fraud, mislabeling of products. In fact, it was rather humorous that the garment that was sent around by the opponents of this bill,

saying that the textile bill gets America by the seat of the pants, I checked and found that they were not even labeled properly according to the law that we passed last year, the labeling law. I could find no label in here as to where they are manufactured. I think that is interesting.

We have the problem of transshipments; that is, countries shipping through other countries.

The SPEAKER pro tempore. The time of the gentleman from North Carolina has expired.

Mr. BROYHILL. Mr. Speaker, I thank the gentleman for the time he did allow me.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1½ minutes to the gentlwoman from Ohio [Ms. KAPTUR].

□ 1130

Ms. KAPTUR. I thank the gentleman for yielding this time to me.

Mr. Speaker, today as the House debates this important trade legislation, studies, data, facts and statistics will be flying around this Chamber like footballs at a Dolphins-49ers game. However, to paraphrase Disraeli, there are lies and then there are statistics. The figure that really counts is the one at the bottom line.

Many would have us believe that it is somehow good to allow foreign imports to destroy a great American industry and rob thousands of hard-working Americans of their jobs. The reason that is most often given to justify this hardship is that the consumer will benefit. Let us just see who is benefiting off the backs of American workers.

These four identical shirts at identical prices were purchased here in Washington at a major department store. Who is fooling whom? At $18 apiece, whether they are made in Guiana, Colombia, Hong Kong, or the United States, they are all $18.

These, children's sleepwear, were purchased here in the District, one made in the United States, one made in Santa Lucia in Central and South America. They are both $7.99. So who is fooling whom?

Let us pass this rule and pass H.R. 1562. Let us send a message to other countries that the American Government, or at least this part of it, is ready to stand up and defend American workers, American businesses, and the American economy.

The SPEAKER pro tempore. The Chair wishes to advise the gentleman from South Carolina [Mr. DERRICK] that he has 5 minutes remaining and the gentleman from Tennessee [Mr. QUILLEN] has 16 minutes remaining.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. I thank the gentleman for yielding this time to me.

Mr. Speaker, I really hate to interrupt such an exciting debate on the bill, but I rise to debate the rule. Unhappily, I must oppose the rule and I do this despite the enormous respect I have for the members of the Committee on Rules in general, and in particular the gentleman from Tennessee, for whom I have the greatest respect.

I would like to return to a point that the gentleman from Pennsylvania [Mr. WALKER] made earlier. We are again busting the budget by waiving the Budget Act. We do this all the time in this body. We go through an agonizing process in this House to create a budget. Certainly our memories are not so short that we do not recall the difficulties we had during the summer months to come up with a budget, and predictably, we come on the floor with bill after bill after bill that waives the Budget Act.

The American people understand this. I would like to reflect on a discussion I had with a famous American named Paul N. Rosenstein-Rodan. As we were discussing this process of building a budget on one hand, waiving the budget on the other hand, and then taking each appropriation bill separately, Mr. Rosenstein-Rodan said to me, I think, a very telling truth: "Judging each separate appropriation on its separate merits is a perefect formula for not thinking."

That, ladies and gentleman, is what we continue to do here. I feel very strongly that we must control Government spending. That is, of course, why I am so much in favor of the Gramm-Mack effort which we will soon consider. Since we have not yet achieved passage of that legislation, I am afraid that today I will feel compelled to ask for a recorded vote so we can see who among the Members of this Chamber are again willing to break the budget with this waiver of the Budget Act.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of the rule because I was a part of the agreement which the gentleman from Georgia [Mr. JENKINS] described. I would, however, describe it somewhat differently. He described it as an agreement forced on him which prevented his tiny minority group of 300 sponsors from exercising its will.

May I say that the opponents of the bill gave up a great deal more. Had we voted for the Gephardt amendment in the Committee on Ways and Means, the gentleman from Georgia would have brought a dead body to the floor. But in accordance with our agreement, we voted against it so that he could bring his bill out in mint condition under the closed rule.

I support the rule notwithstanding the fact that it will give up $2½ billion of customs duty revenue over the next 5 years, at a time when we are in fiscal disrepair. The bill is clearly a budget buster. Its fiscal impact alone is enough to warrant a no vote on H.R. 1562.

With respect to the jobs, Mr. Speaker, I hope the Members of this body will consider that 36 States will lose jobs under this bill, while only 5 will gain them. I hope the Members will understand that for each apparel job allegedly saved, the cost to the consumers will be $66,000, and for each textile job allegedly saved, $27,000.

I hope the people will understand the remarks of the gentleman from Florida [Mr. GIBBONS], who pointed out that total import penetration in textile mill products and apparel in dollars for the first 6 months of 1985 was 15 percent of the market, 14 percent in 1984, 21 percent in apparel and 6.7 in textile mill products.

So this very highly protected industry whose tariffs are five times what the average tariff on all other goods in the United States is, has less import penetration than many of the basic industries of this country. The only thing different about textiles is that it has been one industry that this Congress has seen fit to protect, reprotect, and overprotect. Its response has invariably been to ask for more.

Pass the rule and defeat the bill.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Arizona [Mr. KOLBE].

Mr. KOLBE. I thank the gentleman for yielding this time to me.

Mr. Speaker, this is a historic occasion that we are faced with today. The tide of protectionism has finally reached the floor of this body. There have been more than 300 bills that have been introduced in the House of Representatives that deal in some way with protectionism for one industry or another with trade.

Today we face the first wave of that with H.R. 1562 which addresses this problem that exists for many industries in the United States, addresses it for the textile industry. So we have come truly to a watershed in this body. Do we turn our backs on the slow and the incremental progress that we have made over the last 50 years in this country toward more open markets, toward more trade, toward a historic amount of prosperity in this world? Do we return to the era of the Smoot-Hawley Tariff Act of the 1930's, an era that launched an endless round of retaliation, and now I think most economists today would agree was instrumental in turning what might have been a small recession into a very major depression, the deepest depression in the history of this country?

There are many objectionable aspects of this legislation, but perhaps

the worst is the fact that at a time of legitimate concern about the U.S. trade deficit, this legislation is a violation of existing trade agreements. Is this really the message that the House of Representatives wants to send to the rest of the world?

What we are saying here today if this bill is approved is that we will protect ourselves regardless of the merits of the argument and that we will violate agreements to which we are a party in order to do so. There are some adverse effects of H.R. 1562 which would be true of any piece of protectionist legislation, whether it is textiles or apparel, steel or automobile, or, yes, the copper industry which is so important in my own part of the country.

Any time tariffs are increased and quotas are decreased, prices to the consumer are going to be increased, and we have seen that with the automobile legislation that has been in effect before, either directly by adding a tariff to the cost of the item or indirectly through decreased competition. It has been estimated that in this particular case the cost to consumers could be as much as $14 billion a year.

Any protectionist measure that is enacted into law is going to invite retaliation from our trading partners. It was not very long ago, in 1983 as a matter of fact, that the Chinese boycotted American cotton, soybeans, synthetic fibers and cut their purchases of American grain in response to the unilateral restraints that we put on textile imports.

We just completed our work 2 days ago on the farm bill, an attempt to help the agricultural sector of our domestic economy. Do we really want to leave our farmers vulnerable to further economic damage by passing this particular piece of legislation? I have listened to the arguments of my colleagues and I have the greatest respect for them and I understand the problems of their industry, just as my own industry in my part of the country faces these problems.

Mr. Speaker, yesterday we had on the floor of this body the Prime Minister of Singapore who addressed us. I hope that most of my colleagues have had a chance, if they were not here, to read the remarks that he addressed to us.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from North Carolina [Mr. COBLE].

Mr. COBLE. I thank the gentleman for yielding this time to me.

Mr. Speaker, we have heard today about this being a budget buster; if we do not support this bill it will be a job buster. Many who oppose the passage of this legislation comfortably and conveniently rely upon the term "free trade." The concept of free trade is an important and laudable one, ladies and gentlemen, but it is one that simply does not exist in international trade. It exists only in theory in economic textbooks.

□ 1140

There is no free trade. Otherwise we would not have to be here.

Now this bill does not provide for the construction of barriers and walls around our boundaries. What we are simply trying to do is control the growth of imports. Voluntary restraint may well be an alternative, but we are talking about domestic jobs, we are talking about American jobs.

If we have the alternative to protect Taiwanese jobs, or Chinese jobs, or Korean jobs, or American jobs, Mr. Speaker, I opt for the latter, and this is the time to be heard.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Washington [Mr. MILLER].

Mr. MILLER of Washington. Mr. Speaker, I rise in strong opposition to H.R. 1562. There are many reasons why I oppose this bill—regional self-interest, the lessons of history, sound economics, national security. But all these reasons can be summed up by simply stating that this is bad legislation—bad for my own district, bad for my own State of Washington, and bad for our Nation and the free world.

Mr. Speaker, this bill sends lots of messages. But the messages are not what the sponsors intend.

Listen to the message the bill sends to American workers: "We will save your textile job in South Carolina, but we will take away your port job in Florida or California." In the long run, this bill will cost more jobs than it saves. It will save jobs in the textile industry and lose jobs across our Nation in retailing, shipping, and exporting sectors such as agriculture and high tech. This bill does not reduce unemployment; this bill just transfers it.

Listen to the message this bill sends to American consumers: "We won't cut the budget deficit and lower the dollar's value to correct our trade problems, so we're going to raise your clothing prices." For each job "saved," American consumers will pay at least $70,000 in higher prices; some estimates go much higher. And this is so that an industry that has almost 80 percent of our market can recapture the 20 percent that gives the American consumer a choice in goods and prices.

Listen to the message this bill sends to American businesses: "We want you to sell your soybeans and cotton, your planes and computers, but we are going to take away the opportunity to trade your goods for the currency and goods your customers want to give in return."

Listen to the message this bill sends our trading partners. To China: "We want you to buy our manufactured goods and farm produce—but we're not going to let you send us your major export." To Taiwan and Thailand: "You've been loyal allies who have kept your commitments to us, but we're going to unilaterally break our agreements with you to slash your trade." To Brazil: "We want you to honor your debt obligations to us, but we'll make it harder by not honoring our trade obligations to you." To all Asian nations and to Brazil: "We want your markets, but when it comes to textiles, we're going to pick on you, not on the Europeans, even though their textile exports to us have recently grown more than yours." To the free world, whose security we care about: "The industry that is most crucial to our national security—the industry that we are going to place the highest tariffs and lowest quotes on, the industry that we are going to break multilateral and bilateral agreements for is: Textiles!"

And last, listen to the message this bill sends to economists and hostorians: "We didn't follow your advice against erecting trade walls in 1930 when we passed Smoot-Hawley, and we're going to start repeating the same mistakes all over again."

Mr. Speaker, this bill sends the wrong messages at the wrong time. It is bad legislation for our national and international interests. It is bad legislation for the whole country. We should vote it down.

Mr. DERRICK. Mr. Speaker, for the purposes of debate only, I yield 1½ minutes to the gentleman from Arkansas [Mr. ALEXANDER].

Mr. ALEXANDER. I thank the gentleman for yielding and appreciate the leadership he has provided to the Congress and to the Nation in helping bring this important bill to the floor for consideration.

In my hometown of Osceola, AR, last year, two textile mills closed and we lost about 900 jobs. The impact of that job loss on my hometown was to lose approximately 40 percent of the gross revenues for Main Street in that city. The impact was overwhelming.

We are here today not to respond in a protectionist mode, but to send the President of the United States a message, a message that we, in Congress, want him to reinforce the principle of free trade with our demands for fair trade. We are saying to President Reagan that we insist that he enforce the provisions of the Multi-Fiber Act of 1981 and the general authority granted by the Congress in 1935. This is the same problem we have with the American footwear industry which is under assault from imports. Like textiles, footwear needs relief through Presidential enforcement of existing statutes. Legislation on behalf of footwear being considered in the Senate is intended to send that same message.

We are asking the President to add to the equation of free trade the com-

ponent of fair trade. Textiles and footwear are a good first place to start.

A moment ago, a gentleman mentioned the marvelous address delivered yesterday by the Prime Minister of Singapore.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Florida [Mr. SHAW].

Mr. SHAW. Mr. Speaker, the bill before us this afternoon was born out of frustration. It was born out of the frustration that there were 900 jobs lost in the district of the gentleman from Arkansas, and there are hundreds of thousands of other jobs that are lost across this country.

I signed on to this bill as a cosponsor out of frustration at what is happening to American jobs. But I believe, after further reflection, after particularly listening to the fine speech by the Prime Minister of Singapore that was presented in this Chamber yesterday, that this frustration is the wrong way to go, that the message that we would be sending would not be to the White House but would be to Japan. And that message to Japan would be that we are no longer going to fight their protectionism, but we are going to join with you by throwing up protectionism ourselves.

Yes, there are things that we must do. We must speak to Japan and we must be tough with those trading partners who close their markets to our goods. But for us to join them in a wave of protectionism, I believe, will lose us more jobs than we would save by the passage of this bill.

Mr. DERRICK. Mr. Speaker, for purpose of debate only, I yield 1 minute to the gentlewoman from Tennessee [Mrs. LLOYD].

Mrs. LLOYD. Mr. Speaker, I represent an agricultural State and, yet, one that has seen innovative undertakings with foreign concerns. But it is a State that has been wracked by imports. Coal, steel, cast iron, chemicals—all have lost ground and now textiles and apparels are being gradually eliminated. For the last 2 years, imports have doubled since 1980. More than 100,000 workers lost their jobs last year, 5,600 in my home of Chattanooga alone over 10 years. At the same time, some $2 billion a year has been invested in modernization. Our textile and apparel industry can compete one on one with any foreign manufacturer. But it can't compete against foreign governments as well.

Mr. Speaker, I ask the opponents of this bill to try to measure the frustration of the American textile workers. These workers, Mr, Speaker, have no budget to bust. Try to measure the frustration of one of my constituents who is trying to keep his hosiery mill open. He said, "Marilyn, if protectionism is so bad, why isn't Japan bankrupt?"

The international and bilateral agreements have been signed, the technological advances implemented, and still the imports pour in.

The question we are addressing today is, quite simply, "Does America need a textile industry? If we don't, if we are willing to continue losing ground to foreign producers, then clearly we can direct our attention elsewhere. But we should keep in mind what the textile-apparel industry means to our Nation. This industry is second only to metal products in terms of production workers and comprises 9.7 percent of the total manufacturing work force. Clearly, it is at the base of America's industrial strength and exists in some form in every State of the Union. But, each month, almost 10,000 of these workers lose their jobs. We need this bill and I urge adoption of this rule.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1½ minutes to the gentleman from South Carolina [Mr. SPRATT].

Mr. SPRATT. Mr. Speaker, this morning I opened my mail and found in it a letter labeling this bill protectionism of the worst sort. Well, I suggest we put this bill in context.

Is it time for some protection when today we have a $17 billion trade deficit in textiles and apparel? In the last 5 years, in volume terms, textile imports and apparel imports have doubled. In terms of dollars, textile imports and apparel imports grew by 53 percent from 1973 to 1974 alone.

The chart that was here, and has been taken down, showed that we buy clothing imports amounting to 60 percent of all of the imports of the lesser-developed countries and the newly industrialized countries of the world. In per-capita terms, we buy five times more in foreign clothing than do the Japanese and we buy three times more than do the Europeans.

After the adoption of this bill, our industries will be somewhat more protected, let us be honest about it. But we will still have far more free trade in textiles and apparel in this country than do the Europeans and do the Japanese with their own Pacific Rim neighbors.

For the countries who will be affected by the cutbacks in this bill, there is an answer. They can ship more textiles and apparel goods to the European countries, to the EEC, where, in fact, for the last 3 years, they have been shipping under quota, or they can ship more to the Japanese. They have an enormnous trade surplus with which to take up some of this slack.

Protectionism has become a pejorative word. I used to think "protection" had a benign connotation.

I think we ought to ask, before we condemn automatically this bill, what it is that we are going to be asked to protect. This industry employs 3.2 million Americans, 7 out of every 8 in the manufacturing sector.

I urge the adoption of this rule and the adoption of the bill.

Mr. QUILLEN. Mr. Speaker, I would inquire, how much time is remaining on this side?

The SPEAKER pro tempore. The gentleman from Tennessee [Mr. QUILLEN] has 4 minutes remaining and the gentleman from South Carolina [Mr. DERRICK] has 1 minute remaining.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge adoption of this rule. I call to the attention of the Members of this Chamber the fact that the problem is real. It is so real, in fact, that in my district we lost a large textile plant, and two other large ones are laying off employees. Another is on the verge of closing. It is real.

We also have a great number of other industries suffering the same crisis.

We are here today to do the job, and we must do it. I urge the adoption of the rule and the passage of the bill.

To close debate, Mr. Speaker, I yield my remaining time to the gentleman from South Carolina [Mr. CAMPBELL].

The SPEAKER pro tempore. The gentleman from South Carolina [Mr. CAMPBELL] is recognized for 3 minutes and 15 seconds.

Mr. CAMPBELL. Mr. Speaker, we have heard many arguments against this bill. We have heard of free trade.

Let me remind you that we operate under rules of trade in the international community, and not free trade. We have the General Agreement on Tariffs and Trade under which we operate in textiles and apparel with the Multi-Fiber Arrangement.

Let me tell you that this legislation is consistent with the objectives of the MFA to provide managed textile trade with growth opportunities for exporting countries. That is what the MFA does. It has been violated in principal and that is the reason we are here today.

Second, there are those that say we violate international agreements. Article 12 of the General Agreement on Tariffs and Trade authorizes any member nation to limit imports in order to safeguard its external financial position and its balance of trade. With the United States facing its largest trade imbalance in history, on the order of $140 billion, who can argue that we should not have authority under article 12?

Further, article 19 of the General Agreement on Tariffs and Trade authorizes the suspension of imports to the extent and for so long as needed to prevent serious injury to domestic producers. And the Multi-Fiber Arrangement itself in article 3 authorizes a nation to restrict textile imports, if

justified under the General Agreement on Tariffs and Trade.

Do not sit here and talk to us about principles of free trade when the world operates differently. I would go for free trade too if we did not have barriers in Japan, and China, and Korea, and Taiwan against our products, and if China, the People's Republic of China had not just listed a whole new agreement on tariffs that they have imposed unilateraly and quotas on items, including textiles.

Ladies and gentlemen, you are not living in a fantasy land, you are living in a real world, and the real world is that the rest of the world is restricting our goods and demanding we leave our markets open.

I do not want to build a wall around this country. I want to trade. But I want mutual trade. I want respect for our people in other marketplaces. I want fair trade. And if we cannot break those barriers in other markets in any other way, then sometimes you have to take rather drastic action.

This action is sending a message, not that we want to build a wall around this country, but that we will do what we have to do to keep fair and mutual trade alive, and you had better believe that we will do it.

Let me leave you with a quick story. In North Carolina, a textile mill closed down. This is a true story. The manager of the local department store wrote a letter to the plant superintendent and said, "You have destroyed the town. You have shut down your mill and I am going to have to shut down my department store."

The superintendent of the mill went to the department store and looked through all of the items. These were people that worked in the textile mill that shopped there. He could not find anything made in America.

He wrote a letter back to the man in the department store and he said, "Sir, I didn't shut your store down, you shut us both down."

Ladies and gentlemen, it is time we woke up.

□ 1155

Mr. DERRICK. Mr. Speaker, let us get this business of protectionism out of the way. All this legislation does is enforce agreements that have been voluntarily entered into by countries. Let me reinforce what Mr. CAMPBELL and others have said.

We are talking about real Americans. We are talking about Americans who pay taxes, Americans who have fought the wars of this country, Americans who are depending on their Congress and their Senate to protect their jobs.

I do not have anybody from Singapore that lives in my district who is a citizen; I do not have anyone from Korea that is a citizen; I do not have anyone from Korea who is a citizen; I do not have anyone from Japan who is a citizen; I do not have anyone from China who is a citizen; but I do have dedicated, patriotic Americans who are taxpayers, who are having their jobs stolen, stolen.

I am being asked to sit in my house while my goods are stolen, while my family is abused and to hear others talk, I am being asked to do nothing. I will tell the membership it is time to do something and we are going to to it today.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ARMEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 277, nays 139, answered "present" 1, not voting 17, as follows:

Ms. SNOWE and Messrs. HUNTER, GLICKMAN, ROBERT SMITH of New Hampshire, and COMBEST changed their votes from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

COMMUNICATION FROM THE HONORABLE JOHN E. GROTBERG, A MEMBER OF CONGRESSS

The SPEAKER pro tempore laid before the House the following communication from the Honorable JOHN E. GROTBERG; a Member of Congress:

HOUSE OF REPRESENTATIVES,
Washington, DC, October 9, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, H204, The Capitol, Washington, DC.

DEAR MR. SPEAKER: Due to my appointment to the House Committee on Government Operations, I hereby resign my seat on the House Committee on Small Business effective immediately.

Thank you for your past assistance.

Sincerely,

JOHN E. GROTBERG,
Member of Congress.

COMMUNICATION FROM THE HONORABLE JOHN G. ROWLAND, A MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable JOHN G. ROWLAND, a Member of Congress:

HOUSE OF REPRESENTATIVES,
Washington, DC, October 9, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, H-204, The Capitol, Washington, DC.

DEAR MR. SPEAKER: I hereby resign as a Member of the Committee on Government Operations effective this date.

Sincerely yours,

JOHN G. ROWLAND,
Member of Congress.

ELECTION AS MEMBERS TO THE COMMITTEE ON GOVERNMENT OPERATIONS AND THE COMMITTEE ON SMALL BUSINESS

Mr. MICHEL. Mr. Speaker, by direction of the Republican Conference, I call up a privileged resolution (H. Res. 292) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 292

Resolved, That the following-named Members be, and they are hereby, elected to the following standing committees of the House of Representatives:

Committee on Government Operations: Mr. Beau Boulter of Texas and Mr. John E. Grotberg of Illinois.

Committee on Small Business: Mr. Stewart B. McKinney of Connecticut and Mr. Larry Combest of Texas.

Mr. MICHEL. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

TEXTILE AND APPAREL TRADE ENFORCEMENT ACT OF 1985

The SPEAKER pro tempore. Pursuant to House Resolution 286 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1562.

□ 1218

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1562) to achieve the objectives of the Multi-Fiber Arrangement and to promote the economic recovery of the U.S. textile and apparel industry and its workers, with Mr. MAVROULES in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

The gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 1 hour and the gentleman from Tennessee [Mr. DUNCAN] will be recognized for 1 hour.

The Chair recognizes the gentleman from Illinois [Mr. ROSTENKOWSKI].

□ 1220

Mr. ROSTENKOWSKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 1562, the Textile and Apparel Trade Enforcement Act was favorably reported by the Committee on Ways and Means by voice vote on September 30. This legislation would establish import quotas for imports of textiles and textile products from all countries except Canada and certain members of the European Community. Separate import quotas would be applied to each product category of textile products from each foreign country. The size of each quota would differ, depending on whether the import is from a "major exporting country" or a smaller "exporting country," and whether or not the product is an "import sensitive product." More restrictive quotas apply to imports from "major exporting countries" and to "import sensitive" products. Import licenses would be required for imports of all textiles and textile products from all countries—including Canada and Europe.

Mr. Chairman, I do not support this legislation. However, given the broad support which it has received from the membership of my own committee and of this body as a whole, I concur with the judgment of my committee that it should be brought to the floor for rapid consideration. The legislation is, therefore, before us today after having received thorough consideration, including exhaustive hearings, in the Committee on Ways and Means.

I recognize the serious plight of the textile and apparel industry. I am greatly disturbed by the severe dislocations which our staggering trade deficit has caused to this and other sectors of the economy.

However, the appropriate solution to the trade problem is not to erect permanent and rigid import barriers, solely for the purpose of insulating ourselves from international competition. Rather, I believe the answer lies in adopting a more sensible set of policies to attack the underlying causes of our trade deficit.

First, we must reduce the value of the dollar through fiscal and monetary policy. Without such action, American industries cannot survive in the world market.

Second, we must adopt tough, unyielding measures against foreign market barriers and foreign unfair trade practices. These barriers and practices are having a far more pervasive effect on U.S. industries than most economic "experts" or the current administration concede. We need new laws which will force these countries to change their practices or face similar treatment from the United States.

Third, we need a consistent, well-orchestrated trade policy, and a strong central voice within the administration to impose such a policy.

The combination of these basic changes in U.S. economic and trade policies will have a positive and long-term effect on all industries now suffering from today's trade problems. To single out one sector for preferential and highly protectionist treatment will simply make it more difficult to solve these problems on a comprehensive basis. It is not a wise economic policy and, although it may bring some marginal benefits to the textile and apparel sector, studies show that it will have an overall adverse impact on employment, productivity, and growth.

I trust that the House will act this year to carry out the changes I have outlined above, and to bring under

control the massive hemorrhage in our trade balance. The present administration has shown itself to be insensitive to this macroeconomic problem and to the localized damage which it has caused to industries like the textile and apparel industry.

Although I oppose this legislation, I want to assure its sponsors that, if it is defeated, I will work with them to formulate a sensible response that will enforce existing textile agreements, regulate unfair trade practices, and bring down the value of the dollar so that our industries are not threatened with extinction by foreign competition.

Mr. Chairman, would the Chair advise me how much time I have remaining?

The CHAIRMAN. The gentleman from Illinois [Mr. ROSTENKOWSKI] has consumed 4 minutes of the 1 hour allotted to him.

Mr. ROSTENKOWSKI. Mr. Chairman, I ask unanimous consent to yield half my remaining time to the gentleman from Georgia [Mr. JENKINS] and the other half of my remaining time to the gentleman from Florida [Mr. GIBBONS].

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. DUNCAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I support H.R. 1562 and I do so without reservation.

All of us have heard—often and loudly—the claims that this bill will damage the U.S. world trade position. Some have even said the measure will lead to a trade war and trigger a depression, as some feel happened following enactment of the Smoot-Hawley Tariff Act.

Well, I do not accept that line of reasoning. This is not 1930, world trade is far from free, and our trading partners engage in restrictive practices that make provisions of this bill look puny and anemic by contrast. The measure is narrow in scope, designed to save only one domestic industry from sinking entirely from sight. Furthermore, I do not believe that enactment will result in the type or magnitude of retaliation that the doomsaysers predict.

H.R. 1562 sets permanent import quotas on textile and textile products from countries which have been flooding our markets with products turned out by very low-cost labor, at prices which simply cannot be matched or ever approached in some cases in this country. Certainly, it is a tough bill, in comparison with the kind of trade legislation we usually consider. But in light of what has happened to the American textile industry, it looks reasonable to me.

There are huge stacks of statistics on the subject, but I will not belabor them. You have heard most of them anyway. Suffice it for me to note that employment in textile mills has hit its lowest level in 40 years, and textile plant are idle or vanished in far too many economically stagnant towns and cities all over the country. Talk about depression! These places are already experiencing the distress. If any of my colleagues doubt the gravity of the situation, all they have to do is go and look.

No, Mr. Chairman, I do not feel this bill goes too far. It's about time we did something like this, and stopped pretending that free trade really exists. If it ever did, it does not today. H.R. 1562 may at least make it a little more fair.

The CHAIRMAN. The Chair wishes to announce that the gentleman from Georgia [Mr. JENKINS] is allotted 28 minutes which he will control, and the gentleman from Florida [Mr. GIBBONS] will control the other 28 minutes.

Mr. JENKINS. Mr. Chairman, I yield 30 seconds to the gentleman from Illinois [Mr. RUSSO].

Mr. RUSSO. I thank the gentleman for yielding time to me.

Mr. Chairman, I rise in strong support of this legislation, and I would like to engage in a colloquy with the gentleman from Georgia.

It is my understanding that the gentleman is committed to resisting any amendments to his bill at this time. But it is my further understanding that he does recognize and is willing at a later time to support language which will exclude toys and similar articles included in subpart E, part 5 of schedule 7 of the Tariff Schedules of the United States. Apparently their inclusion was inadvertent and their deletion will do no harm to the intent of the bill. Is that correct?

Mr. JENKINS. Mr. Chairman, if the gentleman will yield, that is correct.

Mr. RUSSO. I have one further question for the gentleman from Georgia.

Am I correct that articles classifiable in part 1 of schedule 8 or in part 1 of the Appendix to the Tariff Schedules of the United States are not included within the definition of the term "textiles and textile products" in section 4 of the bill, unless they are otherwise classifiable in the other tariff schedule provisions named in that section of the bill?

Mr. JENKINS. That is correct.

Mr. RUSSO. Mr. Chairman, I thank the gentleman.

Mr. DUNCAN. Mr. Chairman, I yield 6 minutes to the gentleman from South Carolina [Mr. CAMPBELL], a member of the Committee on Ways and Means.

Mr. CAMPBELL. Mr. Chairman, I feel sure that no one here has missed the ambitious new advertising campaign with the theme "Made in the U.S.A.—It matters to me." Mr. Chairman, I submit that preserving the American textile/apparel/fiber industry matters to all of us. And, I submit that is what the bill before us today is all about—the preservation of this basic American industry. Nothing more, nothing less.

Very briefly, H.R. 1562 would fix 1985 import levels for major exporting nations where they should have been if the Multi-Fiber Arrangement had been properly enforced, and allow subsequent growth rates of 1 percent per year. For smaller exporters, 1985 import limits are set at 1984 imports plus 15 percent and a generous growth rate of 6 percent per year is allowed. An import licensing program is established to enforce these provisions. Europe and Canada are exempt from the provisions of the bill because we grant that much of our trade problem with these nations is due to the strength of the dollar. It is important to note that the textile trade deficit with the countries covered by H.R. 1562 are largely unaffected by the dollar because most of these suppliers have their currency tied to the U.S. dollar or are operating under managed currencies.

The legislation is designed to carry out the intent of our international agreements in the textile area. It is designed to provide for orderly growth in textile trade. It is designed to stop the 25 and 30 percent surges in import growth we have seen over the last 2 years. But, Mr. Chairman, we are not by this legislation attempting to put a wall around this Nation. On the contrary, it is other nations which have built the walls.

It is, for instance, Korea which assesses a value-added tax and a special additional tax on textiles and apparel and then requires cloth and garment import licenses to be approved by the Korean Federation of Textile Industries. It is Japan which practices state-of-the-art protectionist practices ranging from controlled distribution to bureaucratic blocking of goods at the docks.

Mr. MARTIN of New York. Mr. Chairman, will the gentleman yield?

Mr. CAMPBELL. I yield to the gentleman from New York.

Mr. MARTIN of New York. Mr. Chairman, I rise in favor of the textile legislation, notwithstanding the fact that I believe in fair trade. Without question, this legislation has protectionist trappings. I do so because I am fed up, as are millions of Americans, with the unfair trade practices in which our trading partners, if you can call them that, are engaged.

For example, this high-quality baseball bat made by Adirondack Bat of Dolgeville, NY, is the top of the line. It is a piece of baseball equipment which is used by major leaguers, colleges, high schools, little leaguers, and sandlot players and endorsed by them.

For years, the Japanese, through their ingenious methods of obstructing our products from their market, have denied us the opportunity of selling these bats, and, for that matter, baseballs. Through the ruse of checking that equipment for safety, the Japanese stymied our manufacturers for a long time, and we find once we jump that hurdle, another hurdle will be placed in our path, such as failure to receive the approval of their baseball federation which is working hand-in-hand with the Japanese Government and its treacherous protectionist policies.

I have been told that domestic buying and these kinds of ingenious protectionist activities are matters of tradition with the Japanese. We have a tradition here, as well, and that's called fair play. I have been a winner and a loser, and I like being a winner a lot better, but if I lose, I don't complain if it is a fair fight. Our trading partners are continuing to play us for the saps we have been in the trading arena. I am not wedded to any and all kinds of protectionist legislation, but I feel it is high time we drew the line and let our trading partners know that we insist on a level playing field and will accept nothing less. Perhaps the administration can explain to our trading partners that they had best get their houses in order or the Congress, in its frustration, will be passing legislation that, in the long run, is in the best interests of no one. Most of this legislation comes out of frustration, quite frankly, and the failure of our Government to act when it has the authority to do so under present legislation.

The nonrubber footwear question is an illustration. Despite the findings of the International Trade Commission that foreign imports are harming our domestic footwear industry and that relief is warranted, our Government failed to implement any such relief. The pleas of thousands of workers who believe that our trade laws provide the appropriate mechanism for addressing the vast import problems our Nation is facing went unheard. We must give industries such as these the breathing room they so desperately need and deserve.

The wood fiber industry is still another good example. There are other shocking examples that I'm sure will be dealt with unless our trading partners understand that this is a fair warning and preview of things to come.

Mr. Chairman, I reluctantly support this legislation and hope that passage of this legislation, whether it ultimately goes into effect or not, will serve as a clear warning to everyone that America is serious about getting fairness in this trade equation.

Mr. CAMPBELL. I thank the gentleman for his contribution.

It is the Philippines which place a total ban on textiles and apparel except for those which will be reexported. It is the People's Republic of China whose dual currency system not only allows their producers and exporters a false profit but inflates the price of imports. China, moreover, while threatening retaliation if this textile bill is passed, was at the same time slapping new import surcharges on a whole range of items from cars to fabrics.

And the list goes on and on, as illustrated by this Department of Commerce 250-page publication listing tariff and nontariff barriers to U.S. exports of textile and apparel products.

If we are not facing barriers to our own exports, we are facing subsidization of foreign goods offered for sale in the United States or outright evasion of the textile and apparel quotas we do have in place through transshipment, undervaluation, misdescription, targeting and any number of other innovative schemes.

I would point out to those who call this bill protectionist that we are ceding fully 38 percent of the domestic market, plus annual growth, to imports. That is hardly barring the gates of trade.

So, Mr. Chairman, I do not believe we are looking at the start of a major trade war with passage of this legislation. We are very simply wising up to what the rest of the world has been doing for years. We are simply rejecting the "do as I say and not as I do" attitude of our trading partners. We are taking the same kind of measures the EEC took some 5 years ago with, I should point out, no disastrous consequences, to insure a future for our textile/apparel industry.

Representing as I do a district known as the textile capital of the world, I am sure my strong support for H.R. 1562 comes as no surprise. After all, "you dance with the one what brung ya" as they say. The fact is, however, that this is a national problem as well as a regional one. This industry employs over 5 percent of the total manufacturing work force in 36 States, and represents 10 percent of total U.S. manufacturing employment. Maybe the impact hits home faster when your State has lost some 24,000 textile jobs in the last 5 years and when daily headlines decry another plant closing. But the textile/apparel/fiber industry plays a major role in this Nation's economy, not just my region.

It provides some 2 million jobs directly and many more indirectly. It employs a heavy percentage of women, minorities and unskilled individuals who have no real alternative to textile employment or the welfare rolls. We are talking about 1 in every 10 American manufacturing jobs—more than steel and automobiles combined—in facilities spread across 48 of the 50 States.

And it is an industry in trouble because of imports, and generally subsidized imports at that. It is in trouble because of the failure of Government to enforce the textile program. While the industry was promised import growth consistent with the growth in the domestic market, actual imports grew at an average rate of 19 percent per year over the last 4 years, with a 65 percent surge in the last 2. The U.S. market, on the other hand, including imports, grew a total of 11.6 percent during the period. Domestic production increased by 2.3 percent illustrating all too well the increasing share of the market taken by imports. So much for promises.

The result is that more than 200,000 textile workers have lost their jobs to imports since 1980. Obviously, this surge of imports is a major contributor to the trade deficit and, in fact, the textile/apparel trade deficit of $16.5 billion in 1984 made up 13 percent of the record $123 billion total U.S. trade deficit. It looks like we're headed for another record year in our overall and our textile trade deficit.

Mr. Chairman, the United States must come to grips with the reality of the world trade situation. We must deal with the reality that many, if not most, other nations provide direct or indirect subsidies to their textile and other basic industries; bar our goods from their markets, and evade the trade agreements we do have in place. In short, as a nation, we must stop being the world's patsy and seek a fair and equitable trade policy.

Mr. Chairman, it is true that as we are losing jobs in our basic industries, new jobs are being created in the service sector. I applaud that. However, as my good friend, the gentleman from Georgia [Mr. JENKINS] and the chief sponsor of this bill, observed recently, the United States cannot survive by taking in the world's wash. Free trade is an admirable goal, Mr. Chairman, but it is not served by the United States abandoning its largest manufacturing work force to imports from countries which bend or break international trade laws and subsidize their own industries. The Textile and Apparel Trade Enforcement Act will insure fair textile trade, and it deserves passage.

MFA COMPATIBILITY

It is consistent with the objective of the MFA to provide managed textile trade with growth opportunities for exporting countries while also limiting market disruption or the threat thereof in developed countries. By providing a two-tier system of countries with very generous growth rates for truly developing countries, H.R. 1562 complies with the spirit of the MFA.

Article 12 of the GATT authorizes any member nation to limit imports in order to "safeguard * * * (its) external financial position and its balance of payments." With the United States facing the largest trade balance in history—on the order of $140 billion—and nearly one-sixth of this imbalance caused by textile and apparel imports, it seems clear that article 12 would authorize import limits. Moreover, GATT article 19 authorizes the suspension of imports to the extent and for so long as needed to prevent serious injury to domestic producers.

MFA article 3 authorizes a nation to restrict textile imports if justified under the GATT. A recent House of Representatives Government Operations Committee report concludes that:

No provision in the MFA would prohibit adoption by the United States of a system of global quotas providing fixed and definite guidelines for the rate of growth of textile and apparel imports from all foreign countries.

And points out that the EEC and other U.S. trading partners have already established similar plans.

In any event, the bill does not necessarily abrogate all of our 34 bilateral agreements. There are provisions in each for orderly termination. Also, in 22 of the bilateral agreement countries, the bill provides for an increase in trade of 15 percent in 1985 and a 6-percent annual growth thereafter.

IMPACT OF THE DOLLAR

Although imports from Canada and the EEC appear to be dollar-related—and, hence, are excluded from the scope of H.R. 1562—practically all imports of apparel and many of textiles and textile products have been largely unaffected by the dollar. This is because many of the most important textile and apparel suppliers have their currency tied to the U.S. dollar and exchange rates have no impact, or are operating under managed currencies.

Between 1981 and 1984, aggregate U.S. imports from the six major suppliers with stable exchange rates increased rapidly. Textile imports rose by 84 percent, and apparel imports rose by 48 percent. During the same period of time, imports from other major supplying countries also increased rapidly but at a rate that was not significantly different from import growth from countries with stable exchange rates. Textile imports rose by 91 percent and apparel imports rose by 49 percent.

See following chart.

CONSUMER PRICE ARGUMENTS

Catalog items marked "Made in U.S.A. or Imported" sell for same price.

The following chart illustrates how the same men's shirt from various countries are sold by retailers at the same price:

	Cost to	
	Retailer	Consumer
Country of origin:		
Hong Kong	$5.92	$18
Guyana	5.43	18
Colombia	6.35	18
United States	7.50	18

Apparel prices have risen only about half as fast as prices for other consumer goods, due to competitive nature of U.S. industry—there are about 20,000 American apparel companies. Moreover, it is not imports which kept prices down since most estimates are that imports are marked up 200 to 300 percent.

Market Research Corp. data based on survey of actual retail prices shows that domestic men's and boys' apparel is priced at approximately $6.68, while similar import price is $6.63. In the case of women's and girls' apparel, domestic price is actually 7 cents below the import price.

IMPORT PENETRATION

According to an audit of 1.34 million garments counted on retail shelves available for sale by the Merchandising Group in June 1985, total import penetration of U.S. apparel market is 56 percent—65 percent in menswear and 51 percent in womenswear.

NATIONAL DEFENSE

U.S. Government spends about $1.5 billion in procurement of clothing and textiles.

Over 300 different combat essential items utilizing textile products.

Textiles considered second only to steel and perhaps automobiles in national security importance.

WWI, the industry invented rayon, which resulted in the discovery of a lacquer coating that proved useful in the production of warplanes. In WWII, nylon was invented which replaced Japanese silk in the production of parachutes.

GENERAL ASSESSMENT OF EXCHANGE RATE IMPACT IN THE PERIOD 1981–84 ON U.S. IMPORTS OF TEXTILES AND APPAREL FROM THE MAJOR FOREIGN SUPPLIERS IN 1984

Country	Imports in 1984 (million SYE)	Impact of exchange rates		
		No or minor impact	Some impact	Major impact

Mr. GIBBONS. Mr. Chairman, I yield myself 6 minutes.

Mr. Chairman, I am going to try to keep my voice low and my reasoning straightforward and try to stick to the facts, because there is going to be an awful lot of other talk around here today. So I am going to do something I usually do not do and that is use a lot of notes.

I have examined the textile and garment industry of the United States as best anyone can without any delay, and it has got problems. But there is hardly an American industry that does not have problems, and the reason they have problems is because this Congress has seen fit for 15 years to overspend the resources of this country. You cannot do that without having this kind of impact. It is just as rational as night following day.

While I would not decry the proponents of this legislation trying to patch up the economy of the United States with this kind of work, I would say that it is going to be futile and it is going to be counterproductive. That is the argument that I will try to develop here.

Something should be done for the textile and garment industry. They ought to have a good adjustment assistance program. They ought to have all the incentives that we can give them to modernize. They are doing that, slowly in some parts of the industry and rapidly in other parts of the industry. I have seen very modern plants and I have seen some ancient plants. I have seen some very fine workers all through America. I do not decry their ability.

But even the best worker cannot make the finest threads and the finest cloth and the finest garments if they have not got the tools to do it. They cannot do it most productively. That is what a part of this argument is about.

Let us look at the employment in Alabama, Georgia, and North Caroli-

na, which are the hearts of the textile industry. I have lived in that area most of my life. I am a resident of Florida, but I have visited these areas all my life and I have never seen them look as good as they do today. They could look better, but they look better than they have ever looked in all their long history.

The national unemployment rate in July 1985 was 7.4 percent. In North Carolina, South Carolina and Georgia, the unemployment rate was less than that in all of those States, hardly areas that you would find going down. Let us look specifically at the textile and garment industry. In 1980, they employed 2.111 million workers. In 1984, they employed 1.955 million workers, a slight drop of employment, but something that would be expected in an industry that is modernizing with new spinning equipment, new looms, a high degree of modernization in those areas, and even some modernization in the garment end of the work. These industries would be expected to drop workers and they have.

Let us look at imports as a percent of U.S. consumption. I know there have been an awful lot of figures thrown around in this area, but I will stake my next paycheck on the accuracy of these figures because they were given to me from the Department of Commerce, the only agency that really has accurate figures. Let me tell you what they are.

These are 1984 import market share figures. I am talking now about both textiles and garments by dollar value. The import penetration as a percent of consumption was 14 percent. Fourteen percent. Not 50 percent as some have alleged here; 70 percent as others have alleged, but 14 percent. If you do not believe me, go down and ask the Secretary of Commerce.

If you break it down in textiles only, and America is very competitive in textiles, at one time during the seventies when the dollar was not so out of shape, we were great exporters of textiles. The dollar volume of textiles is 6.2 percent. That is imports as a percent of consumption of textiles in the United States; 6.2 percent. My God, we import more strawberries than that.

The square yard equivalent, which the industry always wants to use as measuring textile imports, for textiles in 1984 was 4.9 percent. Let me repeat that figure; not 49 percent, just 4.9 percent. That is all.

I mailed a letter to all the Members this morning, but you know with the mail and all the other mail we get I am sure the Members have not had a chance to read it. Let us go down country by country.

Mr. JENKINS. Mr. Chairman, will the gentleman yield at this point?

Mr. GIBBONS. Well, now, wait a minute. You have got as much time as I have, and I will be glad to yield to you on your time.

I will yield on your time if you want to. Do you want to yield on your time?

Mr. JENKINS. Is the gentleman yielding to me?

Mr. GIBBONS. If you will take it out of your time.

The CHAIRMAN pro tempore. The time of the gentleman from Flordia [Mr. GIBBONS] has expired.

Mr. GIBBONS. Mr. Chairman, I yield myself another minute.

The gentleman has got as much time as I have, and I have got a lot more to say.

Mr. JENKINS. Well, I have got a lot more supporters than the gentleman.

Mr. GIBBONS. For the major textile exporting countries that are targeted by this bill, let me go down those countries and tell you what percent their exports are of our total consumption.

Let us pick out Hong Kong first because it is the major villain in all of this. Hong Kong's exports to the United States as a percent of United States consumption is 2.51 percent. Next comes Taiwan with 2.07 percent. Korea with 2.05 percent. Then it goes on down to the People's Republic of China of 1.01 percent, of total United States consumption. These are those horrible things that you are hearing. These are the actual figures from the Department of Commerce for 1984.

Japan: 0.92 percent.

The CHAIRMAN pro tempore. The time of the gentleman from Florida [Mr. GIBBONS] has again expired.

Mr. GIBBONS. Mr. Chairman, I yield myself another 30 seconds.

Yesterday the Prime Minister of Singapore talked here, and he gave us the finest lecture I have ever heard on what makes America great. His great exports of textiles to this country is 0.24 percent of our domestic consumption. I would say to the Members that this case has been vastly overstated. There is damage out there, I will admit. There is dislocation out there, I will admit. But not enough to warrant the drastic legislation we have here.

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio [Mr. GRADISON].

Mr. GRADISON. I thank the gentleman for yielding me this time.

Mr. Chairman, because I am not permitted under the rule to offer an amendment, I would like to take this opportunity to address one of the many concerns I have about H.R. 1562. This bill was drafted to limit imports of textile and apparel products such as trousers, blouses, shirts, skirts and sweaters, which are already subject to restrictions under the Multi-Fiber Agreement. But the bill goes much, much farther, even including plush toys and dolls, such as the Care Bear I am now holding, which are included under the quota restrictions of H.R. 1562.

Toy manufacturing by U.S. companies is largely done overseas. Generally, employees of U.S. toy manufacturers are engaged in assembly, packaging, shipping, marketing, sales, and administration. Domestic employment in the industry, including 2,650 hourly and salaried workers of Kenner Products in my district in Cincinnati, is made possible by the ability to import reasonably priced toys and parts that sustain U.S. toy operators.

Given the structure of the domestic toy industry, imports help maintain domestic employment. Enactment of H.R. 1562 would raise the cost of toys and dolls for the children in our country. It would cost jobs in my district and in the domestic toy industry as a whole. I am not going to vote to cut jobs in my district. I am going to vote against this bill and I urge its defeat.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Ohio [Mr. TRAFICANT].

□ 1245

Mr. TRAFICANT. Mr. Chairman, 1 minute is not a long time but I remember a conversation when a TV interviewer was asking the former all-pro and now Hall of Famer Willie Davis what he felt about his coach, Vince Lombardi. He said, "I really love him, and all of us love him."

He was asked, "Why is that?" He said, "Well, because he treats us all alike. Like dogs, but all alike."

I think what the American worker is trying to say is that it is pretty hard for us to compete in international markets as it is, but at least give us an opportunity to be treated alike in that particular market. There is no way the American textile worker and garment worker can compete in international markets when his wages are $6.57 here and anywhere from 63 cents an hour to $1.18 an hour in these competing markets.

I think Congress has to put its foot down, take a stance once and for all, because all the theory that we have talked about has us in the greatest trade deficit in American history, taking us right to the brink. I think the textile industry is a microcosm of a greater problem, and that is all our industry, which is an endangered species.

Mr. Chairman, I urge that we support this bill.

Mr. DUNCAN. Mr. Chairman, I yield 4 minutes to the gentleman from Nebraska [Mr. DAUB], a member of the committee.

MR. DAUB. Mr. Chairman, I rise in strong opposition to this legislation. This bill is the wrong solution, aimed at the wrong problem and will hurt American farmers, consumers, and our job base.

We are discussing enacting some of the most drastic import restrictions since World War II, for an industry which is already one of the most protected in the country.

The textile industry already has protection from over 300 different quotas and an average tariff of 22.3 percent—more than 4 times the average tariff for any other industry. Moreover textile products not under a quota are subject to calls meaning if import growth rates become at all significant, we can involve ourselves in negotiations for restraint. If tariffs are so healthy for an industry, the American textiles and apparel business should be booming today.

What has this industry done with all the protection it has received up till now? It has requested, for example, only four patents in 5 years.

This bill is not going to preserve jobs, we are merely going to swap jobs in one sector for jobs in another—and this is a costly swap.

The International Business and Economic Research Corp. concluded that this bill may preserve 36,000 jobs in the apparel industry at a cost of $66,000 per job and 35,000 jobs in the textile industry at a cost of about $27,000 per job. It also added that about 58,000 retail jobs would be lost with this bill plus another 4,000 with the drop in textile consumption. Furthermore, there will be many shipper and dockworker jobs lost, especially on the west coast, with the expected decline in imports.

Do you want to go home and tell your constituents that you voted for a bill which swaps jobs for jobs and will slap at least a 3 percent surcharge to the weighted average apparel prices for both foreign and domestic products? You had better be prepared to tell them that if you vote for this bill.

Administration says that consumers would pay $14 billion more a year with the passage of H.R. 1562.

Not only will this bill cost American consumers more and lose jobs in other sectors, it will invite retaliations. As usual, the American farmer will suffer.

In 1983 after we imported unilateral restraints on Chinese textile imports, the Chinese boycotted American cotton, soybeans, and grain. The National Association of Wheat Growers testified in committee that we lost about $500 million in wheat sales alone because of this. The dispute was over just $50 million worth of textiles. That is a 10-to-1 ratio.

This bill threatens a dozen nations who last year bought $2¼ billion of American wheat or 35 percent of our total wheat exports. These countries bought $5.1 billion of American wheat and corn last year. Who are we kidding? Does anybody think that these nations will buy American farm commodities readily available elsewhere if we shut down between 35 and 40 percent of their textile exports to this country?

Textile imports rose 20 percent per year between 1980 and 1984. However, from 1972 to 1980 these imports decreased 3 percent per year. What is the reason for the upturn in recent imports in the last 4 years?

From January 1980 to March of 1985, the dollar's value has increased by 60 percent. In other words, textile imports have gained a cost advantage over domestic goods on the average of 60 percent! Of course consumers are going to buy more of them.

In fact, the Congressional Budget Office said that from 1980 to 1984 about 87 percent of the total deterioration in trade deficit was due to the appreciation of the dollar.

And why has the dollar's value increased so dramatically? The CBO will tell you that the first reason is persistently large deficits which has led to high interest rates bidding up the dollar.

We can reduce textile imports without passing on the cost to consumers, without swapping jobs in other sectors for jobs in the textile and apparel industry, without inviting retaliation against our farmers and other exporters, if we get Government spending under control.

The real pro textile and apparel industry vote is going to be on the Emergency Budget Deficit Act which I hope we get a chance to consider when we try to raise the debt ceiling above $2 trillion.

It was pointed out in committee that the Pacific rim countries which some members of the trade subcommittee visited recently were referring to this legislation as the white man's bill.

I don't for a moment think that the proponents of this measure are at all racially or ethnically motivated, but look at who this bill is aimed at. Canada is exempt from restrictions. So is the European Community. It is Hong Kong, Taiwan, Korea, and Philippines, Indonesia, Thailand, and China who are affected. We should avoid even the appearance of racial or ethnic favoritism in our economic policies. This bill encourages the notion that the United States is interested in promoting trade only among the Western elites.

Has anybody thought about what this can do to our national security interests in the Pacific? This bill is aimed at our Asian allies—Hong Kong, Taiwan, Korea, and Philippines, Thailand. It will make drastic cutbacks in an industry that forms the backbone of many of these countries' economies. It can easily destroy the fragile political stability that presently exists.

Pakistan would qualify as a major exporting country under this bill and be subject to export restrictions. This nation has the largest refugee population in the world because of Soviet extermination efforts against the Afghan people. Yet this beleaguered country has stood up bravely to Soviet intimidation. The Commerce Department says this bill will cut their exports by 40 percent next year. It tells Pakistan that it better turn elsewhere to sell its products—your export growth is now on a leash. That's what I call getting tough on the trade deficit—picking on big bad Pakistan.

This bill hurts farmers, hurts consumers, slaps our allies in the face and ignores the real reason for the textile and apparel industry's woes—the high dollar—which is caused by the profligate spending of this Congress.

Let's vote it down!

Mr. Chairman, I ask the Members to consider these facts and vote "no" on final passage of this bill.

The CHAIRMAN. The Chair wishes to notify the gentleman from Tennessee [Mr. DUNCAN] that he has 47 minutes remaining; the gentleman from Florida [Mr. GIBBONS] has 21½ minutes remaining; and the gentleman from Georgia [Mr. JENKINS] has 26 minutes remaining.

The Chair now recognizes the gentleman from Georgia [Mr. JENKINS].

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Louisiana [Mr. HUCKABY].

Mr. HUCKABY. Mr. Chairman, I thank the gentleman for yielding this time to me.

I would like to address this bill in terms of the cotton farmers. Today imports of manufactured cotton products have increased 29 percent in just the last year. In fact, imports now account for 38 percent of U.S. domestic retail sales of cotton products. If imports continue to grow at this rate, within 5 years there will be no market for U.S. cotton.

This astounding rate of growth cost American cotton farmers $1.25 billion last year alone.

If this legislation is passed, not only will it protect American farmers but it is going to open up exports, and the Japanese and the people in the other countries in the Far East are going to realize that America is serious. They are going to take down their trade barriers instead of imposing trade barriers.

Mr. Chairman, I urge my colleagues to support this legislation. Let us send a strong signal that America is finally serious about having fair and free trade. We want a level playing field.

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentlewoman from Maine [Ms. SNOWE].

Ms. SNOWE. Mr. Chairman, perhaps no district in this country is growing more frustrated every day with our failed trade policies than the Second District of Maine.

That is why it is important that we begin to set the stage in Congress

today to redevelop national trade policies that are both fair and reasonable to our workers, as well as to American industry. If we fail to meet this challenge by neglecting to provide American workers an even playing field with foreign workers, I shudder to think of the consequences for our work force.

We believe we are addressing important legislation today. There are obvious loopholes in the current Multi-Fiber Arrangement international quota system, and the United States has failed to enforce the agreements we negotiated. These agreements have only served to permit imports to increase by a staggering 19 percent, and even greater levels are entering each year. In fact, textile and apparel products now account for 16 percent of our $140 billion merchandise trade deficit.

There is even more at stake, however, than just 10 percent of all of our manufacturing jobs. The fate of our entire industry is at hand. The scenario is similar for dozens of our manufacturing industries: cheap, subsidized, imported products are being targeted by countries around the world right at the United States.

Time has literally run out for my district, and for the thousands of workers in the textile and apparel business. In just 10 short years, one-third of the Maine workers in this business lost their jobs as textile and apparel mills were forced to shut down. But 17,000 Maine workers are still hanging on to their jobs, and, in a rural State with one of the lowest per capita income levels in the Nation, your job is everything.

If you want to see how the textile and apparel industry has modernized, come to Maine. Inside some of the oldest mills in the country are housed some of the most modernized, up-to-date operations anywhere, producing specialty materials, high fashion woven products, industrial fabrics, and other articles.

But, if imports continue to rise at the floodtide level we now see, that entrepreneurial spirit that has made this country great will flicker and die. It is almost horrifying for me to think that if we continue on our present path, there may be no textile and apparel industry in Maine by 1990.

The shoe industry in Maine is in a similar position as the textile and apparel industry—only worse. Highly subsidized imported shoes now hold a simply astounding 80 percent of the domestic market.

In fact, the International Trade Commission determined that the shoe industry deserved relief from imports. And the administration, unfortunately, rejected that notion.

Maine lost almost 25 percent of its shoe work force last year. How can we possibly not respond in support of these workers? The simple truth of the matter is as clear to the worker in Maine as it is to workers across this country: we aren't lifting a finger to help our people to compete and to save their jobs. Passage by the House today of H.R. 1562 is a very important step on their behalf, and I urge my colleagues to support its adoption.

I also hope it will be possible to include a provision to this bill in conference, if approved by the other body, which offers similar, justified relief to this Nation's shoe industry. Shoeworkers are in dire need of relief from imports, and I hope that the House will be able to support them in conference.

Mr. Chairman, I want to congratulate the gentleman from Georgia [Mr. JENKINS] and the gentleman from North Carolina [Mr. BROYHILL] for their fine work in bringing this very important legislation to the floor of the House. I have high hopes for this bill because it is an important step forward that will pave the way toward a more coherent, fair system of trade.

□ 1255

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentlewoman from Illinois [Mrs. COLLINS].

Mrs. COLLINS. Mr. Chairman, I rise in full support of this legislation, for a number of reasons. Let me name some of them.

Starken & Fred, Simpson Clothes, Independent Clothing, R.B. Northside Clothing, Biggs & Taller, Caye Bros., Rossi & Rossi, Rosen Trousers, Lytton Henry, Economical Pants, Baskins, Murry Tom Co., Chester Cleaners, and Caleno, Inc. These are all manufacturers of textiles that were in Chicago, IL, until we started getting barraged by unfair trade practices by other governments. These are the people that we should be concerned about, not only the owners of the manufacturing companies, but the workers.

And who are those workers? Eighty percent are women; 30 percent happen to be black; 17 percent are Hispanic; and 5 percent are Asians. These, and all the rest of the people who are cutters and seamstresses, are the people who stand behind the label "Made in the U.S.A." These are the people who are losing their jobs, and will continue to do so, unless we pass this bill today.

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentleman from Kentucky [Mr. ROGERS].

Mr. ROGERS. Mr. Chairman, if we were able to go to a factory today in Hong Kong, as I have in the past and I am sure many of you have as well, you will find there that the employers in that factory do not pay any income tax. They pay no property tax. There is no withholding tax that they take from the employees' pay. There is no unemployment insurance compensation that they withhold from their employees' pay. There is no Social Security they withhold from the employees' pay.

The company does not have to worry about safety laws. There is no OSHA inspection or requirement in Hong Kong. There is no EPA law in Hong Kong with which the company must comply. There is no minimum wage requirement in those factories in Hong Kong. There are no child labor laws that prevent child slavery in Hong Kong and many of the Far Eastern countries.

The wage scale they must pay is nothing compared to ours. In Red China it is 16 cents per hour in those textile factories.

The standard of living in those nations is far below ours.

All of these things propelled us in 1973 and 1974 to agree with those nations at our insistence that there be some arrangement entered into by which they would not be allowed to flood this Nation with the products manufactured under those conditions, because we simply cannot compete with the governments of Asian nations as we are attempting to do today.

So the nations that we trade with entered into that agreement in 1973-74. We both signed those documents, the Multi-Fiber Arrangement, which limited or allowed the limitation of the amounts of products that could be brought into this country manufactured under the conditions that I have just described.

We hear today from those opposed to this bill that we must be a free trader. We must trade freely in the world's markets. I say that you cannot trade freely under the conditions that have been described heretofore by me. You simply cannot do it.

Mr. Chairman, we must have this bill.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Alabama [Mr. SHELBY].

Mr. SHELBY. Mr. Chairman, today, the House begins to address one of the most serious crises facing our Nation today—the soaring trade deficit. One industry particularly threatened by the unprecendented flood of imports is the textile/apparel/fiber industry.

The Textile and Apparel Enforcement Act of 1985, before us today, would limit textile imports from various countries and is absolutely essential to the survival of the textile industry.

The President said in the announcement of a new trade policy last week that he had worked for 4 years to get our trading partners to dismantle their trade barriers and other unfair trade practices.

During those 4 years, over 350,000 textile jobs have been lost.

Since October 1984 over 8,500 textile workers in Alabama have lost their jobs.

A few Saturdays ago, in his weekly radio address, the President announced that he had asked the U.S. Trade Representative to investigate certain trade practices by four of our trading partners.

Since then, the Debra Knit Plant in Northport, AL, in my district, announced that due to imports, it will close its doors on October 15, throwing 300 people out of work.

Over the past 5 years, the value of textile and apparel imports rose by 104 percent.

Fifty percent of all finished apparel goods sold in the United States are now imported.

All across this Nation communities are threatened by a new wave of plant closings and unemployed workers are worried about feeding and educating their families. Our very industrial base is jeopardized by imports.

Meanwhile, the President, continues to tell us that the economy is doing well. Our trade deficit this year is expected to reach a once unimaginable $150 billion. We have become a debtor nation for the first time since 1914. The President is obviously looking at our economy through rose-colored glasses—probably imported from Japan.

How many more plants will be closed? How many more jobs will be lost before action is taken?

The growth in imports over the past 4 years is not due to any laxity on the part of the domestic textile industry. The industry has made every effort to modernize, compete, and survive. As a result, the industry has achieved productivity gains significantly greater than the national average.

Mr. Chairman, the reason imports continue to capture an increasingly larger share of the domestic market is because foreign manufacturers do not compete on a fair and equal footing. These countries use a myriad of means to subsidize and promote their own textile/apparel industries at the expense of the American industry.

Also contributing to this trade crisis is the overvalued dollar which is directly linked to our massive Federal deficit. As part of the solution, I suggest that we get our own fiscal house in order and restore some sanity to this Nation's fiscal policy.

I certainly will not deny the benefits of free trade. However, our definition of what "free" actually means does not always correspond with that of our trading partners. While we must be cautious not to unravel a fragile world-trading system and cause an inevitable trade war, there comes a time when additional pressures must be brought to bear.

The President said last week, "I will not stand by and watch American workers lose their jobs because other nations do not play by the rules." Mr. Reagan threatens to veto the Textile and Apparel Enforcement Act of 1985. I invite the President to come to Alabama and veto this legislation at a closed textile plant face to face with unemployed textile workers.

Mr. Chairman, this bill is essential for the survival of one of the most important industries in our Nation. We must maintain a strong, viable domestic textile/apparel/fiber industry. I urge my collegues to support this crucial piece of legislation and begin putting American textile workers back to work and ensure the survival of America's textile industry.

Mr. JENKINS. Mr. Chairman, I yield 30 seconds to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Chairman, I rise in strong support of the bill.

In my area of Cleveland we have lost a lot of our textile industry, but I think the rest of the country ought to flourish and I hope we support this bill and really give a good solid signal.

In considering H.R. 1562, the Textile and Apparel Trade Enforcement Act, there are several points among many as to why I believe this legislation should have the support of Members of the House.

I am sure you are aware that, in both industries, over 80 percent of the workers are women. A good proportion of the workers are members of minorities: blacks, Hispanics, and Asiatics. If they lose their jobs because of the tremendous increase in imports to this country, there are few areas where they may find employment.

For instance, women who work in textile and apparel plants cannot move from one part of the country to another in the hope that they can find jobs. If they are married but must work to supplement the family income, they cannot expect their husbands to give up jobs on the chance of employment in other areas.

Most of them cannot take the advantage of being retrained because, unfortunately, their formal education makes it almost impossible to look to high-tech jobs such as computer programming which require high school or college level education to be eligible. As a matter of fact, a survey of the 158,000 apparel workers who entered training programs indicated that only 1,400 or one-half of 1 percent completed training.

Many of these workers are women who have just lately arrived from Asiatic countries such as China, Korea, Japan, Taiwan, Vietnam, Cambodia, Philippines, or from South and Central America. Even though their knowledge of English is nonexistent or extremely limited, they make great textile or apparel workers and are a great boon to the industries.

If they lose their jobs and need to seek assistance from their communities' State or Federal programs, they unwillingly become an additional tax burden.

Many of these women, blacks, Hispanics, and Asiatics, work in areas where either the textile and/or apparel plants are the only manufacturing facilities in the community. When the plants close, the economy of the whole area is affected.

We need to remember that H.R. 1562 does not close the door to textile and apparel imports. It merely asks that workers in America get a fair share of the domestic market and that the legislation calls for enforcement of agreements already in place.

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentleman from North Carolina [Mr. MCMILLAN].

Mr. MCMILLAN. Mr. Chairman, I thank the gentleman for yielding time to me.

Mr. Chairman, I rise in support of H.R. 1562, the Textile Trade Enforcement Act.

Freed of all the complications, the limits in the textile bill are the limits textile-producing countries themselves substantially agreed to in the Multi-Fiber Agreements in 1981. Such negotiated agreements are an important part of a realistic trade policy that paves the way to free trade without destroying the economies of all partners. This legislation will eliminate loopholes and enforce the agreement the exporters made with America. It reduces imports in some cases because those importers have violated the letter and the spirit of the agreements made between the exporting countries and America 4 years ago.

The MFA was supposed to allow the exporters a predetermined and growing share of the U.S. market. They have evaded MFA limits and imports have reached a catastrophically high percentage of the domestic market, at a cost of over 300,000 jobs in 4 years and the destruction of communities that developed around textile and apparel factories.

Over 4 years imports have soared at an average of 19 percent per year—32 percent last year—now threatening 2 million more jobs. We are soaking up two-thirds of the Third World's clothing exports, far more than anyone's fair share, because other developed countries have limited their imports in textiles. The road to free trade is fair trade. Fair trade will result from laws that provide for tough-minded negotiations of quotas, elimination or counterbalancing subsidies, and reciprocal market access.

We will not achieve free trade through a unilateral disarmament mentality. This bill does not initiate trade war; we've been in a competitive struggle for years, but we aren't fighting.

Mr. Chairman, I urge my colleagues to join in support of H.R. 1562.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Michigan [Mr. CONYERS].

Mr. CONYERS. Mr. Chairman, I thank the gentleman very much for yielding. I realize we are short of time, but I want to ask the gentleman a question about this measure, which I cosponsored, and which seems to be directed against so many small develop-

ing Third World countries, to Mexico, the Caribbean. Is it not true that every leader from the Caribbean countries wrote the President a letter opposing this measure? Are we not putting them in a squeeze, Mr. Chairman? They are trying to develop. They are under the incessant IMF pressure and here they are getting what may be the disproportionate penalogical brunt of this legislation.

I say that realizing the impact of imports in Detroit, and other similar cities. We go into the K-mart and the department stores and there is nothing American made; but let us think about this other part of it. I think we need some real answer, Mr. Chairman. For instance, what is the role of this administration's macroeconomic policy in putting this country into trade-debtor status for the first time ever. The problem of unemployment and job displacement runs much deeper than import quotas. And while I intend to support this legislation, I want to make it clear that this is no acceptable substitute for a jobs policy in this country.

I yield to the gentleman.

Mr. JENKINS. Mr. Chairman, let me say to the gentleman that the Caribbean area and Mexico are treated better than any other part of the world.

Second of all, every developing country that does not now ship into this country 1 million square yards immediately have 1 million square yards to commerce and an annual increase thereafter.

Mr. CONYERS. And they are not doing that, is that the point?

Mr. JENKINS. Yes; the gentleman is correct.

Mr. CONYERS. Mr. Chairman, I thank the gentleman.

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the very distinguished gentleman from Ohio [Mr. PEASE].

Mr. PEASE. Mr. Chairman, today, the House is sending a signal of its frustration to the White House. And no wonder. At the same time that it has presided over the largest and most enduring trade deficits in history, the Reagan administration has shut down much of the trade law machinery.

If it had administered the MFA properly, there would be no need for the Jenkins bill. If it wasn't still sitting on a machine tool industry petition 18 months after it was approved by the Commerce Department, there would be no need for the machine tool industry bill introduced the other week. If it had made judicious, intelligent use of section 201 in the shoe case, there would be no need for the introduction of shoe bills and, for that matter, protectionist bills for other industries. The list goes on and on. All of these matters should be handled by the existing trade laws. That's what they're there for. That's why Congress put them on the books.

The Reagan administration has short circuited the trade law process. Its response to the problems of tens of thousands of laid off shoe and textile workers has been the initiation of four unfair trade cases.

The unfair trade problem didn't just turn up on the eve of the shoe decision. What's the administration been doing all of this time? It has been sitting on its hands. And Congress is fed up. That's what this vote is all about today.

Many who are going to vote for this bill aren't voting for its provisions. They're voting to send a signal to the President. But even though they're not voting for the dangerous signal it sends overseas, that signal gets sent anyway.

While this body trades smoke signals back and forth with the White House, people out there get laid off and plants continue to close down.

Mr. Chairman, we need to do something more than blow smoke. We need a constructive alternative trade policy that squarely confronts our trade problems. I introduced my alternative today.

Mr. AKAKA. Mr. Chairman, will the gentleman yield?

Mr. PEASE. I yield to the gentleman from Hawaii.

Mr. AKAKA. Mr. Chairman, as we are all aware, the issue of international trade has come to be one of primary concern across our great country. Due mostly to the cry of the masses to control our ever-increasing trade deficit, we stand here today, discussing a bill which, by means of protectionist measures, will purportedly help to improve our situation.

There is no doubt in my mind that this bill has been formulated on good intentions. Likewise, there is no doubt in my mind that the impetus for controlling the trade deficit is good. Yet, there is no doubt in my mind that the legislation before us today offers only simplistic protectionism as the panacea for our country's problems.

In my judgment, this approach is one which may be unwise policy for the United States. Globally, the U.S. duties on textile and apparel items are the highest in the industrialized world. Nationally, this domestic industry benefits from an average tariff level of 22.3 percent, as compared to an average of less than 5.0 percent for all other industries—more than four times the average tariff. Eighty percent of all textile and apparel imports are restricted in some manner. Six hundred fifty textile quotas, covering imports from 31 countries, are administered currently—78.4 percent of imported men's cotton trousers, 80 percent of imported men's woven cotton shirts and 96.1 percent of imported men's synthetic knit shirts are covered by trade restricting measures. Yet, we are still subject to the calls for protectionism.

Well, my colleagues, it is time that we take a stand and let the industry know that protectionism is not the solution, and that H.R. 1562 is not the vehicle.

Were H.R. 1562 not based on myths, perhaps I would not be standing here today. However, H.R. 1562 is based on myths, and I, for one, will not support myths.

Supporters of the bill would have us believe that imports of textile and apparel products are the sole cause of the declining job levels in the U.S. textile and apparel manufacturing sector.

This decline, however, has less to do with imports than with the basic fact that through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last 10 years at the average annual rate of 4.2 percent and in the apparel sector at the average annual rate of 3.4 percent, as compared with the lower productive growth of all manufacturing in the same period of 1.9 percent. The net result of such capital-intensive movement is a loss of jobs.

Supporters of the bill contend that without increased protection, this industry will cease to exist and many millions of people will be thrown out of work.

Well, the truth is that import limits do not really save jobs overall. Tighter restrictions put thousands of other people out of work. In fact, what supporters fail to realize is that many U.S. jobs which depend on importing such as those associated with shipping, warehousing, retailing, banking and telecommunications, will suffer. H.R. 1562 will, in fact, result in a net displacement of at least 62,000 retail and import-related employees. Only three States will have a net gain, while 47 States will suffer a net loss.

Furthermore, limiting imports would hurt the American consumer. According to a study by the International Business Economic Research Corp., the bill will substantially increase the price of clothing. In fact, it is envisioned that the price of imported textile and apparel products will increase by as much as 30 percent. Other studies estimate that implementation of this bill will cost consumers $14 billion over 5 years.

Obviously, this price change would affect some more than others. Because many types of children's wear and low-cost clothing will become unavailable if this bill becomes law, its impact will be felt most by those low- and middle-income families who can least afford increased prices for the clothes they need.

Supporters of the bill would have us believe that this legislation is consistent with U.S. international agreements, including the Multi-Fiber Arrangement [MFA]. Yet, this bill violates all basic trade agreements because it is discriminatory, and inconsistent with our commitment to the most-favored-nation principle. U.S. obligations under the MFA also are ignored, especially those which guarantee expansion of trade and liberal treatment of new supplier countries.

What will be the end result? The legislation will no doubt cause affected countries

to retaliate to the detriment of our exporters. Exports of farm products, high technology, services, and heavy machinery will be most heavily affected. Retaliation translates into consumer price increases, which in turn will reduce the number of employment opportunities.

Do you find it hard to believe that this bill could result in a trade war? Then, you must have forgotten what happened in 1983, when United States farmers lost nearly $500 million in grain sales because the People's Republic of China reneged on a purchase agreement after the administration restricted textile imports from that country.

Likewise, in late June of this year, the European Economic Community more than doubled tariffs on lemons and nearly quadrupled import fees on walnuts in retaliation for the administration's decision to hike tariffs on pasta imports.

Believe me. Trade wars are a reality.

As if these problems are not enough, the bill also introduces a new feature which will certainly have a devastating effect on apparel imports to the United States, and create an equally devastating additional cost to the American consumer—the establishment of an import licensing scheme to be managed by the Commerce Department.

The Department of Commerce does not have enough manpower to make a licensing scheme work efficiently without a long organizational period. This would unquestionably cause the complete disruption of the import delivery system and the elimination of a great many import companies overnight.

Let me take this opportunity to leave the macroperspective of my argument, and move on to the microperspective.

If this bill passes, the State of Hawaii will be adversely affected. Fear runs rampant in my district that the economic viability of our garment industry will be a sacrificial lamb, in the name of saving the textile and apparel industry.

The garment industry in Hawaii consists of 138 establishments. Employing an estimated 2,950 workers, the industry purchases about $46.7 million of materials annually and has an annual gross product of approximately $80 million, numbers which are significiant for Hawaii.

As much as 64 percent of the materials used by Hawaii's manufacturers come from foreign countries, either directly or indirectly through domestic fabric houses. This reliance on Asian textiles is due to the fact that the quality of prints, colors, and special screened fabrics used are available only from a few domestic mills and are not produced in sufficient quantities to meet the demand of Hawaii's industry. In addition, smaller minimum quantities of fabrics are available from Asian producers than from domestic mills, a crucial factor in an industry which generally manufactures small quantities because of the uniqueness of the apparel.

The inequitable, biased application of the legislation will definitely result in the crippling of Hawaii's industry. The decline will not be limited to the apparel industry, however. In fact, it will also hurt tourism, the State's No. 1 industry. Clothing and garments comprise an important segment of the visitor spending pattern. In 1983, for example, visitor expenditures on clothing and accessories totaled $417.8 million.

Hawaii is a popular destination for Japanese visitors who spend an average of $234 each day during their stay. This is 2½ times more than visitors from the U.S. mainland. Many of these foreign visitors purchase garments made in Hawaii to take home—about 5 percent of their daily expenditures. Thus, Hawaii's apparel industry contributes favorably to the U.S. balance of trade.

Mr. Chairman, I am truly sympathetic to the plight of our Nation's textile workers. I am truly sympathetic to the important national issue of controlling the trade deficit. I am truly sympathetic to the need to protect our industries from extreme dislocation. Yet, I think we need to recognize that the answer to our problem is not in the creation of a new one. In my mind, this legislation is not an answer, and I call upon each and every one of my colleagues to act responsibly and reasonably by casting their vote in opposition to the bill.

Mr. DUNCAN. Mr. Chairman, I yield 1½ minutes to the gentleman from Ohio [Mr. OXLEY].

Mr. OXLEY. Mr. Chairman, listening to Prime Minister Lee from Singapore yesterday, I think those of us who oppose this legislation took a great deal of interest in that and those who cosponsor the bill that we have before us I think had to feel a bit uncomfortable.

It is amazing to me, frankly, to look at the cosponsors of this legislation and find some of my conservative friends on the right who have espoused in the past and hopefully in the future free trade, and particularly the freedom of the nations of the Pacific rim, and then the liberals who have constantly come to the floor and supported the poor and talked about how difficult it is to be poor in this country, which indeed it is, and then to turn around and support a bill that will drive the cost of clothing up, more importantly to the poor than anyone else, and indeed, will cost the American family $450 more a year to purchase textile products. I find that to be rather inconsistent.

We have talked about the unemployment levels in some of the States. All of us from the industrial Midwest particularly are concerned about that, because the unemployment rate in all the States involved in this textile bill, particularly North Carolina, South Carolina, Georgia, and others, find themselves with unemployment rates far below those of us in Ohio and other industrial Midwest States.

This is a classic example of an economy in transition and that transition is taking place no matter what this House does today.

Retaliation: Retaliation, for example, against soybeans would affect my home State dramatically. The Pacific Rim countries that are affected purchase 1.8 billion dollars' worth of soybeans per year.

I thank the gentleman for yielding.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania [Mr. KANJORSKI].

Mr. KANJORSKI. Mr. Chairman, in response to my good friend, the gentleman from Ohio, and the previous speaker, I would like to say that perhaps we are sending a message to the President of the United States and perhaps it is unfortunate that the House of Representatives has to do so; but we saw in most recent weeks that we had to do it on South Africa and I guess we have to do it again for American employees.

I cry out because I represent a district in northeastern Pennsylvania that in the last 2 years has lost 3,500 jobs. We have the souls of 600,000 Americans in the last 2 years who have lost their jobs and the possibility of the loss of jobs for 2 million more Americans.

□ 1310

We ask these Americans every day they work to contribute to the defense of America and to pay income taxes to support the rest of the world's freedom, and yet we are allowing and fostering the slave labor of the rest of the world in America at 16 cents an hour. We fought an American revolution, the Civil War, 120 years ago so slavery could not prevail in this land, and yet, through what we call a free market system we have opened our markets to 16-cents-an-hour slave labor.

I say it is time to tell the world, and specifically the White House, that the House of Representatives will not encourage this.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. I thank the gentleman for yielding this time to me.

Mr. Chairman, I say this to the opponents of this bill: You can try to suffocate it with details but one fact is undeniable. The trend in many areas of domestic manufacturing is down, down, down. When it comes to manufacturing, we are losing the shirts off our backs.

You raise the ghost of Smoot-Hawley, but what about the skeletons of closed shops and lost jobs? What is your alternative? Silence. Silence. No policy has been U.S. policy. A no policy is a no-win policy.

This bill says enough is enough. It cries out for the adoption of a U.S. policy and it is time to do so loudly, clearly, right here today.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from North Carolina [Mr. HENDON].

Mr. HENDON. I thank the gentleman for yielding this time to me.

Mr. Chairman, I would like to commend my good friend, the gentleman from Tennessee [Mr. DUNCAN], as well as the coauthors of this fine legislation, the gentleman from Georgia [Mr. JENKINS] and the gentleman from North Carolina [Mr. BROYHILL] for their foresight and their outstanding leadership in bringing this very measured and very necessary legislation to the floor.

My friends, we in North Carolina, as my colleagues have heard me say many times, are bleeding from a self-inflicted wound called free trade. We must stop, and I trust we will today, the export of American jobs overseas and we must moderate this tidal wave of cheap imports that is wrecking many of the communities of America.

My friends, textile plants in North Carolina and South Carolina are closing at the rate of one every 11 days. That is a lot of pain. We can stop that pain today by passing this very measured and very necessary legislation. I urge a yes vote.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentlewoman from Connecticut [Mrs. JOHNSON].

Mrs. JOHNSON. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in opposition to this bill because, as a representative of the third largest exporting State in this Nation, I am deeply concerned about the jobs that will be lost in Connecticut and in States throughout America if we pass this bill and send a message that America is going to adopt industry-by-industry protectionist policies.

We do not need to send a message to the Preisdent at this time. We need to act. We need to adopt without delay legislation that would assure a timely and tough enforcement of our laws against unfair trading practices, counterfeiting, and those abuses we know are hurting American industry.

We need to back American business in gaining equal access to foreign markets. We need to address in a comprehensive manner the problems that our trade deficit symbolizes. This is no time for Congress to pass the buck and blame the President. Let us take our responsibility and domestic law that will serve our growth and promote the prosperity of the world in the decades ahead.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from North Carolina [Mr. HEFNER].

Mr. HEFNER. I thank the gentleman for yielding this time to me.

Mr. Chairman, this is a great day for the textile industry and one which we have long worked to bring about. I want to thank my colleagues on the Ways and Means Committee who have seen fit to bring this bill to the floor, and my special thanks to those Members who have supported this effort over the past several months.

Mr. Chairman, this is a proposal which only asks that our Government enforce those agreements we have made with our international trading partners which give them reasonable access to our markets. We simply want our domestic industries to be able to compete on a fair basis. America must stop exporting jobs.

My district in North Carolina, which extends from the sandhills to the foothills and encompasses 12 counties, is one of the heaviest textile/apparel and fiber intensive areas in the country.

The largest textile plant in my district employs 16,000 people. Over the last 2 years, this company has lost 3,100 jobs. These losses were directly related to the penetration of imports from foreign sources.

In June the unemployment figure for the county in which most of this company's plants are located was 14.8 percent, the highest in North Carolina. In May the unemployment rate was 18.7 percent.

And in August there were an additional 670 Eighth District textile workers who permanently lost their jobs. In the first 8 months of 1985, North Carolina lost 4,514 textile jobs; 1,616 of those jobs were in my Eighth District alone.

I have received thousands and thousands of letters from textile workers in my district begging for relief from the outrageous surge of imports that have been allowed to occur over the last 4 years.

Some 1,500 people attended a Trade Subcommittee hearing which I arranged for my district back in June. Witness after witness sounded the same concern: "Will I have a job tomorrow?" One witness stated he was a "three-time loser," having lost two jobs to imports and threatened with the loss of a third. At age 50, that's a hard lump to swallow.

Textiles is North Carolina's largest industry, supplying 3 out of 10 manufacturing jobs in the State, with 1,288 plants in 81 of our 100 counties.

Textile, fiber, and apparel operations are located throughout the United States and employ approximately 2 million workers. Since 1980, we have lost over 300,000.

Mr. Chairman, adoption of this legislation will put a stop to the erosion of these jobs and possibly the ultimate demise of the entire industry. I strongly urge my colleagues to support it.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Illinois [Mr. HAYES].

Mr. HAYES. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise today to give my strong support to H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985.

There are many reasons to support the bill before us today. Some of my colleagues will support this bill in order to see a stronger enforcement of the Multi-Fiber Arrangement [MFA], the international trade agreement governing fiber, textiles and apparel. Some will support it in order to halt the disruption of our economy. It has been estimated that if import growth is not controlled, the trade deficit will increase by $21 billion by 1990, another $24 billion will be added to the Federal budget deficit, and a $40 billion loss of the gross national product would occur.

But the figure that catches my attention, is the prediction that job losses will soar by 1.9 million by 1990 unless we control imports. We cannot afford to put another 2 million people out of work. What we need to create in this country is more jobs, not more unemployment. That is why I support this legislation. That is also why I have introduced, along with 29 cosponsors, H.R. 1398, the Income and Jobs Action Act of 1985, which would provide a decent job for all Americans who want to work.

Mr. Chairman, I have heard claims that the textile industry is a small, insignificant work force that is undeserving of import relief. In other words, these are not jobs worth saving. Well, there are some 2 million direct textile and apparel manufacturing employees in all 50 States. It has more employees than steel and auto assembly combined, and is the largest manufacturing employer of women and minorities in the Nation. I have heard the claims that this bill would only help a limited number of workers in only three States.

I have heard that my State and my city would lose jobs through this bill. In fact, I would like to insert into the RECORD at this point a telegram from the mayor of the city of Chicago, Harold Washington. He has sent a telegram to the entire Chicago congressional delegation on behalf of the 10,000 garment, apparel, and textile workers in the city, as well as local manufacturers in the city of Chicago in support of H.R. 1562. Mayor Washington says, and I quote:

> I support this legislation, and at the same time I believe that it is only one of many steps that must be taken soon to reverse the present decline in the competitiveness of American-made goods.

Mr. Chairman, the full text of the telegram is as follows:

CHICAGO, IL,
October 4, 1985.

Hon. CHARLES A. HAYES,
House of Representatives,
Washington, DC.

DEAR CONGRESSMAN HAYES: On behalf of both the 10,000 garment, apparel and textile workers in the city, and our local manufacturers, I urge you to support H.R. 1562 (SB. 680), the "Textile and Apparel Trade Enforcement Act of 1985."

I am very concerned about the declining competitiveness of domestic manufacturing. General inattention to trade issues, the lack of a national trade policy, and an overvalued dollar have all contributed to this erosion. Recent declines in Government support for basic research and inattention to the importance of cheap capital in the private markets for technology research and development have also been factors.

I support this legislation, and at the same time I believe that it is only one of many steps that must be taken soon to reverse the present decline in the competitiveness of American made goods.

Mayor HAROLD WASHINGTON.

Mr. Chairman, I have heard the voices of those who seek to blame American workers for the predicament in which they now find themselves. This is so far from the truth that it hurts. It hurts because U.S. industry and its workers are the most productive, efficient, and professional in the world. But even they can't compete when foreign governments subsidize their industries and pay their workers as little as 15 or 16 cents an hour.

The American textile workers are counting on us to give them a chance to compete. Support H.R. 1562. Their jobs may depend upon it.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from South Carolina [Mr. SPENCE].

Mr. SPENCE. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in strong support of H.R. 1562.

For over 30 years we have stood by while our so-called trading partners have made a mockery of every accepted rule of international trade in regard to textiles. The time is long past due for affirmative action by this Congress to salvage what is left of this absolutely vital U.S. industry.

I can't understand how people can refer to H.R. 1562 as "protectionism," or as a "discriminatory piece of legislation."

I'll tell you where protectionism and discrimination exists. It exists when textile-producing nations slap unbelievable quotas on American-made products. It exists when these same nations violate antidumping laws by pouring cheap, low-wage textile products into the American marketplace.

It exists when nations have the unmitigated gall to subsidize their domestic industries at tremendous losses just in order to penetrate the American marketplace. It exists when nations in full violation of international agreements counterfeit labels on products made in this country. It exists when nations can pay slave labor wages and not worry about the conditions of the workplace.

All we seek in this bill is some degree of equity and fair play. We simply want the spirit and philosophy behind the 1974 Multi-Fiber Arrangement to be adhered to. Let there be no mistake about it, the MFA has been violated and it has been violated with virtual impunity. In fact, had the textile exporting nations abided by the terms of MFA there would be no reason for us to be here today.

But since the 1974 agreement, the domestic textile industry has been devastated. In just my State of South Carolina alone we have lost 60 textile plants, 36 apparel plants, and over 21,000 jobs in the past 6 years. No one can convince me that these plant closings and lost jobs were caused by anything else other than greedy trading partners and foreign producers who don't abide by accepted practices of international trade.

But I tell my colleagues here today that South Carolina isn't alone in this business. There aren't many States in the Union who don't produce products related to textiles. After all, this industry accounts for $45 billion of our gross national product and some 2 million jobs. I'll tell you this, if we put another 2 million people out of work we'd better be prepared for a revolt.

I want to commend my colleague, the gentleman from Georgia [Mr. JENKINS], and the senior Senator from my State, Senator THURMOND, for their authorship of this legislation. It is the product of careful planning and hard work on their part and the part of numerous other colleagues who share our concern over the future of America's textile industry.

Again, we are only seeking equity and an end to unfair, arbitrary trade policies on the part of our trading partners. I feel confident that with passage of this bill those same trading partners will have difficulty in circumventing international agreements affecting this industry.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from Idaho [Mr. CRAIG].

Mr. CRAIG. I thank the gentleman from yielding this time to me.

Mr. Chairman, I stand in opposition to this legislation today not because of what I have heard nor do I fail to understand the problem that many of my colleagues are experiencing in their districts.

Serving as the ranking member on the Government Operations Subcommittee on Commerce, Consumer, and Monetary Affairs, we have just completed what I believe to be a fair and very extensive study of the Multi-Fiber Agreement. Whereas, the signers of the agreement, the Western Europeans have used it and enforced it as we should have, they are not in any way beginning to experience the kind of difficulties we are having in the textile industry.

This Nation and this Government has simply failed to enforce the very international agreements that are currently the books that we are signatories to. If we would do that, we would not be here on the floor today with the kind of protectionist legislation that we are currently considering.

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. DOWNEY].

Mr. DOWNEY of New York. I thank the gentleman for yielding this time to me.

Attention shoppers. Attention shoppers. The Congress of the United States is about to increase the cost of clothing and textiles to you, and it is going to do that because in the absence of any policy from this administration, the Congress has stumbled upon something that is profoundly misguided and in the long run, dangerous not only to our own economy but to the world economy.

We are today in attempting, in the minds of the proponents of this legislation, to protect jobs, to protect an industry. One has to only travel a little bit to the textile area of the country to see that there are severe problems in that industry. Or to see the look of concern on the faces of people in the Needle Trades who are only working part time or not at all.

□ 1320

But are we really going to save that industry? Are we really going to save jobs? Is there going to be a net gain of jobs if we adopt this legislation or a net loss?

I believe that we will see over the long term a net loss of jobs. That will be one of the side effects.

In New York and in New Jersey, the port authority suggests to us there will be 3,900 fewer jobs, and $80 million in reduced payroll from the imports that will not come into the metropolitan area. I happen to believe, I guess I am an internationalist, in agreements like the Multi-Fiber Agreement and the GATT. I believe they work. I believe that there is a world economy that can and does work.

I also believe that you are far less likely to blow someone up to whom you owe a lot of money, that the structure of international trade is the currency for peace and understanding.

The passage of this legislation will reduce the understanding between billions of people. We will be drawing an iron curtain between East and West. We will be saying to the ASEAN countries and the others we fear competition, we do not see the billions in the East as an opportunity to trade, but only as a predator in the marketplace.

That is not what America is about. We have goods to offer the entire world. If we are prepared to trade with others, we can provide them the opportunity to earn the currency to buy our goods. We can provide the opportunity, as we have in Hong Kong, for goods of all types from our country to penetrate their market, to provide jobs in this country.

This would be a mistake of historic proportions if the United States of America decides to turn its back on international agreements and on a structure of international trade that has affected and benefited this country for the last 50 years.

The CHAIRMAN. The Chair will advise Members that the gentleman from Tennessee [Mr. DUNCAN] has 35½ minutes remaining; the gentleman from Florida [Mr. GIBBONS] has 14½ minutes remaining; and the gentleman from Georgia [Mr. JENKINS] has 17½ minutes remaining.

The Chair will also remind all persons in the gallery that they are here as guests of the House, and that any manifestation of approval or disapproval of proceedings is in violation of the Rules of the House. We ask you to respect that.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from Colorado [Mr. SCHAEFER].

Mr. SCHAEFER. Mr. Chairman, I strongly oppose H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985. The arguments against this proposal are so clear cut and compelling, I am astounded this body would consider such legislation.

Supporters claim this bill will save 71,000 American jobs. Yet, the Congressional Budget Office estimates it would actually cost 62,000 U.S. jobs. Thus, the net number of American jobs saved is only 9,000. If this estimate is correct, and I suspect it is fairly accurate, the American taxpayer will be paying $1.5 million dollars per job saved. I suggest to you, that this is not a responsible method to deal with either the trade deficit, or the bigger problem, the budget deficit.

Today, we as elected Representatives must face the difficult choice between the long-term economic benefits of free trade, and the immediate, short-term political relief derived from budget-busting protectionist measures.

Certainly, the textile industry is suffering from overseas competition. It is not alone. We all now know that the United States is a debtor Nation, importing more than we export.

The proposal we are considering today takes action against our overseas competition. I believe such a measure is reckless and irresponsible, considering we have yet to take any serious action to resolve the current trade crisis within our own borders.

Ask yourself, have we truly done everything possible to relieve the pressure placed on the dollar by our budget deficit? I don't believe we have. Have we considered what sort of regulatory burdens we have placed on the industry and if so, have we removed them?

The bill we are considering today is very strong medicine. Unfortunately, it is the wrong prescription. The United States already suffers from one of the world's most restrictive textile import policies. Presently, over 80 percent of all apparel and textile imports entering this country are restricted, adding over $20 billion a year to American consumers' shopping bills.

Like many drugs, today's dose may offer short-term relief to a serious illness. However, like those same drugs, it may prove addicting. If we agree to this fix, industries, like drug addicts, will become dependent on the Government for this protectionist relief. Worse yet, like drug addicts, industries will quickly be back in search of even stronger doses.

I urge each Member to forego the lure of this quick fix. Rather, let's move on to some serious actions that will provide a true cure and offer our trading community a healthy environment for long-term success.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from Iowa [Mr. TAUKE].

Mr. TAUKE. Mr. Chairman, I oppose this misguided effort to protect the domestic textile and apparel industries that will ultimately harm our national economy, cost us jobs, and harm our efforts to export agricultural products.

The administration's letter of June 19 sets forth a number of reasons why this bill is unnecessary and detrimental, including the possibility of retaliation by our trading partners. Indeed, the administration states that the passage of the textile bill would almost certainly lead to retaliation against U.S. exports by the affected textile suppliers. The letter further notes that, in 1984, our exports to these countries totalled $33 billion. Corn and wheat are the most likely targets of retaliation. The United States exported $5.1 billion in 1984 of corn and wheat to the 12 major textile supplier countries targeted by this legislation.

Various agricultural groups are keenly aware to the threat which this bill poses to export opportunities. A July 15 letter to Congress, which expressed strong opposition to the textile quota bill, included among its 150 signatories of the American Soybean Association, Continental Grain Co., the National Association of Wheat Growers, National Corn Growers Association, and the National Grange.

United States agriculture has already paid the price for textile protection: In 1983, the textile bilateral agreement between the United States and China lapsed as a result of United States pressure to freeze China's share of the United States textile and apparel market. The United States imposed unilateral restraints on Chinese textile exports and China retaliated by officially boycotting the purchase of United States cotton and soybeans. At the same time, China shifted its purchase of United States grain to other suppliers. As a result, U.S. sales of grain declined from $1.2 billion in 1982 to only $600 million in 1983. American farmers lost an estimated $500 million in anticipated grain sales. Even when the textile dispute ended and a new bilateral agreement was reached, China did not replace these lost purchases.

Mr. Chairman, U.S. agriculture exports are always the first to feel the sting of retaliation. The domestic textile and apparel industries today receive far more protection than any other industrial sector, and it simply makes no sense to add yet another layer when other American products must suffer further disruptions in the market.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Georgia [Mr. RAY].

Mr. RAY. Mr. Chairman, I rise today in support of this commonsense legislation and also in support of the textile industry—the industry on which our Nation's industrial revolution was founded.

I support this bill, Mr. Chairman, because it is a step forward toward fair trade and because it sends a strong signal to our trading partners that what is good for the goose is good for the gander.

During August, a textile plant in Manchester, GA, announced that it was closing its doors after 30 years, because of foreign imports. I visited that plant, Mr. Chairman, and saw the anguish and the tears that those hard-working people shed for the jobs and the incomes that they had lost.

In my district, the textile industry is the largest producer of manufactured goods—but that is changing. For the last 3 years, textile and apparel plants have been closing at an alarming rate—250 plants closed since 1980—48 in this year alone.

One of our Nation's most vital and productive industries is dying, right before our eyes, and foreign imports are at the core of the illness—

Imports that have doubled in the last 5 years;

Imports that account for more than half the clothing that consumers buy;

Imports that have cut industry jobs by 300,000 since 1979;

Imports that last year accounted for $16 billion of our trade deficit.

This legislation has one purpose—to bring textile and apparel imports under control, so that our Nation's industry can fight for its life. Mr. Chairman, I support our trading partners—

but not to the extent of destroying our textile industrial base.

For too long, the enforcing agencies of our country have failed to enforce import levels which are imposed by international law under the Multi-Fiber Arrangement. This bill will give us that and will give us a strong bargaining position when the Multi-Fiber Arrangement is renegotiated next year.

But more than that, this bill will give our textile industry hope and a fighting chance to survive. And survive it must, because this is an industry which is critical in our everyday lives:

From safety belts in our cars to garments for our astronauts;

From toys for our children to protective clothing for our military; and

From medical devices to beach blankets.

And it provides a profession and a career for over 1 million of our citizens who have proudly spent their working lives in apparel and textile manufacturing plants across America. Unfortunately, for many, those plants have closed forever—a sad memory of days gone by.

Mr. Chairman, this vote today is a vote to support American workers and American industries.

It is a vote to give our industries a chance to complete equally in the world market.

It is a vote to protect American interests, for as has been said, "We can't have American soldiers fighting in Japanese uniforms and sleeping in Chinese tents."

Mr. Chairman, I urge my colleagues to vote in favor of this legislation. We have to show our support today for an industry that has done so much for America.

Mr. JENKINS. Mr. Chairman, I yield such time as he may consume to the gentleman from Georgia [Mr. ROWLAND].

Mr. ROWLAND of Georgia. Mr. Chairman, I rise in strong support of the Textile and Apparel Trade Enforcement Act of 1985. Textile and apparel industries across our Nation have been suffering for a long time due to cheaply produced imports which have been pouring into the United States for some years.

The repercussions of our trade imbalance are rapidly spreading across our country.

Last year the textile and apparel industry faced a deficit of $16 billion, and I understand that it is running near $17 billion this year.

Hard-working Americans are being thrown into the ranks of the unemployed as they watch their plants close or receive word that they have been permanently laid off.

In the past year, my home State of Georgia, has particularly felt the impact of this trade imbalance.

As of late September, nearly 14,000 textile and apparel workers in Georgia had been displaced due to plant closings and lay-offs. In my district alone, the number of employees affected is over 1,500. I don't know how many of you have been to the Eighth District of Georgia, but for the most-part it is made up of small rural towns. A plant closing is especially devastating to these small communities.

Plant closings in large cities are not always noticed by the public at large. But in a small town, when just one plant closes, it can literally tear a community apart. It affects everyone—the corner druggist, the service station owner, the grocer. Everyone feels the impact.

In some parts of my district, just about all the economic indicators are on a downward slide. We are losing plants. We are losing jobs and income. About the only thing that is on the rise is the unemployment rate.

Mr. Chairman, it's time to consider some remedial measures to try to halt these trends. The bill before us provides a very modest approach. This bill does not irrevocably place us in a protectionist posture. Instead, it challenges our trade partners to adhere to fair and reasonable trade practices, something that will help reestablish a truly free and open international marketplace, which is what we all desire.

I urge my colleagues to support the Textile and Apparel Trade Enforcement Act of 1985.

Mr. JENKINS. Mr. Chairman, I yield such time as he may consume to the gentleman from Tennessee [Mr. JONES].

Mr. JONES of Tennessee. Mr. Chairman, I want to voice my support for our consideration of H.R. 1562. I do so recognizing my representation of an agricultural-oriented district that depends heavily on agricultural exports and also my representation of many employees of textile factories.

There are others who will be recognized today that will cover all of the statistical information that supports the need for this legislation. I want to offer my own district as an example of why this legislation is needed.

The latest figures available report that unemployement in my district is over 10 percent. That comes at a time when economic recovery is being experienced elsewhere. Additionally, farmers are telling me that they are being quoted prices of around $4.85 per bushel on the soybeans they are harvesting now.

I can tell you that they cannot expect to make a profit on those soybeans, or any other crop, at the prices they are receiving today.

What is it that ties these two sets of figures together? The trade situation—pure and simple. Imports are putting many of my people out of work, and our trading partners are not buying the agricultural products we need to sell to keep prices high enough to allow farmers to make a profit. My point is that there is nothing on the horizon that gives us any indication that the trade situation is going to get any better without some action on the part of the United States.

I know that there are those who predict that actions on bills like this invite retaliation by our trading partners.

As I look around my district, noting the high unemployment, and farm prices that ensure another year of losses in agriculture, I cannot imagine how those trading partners could hurt us any worse than they already have.

I join with many of my colleagues in support of this bill and in saying "enough is enough."

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Texas [Mr. COLEMAN].

Mr. COLEMAN of Texas. Mr. Chairman, I rise in support of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985.

In the face of $150 billion annual trade deficits, the Nation's textile industry is facing a barrage of imports underpriced to capture the U.S. market and force the closure of hundreds of textile and apparel manufacturers and put hundreds of thousands of American workers out on the street. In two of the largest apparel manufacturing plants in El Paso, TX, over 6,000 jobs have been lost since 1980 to imports.

There are several factors which have led to the rise in textile and apparel imports. Paramount to those are the huge budget deficits incurred since fiscal year 1981 that have caused an increase in interest rates and an artificially inflated value of the dollar in foreign exchange markets. Yet, as our industries have suffered from the borrow and spend economic policies, the administration has not lifted one finger to enforce existing trade laws to ensure free and fair trade. Nor have they sought to deal with the deindustrialization of America. As a result, our domestic textile and apparel industry has suffered and is in need of legislation relief. This bill would provide such relief.

This bill will not slam the door on foreign imports as critics would have us believe. Rather, it would place our textile and apparel industry on equal footing with world competitors. The bill would allow foreign textile and apparel imports to increase over their 1984 level, but at a controlled rate of growth. In the case of developing nations and particularly of Mexico, textile and apparel imports would be allowed to grow at a greater rate of 15 percent in 1985 over the 1984 level and 6 percent each year after that. This is important to the U.S. border economy.

The bill allows for Mexico and the other nations in the Caribbean region to increase production and in turn increase their domestic income and standard of living. That is the key to our foreign policy in that region as well as the management of the world debt situation. In the case of Mexico, the allowance of growth is important to allow that country to grow its way out of the economic nightmare it has suffered since 1982. That growth will benefit the border economy, which is directly affected by the economy of Mexico in terms of commerce, tourism, and immigration. The growth factor allowed for Mexico is the key factor in my support for this bill, and I would not have supported it if the Mexican economy and the U.S. border economy had not received this special incentive for growth.

Mr. Chairman, it is unfortunate that the Congress must take the lead to enforce free trade laws when the duty for that lies in the jurisdiction of the executive branch. Since 1981, the administration has ignored the existing mechanisms in our laws to ensure free trade. They have ignored the deteriorating situation a 104-percent increase in textile import value and a 34-percent increase in U.S. textile exports. They have ignored the impact of Federal budget deficits on the value of the dollar and in turn its effect on domestic industries striving to compete, particularly textiles and apparel. Only as a last resort has the administration sought to introduce a trade policy, 5 years after the fact. Mr. Chairman, they have addressed to the problem too late and done too little. It is now up to the Congress to act.

Finally, Mr. Chairman, I believe the Congess should move forward in enacting legislation to renew our industrial base. We must explore new ways to train workers and retool basic industries in order that we can compete with a changing and developing world market. We must review our existing trade regulations and laws to see that they conform with the changing global economic situation. And, above all, we must act to reduce the Federal budget deficits of the last 5 years and bring down the value of the dollar to remove the harshest trade barrier of all.

Mr. Chairman, it is incumbent upon the Congress to act by passing this bill and provide the relief due to the workers and industries of the countries which have suffered unfairly under the illusions and claims of free trade. We all support free trade, but as the President stated, free trade must also be fair trade, and we cannot stand by and watch businesses fail and workers lose their jobs because of unfair trading practices. Our responsibility should be to our workers and industries above all else. For if they cannot compete, if they cannot produce, we all suffer.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. Mr. Chairman, passage of H.R. 1562 would represent the acceptance of protectionism as the official trade policy of the United States. Since 1776, economists of nearly every stripe and color have been aware of the flawed nature of the trade policy labelled "protectionism." For one reason or another, protectionism has survived and actually flourished in the years since Adam Smith published "An Inquiry into the Nature and Causes of the Wealth of Nations;" a work written primarily to combat the flawed protectionist argument. My testimony today will center around the danger of protectionism generally, and specifically of its harmful effects in the textile and apparel industries.

By way of introduction, I would like to quote a section from "The Wealth of Nations" which I have framed and sits on my desk. It says:

> The statesman, who should attempt to direct private people in what manner they ought to employ their capitals would * * * assume an authority which could safely be trusted, not only to no single person, but to no council or senate whatever, and which would nowhere be so dangerous as in the hands of a man who had folly and presumption enough to fancy himself fit to exercise it.

Smith immediately goes on to state that—

> To give the monopoly of the home-market to the produce of domestic industry, in any particular art or manufacture, is in some manner to direct private people in what manner they ought to employ their capitals, and must, in almost all cases, be either a useless or hurtful regulation * * *. It is the maxim of every prudent master of a family, never to attempt to make at home what it will cost him more to make than to buy * * *. What is prudence in the conduct of every private family, can scarce be folly in that of a great nation.

At this point, Smith unlocks the secret of free trade and forever discredits the logic of protectionism, and I quote:

> If a foreign country can supply us with a commodity cheaper than we ourselves can make it, better buy it of them with some part of the produce of our own industry, employed in a way in which we have some advantage. The general industry of the country, being always in proportion to the capital which employs it, will not thereby be diminished * * * but only left to find out the way in which it can be employed with the greatest advantage.

Despite this convincing argument, protectionist laws and proposals such as H.R. 1562 continue to exist. The supporters of H.R. 1562 state that they are saving jobs from foreign competition. In fact, as Adam Smith has demonstrated so forcefully, protectionism may protect some specific, existing jobs in the short-run, but hurts everyone, including consumers, exporters, importers, retailers, and eventually the textile industry itself. H.R. 1562 clearly illustrates these inevitable pitfalls of the protectionist philosophy.

H.R. 1562 would eventually hurt the American textile and apparel industries by insulating them from competitive imports and clouding vital market signals. For example, in the 1970's, trade restrictions had so obscured U.S. market signals that many American car manufacturers decided to produce cars in sizes and styles which were out of tune with American demand. If we want a truly long-term competitive textile and apparel industry, we must provide a clear channel for the textile and apparel industries to receive market signals, and that requires less, not more, government intervention.

Furthermore, this legislation is not in the long-term best interests of the workers in the textile and apparel industries who are supposedly being protected. Apparel and textile wages are typically well below the average for American manufacturing workers. Import tariffs and quotas encourage these workers to remain in uncompetitive, low-wage industries rather than moving to higher paying, higher growth sectors of the economy. As Senator MATHIAS pointed out in a hearing before the Subcommittee on International Economic Policy last fall, a 1981 study for the U.S. Labor Department found that textile and apparel workers who were permanently laid off received higher incomes in the 5 years following their layoff than they would have by remaining in their old jobs, even after accounting for a period of unemployment. This is a perfect example of the Government artificially diverting labor away from productive and competitive sectors and into uncompetitive areas.

H.R. 1562 would greatly increase the chances of retaliation in other areas of trade, which could easily lead to trade warfare. Past experience has shown that measures such as H.R. 1562 are an open invitation to retaliation. After the imposition of unilateral textile quotas in 1982, China refused to purchase any U.S soybean or grain. In January of 1983 the United States unilaterally imposed quantitative restrictions on Chinese textile exports. In retaliation, China suspended previously agreed upon purchases of American wheat and other agricultural products. Although a crisis was averted by the conclusion of a new bilateral trade agreement, the dispute illustrates the fragile nature of the trade relationship between the two nations. The fact that the proposed extension of the MFA includes new, more restrictive import quotas suggests that there is a strong possibility of some type of disruption which will affect American exports.

Many nations such as China have tenuous trading relationships with the United States, and link trade in certain products, such as textiles, with trade in all products and services of its trading partners. Trade is an important consideration in conducting their foreign policy. For example, I have already mentioned that China may cut off all agricultural trade with the United States in retaliation for implementation of H.R. 1452. But they also may take actions against other U.S. exports and economic joint ventures with American companies. Such actions could prevent American high technology and manufacturing interests from entering the huge Chinese markets.

Acceptance of the proposed extension of MFA in H.R. 1562 would jeopardize all American exports to China and many countries which would be severely affected by the proposed increased protection of our textile and apparel industries. For example, China's imports from the United States grew by over 37 percent in 1984 to $3 billion. China's textile and apparel industry accounts for nearly 40 percent of its total annual exports to the United States. Therefore, it is clear that China's economy and foreign exchange earnings would be significantly affected by the 57-percent cutback under H.R. 1562, and would significantly affect China's importations from the United States in a wide array of products. It is important to emphasize that every nation pays for its imports with revenue derived from its exports, and without an export market, we cannot provide other nations with that sustenance for importation of our products.

H.R. 1562 would reduce textile and apparel imports drastically. For example, it will reduce Chinese imports by over 56 percent, Brazilian imports by 58 percent, and Indonesian imports by over 72 percent (see table A). Besides restricting entry of imported goods from these countries, it will also increase the price for such goods. In mid-January 1983 when the United States set quotas on many textile categories from China, many retailers predicted that the price of imported clothing would go up 20 percent over a period of 1 year. This estimate was exceeded in less than 6 months, and it is now reported that the price of imported apparel went up 25 percent to 35 percent in 1984. Such trade practices simply invite retaliation and a hostile international trade atmosphere.

Besides firing the first shot in a trade war, H.R. 1562 would harm the very developing countries the MFA was intended to assist. A 1982 article from the Economist pointed out that—

> The MFA's history shows how supposedly liberal intentions become restrictive in practice. Its drafters emphasized that "a principle aim * * * shall be to further economic and social development of developing countries." It has not turned out that way.

It goes on to state that even though it was—

> * * * introduced as an instrument to help poor countries develop, it has put them in handcuffs—and provided work for thousands of bureaucrats.

The proponents of this legislation insist that it will not affect developing countries. However, this legislation would encourage the development of a textile and apparel industry in developing countries to a certain degree, but then cut it off. It does this by defining a major exporting country as one which exported to the United States 1.25 percent or more of the total U.S. imports of textiles and apparel for 1984. The remaining countries, defined as exporting countries are technically allowed a 15-percent growth in nonimport sensitive items.

However, 40 percent of U.S. imports of textiles and apparel fall into this import sensitive category. To make matters worse, a disproportionately high share of exporters of import sensitive items happen to be developing nations.

Of the remaining 60 percent of the market in which the developing countries are allowed to compete, we allow them a generous growth rate until they reach 1.25 percent of the total U.S. imports of textile and apparel for a given year. At that point we redefine their status to a major exporting country, and allow them a 1-percent annual growth rate. In effect this bill says that we support economic development, but only to a point.

It is true that in the near future this provision will directly affect only a few developing nations, but as an overall trade philosophy it is a perfect example of hypocritical international development policy. It placates our conscience and allows us to argue that we are doing all we can for international development when in fact we are creating an industry which we will destroy if it happens to become successful.

Over and above presenting a hypocritical development policy, this legislation would also substantially reduce the future growth potential of developing countries. For countries that have a small export base, which is a large percentage of developing countries, restrictions on future growth eliminate the incentive to develop an economically viable industry. For example, has the proposed legislation been enacted in 1983, imports from Bangladesh in 1984 would have been only 3 percent greater than their 1983 volume—and 78 percent smaller than their actual 1984 level.

All of this boils down to one conclusion: H.R. 1562 presents a blatant case of trade discrimination. It singles out certain nations for perferential treatment, and certain nations for preferential punishment. By specifically exempting the European Community and Canada from any of the adverse effects of this bill, we create a perception of discrimination. In effect we are saying that our first world trading partners are preferred customers. This is not only blatant international discrimination, but violates one of the most fundamental principles of GATT, and especially the original intent of the MFA. It clearly runs counter to the intentions of paragraph 6 of the MFA which requires that developing countries receive more favorable terms than developed countries.

If the intent of this legislation is to protect domestic industry from foreign competition, the exemption of Canada and the EC in H.R. 1562 is clearly nonsensical. Imports from developing countries between October 1984 fell 4 percent from the same period a year ago, while imports from Canada, the European Community, and the European free trade area increased by 35 percent.

Finally, and most importantly, this legislation is a disaster for the American consumer. Special interest groups, such as the textile and apparel workers, are easily organized and highly effective lobbying mechanisms. Historically, the texitle and apparel lobbies have been extremely powerful and skillful in the promotion of what they see as their best interest. However, consumers as a whole form such a large and diverse group that they are nearly impossible to organize into an effective lobbying group. In fact, it has proven extremely difficult to even inform consumers of the dangers of bills such as H.R. 1562. As a result, consumers as a group have been silent in the face of legislation which will affect them modestly in the immediate future, but profoundly in the long run.

Not only would this bill be the opening shot in a trade war which would be disastrous for consumers in the long run, but it has been estimated that H.R. 1562 would immediately raise the prices of textile and apparel products by 20 to 30 percent. According to a study done in 1983, the MFA has already cost consumers an estimated $18 to $23 billion a year since 1974. It has also been estimated that H.R. 1562 will cost the apparel consumers an additional $2.4 billion per year, and textile consumers an additional $1 billion annually. These figures would combine to create a total annual cost to American consumers of between $21.4 and $26.4 billion which can be traced directly to the MFA as amended by H.R. 1562.

H.R. 1562 would increase apparel import prices on average by 16 percent at wholesale. Textile import prices would increase an average of 33 percent. These gains reflect both quota

51-059 O-86-2 (Pt. 20)

induced price increases as well as product upgrading as foreign producers concentrate on the export of higher unit-value goods, as did the Japanese under the recent voluntary export restraint agreement [VER].

Not only will this bill increase the costs of textile products, but it will also limit their availability. With its broad coverage, this legislation would restrict trade in fibers historically outside of the existing regulatory structure and never produced in large quantities in the United States. For example, if silk were to be covered by quotas, there would be a substantial reduction in supply to the consumer because there are very few producers of silk apparel products in the United States.

This legislation would also raise costs and reduce availability due to endless red tape and bureaucratic strangulation. H.R. 1562 requires a separate license for each of the approximately 250,000 textile and apparel entries made every month in the United States. Issuance of these licenses will adversely affect newcomers to the textile and apparel industry which would perpetuate established businesses and discourage newer and often more innovative businesses. The end result is, once again, higher prices and reduced availability for the American consumer.

H.R. 1562 is not only discriminatory in terms of international trading partners, but it also discriminates domestically in terms of which consumers will be most affected by the increased protection. All consumers are likely to suffer somewhat from this legislation, but it is the lower income consumers who will be the hardest hit. This legislation will be particularly harsh on lower income consumers because it will severely restrict the amount of less expensive imports.

An import restriction of interest in this area is the voluntary export restraint [VER] agreement on Japanese cars. A recent study estimates that VER's raised the average price of imported cars by $851—and domestic cars by $324—over the years 1981-82. Quite naturally, when presented with a strict new import quota, the Japanese chose to export more expensive cars to the United States. The resulting shortage of cheap automobiles was a direct and painful penalty imposed upon lower income consumers of automobiles. H.R. 1562 would impose the same type of penalty on lower income textile and apparel consumers who buy a great deal of clothing from countries such as Taiwan, China, and Thailand. Under H.R. 1562, these three countries would each have their allowable imports reduced by approximately 50 percent from 1984 levels.

Import quotas as imposed by H.R. 1562 are basically a tax. And because of its severe effects on lower income Americans, it is clearly a regressive tax. H.R. 1562 will assure that the ones who can least afford it bear the heaviest burden when it comes to textile and apparel products.

It is clear that the vast majority—75 percent—of jobs supported in the textile and apparel manufacturing sector would occur in the South, particularly in Georgia, and North and South Carolina. Again, this provides a cohesive and well-organized lobbying group, while the retail job losses will be distributed throughout the country. In fact, at least 36 States will suffer net job losses as a result of this legislation. The Midwest, West, Southwest, and Mountain regions will suffer the most. New York, Pennsylvania, New Jersey, and Massachusetts will experience a possible net job savings, but it will be marginal and temporary. Actual retail jobs lost due to this legislation have been estimated to be at least 61,000 (see table B).

Throughout this session of Congress, Members have seen the urgent need to cut Federal spending. However, as a result of this legislation, the U.S. Government will incur substantial new costs in several areas. Obviously, because this new quota will further limit imports, the Government will suffer a loss of tariff revenue. If the apparel imports are reduced by the estimated 20 percent, and this is a conservative estimate, the Government will lose $629 million. Add to this a loss of $166 million for foregone textile revenues, and the total loss to the U.S. Government would be $795 million. This increase doesn't even take into account the creation of an entire new bureaucracy which will be needed to set up and run the proposed licensing program. While the precise cost of such an operation cannot be calculated exactly, Walter Lenahan, the Deputy Assistant Secretary for Textile and Apparel of the Department of Commerce, has estimated that the import entries of textile and apparel amount to 250,000 per month, or 3 million per year. This is equal to half of all the entries into the United States each year and would require a substantial bureaucracy to administer such a program.

In conclusion, the Textile and Apparel Trade Enforcement Act would further protect the most protected industry in the United States. It would finalize and put on record a U.S. trade policy based upon unilateral, arbitrary, and discriminatory import quotas. For the reasons outlined above, implementation of H.R. 1562 would hurt the textile industry, the apparel industry, the workers of both industries, developing nations, American retailers and manufacturers, American farmers, American taxpayers, American consumers, and would contribute to economic inefficiency in the American economy on the whole.

Thank you.

TABLE A.—REDUCTION IN MAXIMUM ALLOWABLE 1985 TRADE FROM "MAJOR EXPORTING COUNTRIES" UNDER TEXTILE AND APPAREL TRADE ENFORCEMENT ACT OF 1985 COMPARED TO ACTUAL 1984 TRADE

Country	Percent reductions all categories	Percent reductions for categories actually shipped in 1984
Brazil	58.15	65.28
China	56.66	57.28
Hong Kong	12.41	12.70

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from Washington [Mr. CHANDLER].

Mr. CHANDLER. Mr. Chairman, the objective of the Textile and Apparel Trade Enforcement Act of 1985 is a worthy one: improving our trade picture and providing relief from the severe economic distruption and hardship experienced by American textile and apparel manufacturers and workers.

It is for that very reason that this bill is so disappointing.

I respect those among my colleagues who feel they must support this legislation. The problem it seeks to address is one of the most pressing problems facing this Congress.

But, Mr. Chairman, this legislation is wrong. It is shortsighted and counterproductive.

This bill will cost consumers between $1.4 billion and $6.9 billion in the first year alone. Those aren't my numbers; they were provided by the Congressional Budget Office.

It will cost us $1 billion in Federal revenues. Again, the numbers aren't mine; they're CBO's. If we want to do something about our trade deficit, we have to do something about our budget deficit; and this is no time to pass a bill that will cost us $1 billion in revenues.

And, according to CBO, this bill will ultimately cost more jobs than it will save. Does that make sense?

Mr. Chairman, the rush to protection is being justified on the grounds that we have to establish a level playing field. But this legislation violates the Multi-Fiber Agreement, the General Agreement on Tariffs and Trade, and the 38 bilateral textile agreements now in force. How can we demand that others play on a level field, while we unilaterally abrogate our obligations?

While the bill exempts Italy, Canada, and Germany, the sixth, eighth, and ninth largest textile and apparel exporters, it hits several of our most vulnerable allies: Taiwan, South Korea, and Thailand.

The implications of this bill for the international debt crisis and on American exporters are staggering. How will our exporters deal with the inevitable retaliatory measures? How can we improve our balance of payments by reducing the purchasing power of our trading partners?

Mr. Chairman, if we want to do something about the trade deficit, we'd better do something about the budget deficit. If we want to do something about the trade deficit, we'd better pursue foreign markets more aggressively. But to pass a bill that will raise the price of clothing, by some 25 to 33 percent, hitting the poorest among us the hardest; to pass a bill that will widen the Federal deficit; to pass a bill that will cost more jobs than it saves; to pass a bill that will violate our agreements with our allies and undercut their ability to purchase our goods just doesn't make sense.

Mr. Chairman, we can do better than that.

Mr. DUNCAN. Mr. Chairman, I yield 30 seconds to the gentleman from California [Mr. DYMALLY.]

Mr. DYMALLY. I appreciate the gentleman yielding.

I would ask the gentleman from Florida [Mr. GIBBONS] if he will answer a question. Is the gentleman aware of the fact that every head of state in the Caribbean has written the President about the negative effect this bill would have on the CBI?

Mr. GIBBONS. Mr. Chairman, will the gentleman yield?

Mr. DYMALLY. I yield to the gentleman from Florida.

Mr. GIBBONS. Yes, sir, I am, and I know heads of other developing countries have also done that.

Mr. DYMALLY. I thank the gentleman very much.

Mr. Chairman, I submit the following communication for the record regarding H.R. 1562:

AUGUST 23, 1985.

Hon. MICHAEL BARNES,
U.S. House of Representatives,
Washington, DC.

DEAR CONGRESSMAN BARNES: We, the undersigned representatives of Caribbean Basin Governments, view with concern the developments regarding House Bill H.R. 1562 which, in our opinion, would adversely affect the textile and apparel industry in the region.

We are particularly concerned that the Bill, if enacted, would eliminate the current system of bilateral textile and apparel arrangements between the United States and garment producing countries and would impact negatively on the current "807.00" joint production strategy, which benefits both the United States and the Caribbean Basin sub-region.

Passage of the Caribbean Basin Economic Recovery Act was an historic moment in US/Caribbean relations, since the Act provides a framework for rapid expansion of bilateral trade in an effort to stimulate the development of the countries of the region. It is, however, also a fact that the Caribbean Basin Economic Recovery Act excludes products such as textiles, which are important in our industrial programmes. Although the Caribbean Basin Initiative has resulted in heightened interest by U.S. entrepreneurs in initiating or expanding business enterprises in the region, firm commitments to invest capital and know-how have been less forthcoming. This is especially so in the case of the textile industry because of the uncertainty surrounding the future of textile exports from the region to the United States.

H.R. 1562 further threatens to remove even the limited scope provided for expansion with respect to textiles under the current arrangements. In almost all CBI countries, this industry offers the best opportunity for rapid industrialization and development, particularly in terms of job creation. For example, "807.00" operations constitute a significant source of employment in the manufacturing sector in the region. Consequently, the imposition of further impediments to growth at this stage would seriously jeopardize our economic programmes, particularly in regards to employment and foreign exchange generation. Moreover, it should be borne in mind that according to the report of the Department of Commerce entitled "U.S. Trade, Performance in 1984 and Outlook", total U.S. imports from Caribbean Basin designated countries grew only 6.7% in 1984 while U.S. imports from the world rose by 25.4%.

Our Governments strongly urge that the proposed legislation be amended to ensure that the treatment of textile exports from the Caribbean Basin States is at least as favourable as that accorded to Canada and the EEC. The Bill, in Sec. 3, para 10 reaffirms that any change in U.S. textile trade policy should "afford the smaller exporting countries and countries in the Caribbean region a relatively greater share of imports and textile and textile products (which) would promote the national economic interests of the United States". However, the constraints imposed by its provisions defeat the very purpose of providing improved access to U.S. markets. An amendment as suggested above would correct this anomaly in the Bill.

At the very least, we strongly recommend that Sec. "807.00" goods assembled in the Caribbean, using exclusively U.S. components be exempted from quantitative restrictions. This would greatly benefit not only the countries in the Caribbean, but also U.S. firms that are engaged in "807.00" joint production ventures. Special treatment for such ventures would mean significant benefits to U.S. labour and private industry as a result of the increase in demand for U.S. components and materials.

We believe that the enactment of H.R. 1562 as its stands would have disastrous consequences for the economies of the Caribbean sub-region and would derogate from the intent and purpose of the Caribbean Basin Economic Recovery Act.

We, the undersigned, sincerely appreciate your continuing interest in the Caribbean region and hope that the concerns outlined above will be taken into consideration before a definitive decision is made on H.R. 1562. In this spirit we shall be happy to meet with you, at your convenience, to discuss the above-mentioned issues.

Please accept the assurances of our highest consideration.

Edmund Hawkins Lake, Ambassador of Antigua; Edward A. Laing, Ambassador of Belize; M. Teresa Butler, Charge d'Affaires, Bahamas; Peter Laurie, Ambassador of Barbados; Marcella Muskasa, Charge d'Affaires, Dominica.

Albert O. Xavier, Ambassador of Grenada; Keith Johnson, Ambassador of Jamaica, William Herbert, Ambassador

of St. Kitts, Nevis; Joseph Edmunds, Ambassador of St. Lucia; James O'Neal Lewis, Ambassador of Trinidad and Tobago.

H.R. 1562 exempts the Caribbean nations and Mexico from major country status. Countries not exempted include: Sweden, Norway, Finland, Switzerland, Australia, and New Zealand (see section 4, under definitions, on page 14, paragraphs 4, 5, and 6 of the bill). In other words, they are not graduated to major exporting nations status, regardless of how high a share of U.S. textile and apparel imports they represent in the future.

It should further be noted that section 807 to which Mr. Kohn's letter refers has noting to do with this legislation.

Attached is a copy of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985.

AMERICAN CARIBBEAN TRADE ASSOCIATION,

Miami, FL, October 8, 1985.

U.S. HOUSE OF REPRESENTATIVES,
Washington, DC.

DEAR CONGRESSMAN: Tomorrow, you will be asked to vote on the "Textile and Apparel Trade Enforcement Act of 1985" (H.R. 1562). Your colleagues who support this legislation have said that it is consistent with U.S. trade policy objectives and with the system of trade restraints permitted under the GATT Multi-Fiber Arrangement. What they have not wanted known is how damaging this legislation will be to our vital economic and security interests in the Caribbean Basin.

The United States has been aggressively encouraging the small nations of the Caribbean Basin to redirect their development efforts into the formation and expansion of export-oriented industries. Both the President and the Congressional leadership have counselled Caribbean Basin leaders to follow a free enterprise model in putting their nations on the road toward self-sustained economic growth. Could it be that our legislators are now prepared to ignore the advice they have been giving our Caribbean Basin neighbors, and to pass legislation which will set back the development efforts of these countries three-to-five years?

Contrary to what many supporters to the Textile and Apparel Trade Enforcement Act believe is the case, the provisions of that measure will force several Caribbean Basin nations to immediately reduce their shipments of apparel to the United States (see attached statistical summary). These rollbacks will directly impact on new productive facilities that have been established within the past 24 months. These are facilities owned or managed by Caribbean Basin entrepreneurs, working in partnership with U.S. apparel companies.

The new Caribbean Basin operations are examples of the so-called "twin plant" concept under which a U.S. apparel firm sends U.S. fabrics and other textile materials, already cut to shape, to Caribbean Basin operators for assembly (i.e. sewing). The completed garment is returned to the United States and imported under a preferential duty provision (Item 807.00 of the Tariff Schedules of the United States). The twin plant concept for apparel manufacturing has been actively promoted by U.S. Government agencies, and by organizations representing U.S. textile mills.

Growth over the past 24 months of 807.00 manufacturing in the Caribbean Basin has been encouraging. In fact, it has been the most encouraging outcome of the Caribbean Basin Initiative.

The Textile and Apparel Trade Enforcement Act of 1985 will cripple 807.00 production betweeen U.S. apparelmakers and Caribbean Basin firms. Thousands of jobs in the Caribbean Basin tried to 807.00 manufacturing will be lost, and Caribbean Basin governments will lose important revenues derived from apparel exports—thus making them more dependent upon direct financial transfers from the U.S. Treasury.

The Textile and Apparel Trade Enforcement Act should have provided for special and differential treatment for joint production of apparel between U.S. and Caribbean Basin firms. In its present form, it will undo much of the good that has resulted from the Caribbean Basin Initiative. Our membership must therefore urge you to vote against this legislation.

Sincerely,

RONALD KOHN.

Attachment.

As a result of the stimulus provided by the Caribbean Basin Initiative (CBI), and the U.S.-funded investment promotion programs associated with its implementation, the rate of growth of exports of apparel assembled in the Caribbean Basin from U.S. fabrics and other textile materials far exceeds the 15 percent growth provided for in H.R. 1562.

H.R. 1562 would require substantial rollbacks of apparel exports from Caribbean Basin countries in 1986. The following chart shows the rollbacks required (in dozens of garments) for the three largest Caribbean Basin suppliers.

APPAREL EXPORTS[1]

Country	1984	1985[2]	H.R. 1562 quota limit	Rollback
Jamaica	809,759	1,911,780	898,793	−1,102,021
Dominican Republic	5,207,927	6,785,338	6,534,161	−251,177
Haiti	3,920,882	6,607,659	4,425,506	−2,182,153
Aggregate rollback				−3,729,420

[1] Given in dozens of garments. Based on shipments in major categories. Source: U.S. Department of Commerce statistics.

[2] Projected exports for 1985 based on growth in shipments for first 7 months of 1985.

Note: More than 90 percent of the apparel "made" in Caribbean Basin countries is apparel assembled in the Caribbean Basin from U.S. fabrics and materials that have been pre-cut or otherwise prepared in the United States. The value added to these garments in the Caribbean Basin countries averages 30 percent of the U.S. appraised value of the merchandise.

CONGRESS OF THE UNITED STATES,
Washington, DC, October 7, 1985.

DEAR CAUCUS MEMBER: We are writing in reference to H.R. 1562, the Textile and Apparel Trade Enforcement Act, in an effort to stimulate discussion of trade policy and protectionism among CBC members.

This bill, while co-sponsored by more than 200 Members, raises many issues concerning protectionism as a policy tool for the United States. While we fully appreciate and understand the political and humanitarian concerns that underly Caucus Members' support for H.R. 1562, we nonetheless feel that additional discussion and study of the manifold implications of H.R. 1562 and other trade legislation before the Congress would be both useful and instructive.

Issues to be raised with protectionism as a trade policy are as follows. First, the effects of the bill on low income consumers who would be faced with higher clothing costs. Second, the likelihood of retaliation from many of the countries affected. Third, the effects of the bill on the debt service needs of Mauritius, Egypt and the Caribbean countries and on the international financial system as a whole. Fourth, whether the bill even addresses the causes of the trade deficits, including the strong dollar and the federal budget deficit. Finally, why the bill targets developing countries and excludes European countries and Canada from the provisions.

Our own conclusions as to the effect of HR. 1562 on each of these points are as follows:

1. The restriction of apparel imports from other countries would raise the price of clothing in the United States thereby increasing the costs of living for consumers. The effects of low income consumers would be particularly harsh.

2. Other nations have already expressed the likelihood of retaliation against our exports. Several nations, for example, have already threatened to curtail imports of wheat from the United States in response to H.R. 1562. Exports into developing countries constitute approximately 40% of total exports from the United States. Every billion dollars of exports create about 25,000 jobs. The retaliation invited through the passage of H.R. 1562 would sharply reduce the jobs created in the United States, lowering the rate of economic growth while exacerbating the trade deficit.

3. In light of the austerity programs imposed upon the developing countries by the IMF in an effort to meet their external debt, H.R. 1562 would make it impossible for these countries to earn export credits. The repercussions of such a bill would increase the difficulty of these countries servicing their debt, creating disruption in the financial markets.

4. More importantly, H.R. 1562 does not address the manifold causes of the United States trade imbalance including the federal budget deficit, the overvalued dollar, the lack of an industrial policy, the lack of worker training and retraining, and high real interest rates.

5. Finally, H.R. 1562 unfairly targets textile imports from developing nations of the Caribbean, Africa, Latin America and Asia. Textiles from Canada and the West European countries, including "major producers" such as Italy, and Western Germany would be exempt from quotas.

As an example, Mauritius would be one of the countries affected by H.R. 1562. In Mauritius, approximately one out of every five employees works within the textile industry. In 1984, textile exports from Mauritius to the United States increased by 80%, reaching $40 million. The loss of employment in Mauritius which would follow from passage of H.R. 1562 has been conservatively estimated at 5,000 jobs, about 15% of the total employment in textile manufacturing in this African nation. It would exacerbate already existing strains on the balance of payments and it would increase the difficulty of this African nation meeting its debt obligations. In addition, the 40% reduction of the textile market would increase the prices on American textiles, thus raising the costs of clothing for low income consumers in the United States.

As Members of the Congressional Black Caucus, we should examine alternatives to protectionism and attempt to evaluate each in terms of their impact on jobs at home, costs to low-income consumers, and the effects on the developing world. Trade ex-

panding measures such as industrial policies, targeted investment in innovative technologies, development banking, and worker training and retraining, should be examined in the course of the discussion.

We appreciate the opportunity to share our views with you.

With kindest personal regards, we are,

Sincerely yours,

WATER E. FAUNTROY,
Member of Congress.
MERVYN M. DYMALLY,
Member of Congress.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
October 10, 1985.

DEAR CAUCUS MEMBER: Yesterday the Congressional Black Caucus received a letter discussing H.R. 1562, the Textile and Apparel Trade Enforcement Act. I believe the letter may have been based on a misunderstanding of the bill and that further clarification is necessary.

(1) Remember who are the people most affected by this bill. The overwhelming percentage of workers in this industry are women. 30 percent of the workers are Black, 17 percent are Hispanic, and another 5 percent are Asian. These are the people who are losing their jobs because of the flood of imports due to the Reagan Administration's failure to properly use and administer the Multi-Fiber Arrangement. The textile and apparel industry has given opportunity and a decent living to minorities and women in the South and in our major Northern cities to an extent no other industry can claim.

(2) [1] Attached are three pieces that address the issue of consumer price rises, based on what actually happens on store shelves. Note also that imports will still provide 38 percent of our market under the bill.

(3) The nations most directly affected by the Textile Bill either can not or will not retaliate against American exports. Just about every major textile and apparel exporter to the U.S. has a positive trade balance with our country. What they import from the U.S. they do because there are no other sources of supply or we provide the cheapest and the best product. Only China has threatened retaliation, but it is a hollow threat. They have ceased buying American cotton because their own crop now far exceeds their domestic needs. Likewise they have sufficient wheat and synthetic fiber supplies so that further imports are no longer necessary.

(4) The Textile bill will not shut off textile imports from the countries the Congressional Black Caucus is most concerned with, but quite the opposite. It will give them greater opportunity in our market. The Caribbean countries retain the full amount of trade they now enjoy and receive a 15 percent bonus on top of current trade, and can grow further 6 percent per year forever. They can never graduate to the more restricted group of only 1 percent growth in future trade.

(5) Africa is likewise generously treated. Mauritius can not lose a single job due to this bill, for their current expanded imports are not cut back one square yard. And they are also given the 15 percent bonus and 6 percent growth to increase future trade and economic development.

(6) The rise of the dollar has not been a significant factor in textile and apparel imports. All the major Asian suppliers, with the exception of Japan, have their own currencies closely tied to the U.S. dollar and thus have not been affected trade-wise by the dollar's rise.

(7) During the entire history of the MFA and our textile and apparel quota agreement limiting European or Canadian imports. This bill does not prohibit the Administration from negotiating such bilateral agreements with Europe and Canada if it feels them necessary.

H.R. 1562 will preserve needed jobs for American workers. It also attempts to help the truly underdeveloped nations of the world by giving them a greater opportunity to get a share of our market by cutting back on the 12 major exporting nations that now control 80% of U.S. apparel and Textile imports.

Sincerely.

CARDISS COLLINS,
Member of Congress.

Mr. DUNCAN. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota [Mr. FRENZEL] a member of the committee.

Mr. FRENZEL. Mr. Chairman, we have heard a lot of talk about this bill. It is obviously controversial. It is an emotional question. We have heard a lot of charges and countercharges made.

I think essentially the problem with the bill is that if you want to give special advantage to any class in America, you have to punish all of the rest of the classes, and you do not do anything without a heavy cost.

Now it has been pointed out again and again that we are paying over $20 billion, the consumers of the United States, for current textile protection. Those are for the highest textile tariffs in the industrialized world, and the quotas already imposed under MFA.

Under this bill, depending on which of the rating agencies you believe—CBO, CEA, Commerce, or IBERC—the new protection will cost from $3.4 billion to $26 billion.

Whatever happens, the consumers of America are going to pay an enormous cost, and according to the International Trade Commission, that cost is $66,000 per apparel job and $27,000 per textile job. That is a very high cost for protecting a few workers in the United States.

What is it going to cost our trading partners?—$3½ billion in reduced ability to buy U.S. goods abroad. And that, in turn, is going to cost every exporting industry and every seacoast trading area jobs and money.

In addition, it is going to cost the U.S. credit system something, because many of these countries are in great distress and are not going to be able to pay their bills.

What does it do to the U.S. taxpayer? All it is going to cost him is $2.5 billion over 5 years in customs duties forgone, shattering further our budget problem, causing further distress.

□ 1335

Now, what is it going to do to some other exporters? Well, the $12 billion that we are going to restrict goes to countries who buy about $33 billion of U.S. goods. That means everyone who exports; farmers, workers, whoever you are, are likely to suffer retaliation.

That, in my judgment, the combination of all these costs, make this bill absolutely intolerable.

Mr. Chairman, to get the protection that the textile industry requires means that all of the rest of U.S. society has to be beggared. To gain a few jobs, to protect a few jobs, which may themselves be nonproductive, we have to charge everybody else in the country this outrageous price.

Now we know there is distress in the textile industry. Any person without a job is a cause for suffering of all the rest of us in the United States, but the three biggest textile States are Georgia, North Carolina, and South Carolina.

The U.S. average in July of unemployment was 7.4 percent. Georgia skins under that at 7.3, less than the average in the United States. South Carolina, 6.7. That is 10 percent under the U.S. unemployment rate. North Carolina down at 5.6, an enviable position which many of the other States would like to have, but they are not asking for this kind of protection.

Under most analyses, 36 States will lose jobs while only five will gain, and in my judgment, that is much too high a price to pay for this bill.

Remember, too, that the bill does not touch the European Community; it does not touch Canada—the countries which had the two largest rates of growth of textile into the United States. It does not touch Mexico, because that is where the textile industry has its investment.

It will shift imports from Asia to Ireland to Portugal, to other low-cost areas, to Mexico; we will have the same number of imports but they will come from different areas. That, of course, will protect the textile manufacturing industry; it certainly will not protect the textile employees.

Look at the countries we hurt. A big hitter is Hong Kong. It does not have any barriers to U.S. goods. Another one is Thailand. Thailand has been to war with us the last three times we marched. It does not have anything else to sell us; we are reducing its textile exports to us by 64 percent. The People's Republic of China takes a 56-percent hit. That is a new ally that we are trying to sell farm products to. They have already served noticed that they cannot buy if we do not buy some of their stuff.

As to the fact that it enforces the MFA, this bill repudiates the MFA. Textile is the most protected industry in the United States.

[1] Not included in Congressional Record.

I hope we reject this bill so we do not have to punish every other element of U.S. society to save a few jobs.

Mr. JENKINS. Mr. Chairman, I yield to such time as he may consume to the gentleman from North Carolina [Mr. WHITLEY].

Mr. WHITLEY. I thank the gentleman for yielding, and I rise in strong support of the bill.

Mr. Chairman, the economy of the North Carolina Third Congressional District, which I represent, is heavily dependent upon the manufacture of garments, draperies, toweling, and other textile products.

The huge increase in textile imports which we have seen in the past 5 years has resulted in plant closings, layoffs, and corporate decisions against opening new plants in the third district, as I am sure has happened in textile-dependent communities throughout the Nation.

There is no denying that some job losses may be the result of automation, but the great majority are the direct result of the unfair competition of cheaply produced foreign goods in the marketplace of the United States. While imports of textiles and apparel have increased by 104 percent in value since 1980, domestic consumption of these goods has increased by only 28 percent during this period. We must conclude then that imports have been capturing an ever-larger share of the domestic market.

Opponents of H.R. 1562 argue that there are already ample provisions in current law and policy to protect the American textile industry. The problem is that the provisions of the Multi-Fiber Arrangement are not working. If the situation that now prevails is allowed to continue, the U.S. textile industry faces certain destruction within a very short time.

Further, import increases in fibers not covered by the Multi-Fiber Arrangement are rising rapidly (increase in 1983 of 29 percent and 80 percent in 1984) make new legislation imperative. These increases are wreaking havoc in the American textile economy, and the administration has never attempted to control them.

The so-called multitude of tarriff barriers cited by opponents of the bill have not been successful in giving U.S. products a fair market in this country. Nevertheless, the most meaningful facts in consideration of the measure are not the statistics we cite to prove our various points of view.

The meaningful facts are the closed plants, the unemployed workers, and the stagnating textile economy in the North Carolina Third Congressional District and the United States.

Let us have trade that is as free as possible, by all means, but let us have trade that is fair.

Mr. JENKINS. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois [Mr. GRAY].

Mr. GRAY of Illinois. I thank my distinguished friend for yielding time to me.

Mr. Chairman, as a cosponsor, I rise in strong support of this legislation.

Mr. JENKINS. I yield such time as he may consume to the gentleman from Alabama [Mr. FLIPPO].

Mr. FLIPPO. Mr. Chairman, I rise in strong support of this legislation.

Mr. JENKINS. Mr. Chairman, I yield such time as he may consume to the gentleman from North Carolina [Mr. VALENTINE].

Mr. VALENTINE. Mr. Chairman, I rise to express my support for this legislation.

Mr. Chairman, I rise in strong support of the Textile and Apparel Trade Enforcement Act of 1985.

The trade and apparel industry is facing a challenge to its very existence—a challenge that affects the livelihood of thousands of American companies and millions of American workers and their families. In the 4 years from mid-1981 to April 1985, the United States lost 117,000 textile mill jobs and 90,000 apparel jobs.

Why has this happened? These jobs did not simply disappear. The demand for textile products has not evaporated. These workers have not decided to take jobs in other industries.

These American jobs were lost to foreign competition. In the first 7 months of 1985, $12 billion worth of textiles and apparel were imported into the United States. This represents an increase of 7.2 percent over the same period last year. At the same time, American textile and apparel exports dropped by 6.8 percent to $1.75 billion.

Mr. Chairman, we set a record in 1984—a record for the highest textile apparel and trade deficit in our history. If the present trend continues, we will break that record in 1985. We all want a record-breaking economy, but we are setting our records in the wrong direction.

The textile and apparel industry is not alone. Other industries face stiff challenges from unfair foreign competition, but the plight of textiles is particularly widespread and acute.

The textile industry is the lifeblood of many communities in my district and State. If we allow the economic foundation to collapse, the very fiber of our communities could be destroyed. We have a responsibility to prevent that from happening.

The legislation we are considering today is desperately needed. It is not a radical protectionist measure:

It would allow a measured, steady growth in textile imports.

It would achieve the objectives of the Multi-Fiber Arrangement.

It would set limits on imports from major exporting countries at levels which reflect import growth since 1980 at growth rates contemplated by the MFA.

It would allow the smaller exporting countries to increase their share of the U.S. market.

It would set the future growth rate of imports at levels provided for in the MFA and the protocol extending the MFA.

Passing this legislation would demonstrate to the entire Nation our commitment to trade policies that are fair and balanced. It would allow a vital American industry time to complete its efforts to modernize and become more competitive.

We need this legislation now. Millions of Americans are counting on us. I urge my colleagues to support this bill.

Mr. JENKINS. Mr. Chairman, I yield such time as he may consume to the gentleman from South Carolina [Mr. DERRICK].

Mr. DERRICK. Mr. Chairman, I rise in strong support of this legislation.

Mr. Chairman, I cannot impress upon my colleagues enough the need for the Congress to enact legislation to provide for a more orderly distribution of textile and apparel trade. The bill that is before this body today, the Textile and Apparel Trade Enforcement Act of 1985, is the most critical piece of trade legislation that will come before the Congress this session. Our current system for implementing textile, fiber, and apparel agreements is certainly not working. Our foreign trading partners are not convinced that America is serious about effecting a responsible trade policy in this area.

The flow of fiber, textile, and apparel trade has gone virtually unchecked in the name of free trade. How can it be free trade when it is destroying one of our basic manufacturing industries? Our industries are competing against foreign governments who knowingly engage in trade practices that are counter to the principles of trade agreements that were negotiated in good faith.

The 1983 trade agreement with China provided for a 10 percent annual growth rate in imports. However, the following year there was 23 percent annual growth and 17 percent the following year. Of course, no action was taken by our trade negotiators because of foreign policy considerations which have traditionally been given dominance over economic concerns. Our citizens are tired of paying taxes to support the defense of other nations which are taking a greater and greater share of the U.S. market. Americans are being put out of work by these same foreign governments. Shoe imports now stand at 72 percent, steel imports stand at 26 percent, and apparel imports now consume 50 percent of the domestic market.

We hear so much conversation about retaliation. Well, I can tell you that the European Community took effective action under the authority of the Multi-Fiber Arrangement in 1977 to prevent disruption in its domestic textile and apparel industry and there was no retaliation. The United States is the largest export market for developing and nondeveloping countries because the executive branch still holds firm to the free trade myth. I am not advocating an abandonment of textile and apparel trade but rather a more responsible policy in the international exchange of these goods.

There have been statements by opponents of this bill suggesting it violates the Multi-Fiber Arrangement [MFA]. But a study just released by the House Government Operations Committee supports the basic con-

cepts of import licensing and a comprehensive quota system which are embodied in the legislation that is being considered today while stating that these provisions can be enacted in compliance with the MFA. Because the administration has not taken strong and effective action to assist the embattled textile and apparel industry, this legislation has become necessary. Promise after promise have been made by the executive branch to restrict textile and apparel imports, but the statistics bear out how ineffective these actions have been. From 1980 through 1983, the average annual increase in imports was 10.2 percent, and from 1982 through 1984, the average annual increase was 30.9 percent. The administration has spoken strongly and fought against illegal immigration and drug trafficking and supports, as well, strong legislative initiatives in the Congress to combat drug trafficking and illegal immigration. Why can't the White House do the same to enforce and control the flow of textile and apparel goods to provide for the national and economic security of our Nation?

The textile and apparel industry is vital to our Nation's defense. The former U.S. Trade Representative, William Brock, stated during his tenure at U.S.T.R. that while a lot of industries claim their importance to our national defense, the textile and apparel industry is the only one we accept. For example, high-technology textiles developed in the United States include those used in bullet-proof clothing, airline brakes, carbon fiber airplanes, radar scattering materials, and artifical kidneys.

Our current trade policy is a national concern which must be addressed at the Federal level, because of the uniqueness of the textile and apparel trade. The international rules for these products were negotiated under a separate international trade agreement under the auspices of the general agreement on tariffs and trade. Thus, the trade problems this industry is experiencing cannot be addressed as part of a comprehensive trade policy but rather as a separate and distinct issue.

You have seen and heard of the hardships communities and textile employees are experiencing across the country because of runaway imports. Unfortunately, the executive branch has failed to take the initiative to resolve this growing problem, but, instead, wishes to continue to engage in dialog. In the fall of 1983, the administration asked the industry to withdraw unfair claims petitions pending against China in return for a new policy in determining market disruption. Currently, there are over 300 categories which meet the criteria on which no call to limit imports have been made. Effective action must be taken now.

The textile and apparel industry cannot wait for help any longer. My district is deteriorating from our trade policy of the last 5 years. I can and will not exercise my legislative authority in the Congress to try and adopt strong trade legislation on textile and apparel trade. I urge my colleagues to join me in supporting this bill which is so vital. It will help the textile and apparel industry directly but it will also let the administration know that the Congress is tired of all this bureaucratic waivering, it will send a clear signal to industrialized nations that the United States is tired of simply taking their share of the exports from developing nations; and it will let the world know that the United States is no longer clinging to the idealogy of free trade but rather pursuing a practical approach to achieve fair trade.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK. Mr. Chairman, to hear a grosser set of exaggerations that have come from opponents of this bill, you would have to hang around a college fraternity house on a Monday morning and hear them describe how well they did on the weekend.

We have been told that this is going to lead to 60,000 retail jobs being lost. Are we to believe that people are going to fly to Hong Kong to buy their T-shirts? That statistic, which is a grotesque exaggeration; that is, untrue, is just an example of how the arguments on the other side are so exaggerated.

I want to talk particularly about concern for the less developed countries. I want to do more for the LDC's. I want America to be more generous, but I do not want that generosity to be taken out of the hide of some of the poorest and hardest working Americans.

The people in the garment and textile industry are very decent, very hardworking, generally low-paid Americans, and a policy which says we will show compassion on their backs while the rest of the country does very well is a mistake.

The rising tide has not lifted all the boats; there are some people being swamped. Let us show some concern for our international obligations, but not at the expense of these very hardworking and deserving segment of the American labor force.

Mr. DUNCAN. I would like to inquire of the Chair, how much time do I have remaining?

The CHAIRMAN. The gentleman from Tennessee [Mr. DUNCAN] has 26 minutes remaining; the gentleman from Florida [Mr. GIBBONS] has 14½ minutes remaining, and the gentleman from Georgia [Mr. JENKINS] has 13 minutes remaining.

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. ZSCHAU].

Mr. ZSCHAU. Mr. Chairman and my colleagues, today we have a choice between doing something easy and wrong or embarking on a course that's more difficult and right.

This bill is based on the assumptions that "imports cost jobs" and that "protectionism saves jobs." Neither is supported by the data.

When textile imports surged in 1983-84, U.S. textile jobs went up, not down. And if protectionism were the answer, there would be no problem. The textile industry is already heavily protected with hundreds of quotas and high tariffs.

Passage of H.R. 1562 won't help, but it's not benign either. It would have a negative impact on the U.S. economy. As the gentleman from Minnesota [Mr. FRENZEL] pointed out, it would cost U.S. jobs, increase the cost of clothing to consumers, and, by abrogating 38 bilateral agreements, would make the United States an outlaw in international trade. That would undermine our ability to enforce fair trade agreements with our trading partners and would invite retaliation against U.S. exporters.

Sometimes it takes an outsider to point out fundamental truths about ourselves. As Prime Minister Lee Kwan of Singapore observed yesterday, protectionism is not the American way. We didn't become a great country and an example for the free world by running away from competition. The American way is to rise to the competitive challenge.

In trade, this means aggressive negotiation and enforcement of fair trade agreements, a focus of all our policies on competitiveness as a primary national objective, and above all the tough actions necessary to reduce the Federal budget deficit.

Mr. Chairman, we can be the best. We can meet the competitive challenge. Let's start today by rejecting H.R. 1562. Instead, let's refocus our energies on eliminating the budget deficit and on implementing Federal policies that promote competitiveness, economic growth, exports, and opportunities for all Americans.

Mr. GIBBONS. I yield such time as he may consume to the distinguished gentleman from Wisconsin [Mr. KLECZKA].

Mr. KLECZKA. Mr. Chairman, I rise today reluctantly, but of necessity, in opposition to H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985.

While the time is clearly right for action on trade, this is just as certainly the wrong action. By singling out one industry for additional trade protections, we send a signal to others to joint the chorus.

This measure would establish permanent import quotas on textiles and textile products from certain major producer countries. We should recognize, however, that every action we take in the world economy encourages a reaction.

We can expect a response from countries targeted in this legislation which will affect our exports of such products as wheat, coal, machine tools, aircraft or semiconductor parts. If we back these nations into a corner though protectionist legislation such as this, we can expect that they will turn elsewhere for their purchases. In any

calculation of job losses and gains, we should measure the effect of the loss of our exports which will result from a restriction on imports. The major effect will be a worsening of the projected 1985 trade deficit of $150 billion.

This is the first industry-specific trade bill we face in this Congress. If enacted, we all know that it will not be the last we will be asked to consider. There is legislation pending that would limit imports of Canadian lumber, an action which, if taken, would have an adverse effect on the rail business in my part of the country. There are proposals to limit the import of copper, of shoes, of wood products and of furniture.

I fear that we will arrive at the point at which any industry which does not have its own protectionist bill will feel left out of the governmental process.

As we address the growing problem of America's increasingly out-of-kilter trade balance, I believe we have to ask ourselves: Do the legislative solutions we consider resolve our trade problems or do they merely postpone a day or reckoning?

I submit that adding new protections for the textile industry does little to address our real problems in the international marketplace. If we are to promote American industries, there are several steps we should prepare to take.

First, we must commit the Federal Government to an ongoing, active policy of bringing down the value of the overly strong dollar.

There is widespread agreement that the overvalued dollar stimulates imports by making them relatively cheaper than American goods while detracting from the competitiveness of American exports. The belated intervention into the international currency markets by the administration is a small but welcome recognition of the need for action in this area.

But intervention in the money markets does not address the most important factor in the overvaluation of the dollar. I speak, of course, of our massive Federal budget deficit, which forces interest rates up, and keeps them there, thereby encouraging foreign investment in dollars in search of a high return on interest.

By failing to act dramatically to lower the Federal budget deficit, this Congress contributes to the trade imbalance.

The $57.5 billion deficit reduction achieved with the passage of the fiscal 1986 budget resolution was a start, but it was not enough. Our goal must be to reduce the Federal deficit still further. To have an effect on world trade, we will need more than modest, incremental reductions in that deficit. We need a major reduction in the flow of red ink. Only a large-scale reduction will produce a direct positive impact on interest rates and thereby, world trade. We have the power to act on this in the Congress, and we should do so if we are serious about resolving our trade problems.

Second, we must strengthen existing trade laws, such as the Trade Act of 1974, to ensure that unfair trade practices by other nations are countered swiftly by the United States.

It is for this reason that I have cosponsored H.R. 1950, the Trade Law Modernization Act. This measure would alter the current requirement that certain trade practices investigated by the International Trade Commission be shown to be a "substantial cause" of injury to an industry, to instead require that the practices be shown simply to be a cause of injury. This change in the law would make it more likely that the ITC would act on many import relief cases. Unlike the sanctions proposed in H.R. 1562, however, this change in the law would be consistent with General Agreement on Tariffs and Trade [GATT] standards. This legislation would also limit the discretionary authority of the President in trade cases by placing that authority in the hands of the U.S. Trade Representative, thereby removing foreign policy considerations, at least to some degree, from trade decisions.

Third, we must initiate intensive bilateral and, where necessary, multilateral negotiations to reduce existing barriers to free trade, not just with the countries targeted in H.R. 1562, but with all of our trading partners. I am a cosponsor of another bill, H.R. 3035, which would do just that. This measure, introduced by Representative ROSTENKOWSKI, would require the administration to undertake new negotiations, under GATT rules, to reduce unfair practices by our trading partners. Specifically, the legislation requires negotiations by the U.S. Trade Representative which address the undermining or existing multilateral trade agreements and the diversion of unfair shares of developing country exports to the United States.

The negotiations aimed at reducing trade barriers would be undertaken by the United States in good faith. H.R. 3035 would strengthen those negotiations by providing an incentive for action to those countries which have heretofore been slow to respond to our requests for freer, more open trade. If we make no progress to remove trade barriers, the legislation would allow the imposition of a 25-percent duty on all imports from countries whose exports to the world were 150 percent of their imports worldwide. In 1984, this would have included Brazil and Japan. In addition, the legislation would impose a surcharge on imports from nations whose exports to the United States were 165 percent of their imports. This would include Korea and Taiwan, as well as Brazil and Japan. With legislation such as this, a measure which employs a "carrot and stick" approach to our trade problems, I believe that we can begin to make trade a two-way street for the United States.

Mr. Chairman, there are indications that the administration is awakening, in the style of Rip Van Winkle, into a world in which the rules of international trade are in a state of flux. I was among the original cosponsors of the administration's measure to establish a $300 million "war chest" at the Export-Import Bank to counter tied-aid agreements of foreign nations. I look forward to working with the administration and others who offer positive alternatives to our current failed trade policies.

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the very distinguished gentleman from Oregon [Mr. AUCOIN].

Mr. AUCOIN. I must say, Mr. Chairman, that I can truly understand how those on the East Coast felt a few weeks ago when they braved the fury of Hurricane Gloria. The fury of protectionist fever is now sweeping this body like Gloria swept the Atlantic Seaboard, and the passage of this bill threatens to leave a wake of disaster much worse than that left by Gloria.

Although offered with the best of intensions, this bill is not the medicine needed to cure our massive $150 billion trade deficit. Indeed, its passage will set into motion an economic hemorrage that shake the economic health and well being of our Nation and the world.

Mr. Chairman, I represent the First District of the State of Oregon. I would like to tell you who represented that same district back in the 1920's. Congressman Hawley, as in Smoot-Hawley.

Hawley made at that time all of the arguments I have heard on the part of the proponents of this bill today. And he passed his bill. And he virtually killed the economy. I am not going to repeat Mr. Hawley's mistake today, and I hope the House does not, either.

Does anybody in this Chamber honestly believe that Hong Kong, Japan, China or any of the rest of the victim nations are going to sit by and do nothing while this Congress begins cutting their exports to this country by an average of 40 percent?

If you think so, my friends, you are hallucinating. I will tell you what they are going to do; it is what happened in the 1920's; they are going to retaliate.

Think back to 1983 when the textile agreement between China and the United States expired. The United States stupidly imposed unilateral restraints on Chinese imports and China immediately retaliated by boycotting United States cotton, United States soybeans and United States synthetic fibers. And they also shifted grain purchases to other non-United States suppliers.

What was the result for us, for America? Foreign grain sales by America's farmers declined to China from $1.2 billion in 1982 to only $600 million in 1983.

It is going to happen again, only this time in spades.

Now, was it my imagination, or did someone say only 2 days ago, on the farm bill, that we have a farm crisis in this country? This bill is "help" for America's farmers?

□ 1345

You will know that it is not. It will be the death knell of America's farmers.

Eighty percent of the wheat grown in my State of Oregon is for export, and it is true in other districts around the country.

What right do the proponents have to make my producers of wheat victims of trade retaliation?

How does anybody here expect China or any other nation to buy the lift-trucks, to buy the machines, to buy the oil-drilling equipment for all the other advanced products that we say we want to sell to China if we deny to countries like China the foreign exchange they need to make these purchases? It will not happen.

This bill is not trade policy. This is bad law.

It is bad law.

It will cost two jobs for every one job that is saved, and I urge my colleagues to defeat it.

How do I explain to the wheat farmer in Amity that his overseas orders were slashed dramatically because we had to give the textile industry more protection than it already needs? What do I say to the logger in Willamina when he hears that jobs in the mill are being cut by 50 percent?

Let's take a moment to look more closely at the issue of the job impact caused by the bill.

Sure, we will be saving some jobs in the textile industry. But it will be at the expense of eliminating jobs in other industries. It's estimated that in the State of Oregon we would lose approximately 550 retail jobs alone. And that does not account for other jobs in farming, shipping, importing, and logging that would be sacrificed in a tidal wave of retaliation. Admittedly, States such as Georgia, for example, would gain about 5,500 jobs. But California and Texas combined would lose the same amount—again, in retail positions alone.

Who are we to decide which industries shall live and which shall die? How do I tell the young woman who sells perfume behind the department store counter in Portland that her job was more expendable than the one in a mill in South Carolina?

At a time when we should be concentrating on how to erase our deficit, we should examine closely the cost of saving a job in the textile industry. According to a recent FTC study, the hidden costs of quota protection are approximately $34,000 for each textile and apparel job saved. When you consider that the average wage of an apparel worker is $7,660 and that of a textile worker is $10,700, then $34,000 per job seems quite extravagant. Moreover, the administration has estimated that we would lose nearly $800 million annually through reduced tariff revenues.

But perhaps the most important effect of this bill would be to increase prices for imported textile and apparel merchandise by 15 to 30 percent. Not only will prices go up but low-cost items will become more scarce as importers seek to make up the difference in volume by sending us their more expensive items. What are we going to say to the young mother living on AFDC payments when the clothes for her baby suddenly skyrocket?

Finally, I predict today that this legislation will not be the last protectionist bill we see in this body. Rest assured that its passage will open up the floodgates. The cries for protection will become louder than ever.

Mr. Speaker, I am not immune to the problems faced by our domestic industries. As a former co-chair of the Export Trade Task Force, I am very familiar with the effect unfair trading practices have had on our domestic industries. And I am the first person to say that our trade must not only be free, but fair.

For example, I do believe that the plight of the textile industry deserves prompt action by the U.S. Trade Representative when textile and apparel trade agreements are violated. And the appropriate Federal agencies should be given the authority to negotiate and enforce fair textile trade agreements.

But there is a larger picture here, one that is being obscured by political emotion and rhetoric.

The major problem that faces the textile industry, the apparel industry, the shoe industry, the high technology industry and all other domestic exports is an overvalued dollar that accounts for at least half of this year's $150 billion trade deficit. It is a Federal debt that has reached $2 trillion and is expending at a rate of $200 billion a year. It is a failed economic policy that has driven us to become a debtor nation for the first time in 71 years.

Before we rush ahead imposing new protectionist measures, we should first address our made-in-America budget deficits. We have to get tough on spending, not tough on Hong Kong.

Mr. Speaker, I'd like to close by reading a statement made by a well-known protectionist: "The pending bill proposes to relieve those against whom foreign competition is specially directed. In their restored prosperity we all will share. . . ."

These are words that sound very familiar to those of us who have listened to the proponents of the textile bill. But these are not the words of one of the proponents of the bill before us today. They are the words of the man I referred to earlier, Willis Chatman Hawley. He along with Senator Reed Smoot were the authors of the Smoot-Hawley Tariff Act of 1930. Enacted 9 months after the stock market crash of October 1929, this bill imposed duties of 60 percent on china, porcelain and glass, 45 percent on hand tools, 90 percent on dolls and 15 cents on a bushel of rye.

We all know that a major trade war developed soon thereafter, international commerce plummeted, U.S. imports dropped from $4.8 billion in 1929 to $1.7 billion in 1932 and American sales nosedived from $5.4 billion to $2.4 billion.

The next decade was the most catastrophic in our Nation's history.

The Textile and Apparel Trade Enforcement Act bill may not be an exact duplicate of the Smoot-Hawley Act. But it is a dangerous beginning down that road. And the passage of this bill threatens to sidetrack us from our more important mission—getting Federal spending under control and our deficits eliminated. Without such action, the gains made by the textile industry will be swept aside by the losses incurred by the entire Nation.

My colleagues, ignore the calls for protectionism.

Let's get serious about the real root of the problem—controlling deficit spending.

Let's make trade—not trade war.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from Florida [Mr. SHAW].

Mr. SHAW. I would like first of all to associate myself with the remarks of the gentleman from Oregon. I think it is a well thought out statement that was made, one this House should listen to.

One of the toughest things in politics is to get up and look at yourself in the face and say, "I was wrong."

I was wrong. I am a cosponsor of this bill. This bill is bad law. We are not leading here in this House. We are reacting. We are not setting an example for the world. We are following the example of Japan.

With the consumption of this country in the world today, we do not have to go to Japan, or those other countries that are treating us unfairly, with hat in hand saying we are going to negotiate. This administration, our President, my President, must go out and make demands for the American people. All of us in this House want the same thing. We want more jobs for Americans.

The way for us to do it is to get tough in our national policy, not pass bad law.

Mr. Chairman, I urge defeat of this bill.

Mr. JENKINS. Mr. chairman, I yield 1 minute to the gentleman from Arkansas [Mr. ANTHONY].

Mr. ANTHONY. Let me tell you where agricultural trade is in the United States. We have lost about $12 billion in trade. we do not need this

bill to hurt agriculture; agriculture has already been hurt.

We have lost 29 percent of our market in rice in the last 2 years. Thailand has increased their markets by 50 percent in the last 2 years.

China just bartered corn with Japan so they can buy computers. Our trade with Japan in corn is down 14 percent this year as a result of it.

What has happened as a result of this legislation just being introduced? Thailand just yesterday reduced their import fees on cotton by 40 percent and on soybean meal by over 57 percent. This legislation is having an effect.

I have a statement here that has 21 countries analyzed as far as using unfair trade practices against agriculture. I encourage my colleagues to look at it. We must pass this legislation to save agriculture, not harm agriculture.

POLITICAL LINKAGES IN TRADE POLICY FORMULATION

The involvement of political considerations in U.S. trade policy formulation has been explicit in the years since the end of World War II. Early trade promotion and economic assistance programs, such as the Marshall Plan, were predicated on the need to restore viability to the international trading system. Over time, programs such as this and new intitiatives, beginning with the National Security Act of 1951, came to serve overt political objectives, including the containment of world communism and support for U.S. foreign policy objectives in the developed and developing worlds. The Economic Security Fund [ESF] continues to play this role. However, political objectives spill over into virtually every other program of government designed to expand U.S. and world trade.

The U.S. economy towered over the international economy in years following World War II. It was possible—and indeed appropriate—for the United States to grant concessions to other trading nations in the interests of a growing global economy. Circumstances are much different today. The United States economy is but one of a number of major economies involved in an intense competition for market opportunities. The United States can no longer afford to abdicate its economic interests to serve foreign policy objectives. Nevertheless, the primacy of political interests continually surfaces in the formulation of policy vital to U.S. economic concerns.

The embargo on exports of U.S. agricultural commodities to the Soviet Union in 1980 is perhaps the most flagrant recent example of this. Other examples abound. Despite the economic benefits that the U.S. would derive from the liberalization of trade with the Soviet Union, U.S. policymakers have insisted that trade policy towards the USSR serve distinctly non-economic objectives, including the promotion of Soviet emigration. While the Commission strongly supports the aspirations of the Soviet Jewish population, it has seen little evidence that the linkage between Soviet emigration and U.S.-Soviet trade has resulted in an improved Soviet policy towards Jewish emigrants. Indeed, it would appear that Soviet attitudes on the subject of Jewish emigration have hardened, rather than softened, since the passage of the Jackson-Vanik amendment. Soviet Jews have seen little benefit from the legislation, while U.S. economic and agricultural interests have manifestly suffered.

The reluctance of the U.S. Government to meet "fire with fire" in trade relations with the European Community [EC] nations and with Japan has in large part been governed by political and security considerations. Statements made by the U.S. Government at the recent summit of U.S. and Japanese leaders—and the appointment of the Secretary of State as chief of the President's Task Force on United States-Japanese trade—highlight this fact.

We have the assurance of government that the linkage of political and economic issues in these contexts serves both interests equally well. There is room for skepticism. The U.S. will be unable to aggressively pursue its economic interests so long as it insists that political objectives be served first.

CONSTRAINTS TO TRADE

Price instability in international markets is heightened by the use of import barriers and government export subsidies and by institutional arrangements such as government-to-government sales and state trading which distort free market trends. Such tools have generally been used to protect domestic economies by means of income transfer. The net result of such policy has been the export of price instability.

Nations such as the United States, which follow policies generally tailored on free market principles, bear a disproportionate burden of adjustments dictated by free market forces. Producers in these countries suffer as a result of price volatility and market disruption. The world economy suffers through the loss of efficiency and benefits of comparative advantage. The United States has been at the forefront of efforts to improve free market conditions through the lowering of constraints to trade. Nevertheless, majority of the world's agricultural trading nations continue to employ policies which run counter to trade liberalization.

Recent data prepared by USDA and submitted to the Senate Committee on Agriculture Forestry, and Nutrition confirm this finding (tables attached). The USDA summarized leading examples of such unfair trade practices as follows:

Argentina. Argentina's primary tool for increasing or decreasing exports is an export reimbursement (called a reembolso) or an export tax. The rates and product coverage change frequently. These tools are used to encourage domestic processing and export of high value goods. Prime examples are encouragement of vegetable oils (soya, sunflower) rather than the beans and seeds, and of leather goods rather than of cattlehides. Apple juice subsidies have also been frequently cited by the trade. In times past, Argentina has subsidized wheat sales but only on a very limited basis. In recent years, Argentina has not subsidized its wheat exports but does discount its posted market prices in order to sell its surplus.

Australia. The Australian Wheat Board [AWB], a marketing board organization, provides extended payment terms to certain markets. The Export Finance and Insurance Corporation of the Australian Government provides export credit insurance to the AWB.

Australia also markets its wheat through the marketing board, but as a rule has not subsidized the sale of wheat into the export market. As a result of a record wheat crop last year of 22 million tons, Australia has undertaken an aggressive marketing campaign and has increased its credit guarantees for wheat purchases to $700 million. Previously, Australia emphasized cash markets. In addition, about 5.5 million tons of last year's crop was damaged by wet weather. The Australian Wheat Board [AWB] has sold a good portion of this in the form of feed wheat. However, much of this wheat is actualy intended for human use: for example, approximately 500,000 tons of the offgrade though millable wheat has been sold to Bangladesh for human consumption. Other sales have been made to Mexico and South Korea. Australian sales of damaged wheat, much of which will be utilized for human consumption, have the potential for displacing U.S. wheat and coarse grain exports in numerous markets.

Australia also has underwritten apple and pear exports, and underwrites sultana production to guarantee a minimum return. Australia provides a rebate on sugar exports, which varies with the world price of sugar and reached A $142.50 (US $157.89) in February 1983.

Austria. Payments are made for the export of slaughter cattle and beef to certain destinations; in 1983 they totaled 480.1 million Austrian shillings (US $26.7 million). Austria has a coresponsibility system with the grain industry to aid export sales, and an intervention system for bread grain financed by the Government.

In October, 1983, Austria signed a contract with the U.S.S.R. for delivery of 244,000 tons of wheat and barley at a subsidy of about $68 per ton. Austria is also under agreement with East Germany to supply 350,000 tons of grain annually at what is believed to be subsidized prices.

Brazil. The Government of Brazil provides a credit premium on exports of "industrialized" products. At present the nominal rate is 11 percent of the adjusted f.o.b. invoice values. Credits in 1982 amounted to 188.9 billion cruzeiros (US $1,052 million). It also provides an income tax exemption for exporters under certain conditions; in 1981, tax exemptions totaled 53.1 billion cruzeiros (US $570 million). There is also working capital financing for export producers, which totaled 471.3 billion cruzeiros (US $2.6 billion) in 1982.

Pressed by the need for foreign exchange earnings, Brazil exported corn in 1982 at a price below the acquisition cost to Government. This amounted to a subsidy of between $5-$10 per ton. Indications are that at least 100,000 tons went to Spain, a market largely dominated by the United States.

Brazil and the European Community have profited especially by subsidies on poultry. U.S. exports of whole broilers dropped by an incredible 71 percent in 1982 to 38.9 thousand metric tons compared to 134.5 thousand tons in 1981, followed in 1983 by a 66 percent drop to 14 thousand tons. The value of whole broiler exports fell from $169.5 million 2 years ago to $17.5 million in 1983. Substantial declines in key markets like Egypt and Iraq accounted for most of this sharp decline. Through that time period U.S. suppliers were facing a $350-$400 per metric ton price disadvantage for whole broilers and 20 cents per dozen disadvantage for eggs in selected Middle East markets compared to subsidized prices from the EC and Brazil. Domestic broiler prices have risen now, reaching $1,350 per metric ton to which a minimum of $130 must be added for transportation and handling. With C&F quotes in the Middle East running in the

$900-$1,100 per metric ton range for broilers, the U.S. disadvantage is in a range of $350-$500 per metric ton.

Our competitors unload poultry meat at lower prices through a number of mechanisms. The French and other EC suppliers use export subsidies, which now run around $220 per metric ton, in addition to producer subsidies. From 1978 to 1983 production of whole chickens in France's three largest poultry firms increased by at least 52 percent, largely due to regional investment grants and subsidies for enterprises which stock, process, and distribute agricultural products. These subsidy programs can be combined so that as much as one-half of the investment for each poultry slaughtering plant may be subsidized. Virtually all of the production from these plants is exported.

Brazilian poultry exporters are eligible for subsidized financing and are exempt from corporate income taxes on export sales. Poultry producers receive rural credit loans at below market rates, and in the past have received subsidized corn if they could prove that they exported poultry.

The same subsidizing exporters are now encroaching on our markets for chicken parts in the Far East. Brazil has successfully test marketed chicken legs in Japan and is reportedly shipping parts to Hong Kong as well. In 2 years, these subsidizing exporters displaced almost 90 percent of U.S. export sales of whole chickens, and now they threaten to do the same to our sales of parts.

Canada. Canada subsidizes rail freight costs for certain grains, oilseeds, and products from the prairies, and products from the prairies provinces to the coasts under the Feed Freight Assistance Program and the Crow's Nest Pass Rate. It exports wheat and certain products through the Canadian Wheat Board [CWB].

The CWB is a quasi-private organization that lists prices of wheat sales on a daily basis but which frequently sells wheat to importers at prices below listed export levels, particularly during the last 2 years or so while the world wheat market has been very competitive. Another way in which the CWB subsidizes (or aggressively markets) its wheat sales is by signing a contract for a specific grade of wheat and then subsequently shipping the importer a higher quality grade of wheat but at the price level of the lower quality grade.

European Community. The European Community makes restitution payments (export subsidies) available to virtually all basic commodities produced within the EC and to the processed products made from them. 1982 and 1983 expenditures on export restitution payments totaled $5 billion and $5.4 billion, respectively. (See attached tables.)

The EC has been moving 15 million tons of wheat/wheat flour annually on the world market (outside EC member countries) for the last 4 years. None of the wheat sold by the EC would be competitive on the world market if EC exporters were not paid a sizable restitution on the order of $60 to $70 a ton. The amount of restitution on EC wheat exports varies depending upon the region of the world to which it is shipped (such as Middle East, Africa, Far East, et cetera). The EC has also heavily subsidized flour exports by as much as $70 per ton. This has directly contributed to the decline in commercial U.S. flour exports. For example, since the early 1960's, U.S. commercial exports of flour have fallen from around 750,000 tons to about 200,000 to 300,000 tons annually. The U.S. share of commercial flour trade has declined from about 25 percent to an average of around 9 percent. Due to export subsidies, the EC share has increased from about 25 percent to 80 percent.

The EC subsidizes barley exports by as much as $40 per ton. In 1983-84, 2.5 million tons were exported, with Algeria, Saudi Arabia, Spain, and the U.S.S.R. the largest markets. EC export subsidies on rice have been in excess of $200 per ton. In CY 1983 Italy, the major EC rice producer and exporter, exported about 440,000 tons of rice, with Middle Eastern and North African countries the largest markets outside other EC members.

West Germany has a clearing agreement with East Germany that provides a high subsidy for West German grain exports. In the agreement, both West and East German currencies are treated equally. However, because the West German mark is worth roughly four times its eastern counterpart, this arrangement represents a very substantial subsidy which is sufficient to more than equalize the lack of EC export restitution or subsidy on grain. For the first time, West Germany exported 150,000 tons of wheat and 50,000 tons of barley this spring to East Germany under this agreement.

France has an export credit system which combines private and public financing. Credit insurance is provided by Coface, a quasi-public organization. Credit may be offered which would not be commercially available, or with automatic access to official finance credits, thus being easier to obtain than regular commercial credits. (For comment on EC poultry subsidies, see discussion for Brazil.)

An illustration of a particularly troublesome situation is the effect of EC subsidies on U.S. apples exported to the Middle East. The EC has for many years provided a lucrative subsidy for apples moving to a number of destinations, including the Arabian Peninsula. The current subsidy is equal to 12.00 ECU's per hundred kilo, currently equivalent to about U.S. $1.79 per 42 lb. carton, or roughly about 15-20 percent ad valorem. This subsidy has been particularly annoying since the U.S. has established a reasonably good volume market, especially in Saudi Arabia. Although these Middle East markets have expressed a preference for American red varieties of apples, the EC subsidy is sufficiently attractive to swing some trade in favor of France, the principal EC participant in the subsidy program.

Finally, it should be noted that the EC provides processing subsidies for certain fruits and vegetables—currently from 10.5 cents/lb. to 49 cents/lb. for various tomato products and 4.7-7.9 cents/lb. for canned peaches. An export subsidy of 3.6 cents/lb. was established on May 31 for raisins shipped to North Africa and East Europe. The latter subsidy is separate from the assistance that was the subject of the U.S. GATT complaint.

Finland. Finland has a price compensation scheme which finances the difference between domestic and world prices for inputs of major agricultural raw material components. The product may then be exported. It also pays export dairies a refund to cover the difference between domestic and target milk prices. A similar system exists for eggs, beef and veal, pork, mutton, barley, and oats. This refund program cost 1,923 million Finnish marks (US $515.5 million) in 1980, 2,345 million Finnish marks (US $460.7 million) in 1982.

India. India has a cash compensatory support system to compensate for taxes and levies on inputs used in export production.

Israel. Israel markets citrus through a Citrus Marketing Board and its noncitrus products through Agrexco, a quasi-government agency. Products excepted from the Agrexco monopoly are avocados, poultry products, and flowers. The Israeli Government does not publish information on the budgets of these agencies.

Japan. Japan makes food aid shipments of rice. The deficit in the control account of rice, wheat and barley under the food control special account for fiscal year 1982 is estimated to be 526.3 billion yen (US $2.1 billion), excluding the deficit from the surplus disposal of rice. This figure includes domestic program measures on all three products.

Japanese producer prices for rice are much higher than world prices and in the past have stimulated production far in excess of domestic demand. In order to dispose of the surplus, export subsidies have, reached over $1,000 per ton. In 1980, Japan exported 795,000 tons. Since then, exports have declined because of bad weather and a rice diversification program. However, with the relaxation of the diversification program and the return of favorable weather, Japan could again be in a position to export.

New Zealand. New Zealand has a tax credit to encourage export market development, and a program of loans which convert to grants, based on export sales levels. All major agricultural commodities are marketed through governmental marketing boards.

Norway. Norway provides price supports on certain agricultural commodities. Exports of beef and veal, pork, cheese, barley, and eggs have to be subsidized in order to move at world prices.

Pakistan. Pakistan provides an income tax exemption of up to 55 percent for certain export income, and an export finance scheme which provides refinancing to commerical banks at zero interest against the latter's advances to finance exports of commodities other than rice, wool, hides, skins, and leather.

South Africa. The use of marketing boards aims to assure that domestic prices are not significantly influenced by world prices. As an example, the Dried Fruit Board, which handles raisin exports, pays the producers at prices calculated on a pool basis with money earned in the domestic and export markets pooled, and adjustments made on the basis of a crop's sales. The Tobacco Board may supplement export receipts with funds derived from levies on domestic sales. Similarly, South African losses on exports of chilled or frozen beef are financed by the Meat Board's Stabilization Fund.

The South African Maize Board subsidizes exports by purchasing domestic corn at prices well above world market prices and in turn selling corn for export at much lower prices. In the export expansion drive of 1982-83, the subsidy reached as high as $60 per ton. In that year, South Africa exported 4.7 million tons of corn. However, South Africa has not exported for the past two seasons because of drought. The United States has often filled the markets that South Africa was unable to supply. For example, the United States and South Africa were major sources for Taiwan's corn imports which total about 3 million tons annually. Because of South Africa's drought, the U.S. share rose from 65 percent in 1981-82 to 93 percent in 1983-84. The return of subsidized exports from South Africa could cut directly into U.S. markets.

Spain. Spain has a variety of measures to support the agricultural sector. Agricultural subsidies totaled 83.3 billion pesetas (US$902.4 million) in 1981, of which 3.0 billion (US$33 million) were for export refunds. Spanish export incentive programs include (1) a rebate of internal taxes on exports of virtually all commodities; (2) a revolving-type credit for working capital granted by Government banks to exporters; (3) Government-subsidized rate on credit for the prefinancing of exports; (4) an export payments insurance program with subsidized premiums (applies primarily to losses related to the cancellation of exports contracts); and (5) direct export subsidies which in 1983 were limited to tomato paste. The Government granted a 16 peseta (or 12 cents US) per kilogram restitution on paste exports to all destinations except the United States, with a limit of 33,000 metric tons of paste in the 1983-84 marketing year.

Sweden. Sweden provides price supplements for certain products, regional aids to production, income support, and export refunds; the total cost of these programs was 5.1 billion kroner in fiscal year 1981-82. Export refunds are paid on most agricultural products to cover the difference between domestic and world prices; they totaled 1.4 billion kroner (US$276.5 million) in fiscal year 1981-82.

Switzerland. Switzerland provides subsidies to cover the difference between earnings from the sale of cheese on domestic and foreign markets. It makes payments to export dairies based on the amount of milk use (in July 1982, payments ranged from 45 to 60 centimes (22 to 30 US cents) per kilogram of milk, depending on the product). In 1982, Switzerland paid subsidies of 30.8 million Swiss francs (US$15.2 million) to maintain exports of cattle; it also pays domestic subsidies for cattle, apricots, wine, grapejuice, and table grapes.

Taiwan. With burgeoning rice stocks Taiwan has pursued a policy since 1977 of sharply increasing its support prices while at the same time heavily subsidizing its rice exports. Mid-year rice sales were made in the region of $240-$260 per metric ton, compared with the Government's acquisition cost for domestic rice of about $700 per ton (unadjusted). Exports in 1983 rose to 550,000 tons. This prompted the Rice Millers Association to file a petition under section 301 of the 1974 Trade Act on July 13. After an investigation by USTR and consultations with Taiwan, an agreement was signed March 1, 1984, whereby Taiwan agreed to limit its sales to 1.375 million metric tons over the next 5 years. (Shipments in 1984 limited to 375,000 tons.)

The above provide some examples of the extensive use of unfair trade practices and is not intended to be a comprehensive listing. Among those commodities not mentioned is sugar, which may be the most impacted by unfair trade practices. One or more such practice is employed by essentially all sugar exporting countries. The cumulative effect of these unfair trade practices has created a world sugar market whose price reflects more a dumping ground than the cost of producing the commodity. If the use of unfair trade practices is permitted to continue and grow unchallenged, the world market for more commodities could become divorced from the economies of production, as has occurred for sugar.

The damage to U.S. agriculture created by unfair foreign competition is well reflected in the number of U.S. agricultural industries which have filed for relief by the U.S. government under sections 201 and 301 of the 1974 Trade Act (see attached).

The cost to the United States of such predatory trade practices, among other factors, is a declining market share for basic U.S. commodities (see attached).

The U.S. taxpayers bear the cost of U.S. government agricultural adjustment programs, the need for which would be lessened in the absence of foreign constraints to trade. In addition, the cost of foreign export subsidy programs is also tremendously unfair to taxpayers and consumers overseas (see attached).

Mr. JENKINS. Mr. Chairman, I yield such time as he may consume to the gentleman from North Carolina [Mr. NEAL].

Mr. NEAL. Mr. Chairman, I support this legislation.

Mr. Chairman, the Textile and Apparel Trade Enforcement Act is a jobs bill, pure and simple; indeed, a bill that would not be necessary if the President had been enforcing the current arrangement of negotiated quotas and we had not adopted the national Republican economic plan of massive budget deficits and the resulting run up in the value of the dollar.

The textile workers in my district now have nowhere else to turn. In North Carolina alone, 40 textile and apparel plants have closed or had permanent layoffs totaling 7,719 people last year. In the meantime, imports of textiles and textile products have grown to an annual rate of 19 percent over the past 4 years. During that same period, the U.S. market has grown at an average annual rate of only 1 percent. The textile, fiber, and apparel industry is North Carolina's largest manufacturing employer, providing jobs for more than 300,000 people. Nationwide, it employs more than 1 million Americans, and the economic condition of the industry affects millions more. But in the last 4 years we have lost about 200,000 jobs in North Carolina and South Carolina alone. If we do not act, the entire industry is threatened with extinction.

Aside from the fact that the administration is not enforcing the Multi-Fiber Agreement, its economic policy of record budget deficits has aggravated the textile import problem by inflating the value of the dollar. Industry experts attribute 20 to 30 percent of the increase in textile imports to the overvalued dollar. Adding insult to injury, the administration's representatives have been voting to build up the textile and apparel industries in other countries. Loans to Burma, Thailand, Argentina, Phillipines, Madagasca, Bangladesh, Colombia, China, Portugal, Swaziland, Zambia, and other countries have further subsidized United States textile competitors with United States taxpayer dollars, all with our own administration support.

I support free trade, but we can't have free trade until we have fair trade. I strongly suppport this bill because it will bring fair trade, and hence a level playing field, not a U.S. advantage, to an embattled industry.

I am confident that I speak for thousands of North Carolina textile workers in thanking Congressman ED JENKINS, chairman of the Textile Caucus, and others in the textile caucus for their leadership on this bill.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from North Carolina [Mr. ROSE].

Mr. ROSE. Mr. Chairman, you know, it a crying shame that this legislation is necessary at all. It is a crying shame that this administration did not use the laws that it already has on the books to keep from seeing the textle industry in America decimated.

A few minutes ago my colleague from Oregon was talking about: Who has the right to made the wheat growers of Oregon the target of the backlash that he thinks will come when this bill is passed? Well, I could ask him and others who think the same way: Who has the right to send shirts into my district in my stores that sell for $18, $20, that cost $4 to make in Hong Kong when it costs over twice as much to make that shirt in American textiles?

Who in the world are we kidding with this legislation? We are out to save the jobs of American textile workers. They are going down the drain.

Mr. Chairman, I urge you to support this bill.

Mr. DUNCAN. Mr. Chairman, I yield 5 minutes to the gentleman from North Carolina [Mr. BROYHILL].

Mr. BROYHILL. Mr. Chairman, earlier we were debating over import penetration figures, and I think the gentleman from Florida was combining apples and oranges and tangerines and everything else. But the fact is that when you take finished apparel that you find on the retail shelves, that the import penetration of those items is well over 50 percent. All you have to do is go over to any retail floor today, and in fact you can hardly find any domestic-made material.

Wool sweaters, for example, about 4 sweaters are coming in for every 1 that is made in America; cotton dress shirts, 2 coming into this country from abroad for every 1 that is made in this country. Talking about manmade fiber gloves, it is about 2½ to 1 coming in for every 1 that is made in this country. And it goes on and on down the list.

The gentleman from California was trying to say there were no losses of textile jobs. I do not know what kind of figures he was using. In the Carolinas in the last 4 years, on the average, once every 11 days there has been a textile-apparel plant closed. In the Carolinas over 100,000 textile and apparel workers are out of jobs who were working a decade ago. When you multiply this around the country, it is far, far greater than that.

I think all we are talking about here is a practice and a trend that is displacing American jobs. And that is the issue here. It is jobs.

There is no doubt about this figure, I just saw it and read it from the Commerce figures: 10 billion square yard equivalent of imports last year, and that is over double what it was 4 years ago. We are told by the economists that the cost in jobs is about 1 million jobs, lost job opportunities, as a result of those imports coming in here; 100,000 lost job opportunities per billion square yard equivalent.

The policies that we are following are very costly to this economy.

Mr. Chairman, there are 2 million men and women who work in this great industry, they work hard, and they make good products. All they are asking for is our help. I know every weekend I go home and walk the streets in my district, in the stores, in the mills, and everywhere I go I meet the people who are employed in this great industry. They come up to me, and they look at me, and they speak to me with pleading in their eyes: "What are you going to do up there in Washington to help us? Can you help us save our jobs? We need help." One-fourth of the textile jobs in North Carolina are gone, one-third of those in South Carolina. They are concerned that theirs is going to be next.

They are looking to us and this legislation as the only hope that they see of keeping their jobs.

Mr. Chairman, we have become a debtor nation. We have a textile and apparel trade deficit of $20 billion. If this bill is not passed, if something is not done, that figure is going to be peanuts. It is going to increase drastically. I think the time is running out.

I am proud of the people that work in this great industry, and they are proud of what they are doing. All they want is a chance to work and produce and to make American made products, quality products that Americans can purchase and use. They are looking to us to help alleviate this very, very serious problem.

I thank the Chairman.

Mr. Chairman, I yield back the balance of my time.

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Washington [Mr. BONKER], chairman of the Export Task Force.

Mr. BONKER. Mr. Chairman, as this debate has revealed, America's textile and apparel industries are going through very difficult times. Thousands of workers throughout the country have seen their jobs disappear forever. Textile mills that once supported entire towns have permanently closed their doors. The economic and social costs in these communities can be staggering. I know the timber and wool products towns I represent in the Northeast are going through the same wrenching experience.

There can be little doubt that surging imports have contributed significantly to the industry's decline. According to industry spokesmen, import volume has increased almost 30 percent per year since 1980, while domestic demand has grown at an annual rate of only 3 percent. This is not just a sector or regional problem. The textile industry, like the machine tool, auto, and leatherwork industries, is of national importance so Congress can no longer ignore this tragic phenomenon.

In searching for solutions, however, we must take care not to offer a cure that may be worse than the disease. I can appreciate that the Textile and Apparel Trade Enforcement Act is a genuine effort to relieve the suffering of thousands of Americans whose livelihoods are seriously threatened. But we must keep our national perspective and be fully cognizant of the causes of the problem as well as the far-reaching implications if we act hastily on this measure.

Few question that the principal cause of last year's $137 billion trade deficit is the overvalued dollar. Since 1980, the dollar has increased in value on foreign markets by over 40 percent, serving as a heavy tax on U.S. exports and a costly subsidy of imports. The effects of the soaring dollar have not been limited to textiles and apparel; every sector of the economy has felt the pain of this imbalance.

The fact is that workers in many other industries have suffered just as much as those in textiles and apparel. For example, from 1980 to 1984, employment in textiles declined 10 percent, and employment in apparel fell 5 percent. During this same period, employment dropped 20 percent in the machine tool industry and 26 percent in consumer electronics. In my home State of Washington, employment in the wood products sector declined 16 percent.

These, too, are vital industries, yet H.R. 1562 would do nothing to help them. To the contrary, restricting textile and apparel imports would strengthen the dollar, thereby worsening the plight of these industries. Foreign retaliation in response to the severe restrictions envisioned by the bill would further reduce exports, which remain well below their 1980 level. It is unfair and irresponsible to protect one industry at the expense of another. I am sorry to say that this is exactly what H.R. 1562 would do.

The State of Washington provides a good example of what is at stake. Washington is one of this country's leading exporters of manufactured goods and agricultural products. The fastest growing overseas markets for Washington's exports are located around the Pacific rim, which happens to be the principal target of H.R. 1562. Many of these countries have threatened retaliation in the event of this bill's passage. We take this threat seriously.

One Pacific rim market is of particular interest to me and my State. The People's Republic of China is in the middle of a dramatic economic and social transformation, which is opening this enormous market to American traders for the first time since World War II. A short time ago the PRC was a hostile adversary and posed a serious threat to our security and geopolitical interests in the world. Today she is an important friend and an increasingly important trading partner. The State of Washington profits greatly from our growing trade with China. H.R. 1562, however, directly threatens this relationship and the American jobs that depend on it by slashing the PRC's textile and apparel exports to the United States by 60 percent. At the same time we are restricting technology transfers to that country and there is a good chance that Congress may disapprove the pending bilateral nuclear agreement. If all this occurs, it will be a serious affront to a country that is moving in the right direction and could be a major export market for our products in the future.

The proponents of H.R. 1562 suggest that their bill is simply an attempt to enforce our legitimate rights under the Multi-Fiber Arrangement and existing bilateral agreements. Anyone familiar with the MFA will tell you, however, that this is just not so. In the first place, the MFA does not cover all fabrics and product categories. Second, the agreement calls for 6 percent annual import growth—not the 1-percent growth proposed by H.R. 1562 for major textile and apparel exporters. Moreover, the stated purpose of the MFA is to expand textile and apparel trade in an orderly fashion to "further the economic and social development of developing countries and secure a substantial increase in their export earnings from textile products."

H.R. 1562 would not enforce the MFA, it would blow it apart.

This is not to say that the MFA is perfect. As a consequence of this administration's indifference, the agreement is not being adequately enforced. The existing quota system could be significantly expanded through negotiations to include more fabrics and product categories. Greater limitations on quota flexibility could be imposed by restricting the use of carryforward and swing.

We can and must work within the parameters set by the MFA to restore order to textile and apparel markets.

The substantial support and progress of H.R. 1562 is a testament to the desperate plight of many American workers. I believe we must address this problem by taking positive steps to improve our economic competitiveness, including concrete measures to

reduce the value of the dollar and remove unfair foreign barriers to American exports. We must also provide the necessary resources for firms and workers to adjust to the realities of a global economy. Unfortunately, H.R. 1562 would do nothing in any of these areas.

We know that the world trading system is in disarray, and that we must act aggressively and swiftly to restore order. What we must not lose sight of is the leadership role which the United States plays in this process. If we are to insist on fair treatment on the part of others, we can demand no less of ourselves.

Mr. Chairman, I ask my colleagues to consider the issue of fairness when considering the Textile and Apparel Trade Enforcement Act. Are we being fair to ourselves? Are we being fair to our trading partners? Are we being fair to other domestic industries who are not getting similar protection? Are we being fair to those who will inherit the trading environment we create? I am convinced that those of you who give careful thought to these questions will join me in opposing H.R. 1562.

Mr. Chairman, we should not pretend we are in the 1930's and H.R. 1562 is not Smoot-Hawley. But it may well be a step in that direction. If this measure becomes law, it will be the opening shot in a trade war no one can win.

In closing I would also like to submit for the RECORD a letter from the Honorable Booth Gardner, Governor of the State of Washington, in opposition to H.R. 1562:

STATE OF WASHINGTON,
OFFICE OF THE GOVERNOR,
Olympia, WA, October 1, 1985.

Hon. DON BONKER,
U.S. Representative, Washington DC.

DEAR DON: I am writing to ask that you personally urge your colleagues to defeat the "Textile and Trade Enforcement Act of 1985." Passage of this legislation would have a chilling effect on the economy of the Pacific Northwest and, in the not too distant future, on the entire nation.

In our state of Washington, curtailed textile exports by China, Japan, Korea and other nations would translate quickly into reduced purchasing power—and thus reduced imports of Washington agricultural, wood and other products. This does not even take into account likely retaliation that would further reduce our access to foreign markets.

Furthermore, enactment of this bill would severely affect apparel importers and the trade-related service industry. We must remember that imports, as well as exports, create U.S. jobs.

Protectionist reaction to the decline of key, basic U.S. industries will ultimately protect no one. No Member of Congress should be lulled into believing that enactment of protectionist legislation will aid our national economy or serve to reduce our trade deficit. History should have taught us our lesson in this regard.

Adverse effects from passage of this legislation are not limited to the Pacific Northwest. One need only consider the agricultural industry. At a time when farmers throughout the nation are struggling, we must recognize that textile-exporting nations such as Japan import more than half their food, and that need is growing. But the United States is not the only nation that can provide agricultural goods. China is also a growing market for our agricultural industry. The list goes on.

There are responsible measures the Congress and Administration can take to alleviate our economic and trade woes. The first is to reduce our staggering deficit. The second is to explore additional policies that would serve to strengthen foreign currencies in relationship to the dollar. We have clear, statistical evidence that our export declines parallel the peaks of the dollar.

The third is to work with industry and labor to make U.S. products more competitive both domestically and on the export market. We would far better serve industry by working to help it be more competitive than by shielding it from competition.

The fourth is to negotiate increased access to foreign markets. There are roadblocks in markets where U.S. firms otherwise would be competitive. These must be eliminated.

I commend your continued work on this and other crucial trade and economic issues. Please advise me if I can be of assistance in this matter.

Sincerely,

BOOTH GARDNER,
Governor.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from Washington [Mr. MILLER].

Mr. MILLER of Washington. Mr. Chairman, what it all comes down to, of course, this bill will reduce trade, not raise it. We have heard distinguished speakers from North Carolina, South Carolina, Georgia, talk about how they need help. I understand that. They want help for their workers. But do not ask us to help your workers by taking away dockworkers' jobs in New York, California, or Florida.

You want help for your businesses. But do not ask us to help your businesses by taking away export opportunities for our farmers across the Midwest, for our airplane manufacturers, for our high-technology manufacturers.

You want help for your States, but do not ask us to do that by sacrificing our ties to the Free World, particularly the Free World nations in Asia.

We can help you. We can help you by cutting the budget deficit and reducing the value of the dollar, coordinating our trade policy, enforcing dumping laws, giving assistance to displaced workers. That is the way to do it, by increasing trade, not reducing it.

□ 1400

Mr. DUNCAN. Mr. Chairman, I yield 1½ minutes to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Chairman, I rise in strong support of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985. I thank the gentleman from Georgia [Mr. JENKINS] for introducing this legislation, which I have cosponsored, restoring sanity to a trade situation whereby in 1984 textile and apparel imports exceeded exports by $14.8 billion, representing 12 percent of the total U.S. merchandise trade deficit.

I would like to state at the outset of my remarks that I am not an advocate of protectionism and that this legislation is not, as many have coined H.R. 1562, a protectionist bill. Indeed this legislation implements the objectives of the Multi-Fiber Arrangement [MFA] to which the United States is already a partner, by simply requiring effective enforcement of import levels set forth by that agreement. H.R. 1562 establishes permanent quotas for imports of all textiles and textiles products from all countries except Canada and members of the European Economic Community. Different formulas apply to determine permissible import levels in any specific product category, depending on whether the product is from a major exporting country or a smaller exporting country; whether it is wool, import-sensitive, or other product; and whether it was subject to a growth rate of less than 6 percent under the terms of an existing bilateral textile agreement.

Under H.R. 1562, 1985 imports from the 12 major exporting countries are restricted to 1 percent above what 1984 imports from those countries would have been had imports from 1980 to 1984 grown at a rate of 6 percent per year as recommended by the MFA. Import growth is then limited to 1 percent in subsequent years. For smaller exporting countries, import growth in 1985 is restricted to 15 percent above the actual levels of 1984 imports from those countries. Import sensitive products are restricted to 1 percent growth above actual 1984 levels. Import growth in future years is limited to 6 percent annually except that import-sensitive products are limited to 1 percent annual growth.

As a cosponsor of the Textile and Apparel Trade Enforcement Act, I am pleased to note this legislation is consistent with the basic objectives of the MFA:

To achieve expansion of trade, and the reduction of barriers to such trade and the progressive liberalization of world trade in textile products, while at the same time ensuring the orderly and equitable development of this trade and avoidance of disruptive effects in individual markets on individual lines of production in both importing and exporting countries.

Members on both sides of the aisle, and policymakers on both sides of the ocean have joined their voices to demand a level playing field whereby all trading partners might benefit equally. I would maintain that H.R. 1562 is the vehicle and now is the time.

The U.S. fiber, textile, and apparel industries together comprise one of the Nation's largest industrial employers, engaging, 1 out of every 10 Americans in manufacturing. I think it is important to note that these industries are also the largest employers of women and minorities. Recent studies show that in 1984, 46,000 domestic textile and apparel jobs were lost to imports. To date in 1985, we estimate that 66,000 American jobs in the same industry have also been eliminated. The ravages caused by the high incidence of textile imports can be felt across this Nation.

I recently had an opportunity to appear before the congressional textile caucus, which, under the fine leadership of Chairman JENKINS, heard testimony from textile and apparel workers and manufacturers from across the Nation on the disastrous effect imports have had on their livelihoods. Among those participating in the hearing were two apparel manufacturers from my congressional district in New York. Both Murray Merle of Tarrytown Garment Co., Tarrytown, NY and Warren Levin of New City Sportswear, Haverstraw, NY told the textile caucus of the improbability that our domestic apparel and textile industries can remain competitive given the tremendous wage differential between this country and many of our trading partners. Indeed plant modernizations, emergency loans, and other quickfix solutions, are not what these or our other ailing industries need. Enforcement of our current trade agreements is a step in the right direction. Accordingly, I urge my colleagues to support the adoption of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985.

Mr. JENKINS. Mr. Chairman, I yield such time as he may consume to the gentleman from Georgia [Mr. FOWLER].

Mr. FOWLER. Mr. Chairman, our country is facing a major economic crisis—record trade deficits. And it's time we took action. This year we are facing a record $150 billion trade deficit. We are losing 3,500 jobs a day to unfair foreign trade. Thousands of hard-working Georgians are losing their jobs. Our children's future is being threatened as our industries are closed down and our good jobs are shipped overseas.

For the first time in this century, the United States is a debtor nation. Today unfortunately our major export is jobs—over 4 million in recent years. The U.S. trade deficit is like a hemorrhage of red ink—from $28 billion in 1981 it has increased fivefold to $150 billion this year.

The first priority for Congress this fall is to take action to restore fair trade and force other countries to open their markets to American products, especially agricultural products. American workers and American farmers are the most productive on Earth. We can compete with anyone but only if the rules of the game are fair. There are those in Washington who are still living in a dream world—they call for free trade but there is no free trade. We are the only country in the world clinging to that illusion. We keep trying to play the trade game by the old rules while every other trading nation has figured out that the game has changed. They're scoring touchdowns while we continue to lose yardage.

The tragedy is we have no real trade policy—no policy to promote agriculture exports and no policy to prevent unfair foreign competition. We are like a great fleet meeting the enemy on stormy seas. The admiral simply says do your own thing—no battle plan—no policy and the other side with a carefully planned order of battle is sinking our hopes for the future. That's no way to run a navy and that's no way to run this Nation's economy.

Everytime I look in the face of a Georgia textile worker or a Georgia farmer and they ask, why are we going out of business? Why are we losing out, we're working as hard as we can—I get angry. It's not their fault that 14,000 textile jobs have left Georgia, that thousands of farmers are facing bankruptcy. It's not their failure—It's a failure of their Government. A failure to stand up for their interest. A failure to protect their future. I think it's time that we put Government back on the side of hard-working Georgia families.

Recently I was saddened to learn that the President had overruled his own International Trade Commission and refused to protect American shoe workers. Unfortunately at his press conference this week, he again refused to face up to the threat of unfair foreign trade.

Well, I believe it's time to take action. I am going to ask the Congress to act immediately to restore fair trade and to develop aggressive export policies. I'm going to be working hard to assure that we pass the Textile and Apparel Trade Enforcement Act that I am sponsoring along with my Georgia colleague, ED JENKINS. And I'm going to be working with my colleagues in Congress to develop other legislation to stop unfair foreign trade and encourage export of American products.

I believe there is a value to developing a "barter system." I think it's time to say to our trading partners if you want to sell a billion dollars' worth of products in America then you should buy a billion dollars' worth of American products.

In addition, we need to reduce the huge budget deficits that are keeping interest rates too high and overvaluing the dollar compared to other currencies. Right now, the overvalued dollar means a 20 to 30 percent surcharge on every American product we try to sell overseas. I'm going to push the administration to take immediate action to correct this currency imbalance.

We must act now. We are not just talking about money or dollars when we talk about a $150 billion trade deficit—we are talking about our fellow Americans, our fellow Georgians—hard working people who are being thrown out of work because of a failure of their Government. We are talking about what kind of future our children will have. I'm not going to let our Government turn a cold shoulder to their suffering.

It's time to act—so that we can assure a brighter future for all Americans.

Mr. JENKINS. Mr. Chairman, I yield such time as he may consume to the gentleman from South Carolina [Mr. TALLON].

Mr. TALLON. Mr. Chairman, I rise in the strongest support for H.R. 1562, the Textile and Apparel Trade Enforcement Act.

Mr. Chairman and my colleagues, we cannot sustain a domestic textile and apparel industry in this country if the growth in imports continues at the level of the past 4 years. Imports have racked entire communities dependent on textile and apparel manufacturing plants, and unless this bill is signed into law, many of the remaining textile and apparel plants will be forced to close.

When these plants close, there are often no options for the hard-working people employed in these plants. You can't sustain very many service jobs if there is no industrial infrastructure. Tragically, thousands of proud textile and apparel workers who lose their jobs because of imports are faced with no alternative to unemployment.

Mr. Chairman, existing mechanisms for ensuring balanced trade have failed. The surge in imports since the 1981 Multi-Fiber Arrangement negotiations make this absolutely clear. We must develop an approach for restoring our domestic textile and apparel industry. H.R. 1562 is a carefully crafted bill to ensure fair competition and balanced growth for textile and apparel imports.

Mr. Chairman, the textile and apparel industry is in crisis. They are now looking for aid from their representatives. On behalf of the millions of Americans dependent on the textile and apparel industry, I urge my colleagues to overwhelmingly support the passage of H.R. 1562 into law.

Mr. JENKINS. Mr. Chairman, I yield such time time as he may consume to the gentleman from Delaware [Mr. CARPER]

Mr. CARPER. Mr. Chairman, I rise in support of this legislation.

One out of every ten manufacturing jobs in this country is in the textile industry. Textile imports have surged by 65 percent in the past 2 years alone, and 300,000 workers have lost their jobs in the 1980's, largely as a result. When that happens in an industry as important to our economy as the textile industry, our Nation simply cannot afford to ignore its consequences.

While I plan to vote for this textile bill, I don't want to suggest that it represents a final definitive solution to our problems in this industry or our overall trade problems. It doesn't.

This measure is a stop-gap measure that buys time and enables us in government, along with management and labor in the textile industry to make the fundamental changes that will provide long-term solutions.

We must reduce the Federal budget deficits to continue reducing our overvalued dollar; continue modernizing our textile facilities to further improve their efficiency while maintaining quality; and take steps to ease the transition of displaced textile workers into other jobs through retraining help and relocation assistance.

The President simply must use the trade reciprocity powers we've provided him to force other nations to remove most of their trade barriers to U.S. products.

Finally, we as American consumers simply must begin to look at the labels of the clothing that we buy. If American-made goods are comparable in quality and price to foreign apparel, we've got to start buying products made by American men and women.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania [Mr. GAYDOS].

Mr. GAYDOS. Mr. Chairman, H.R. 1562, the Textile and Trade Enforcement Act, sets permanent quotas for imports of all textiles and textile products from all countries except Canada and certain members of the European Economic Community.

I rise to wholeheartedly support passage of this bill because I know it is the only way that works.

As chairman of the executive committee of the steel caucus, I can speak with knowledge about the advantages of quotas as a means for heading off unwarranted and unfair imports.

Just a few years ago, when this administration agreed that imports of three specialty steel products—stainless steel bar and rod and tool steel—were unfairly damaging the industry, it set quotas on those products.

The results coming in from the industry vindicate the action. Shipments from the domestic industry of those three products were 110,000 tons in the first 8 months of 1983, when the quotas were instituted, but surged by more than 60 percent for the first 8 months of 1984 to 173,000 tons. At the same time, imports of those products dropped from almost 75,000 tons to 53,000 tons in comparing the first 8 months of 1983 to the same period in 1984.

By comparison, domestic shipments of specialty steel items covered only by current duties, but not quotas, for the same periods in 1983 and 1984 increased by about 20 percent and imports surged from 59,000 tons to 99,000 tons, an increase of just under 70 percent.

This is a clear example of how quotas work and the way they help American industry, whether it is steel, specialty steel, or textiles.

An article in the October 3 edition of the New York Times shows what happens when this country takes action in the arena of international trade. Harley-Davidson, America's premier motorcycle manufacturer, suffered heavy losses in 1981 and 1982, before the administration imposed tariffs at the 50-percent level on imports of large motorcycles.

Today, given some time to rebuild, Harley-Davidson is coming back. Even though the tariffs are on a sliding scale—down to 24 percent this year, Harley has had time to retool its products, is increasing its share of the American motorcycle market, and is showing a minimal profit. Just think what firm quotas for a set period of time would do for them.

This bill provides only for quotas on textiles and textile products, but its impact is more far-reaching. As the American textile industry improves and grows, it will need newer and more machinery and that means that the domestic steel industry, too, will get a boost because of the steel in that machinery.

So, Mr. Chairman, we must recognize that helping one industry is only a part of the picture. While we assist one industry and save American jobs in that field, we are also giving various other industries an opportunity to prosper and grow and to keep other American men and women on the job.

I hope every Member of the House and the steel caucus will recognize the importance and value of this bill and vote for it.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from North Carolina [Mr. COBEY].

Mr. COBEY. Mr. Chairman, I rise in support of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985. I want to address one point of concern to me. The administration claims that consumers would pay higher prices with passage of this legislation, costing them some $14 billion a year. This is totally and completely at odds with the results of an analysis done by a private research firm. I do not know how the administration came up with the $14 billion estimate, but it is known that the United States has lost 1 million job opportunities because of the current import level which equates to a $40 billion loss to our gross national product.

Data Resources Inc. did the private research.

If this textile bill does not pass, the growth of imports will wipe out most of the domestic apparel chain of production by 1990. We have already lost several plants in my district in North Carolina to these imports. Here are some things to look for if this bill is not passed today:

Unemployment will be created for over 1.8 million Americans. An increase in the Federal budget deficit by $24 billion. Consumer disposable income will be lowered by $19 billion. The GNP will be lowered by $40 billion, and we will have only a minimal effect on price levels.

Mr. Chairman, if we do not have this legislation, the cost to the consumer and to the textile industry will be devastating.

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. A question has arisen, and the Chair would like to clarify a point, because now we are nearing the end of the debate.

It is the Chair's opinion that the debate will be closed, because of his seniority status and his subcommittee chairmanship, by the gentleman from Florida [Mr. GIBBONS] to whom one-half the time was yielded. The Chair wants all the Members to have that understanding.

Mr. DUNCAN. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Chairman, I asked for this time because a number of speakers have commented on the administration's trade policy, indicating that there was no trade policy or that what there was was flabby and unequal to the task of expanding U.S. trade interests in foreign markets.

If we look back on the difficulties of this year, we recall that a very unusually effective U.S. Trade Representative, Bill Brock, was promoted to another Cabinet post spot. That left us a 60-to-90-day period in which the principal trade adviser to the President's position was left vacant. However, subsequent to the appointment of Mr. Clayton Yeutter, the present U.S. Trade Representative, there have been a number of actions taken on the trade front.

The President and the administration have assumed a far more aggressive pose, and they have laid down both a legislative and administrative program to be far more aggressive in claiming U.S. markets abroad and in protecting U.S. interests from unfair or subsidized incursions from producers abroad.

In addition, yesterday, a number of Republicans, well over 100, introduced a new Trade Partnership Act which I hope committees of the Congress will work on and take those parts which are meritorious—hopefully, the whole act—and pass, which will I believe, help forward U.S. trade interests.

The President, as some of you recall, had a television speech in which he outlined, at least skeletally, his program, beginning with the self-initiated 301 cases and going through the new negotiations for a GATT round.

My judgment is the President has embarked on a new and more aggressive program. I hope the Congress will be sympathetic to it.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Alabama [Mr. NICHOLS].

Mr. NICHOLS. Mr. Chairman, too often the bureaucratic jungle of Washington hinders many people from getting a clear view of the problems that exist "beyond the beltway," or should I say "in the real world." Too often our opinions are formed from what we read in the newspapers or hear from the so-called experts in a given field. But unfortunately, those experts seldom experience the real world problems first hand.

Today, this body will vote on the Textile/Apparel Trade Enforcement Act of 1985. As a Member of Congress whose home county has 13.6 percent unemployment and who has seen first hand the battle that is currently going on to sustain the American textile industry, let me report to my colleagues the severe casualties that I find from foreign made textiles flooding our markets.

Just this year in my home State of Alabama:

Avondales Mill in Sycamore, closed, and 225 jobs lost.

The Crompton Co. in Leesburg, closed, 481 jobs lost.

Adelaid Mills in Anniston, closed, 230 jobs lost.

Dan River Mills in Benton, closed, costing 250 jobs.

Opelika Manufacturing, closed, still 200 more jobs lost.

Mr. Chairman the list goes on and on.

During the past 12 months more than 12,000 Alabamians have lost their jobs to foreign textile and apparel imports, not to mention the more than 1 million Americans nationwide during the past few years.

Mr. Chairman, these are the cold, hard, sobering statistics reflecting the repercussions of foreign imports. As we debate the textile bill today, millions of American jobs along with the important textile sector of our industrial base are on the line. I ask your support of this legislation.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from Oregon [Mr. WEAVER].

Mr. WEAVER. Mr. Chairman, speaking for my constituents in southern Oregon, I rise in strong support of this legislation. If we do not enact legislation such as this, the wages of our workers in this country will be driven down to the minimum wage or below to compete with cheap foreign labor. We simply must protect the jobs in our Nation. I only wish this legislation included restrictions on Canadian lumber imports so the mills in my district could go back to work. Virtually, today I have almost no mills operating in the greatest timber district in the United States.

Mr. GIBBONS. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. LEVINE].

Mr. LEVINE of California. Mr. Chairman I thank the gentleman for yielding time to me, and I rise in opposition to the bill.

Mr. Chairman, in recent months, trade has become a dominant issue on Capitol Hill and around the country as Members of Congress and their constituents have focused on the devastating economic and social impact of the $150 billion trade deficit. Industries which cannot compete in the world market are forced to close down, battered by foreign imports and unfair trading practices and burdened by budget deficits which create an overvalued dollar and make U.S. exports prohibitively expensive abroad. Thousands upon thousands of people are losing their jobs. Few are left untouched.

Against this backdrop, momentum for Congress to do something on the trade problem has reached a fever pitch. We currently face over 300 bills ranging from higher tariffs or quotas on roses and waterbeds to retaliation against Japan and other nations if they do not open their markets to American products. Whatever the merits of the different bills, they reflect legitimate frustration with the trade deficit and with the Reagan administration's apparent indifference to the problem. Indeed, it appears to many that the recent administration trade initiatives were merely a reaction to congressional determination to take the lead on trade.

Regardless, the time has come for all of us to focus on constructive solutions. Clearly, something must be done to help solve this country's trade problems. However, it must be the right remedy.

We have before us today the first of many bills which we might consider in the months ahead as we tackle the trade issue. H.R. 1562, the Textile and Apparel Trade Enforcement Act, is designed to counter the crisis in the textile industry. Twelve percent of the total U.S. merchandise trade deficit stems from the textile trade imbalance. American textile producers suffer from the high dollar, from unfair trading practices abroad, and from a flood of imports. Existing trade agreements such as the Multi-Fiber Agreement [MFA] have not stemmed this tide—300,000 jobs have been lost in the textile industry since 1979. Because the industry employs about 1.8 million workers—almost 10 percent of all manufacturing jobs in the United States—the impact of its problems on the general economy is potentially very serious. Moreover, we must not forget the historical importance of the textile industry. It has epitomized the melting pot for decades, giving newly arrived foreigners a chance to earn a living. To this day it continues to employ many new immigrants, and remains an important source of jobs for many people.

Clearly the textile industry needs and deserves our help. However, H.R. 1562 is the wrong medicine for this industry's ills and for the trade ailments that beset the United States. This bill, like many bills pending in various committees, addresses the symptoms and not the causes of the trade deficit. It does not deal with the budget deficit or resulting strong dollar, which economists estimate cause 80 percent of the trade imbalance. While it will save jobs in the textile industry, it will likely result in a corresponding loss of jobs in other industries. It will raise prices and restrict consumer choice, an inevitable byproduct of quotas. It invites retaliation from our trading partners, resulting in lessened foreign market access for American goods abroad. This explains why many U.S. firms that export heavily oppose it, for the 12 nations principally affected by this bill purchased $53 billion worth of U.S. products in 1984.

I reject argument that other countries, for fear of losing access to the huge U.S. market, will not retaliate against restrictive U.S. measures. Just as Japanese trade practices have bred hostility toward Japan among some in this country, restrictive and retaliatory American trade measures will likely breed similar anti-American sentiment abroad. Such measures may enflame nationalist feeling to a point where retaliation to U.S. policy becomes inevitable and overrides economic considerations. Let us not underestimate the potential influence of nationalist fervor. Witness what has happened in the United States in the face of rising imports from Japan. My colleagues from California Mr. MATSUI, and Mr. MINETA, note in a recent Wall Street Journal article that anti-Japanese feeling today rivals that of the 1940's. Sadly, an anti-Asian backlash would not only affect our trading relations with Japan but could damage overall relations with some of our closest allies.

There is an additional foreign policy component to consider. Allies like Thailand, Taiwan, and Brazil need U.S. markets in order to earn hard currency to pay off their debts. Brazil in particular is not a country that can survive an increased debt burden. Yet by reducing market access, the bill makes it harder for these and other developing nations to industrialize and to enjoy economic growth and stability, stability that is certainly in the long-term U.S. national interest.

Finally, the bill seems to violate the MFA, GATT, and the various bilateral textile agreements to which we are a party. Nothing in any agreement allows the United States to unilaterally roll back textile imports. If the MFA has been inadequately enforced, and has not succeeded in keeping down textile imports to mandated levels, we should change it. It comes up for renegotiation next year. Industry specific problems should be dealt with at that time.

In sum, H.R. 1562 will not solve the concerns and problems of the textile industry, as valid as many of them are. It will invite retaliation, it will likely raise prices and, most significantly, it will have negative repercussions in the international economic arena, with ramifications for many of our allies. Nobody knows where a trade war will end, or how high a cycle of retaliation will spiral.

Mr. Chairman, there is no question that the trade deficit is a serious problem, that

jobs are being lost to imports, and that American producers of many products fall victim to unfair trading practices abroad. Everyone wants fair trade, but the question is what does that mean and how do we get there. Any solution must deal with the budget deficit and inflated dollar, which contribute to such a high percentage of the trade deficit. Simple calls for a balanced budget will not reduce the deficit. President Reagan continues to press for a balanced budget amendment despite the fact that the deficit has tripled under his administration. As positive as the President's proposals were in his trade speech of 2 weeks ago, they did not address the fundamental issue of budget deficits. One of his more promising proposals—to reduce the value of the dollar—will be ineffective unless there is a simultaneous commitment to reducing the budget deficit.

This body must keep the pressure on the administration to toughen its stance on the budget and trade deficits. This body must ensure that the adminstration fully and vigorously utilizes provisions in present trade law to combat violations of existing trade agreements, and is more responsive to requests from the textile and other industries to open up foreign markets to U.S. products. Finally, this body must work through the various bills before us to come up with a reasonable, workable, and sustainable long-term solution to our trade ills. Only then will we cure the present trade sickness and regain the competitive international trading position we have long known.

This bill, however well intentioned, will not accomplish any of those laudable goals and, if it becomes law, will in all likelihood make matters even worse.

Mr. GIBBONS. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. Mr. Chairman, I must rise in opposition to the legislation of the gentleman from Georgia, who is a very good friend of mine and who has conducted this drive with his usual skill and dignity.

I must tell the body of this House that I just think this legislation is wrong. Some of the most painful moments that I have had have been week after week meeting with textile workers in my district. As I saw their faces, I saw the faces of my grandparents, my uncles and aunts, and they were saying to me, "Congressman, save our jobs." And that is the plea that is made here today, "Save our jobs." It is a meaningful plea and a real plea. No matter what side we take on this issue, it is something we must be mindful of.

If I believed that this legislation would actually save jobs of American workers, I would vote for it, despite all the other misgivings. But it will not. In New York City we have two office towers downtown, housing a company called AIG. Eight thousand people work there. They do the insurance work for countries like Malaysia and Thailand and others around the Asian rim. For every textile worker in New York that keeps his or her job because of this legislation, a worker in a company like AIG will lose a job. This bill will not create jobs. It will lose jobs.

Nor is it legislation that will open up the unfair trade barriers of other countries. We are all concerned about the Japanese. But the Japanese are hardly affected by this legislation, for they do not export very many textiles to us. In fact, the Japanese are too smart to pass legislation like this. They know that Japan cannot be a textile power any longer, nor do the Japanese aspire to be. History teaches us that textiles is an industry that predominates in less developed countries; and then as those countries pull themselves up they develop new industries and textiles move on to other countries. That is what has happened in the United States a long time ago. We must have compassion for textile workers, and we must help them make the transition to other industries, but we cannot and should not attempt to turn back the clock of history.

Mr. DUNCAN. Mr. Chairman, I yield 6 minutes to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. I thank the gentleman for yielding.

Mr. Chairman, I want to congratulate everyone before expressing my opposition to this bill. I know the gentleman from Georgia worked very hard and, in fact, probably set a world's record in terms of getting cosponsors for any biii that was brought before this body. And I know the anguish that he and many of his colleagues in some of the textile States feel. I also want to salute my distinguished chairman of the Trade Subcommittee, the gentleman from Florida, because I know he has come under intense pressures on this, and yet for all of that, I think he has taken a courageous and correct position in opposing passage of H.R. 1562.

Mr. GEPHARDT. Mr. Chairman, will the gentleman yield?

Mr. CRANE. I yield to the gentleman from Missouri.

Mr. GEPHARDT. Mr. Chairman, I rise today with reservations about supporting H.R. 1562—but I will support it. As many Members know, I offered an amendment during the Ways and Means Committee's consideration of this bill that recognizes the importance of our bilateral and multilateral treaty obligations.

But, the fact of the matter is that this administration has failed to live up to its duties. Not only has the President failed to enforce our bilateral agreements, but he has also failed to aggressively seek to negotiate agreements with uncovered countries and products under the umbrella of the Multi-Fiber Agreement.

The President's unwillingness to lead us out of the deficit morass on top of his failure to live up to its duties in negotiating agreements has ravaged the textile industry—resulting in the loss of tens of thousands of jobs.

An industry that is 40 percent more competitive than our trading partners should not have trouble in a free trading system. But, with a 40-percent surcharge on our exports and a 40-percent discount on imports—due to this administration's failed fiscal policies—our domestic textile industry simply can't compete.

My amendment would have recognized the importance of our treaty obligations while putting pressure on the President to live up to his obligations—maintaining fair rules of trade.

My reservations don't negate the need for action—although the rule adopted by this House doesn't allow for my amendment, I plan to support this legislation. It's time this administration lived up to its obligations.

Mr. CRANE. Mr. Chairman, unfortunately, the conclusion I think many of us have reached—and we have heard it articulated repeatedly here this afternoon on this floor—is that while H.R. 1562 is designed to try to save jobs in a particular industry, and one regionally oriented, the unfortunate side effect of that desirable, wholesome effort is to cost many more jobs in other areas. I am particularly impressed, looking at some of the unemployment figures, as my colleague, the gentleman from Minnesota, introduced earlier. The three largest textile States in the United States; namely, North Carolina, South Carolina, and Georgia, with 5.6 percent, 6.7 percent and 7.3 percent rates of unemployment respectively, are all below the national average. That compares very favorably with my home State of Illinois, which has an unfortunate unemployment rate of 8.9 percent, our neighbor State, Michigan, with 10.8 percent, another Midwest rust belt State, Ohio, with 9.3 percent. And this bill, if passed, is going to cost in the Midwest region, in just retailing jobs alone, approximately 15,500 jobs.

□ 1415

That job loss is before you get to jobs lost in transportation. That is before you get to the jobs that will be imperiled in agriculture, and we are already suffering in that category. We can most assuredly anticipate that there will be a reaction to this legislation if it passes, and it will hurt most profoundly those of us in States that are heavy into agricultural exports, as the State of Illinois is.

On that count, this legislation is flawed. But it is flawed in addition to this. This bill is going to cost consumers, and it has staggering consumer

cost implications. Just the current level of protection that this industry enjoys, and it is the most protected industry in our Nation right now, comes at a consumer cost of $20 to $30 billions a year. The expectation is, according to the Council of Economic Advisers, that if this legislation passes that it is going to result in an annual cost increase to consumers of $28 billion additional per year.

In short, it is profoundly injurious economically and the worst part of it is that the people who will suffer most are those individuals in the lower income brackets.

Something else needs to be brought up in this debate. To be sure, there has been a very serious loss of employment over the past decade in the textile industry. Yet, total production is up. Now that suggests that the problems of the textile industry are not the result of imports as much as they are the result of modernization. The truth of the matter is some of these textile plants were operating within this past decade with 19th-century equipment, and 19th-century plants. That simply will not pass in today's highly competitive market. But the most automated and modern of textile plants in this country can compete even against the low-priced labor of some of the Third World countries.

I think another thing we must be aware of is that we are charting a new course that violates existing law. The Multi-Fiber Arrangement was created just for this one industry. It has been revised in the past, but this abrogates the Multi-Fiber Arrangement and other bilateral agreements that we have made. One of the peculiar things in the violation of our relations with Third World countries or some of the underdeveloped countries is that the European Community and Canada are exceptions to its application.

Thus far in 1985, textiles from the major export nations in the Orient are down 8 to 11 percent, and yet the European Community is up 70 percent, Canada is up over 70 percent, and they are not covered by the bill.

The final point I would make is that we are setting a very poor example at a time we are trying to get comprehensive trade legislation passed that will create a fairer environment worldwide. We set, by this legislation, a horrible example. It impairs our leveraging position to go into international trade relations trying to discuss, for example, with the Japanese the desirability of breaking down some of their domestic barriers at the very time we are setting up one of the most incredible barriers this country has seen since Hawley-Smoot. I urge the defeat of H.R. 1562.

Mr. JENKINS. Mr. Chairman, I yield 1 minute to the gentleman from South Carolina [Mr. SPRATT].

Mr. SPRATT. I thank the gentleman for yielding.

Mr. Chairman, we have heard a lot of statistical artifacts, indeed, statistical and economic hyperbole on the floor today about the consequences of this bill. We just have been told that it could have a $20 to $30 billion impact; the industry is hardly twice that size itself.

There is information circulating saying it could have a $14 billion impact. Let us look at facts. The fact is in 1967 the Producer Price Index in this country was at its base: Zero. At the end of the seventies, it was up to 168 for all American industries. For the textile industry, the PPI, the Producer Price Index over that period was 84. It was one-half in terms of price inflation, the performance of all American industry. It still today runs below the PPI for all American industries, and it will for two reasons. One is productivity. This industry has plowed back capital. It has had 4-percent productivity growth and its wages have never outstripped or outpaced productivity. The other is competition. There are 5,000 basic textile firms; 15,000 apparel firms. There will still be substantial foreign competition also after the adoption of this rule.

Mr. GIBBONS. Mr. Chairman, I yield 2 minutes to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in opposition to H.R. 1562, the Textile and Apparel Trade Enforcement Act. I do so, not out of concern for the state of our textile industry, but out of concern for the signal this bill sends to our trading partners and the potentially harmful precedent the bill sets for U.S. trade policy. By its purely protectionist approach, this legislation leaves us open to retaliation against American exports.

We have just finished working on a farm bill here in the House, and one of the overriding concerns in crafting that bill was not to inhibit the ability of our farmers to market their products overseas. In my area of the country, we build airplanes which have traditionally been this Nation's leading manufactured export; that industry is working to regain its commanding world market share. By passing legislation such as this—which for the most part targets a few Asian nations, we would be singling out nations with some of the world's largest potential markets for restrictions against access to our markets. The potential for retaliatory increases in barriers against our products is too great. Even greater is the possibility that these countries will begin to rely on the markets of Soviet Union and Eastern bloc countries for their product.

I believe there are few other issues more pressing on our national agenda than righting the dangerous imbalance in our trade deficit. However, we can no longer sit idly by as imports flood into our country and our trading partners block access to their markets. We have to insist on comparable treatment. The American businessman who competes with foreign companies here more often than not finds that when he carries the battle overseas, he is blocked. Governments throw up protective quotas, duties, or enforces burdensome marketing regulations upon him. The American worker who buys foreign goods often finds, too, as a result of these barriers, that his job is jeopardized by the inequitable treatment our industry receives.

Now is the time for the United States to ensure that when we allow foreign goods into this country, we receive the same treatment. It means more than tough-sounding rhetoric; it means tough policy. It does not mean, however, policy which might harm the global trading system and which insulates our economy from the driving forces of competition. It means reciprocity. It does not mean protectionism.

Instead of one bill for one specific industry, I would hope this House could move swiftly on the measure so many of my colleagues have joined me in cosponsoring, the Trade Emergency and Export Promotion Act of 1985, to impose duties and quotas on goods from countries which do not give American firms equal access to their markets. It is this sort of fair, but firm and unequivocal, policy which I believe will lead us out of this perilous situation.

The American market has nurtured phenomenal growth in the world economy over the past four decades, and at the heart of that growth has been the driving force of competition, producing advancements beyond the wildest imaginations of most of us even just a few years ago. We cannot shut-off that force, as this bill would do. Instead, we have to insist on fair competition, to seek it out, and to demand it. I would urge my colleagues support for legislation which moves us toward a level playing field, here and abroad, not a bill which shelters one industry from competition

Some say we should pass this bill to send the world a message. I worry that it will only confuse the message we should be sending. We stand for markets open to all on an equitable basis, not for damaging protectionism.

I am not unmindful of the terrible trade problems and for that reason I am a sponsor of the Gephardt-Benson-Rostenkowski reciprocity bill. But I think in dealing with these trade issues we have got to look at the root problems of trade. Part of the problem is the trade and nontariff barriers of other countries. Part of the problem is

the administration has done such a poor job of enforcing existing trade policies. But the biggest part of the problem has clearly emanated from the economic policies of gigantic budget deficits promulgated by this administration. These deficits have led to an overvalued dollar which makes imports cheaper, including textile imports, and exports more difficult and expensive to others.

The ultimate answer to our trade problems lies not solely in the bashing of the heads of our trading competitors, but in bashing the budget deficits caused largely by this administration's irresponsible fiscal policies.

The CHAIRMAN. The Chair will state that the gentleman from Tennessee [Mr. DUNCAN] has 7½ minutes remaining; the gentleman from Florida [Mr. GIBBONS] has 4½ minutes remaining; and the gentleman from Georgia [Mr. JENKINS] has 6½ minutes remaining.

Mr. GIBBONS. Mr. Chairman, I yield 1 minute to the gentleman from Georgia [Mr. ROEMER].

Mr. DUNCAN. Mr. Chairman, I yield 30 additional seconds to the gentleman from Louisiana [Mr. ROEMER].

The CHAIRMAN. The gentleman from Louisiana [Mr. ROEMER] is recognized for 1½ minutes.

Mr. ROEMER. I thank both gentlemen for yielding me this time.

Mr. Chairman, I do not support this bill. I want to make it clear that I deeply respect and understand both the author's intent and the desire to protect jobs in America. A family without a job is not happy, not healthy, and not free. But this bill is a net job loser for our country.

What good does it do to protect from imports and lose to the right of exports, What good does it do if we must shoot someone in a trade war, to first point the gun at ourselves. Now, I am not suggesting we should do nothing. There is much we can do for jobs in America. We need a trade policy. The President has failed up to this point this afternoon in that policy. It ought to include deficit reduction. It ought to include the elimination of unfair trade policies and practices toward timber and telecommunications and all of the rest.

It ought to include a call for a new Bretton Woods agreement so we can have growth in the world. They are many steps on the long road toward jobs for all. This bill ought to be the last step, not the first step. This bill is a sucker bill; it will not do what it claims to do. It is a new job loser. Let us be Uncle Sam, not Uncle Sucker. Let us lead, let us fight, let us not surrender.

The CHAIRMAN. The Chair recognizes the gentleman from Tennessee [Mr. DUNCAN].

Mr. DUNCAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Kansas [Mr. ROBERTS].

Mr. ROBERTS. Mr. Chairman, today we are beginning consideration of what could be the first salvo in an all-out trade war. The gun is loaded and carefully aimed—right at our own foot.

The Textile and Apparel Trade Enforcement Act is a first step down the wrong road, one the House has repeatedly rejected.

The Textile and Apparel Trade Enforcement Act would effectively seal off the U.S. textile and apparel market from foreign competition, the textile manufacturers will have a protected market and artificially high prices for their products.

Mr. Chairman, if we accept protection for the textile and apparel industry the other side of the story is that we will also force American agriculture into a state of purgatory with no way to escape.

Trade is a two way street. In order to export we must import. The legislation we are considering today refuses to recognize that fundamental point. By specifically targeting 12 nations for severe restrictions, we are reducing the amount we can in turn sell to these same nations.

The problem for the agricultural producer is that three of the targeted nations are among our top five wheat customers. The 12 nations targeted by the Textile and Apparel Trade Enforcement Act accounted for 36 percent, or $2.1 billion, of all U.S. wheat exports in the 1984–85 period.

And let there be no mistake, our trading partners will respond in kind. In the last few years, China has refused to honor the terms of its wheat purchase agreements with the United States due to disputes over textile import restrictions. As a result, we lost over $500 million in wheat sales. The Chinese have informed us in no uncertain terms that they will retaliate if further restrictions are enacted.

Yes, Mr. Chairman, this will put the Kansas wheat farmer in purgatory. On one hand we refuse to seal him off from the hazards of the international market place. But if at the same time we protect the textile and apparel industry and in doing so destroy one-third of the market for Kansas wheat. We have put the wheat producer in an economic twilight zone.

In effect, we are talking about placing an embargo on sales to major markets for agricultural exports, particularly wheat.

I have seen the results of the Carter embargo. Instead of punishing the Soviet Union for its unconscionable invasion of Afganistan, we punished the farmer. American agriculture is still reeling from the effects of having the flag of foreign policy planted in their backs.

Mr. Chairman, I have only the greatest respect and admiration for my friends and colleagues who have sponsored this legislation. My heart goes out to the people in the textile-producing areas of the country who have been hit hard by the strength of the dollar and flood of textile and apparel imports.

I know all too well what it is like to live in and represent an area that is in deep economic trouble. During consideration of the farm bill, the severe state of distress in farm country was described in graphic terms and I will not restate the situation at this time. Suffice it to say that farm country is suffering, and the legislation we are considering today will only add to the problems facing rural America. I plead with my colleagues not to take us down that road.

Yes, Mr. Chairman, I too want to get tough on trade. I strongly agree with my colleagues that free trade must be fair, and we must hold our trading partners to the same standards that we ourselves strive to maintain.

But, in fact, under the provisions of H.R. 1562, we are doing battle with a monster of our own creation; the strong dollar, created by reckless deficit spending here in Congress. Recently, the strong dollar has shown some heartening signs of softening. I hope that trend will continue.

We in Congress can hasten that process and at the same time get tough on our trading partners by finally putting our fiscal house in order. Getting tough on trade means ending the practice of routinely spending beyond our resources and making the difficult choices necessary to reduce—dare I say eliminate—the budget deficit.

The Senate is currently considering the correct approach. By mandating scheduled spending reductions, the deficit would be reduced and eventually eliminated. The inflated dollar will continue to decline, and once again we will be competitive in the international marketplace.

This course of action, although difficult and painful, is the only real long-term solution to the problems faced by the textile and apparel industry as well as American agriculture. It is a viable get tough trade policy. By making foreign goods more expensive in the domestic market and American products cheaper in the world market, we will be getting a whole lot tougher on our competition and create a much more level playing field than any protectionist legislation could hope to achieve.

I urge my colleagues to choose the straight and proper path of fiscal responsibility and to reject being led down this politically rosy but very rocky road to protectionism.

□ 1425

Mr. DUNCAN. Mr. Chairman, I yield such time as he may consume to the gentleman from South Carolina [Mr. HARTNETT].

Mr. HARTNETT. Mr. Chairman, I rise in strong support of the legislation.

Mr. Chairman, several months ago, I submitted a statement into the CONGRESSIONAL RECORD declaring my strong support for the Textile and Apparel Trade Enforcement Act of 1985. In order to reemphasize the vital importance that I place on this legislation, I am reintroducing my past remarks.

Due to the unprecedented textile import rate, increasing at an average rate of 13

percent for each of the last 10 years, the U.S. textile industry is on the threshold of market elimination. In the absence of congressional action, this import surge will cause an estimated loss of 947,000 jobs in the textile and apparel industries and an additional 943,000 jobs in related industries by 1990. Indeed, the fiber, textile and apparel industry which employs more workers than the steel and automobile industries combined, is about to be buried by subsidized imports.

The pressure of ever increasing imports would have forced most industries to surrender. However, the true American spirit has emerged in the textile industry. In an attempt to become more competitive, the textile industry has spent approximately $1.5 billion per year over the last 5 years for increased research and development, modernized plants and strengthened production techniques. However, even the greatest industry in the world can not compete on an unfair playing field. In the case of textile imports, it is indeed unfair competition when foreign governments continue to offer subsidies and incentives abusing our open market policies.

H.R. 1562 is sensitive to our commitment to giving less developed countries access to our markets. In fact, this legislation allows these countries a 15 percent growth rate over their 1984 import levels plus a gradual increase of 6 percent each subsequent year. However, the major exporting countries which hold a huge market share at the expense of these developing nations will be limited to 95 percent of their import level in 1982 with a 1 percent growth rate each subsequent year.

Protectionism is defined as the deliberate use of restrictions on imports to enable relatively inefficient domestic producers to compete successfully with foreign producers. The U.S. textile industry is hardly inefficient. In a completely free-trade environment, our domestic textile industry could more than compete with any private manufacturer. Therefore, it is unfair to punish this efficient industry by forcing it to compete against unfair foreign trade practices.

The United States maintains the most generous trade policy in the world. However, this open market philosophy has operated to the detriment of our own industrial base. Specifically, foreign governments have continued to enforce unfair trade practices at the expense of a proud and determined domestic textile industry. Therefore, I feel that trade legislation aimed at penalizing the imports from these uncooperative countries is not only necessary, but justified.

□ 1425

Mr. DUNCAN. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. SCHULZE], a member of the Committee on Ways and Means.

Mr. SCHULZE. Mr. Chairman, today the Textile and Apparel Trade Enforcement Act offers the Members of this House a historic opportunity to confront the changing winds of time, and shape the future of American international trade.

For the past few weeks talk of Smoot-Hawley has been circulating around Capitol Hill. It almost makes one wonder whether old Willis Hawley has been resurrected and is walking the Halls of Congress rubbing his hands together. The analogy of Smoot-Hawley, however, simply does not apply to the textile bill before us today.

The textile bill is not major protectionist legislation. It is primarily a quota bill. We are not building up "fortress America." We are asking for a fair international trading order, a fair opportunity in international markets. What we are doing today is sending a message to the rest of our trading partners and saying "enough is finally enough."

Today 21 percent of all telephone equipment is imported; 50 percent of all wearing apparel; 26 percent of all steel; 31 percent of all fans and blowers; 44 percent of all luggage; 60 percent of all TV's and radios; and 70 percent of all shoes.

In 1929, exports were $5.2 billion. Imports were $4.4 billion. In 1984 exports had risen to almost $218 billion; imports had risen to $325.7 billion. Estimates for 1985 show exports at $211.1 billion, and imports at $345.3 billion. Clearly, the volume is dramatically greater today.

No, Smoot and Hawley are not here today. This is the age of sophisticated market closing techniques—of targeting, and dumping by volume rebates and subsidized interest rates, and countertrade.

There are statistics upon statistics, and facts will debate facts but reality shows that we face a record trade deficit. Our trade deficit continues to grow, and our industrial base continues to erode, while all the talk of free trade becomes just that—talk about free trade. Free trade must be fair trade. I ask the Members, where, in the world do we have open and free markets? The Soviet Union? China? The European Economic Community? Japan? Korea? Canada? Brazil? Thailand? India? Where are these great open markets? Who are our reciprocal free trading partners? They are very, very few.

Today, the United Sates absorbs close to 60 percent of the finished products exported by the less developed countries. As the LDC's continue to industrialize, our industrial base will continue to shrink. The question we have to address today is whether we want an industrial base which can produce textiles, which can produce shoes, which can produce steel, which can support our endurance as an independent industrial Nation. And don't say to us that we must endure a declining manufacturing base while you systematically blockade our service industries from your shores.

Why should the United States be the main importer of goods from the LDC's? Why are our markets open, while the rest of the world simply closes its doors to the products of these countries? Japan has not opened its doors to the less developed nations, neither has the European Community, Taiwan, or Korea. Yes; we have an obligation to help and we will, but the burden should be spread. And it should be spread throughout the industrialized nations of the world.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. SCHULZE] has expired.

Mr. DUNCAN. Mr. Chairman, I yield 1 additional minute to the gentleman from Pennsylvania [Mr. SCHULZE].

The CHAIRMAN. The Chair wishes to notify the gentleman from Tennessee [Mr. DUNCAN] that he has 1 additional minute remaining.

Mr. DUNCAN. Mr. Chairman, am I to understand that I will have 1 additional minute after this?

The CHAIRMAN. The gentleman is correct.

Mr. SCHULZE. Mr. Chairman, more importantly the members here today should keep in mind what the consequences of inaction may bring. The effects on unemployment could be staggering; 1 out of 10 factory workers is employed in making fibre, textiles and apparel, making this industry the largest manufacturing employer in the United States.

One million jobs have already been lost to American workers due to imports, at a cost of $40 billion to our GNP; 2 million more jobs hang on a thread and could be lost by 1990, if this legislation is not passed, costing our economy an additional $80 billion. This means a loss of $40,000 for each job given away to imports and an income loss of $1,280 for every family in America.

In closing Mr. Chairman, we must realize that neither our current trade deficit not the world's trade problems were created in 1 day much less 1 year. It has taken many years for the United States to reach its current trade imbalance. What we need is, to build now for a strong trade future. We must send our message clearly for the world to hear and to see.

And that message is a simple one—open your markets. Remove your tariff barriers. Remove your nontariff barriers. Eliminate your subsidies, stop targeting, stop upstream dumping, stop downstream dumping, stop predatory pricing practices, eliminate financial incentives. Deal with us as you would have others deal with you, and we can work together for a golden age of world trade, where a free and fair world trading system will shower its blessings on all who participate.

Mr. Chairman, I urge all Members to vote for the passage of this legislation.

Mr. GIBBONS. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas [Mr. PICKLE].

Mr. PICKLE. Mr. Chairman, it would be easy to cast a vote in favor of this bill. It would provide some relief for the domestic textile industry from the flood of imports which has risen at an average rate of 20 percent over the past 3 years. It would send a strong message to our Asian trading partners that the United States will no longer be the dumping ground for their products. It would send a message to an administration that has been lethargic in the trade policy area that the Congress means business with respect to improving the U.S. trading position.

All these things are desirable, Mr. Chairman, but this is not the way we should go. We don't want to show our displeasure with our partners' trade policies by violating the very agreements we accuse them of violating. We don't want to jeopardize the jobs of our high technology, agricultural, and aerospace industries, nor do we want to jeopardize these foreign sales. We don't want to send a message that we will accept a flood of imports from some parts of the world but not from others. And, we don't want to reverse the economic growth that we have encouraged and supported for years in the developing world.

No, Mr. Chairman, this is not the way we want to go. In my opinion, it is not in the best interest of the country, and I am not convinced it is in the best interest of the textile industry. We cannot countinue to ignore the symptoms of a declining industry. We might better focus on reclaiming the price- and quality-conscious American buyer, not through protectionism, but through innovation, greater integration within the industry, and old-fashioned American ingenuity.

The Jenkins bill has much merit. Already we have noted that textile suppliers are changing some of their trade policies, and together are calling on Japan to open its market.

Moreover, this administration, which has failed to exercise its authority over unfair trade practices, is now awakening and showing some leadership, but not yet enough. And, Japan is now sending envoys and making other overtures of cooperation that we have not seen before.

Therefore, I think the Jenkins bill is serving a good purpose. I am not yet convinced that it ought to pass out of fear that we might start a trade war. But, as the bill moves forward, I still think it may serve a useful purpose. I do not oppose the principle it espouses, but rather, at this time I do not think it is best that it becomes law.

Mr. GIBBONS. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. BERMAN].

Mr. BERMAN. Mr. Chairman, I rise in opposition to H.R. 1562.

Mr. Chairman, I do think our consideration of the bill today can serve a useful purpose. It's no solution to our trade problems, but at least this legislation forces us to focus on them.

During the course of this debate we will hear a lot of talk about getting tough with our trading partners and about protectionism, free trade, and fair trade. These labels and buzz words have little connection with reality and do nothing to advance our analysis of the trade situation.

Artificial barriers to U.S. exports are certainly a major cause of our trade imbalance. Unfortunately, instead of legislation designed to discourage disruptive barriers to orderly trade, we are here today considering a bill that enacts prohibitive and stifling trade barriers of our own.

Clearly the free trade ideal that directed much of our international commerce in the post-World War II era is no longer a realistic guide for U.S. trade policy. But neither is it in our interest to further the decline toward a disjointed and confrontational world marketplace. Trade barriers only encourage trade barriers against our products around the world.

New quotas won't solve the problems of the textile and apparel industries. The textile industry already enjoys an average tariff barrier of 22.3 percent, compared to an average tariff of less than 5 percent for all other U.S. industries. There are more than 1,000 negotiated textile quotas covering more than 2,000 textile products. Three hundred quotas have been imposed in the last 4 years. As a result, the textile industry faces one of the lowest ratios of imports to domestic production of any American industry.

Foreign competition is not solely to blame for job losses in these industries. Import penetration for finished apparel has been much higher and more rapid than in textiles. Yet job losses have been much greater in textiles than in apparel. That puts to lie the assertion that the more open the market, the greater the decline of American employment.

Some sectors of the U.S. textile and apparel industries are indeed competitive. Others clearly are not. Rather than propping up the less competitive sectors of these industries we should be easing the adjustment of firms and workers into more competitive sectors. We should encourage American firms to concentrate on higher quality, speciality items that compete with the higher cost imports from the other industrialized countries rather than fight a losing battle against cheap imports from developing countries. Job retraining, trade adjustment assistance, and Federal aid for plant and equipment conversion make better sense than ill-conceived attempts to preserve dying businesses.

This bill has the potential to do great damage to our relations with developing countries. Combined United States imports of textiles and apparel goods from the European Community jumped 70.2 percent in 1984, while imports from the four major developing country suppliers—Hong Kong, China, Taiwan, and South Korea—rose only 13.4 percent measured in square-yard quantities. Yet despite the fact that textile and apparel imports from the European Community and Canada are growing faster than those from most developing countries, Europe and Canada are totally exempt from the bill.

The LDC's targeted by the bill can only see this as a form of economic racism. Approximately 80 percent of the textile and apparel imports from these countries are already regulated by quotas. On June 27, 28 developing nations signed a letter to President Reagan objecting to this legislation. China, with whom we hope to vastly expand trade relations, has already stated clearly that it will retaliate in kind if the bill passes. Hong Kong, Indonesia, and Singapore have threatened to do the same.

The possibility of retaliation should not be taken lightly. While the United States is the largest single importer of developing country textile and apparel products, by no means is this trade a one way street. United States exports to the 12 major textile and apparel suppliers targeted by the bill amounted to more than $54 billion in 1984.

Even if the affected countries don't retaliate directly, a closed U.S. market will mean lower foreign exchange earnings and less money with which to purchase American goods.

Among those hardest hit by the new quotas are some of the world's major debtor nations. According to the Commerce Department, Brazil, for instance, would experience a 90-percent rollback in its textile and apparel exports to the United States, severly imparing that nation's ability to pay off its massive foreign debt.

Moreover, the bill would abrogate all our bilateral agreements negotiated under the Multi-Fiber Arrangement, as well as trade agreements taken under GATT rules and principles. By no means do I think these agreements have been great breakthroughs in our efforts to eliminate unfair trade practices. But neither do I think it would be in our interest to try to substitute for GATT harsh and simplistic unilateral actions.

Ironically, Japan, the nation most often cited as an offender of "free trade" practices, would benefit from this bill relative to other "major exporters," assuming that H.R. 1562 achieves its intent of adjusting market shares to what would have occurred had each supplier achieved no more than 6 percent annual growth in import levels between 1980 and 1984. The bill would have the effect of rewarding those who lost market share over this 4-year period, while rolling back the improved position of those who gained ground. Japan lost ground between 1980 and 1984 while China, Indonesia, Taiwan, and Brazil built up their market shares.

The fact that this bill has been brought to the floor of the House indicates that we in Congress are finally ready to take action to solve our trade problems. But this bill is not the solution we are looking for. I urge a "no" vote on H.R. 1562.

Mr. GIBBONS. Mr. Chairman, I yield such time as he may consume to the gentleman from New York [Mr. LAFALCE].

Mr. LAFALCE. Mr. Chairman, I rise in opposition to H.R. 1562 as presently drafted.

Mr. Chairman, I must oppose H.R. 1562, as presently drafted, despite the fact that I was a cosponsor of it. I will vote against it for a number of reasons, but with very mixed emotions. Before taking this step, I spoke at length with the chief proponents of the bill advising them of my difficulties with it, and giving them full opportunity to respond to my concerns. I hope, therefore, that they appreciate my sincere and serious reservations about having the bill in its present form become law. I know I appreciate and share their legitimate concerns for the fate of their industry, and want to work with them to obtain appropriate administrative and legislative solutions to their industry's problems. H.R. 1562, however, is not appropriate.

I offered my support initially for one paramount reason. The existing Multi-Fiber Arrangement [MFA] provides a potentially effective mechanism for preventing disruptive imports. The President could easily and should have used this tool to alleviate the severe pressures on our textile and apparel industry. Instead, he chose, as usual, to do nothing. I believed it imperative that the Congress send the administration a forceful message that this inaction in the face of the industy's serious distress would no longer be tolerated.

But there were other assumptions underlying my support on which I can no longer rely. First of all, this bill was described by its supporters as merely providing for "the effective implementation and enforcement of the MFA [Multi-Fiber Arrangement]." According to the bill's supporters, "it would not violate any international agreement, but would set growth of textile/apparel imports anticipated by the MFA."

This is not the case. The bill in its current form is in clear violation of the MFA, GATT regulations, and 34 bilateral trade agreements that the United States has negotiated with textile-exporting nations. The MFA permits limitations on imports after negotiations with exporting nations to reach agreements to deal with imports. This bill would unilaterally and retroactively impose limits on imports, even before negotiations. And it would impose them at levels well below those currently in effect under existing bilateral agreements and on far more products, thus abrogating those agreements.

Second, I assumed that the bill would be perfected in committee and that we would have an open rule which would allow us an opportunity to amend during floor consideration. Neither assumption has proved true. We have lost important opportunities to rectify the type of serious problems the bill now presents.

Given this procedure, I must now ask whether I want this bill, unamended, to become law. That answer to that must be no for a number of reasons.

First of all, I believe that the message many of us intended to send by sponsoring this bill has been received. There are signs that the administration will now forcefully renegotiate an MFA that will better serve the interests of our textile and apparel industry.

Equally important, however, are serious problems with this legislation as it stands. The fact that the bill is in clear violation of existing trade agreements is deeply disturbing. Such a cavalier treatment of our existing trade agreements is unjustified, and would seriously undermine our ability to insist that our trading partners abide by trade agreements when it is in our interest that they do so.

Unilateral imposition of quotas unjustified under existing agreements could subject the United States to foreign retaliation that would eliminate more American jobs in export-sensitive industries than it would save in textiles. U.S. exports to the 12 suppliers that would be most immediately and drastically affected by this bill totaled more than $33 billion in 1984.

It is imperative that we also consider the political and economic stability of those countries which would suffer the most were this legislation to pass. The import limitations the bill imposes would have the most severe impact on those nations which are potentially most vulnerable. Exports from the 12 nations identified as "major exporting nations" would be cut as much as 80 percent below current levels, with the average being approximately 40 percent.

These cutbacks would do severe damage to many important U.S. allies. The bill would reduce textile exports from Thailand, for example, by 64 percent. It would cut Brazil's exports by 81 percent, thereby making it even more difficult for Brazil to pay the interest on its $100 billion foreign debt. By reducing their market access, the bill makes it harder for many developing nations to industrialize and to enjoy economic growth, and, even more importantly, might even jeopardize their political stability.

Further, while I am certain it was not intended, the bill's focus on the Asian countries unfortunately smacks of racism. Eleven of the twelve nations most severely affected are Asian. Canada, Mexico, and most European Common Market countries are specifically exempted from the bill's provisions, despite the fact that four of the five nations whose textile exports to the United States have increased the most in 1985 are in Western Europe.

Finally, I am extremely dubious about the merits of industry-specific legislation. Unfortunately, our trade problems extend far beyond the textile and apparel industry. Many of our industries are currently suffering severe dislocation due to import penetration and other factors such as the introduction of new technology. Many would argue that other industries have suffered from imports to a much greater extent than textiles and apparel, especially since production and employment in the domestic textile and apparel industry have been more stable in recent years than those other industries.

There is a serious danger in Congress locking permanent remedies into place in the face of changing circumstances. What is happening now in textiles and apparel is a perfect example. Productivity is increasing, making it difficult to determine how much industry job loss is attributable to imports. Since the bill was introduced, import levels have actually fallen. Textile and apparel imports declined by 4.4 percent during the first 4 months of 1985 when compared with the first 4 months of 1984. The decline is even more pronounced when one excludes imports from the developed countries, which the proposed legislation would exempt.

Only yesterday Singapore Prime Minister Lee Kuan Yew exhorted the Congress to reject trade protectionism, warning that the alternative would be a global economic tailspin reminiscent of the 1930's. We must take this exhortation seriously. We are, and will, remain under severe pressure from all industries suffering from dramatic changes in their competitive position. We must be responsive to their legitimate concerns; we must reject laissez-faire economics; we must reduce the value of the dollar; we must negotiate international agreements that better serve their interests; we must adopt an industrial competitiveness strategy; but we cannot let specific industry pressure and preferences be the sole guide to our decisionmaking process.

For the reasons I have enumerated, I am compelled to vote against H.R. 1562 at this time. I sincerely hope that in the upcoming MFA negotiations the administration abandons its doctrinaire laissez-faire perspective and seriously negotiates toughly on behalf of American industry. If the President fails to do so, I will have to reconsider my position on some perfected version of this legislation.

Mr. GIBBONS. Mr. Chairman, I yield such time as he may consume to the gentleman from Tennessee [Mr. BONER].

Mr. BONER of Tennessee. Mr. Chairman, I rise in strong support of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

Passage of this important measure is the first, long awaited step toward putting our foreign competitors on a level playing field with the America textile industry.

Preservation of the textile apparel industry matters to all of us, especially to the citizens of the Fifth District of Tennessee. This bill insures that textile tariffs are enforced and that our foreign competitors no longer take advantage of the open market trade policy of the United States.

As already has been stated on the floor today, international trade does not operate under the guise of free trade, but under a certain set of rules. The rules by which the United States plays have been continually violated by our foreign competitors and trading partners. That is why we need this important bill. It has made no sense for the United States to play by the rules of free and fair trade when the rest of the world blatantly violated those concepts.

We here in the United States can no longer afford to sit by and watch as tens of thousands of Americans lose their jobs to

20-cent-an-hour foreign workers. I want the advantages of trade, just like the President. But trade must be fair and on a level playing field. Clearly, the evidence presented to our colleagues today demonstrates that foreign textile manufacturers are not fair. The surge of textile imports have resulted in lost American jobs. And, contrary to the arguments of opponents of the bill, consumers have not been benefited by those imports. As stated earlier, most imported textile products are no less expensive than their U.S. counterparts. Obviously the only people benefiting from currrent U.S. trade laws are the foreign companies and the middlemen who market those products to U.S. consumers.

The importance of this bill can be measured by the number of American jobs dependent on a healthy and viable textile industry. The textile industry employs 2 million Americans, more than the steel and auto industry combined. The industry is among the most modern in the world. Yet, since 1980, imports have grown at 19 percent a year with a 65 percent surge in increases in the last 2 years. Since 1982, more than 2,000 Tennesseans have lost their jobs in the textile industry. Jobs lost because of the unfair trade practices of foreign competitors, who literally dump their textile products on the U.S. market.

It is clear to me that Congress must act. Certainly the administration is unwilling to do so. Without this measure, there would have been certain death for this vital industry. If that were the result, neither the individuals who relay on the textile industry for their employment nor the U.S. consumer would come out ahead.

I am proud of my sponsorship of this bill and I urge my colleagues to vote for its passage.

Mr. GIBBONS. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Michigan [Mr. CROCKETT].

Mr. DUNCAN. Mr. Chairman, I yield 30 additional seconds to the gentleman from Michigan [Mr. CROCKETT].

The CHAIRMAN. The gentleman from Michigan [Mr. CROCKETT] is now recognized for 1 minute and 30 seconds.

Mr. CROCKETT. Mr. Chairman, coming from a labor-oriented State like the State of Michigan, with one of the highest levels of unemployment in the country, it is with some reluctance that I rise to oppose the passage of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985.

My opposition rises from the fact that, the more I read this bill, the more I see the perpetuation of economic discrimination against the nonwhite peoples of the world. It's more subtle here than perhaps in the past, but it's here nevertheless.

Whether or not the bill was crafted on purely economic criteria, the reality of the effect is the same: Of the 12 nations whose imports would be reduced the most by this bill, 11 are Asian, and the 12th is Brazil. All of them are Third World countries struggling to industrialize and to complete their emancipation from the economic bondage in which they were left by the colonial powers.

Canada and most European Common Market countries are exempted from the bill's provisions, even though the growth in imported clothing from these countries has been greatest over the past few years. Developing nations of the Caribbean, Africa, Latin America, and Asia would suffer severe economic setbacks if restricted or denied U.S. markets. These are the same nations which face almost insurmountable external debt problems, which they cannot hope to solve without healthy foreign markets such as the United States. These are the same nations that get the least foreign assistance from us. And these are the same peoples most discriminated against in our immigration admission laws.

Troubling arguments have also been raised about the effect this legislation would have on consumers, especially those poor consumers who cannot afford to pay more for clothing. I am not convinced that passage of this bill is in the best interest of the millions of those citizens in the same way that it is claimed to protect U.S. textile workers.

Finally, the circumstances under which this bill is brought before us do not allow for Members' amendments to those sections of the legislation I would like to see changed, and it becomes a matter for me of which principle must be dominant—our responsibility to reverse the racism that has pervaded and still pervades our economic dealings with the Third World, or our obligation to protect our markets from everyone except Canada and the European Market countries.

Mr. Chairman, I firmly believe that before we pass legislation perpetuating the cycle of misery in the developing world, and perhaps among our own poor, and before we seek to give continued special advantage to a few Western partners, we should examine all other alternatives, including, as the Prime Minister of Singapore has admonished in this Chamber just yesterday morning, more vigorous to get Japan to open its markets to United States and other nations' goods. We should also examine whether the long-range needs of our own workers and consumers would best be served by closing our markets to others, or by aggressively building more markets abroad.

□ 1435

Mr. DUNCAN. Mr. Chairman, I yield 30 seconds to the gentleman from New York [Mr. WORTLEY].

Mr. WORTLEY. Mr. Chairman, I urge my colleagues to give careful consideration to what is being proposed on this floor today.

The Textile and Apparel Trade Enforcement Act seeks to mandate the Multi-Fiber Arrangement's benchmark of 6 percent annual growth in textile imports. In addition, it would make this mandated guideline applicable retroactively to 1980.

Although I fully recognize the problems caused by cheaper imports, I have serious reservations about this retroactive mandate. Its immediate result would be increased consumer prices with little offset in job creation.

I think we can all agree that our trade policies need reform, but not in this selective manner. Our trade problems are not restricted to the textile and apparel industries. They are widespread and require a comprehensive approach. The continued problems faced by the textile and apparel industries, in spite of the highest levels of protection enjoyed by any industry, are a striking example of the failure of current system of trade relief.

I have an additional problem with H.R. 1562. It not only addresses a selective portion of the industries affected by the trade deficit, it also addresses a symptom rather than the cause. There is no question that cheap imports are a problem. Trade barriers are also a problem. But the trade policies and economic conditions of our trading partners are not the only reasons our trade deficit has grown so sharply. we have to look to the reasons here at home for our current trade dilemma.

In an August report, the Congressional Budget Office stated that—

Despite the complexity of the underlying forces, it is clear that the most important reason behind the deterioration of the U.S. trade deficit over recent years was the cumulative appreciation of the dollar in real terms. [The Economic and Budget Outlook, August 1985, page 48.]

An overvalued dollar hurts U.S. exports while reducing the costs of imports into the United States. But the overvalued dollar is still a symptom. It is a sympton of the Federal budget deficit, which drives real interest rates higher than they should be because we are competing for capital to finance our debt.

How do we reduce the deficit without sacrificing economic growth? This is the most important challenge facing Congress, and I suggest we get to work on addressing it and provide some real relief for all of our industries, including the textile and apparel industries.

Mr. Chairman, if we are really concerned about imports and the loss of American jobs, we ought to get concerned right here in this Capitol. Here we are serving toothpicks in the House Dining Room that came in from abroad. It is high time we started assessing things right here first.

Mr. Chairman, I thank the gentleman for yielding to me.

Mr. JENKINS. Mr. Chairman, I yield myself the balance of my time.

Mr. BARNARD. Mr. Chairman, will the gentleman yield?

Mr. JENKINS. I yield to my colleague, the gentleman from Georgia [Mr. BARNARD].

Mr. BARNARD. Mr. Chairman, I rise in strong support of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

Last week, by a vote of 29 to 5, the House Government Operations Committee approved a report, entitled "Federal Enforcement of Textile and Apparel Import Quotas," prepared by the Commerce, Consumer, and Monetary Affairs Subcommittee, which I chair.

This report, based on 2 days of hearings and a yearlong investigation by the subcommittee concludes that the international quota system to manage textile and apparel imports has not worked as intended. The report finds that the overall program under the Multi-Fiber Arrangement [MFA] is flawed because it no longer fulfills its primary objective to prevent market disruption caused by imports.

For over 20 years, the United States has maintained an import program of managed trade in textiles and apparel. The program's objectives have never been total protection, but the avoidance of undue disruption to our domestic markets. But the present system has simply failed to achieve its goals.

Mr. Chairman, the evidence that this system has not worked is the enormous recent growth in imports. During the past 3 years, textile imports have increased at an average rate of approximately 20 percent, the fastest rate in history. Import penetration of the domestic apparel market has more than doubled in the last 6 years, reaching a level of 50 percent in 1984. The textile-apparel trade deficit has increased by 53 percent in dollar terms from 1983 to 1984 alone, and is running at a level of $17 billion this year.

The textile and apparel industries are in serious distress. Many textile and apparel companies have been forced out of business, plants have been closed or operations curtailed, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments.

The report finds that a major reason for the uncontrolled growth of imports is the outdated structure and ineffective enforcement of our bilateral agreements and the Multi-Fiber Arrangement. The report finds that MFA fails to prevent excessive import increases because—

Some quota levels are excessively high;

There have been excessive delays in imposing quotas;

The MFA is not comprehensive in its scope or coverage. It covers only specific products in specific amounts from specific countries. This is an invitation for enterprising importers to "end run" the MFA by establishing imports from countries not covered by an agreement;

The MFA does not cover products such as silk, linen and raiment, and these have gained a large share of the U.S. market;

The MFA contains unduly generous flexibility provisions which allow major exporters to expand their shipments to the United States well beyond the ostensible limits established by agreement; and

The MFA's standard for instituting negotiations—"market disruption"—is excessively vague.

To sustain the U.S. policy of "managed" textile trade in the face of this import surge, the Government Operations Committee report calls for:

—Reduction of present textile and apparel quota levels for major exporting nations, such as China, South Korea, Taiwan, and Hong Kong;

—Imposition of comprehensive quotas on exporting countries; and

—Limitation of future import growth to the rate of U.S. market growth.

These are the major provisions of H.R. 1562. For the reasons detailed in the report, I urge my colleagues to vote for H.R. 1562.

Mr. JENKINS. Mr. Chairman, first of all, I want to take this opportunity to express my appreciation to each of you for your consideration of this measure, regardless of which side you may be on. I want to express my appreciation to the committee for at least giving us the opportunity to have an up or down vote.

Having said that, I want to say to you that while I do not have the closing argument and cannot answer any charges that may be made by opponents who will have the final argument, I want to try to address as many of the questions that have been raised as I possibly can.

First of all, there are many Members who have said—as a matter of fact, the subcommittee chairman, the full committee chairman, the minority ranking member, everyone that is opposing the bill, says to this body the textile and apparel industry has deep problems and something must be done.

But you know, we have been trying for 2 years. We have been trying to get some legislation. What alternative? Why has not the subcommittee chairman brought you a bill to help the textile and apparel industry? Why does the chairman insist upon a closed rule, that you cannot have any input to change it if you want an alternative?

No. This is the only bill that you will get the right to vote on. You do not have any possibility for any alternative.

I have been striving for 4 years on the committee to get this issue addressed, and there has been only silence.

Well, this is the last gasp of this industry. Two million employees. Do not say that you were not told. Do not go back home and say, "I didn't know about those problems."

My friends, you have a choice today to change American trade policy. It affects all other industries. There are oil refineries in Texas, in Louisiana and every State that started with 350 refineries 2 years ago. They are down to 135 today, barely enought to refine our own crude oil. I could go down the list of industries and they are all coming to the same place—the end of the road.

You talk about the policies of mid-level countries like Korea. Let me tell you something. Do you realize that the little countries cannot even export their textile products into Korea. They will not let them come in—total elimination.

So the result is that we take not only the production of these countries, all of their production, but every other lower economic level country. Sixty-five percent of every piece of clothing made by every developing nation on the face of the Earth has found its way to our marketplace.

Something must be done. Something has to be done. This is your chance. You have no other alternative.

You talk about the deficit, the deficit and the value of the dollar. I come with clean hands as the sponsor of the Jenkins-Conable bill since I brought it to this floor to try to get a balanced budget 3 years ago. I tell my friends that you will never address this problem with solving the value of the dollar question alone. There has been no serious exchange rate problem with the countries that are doing most of the exporting in textiles.

I want to say one thing about the Third World, because that has been brought up.

This bill provides for at least 1 million square yards quota for every country on the face of the Earth, whether they are shipping any now or not. It gives a 15-percent bonus to the smallest countries because they ought to have some incentive. They ought to be coming into this marketplace. This marketplace should not be dominated by four or five major exporters. We ought to encourage Latin America. We ought to encourage the Caribbean. And this bill does it at the expense of the Far East because they have too much of our market.

You do whatever you want to with this bill, but this is your last shot this year. This is your last shot at a trade bill this year.

I want to tell my friends from both sides of the aisle that this is a bipartisan bill, supported by Republicans on this side of the aisle. Eighteen States, with every single Member of Congress, Republican and Democrat, are sponsors of this bill. But, some of you may have gotten nervous. I know the White House has been tough, and particularly on the Republican freshmen.

You better look after your own district. You better make up your own mind what is right. I have had that pressure, too, under a Democratic President and I learned to resist when I thought I was right, and I urge you to do the same.

Mr. Chairman, our Nation's economic prosperity was carved out of the industrial revolution. Textiles have played a tremendous role in this picture. Now the American fiber, textile, and apparel industry is threatened with near extinction within a few years unless meaningful action is taken that is compatible with harsh trading realities of the 1980's. I propose that H.R. 1562 is the only solution we have at present, and that we do not have time left to fiddle around with weakminded compromises. I also contend that H.R. 1562, in the context of the fairness we seek, is not extreme as many have implied.

H.R. 1562 is intended to restore fairness and order to textile and apparel world trade. Since 1980, anything but fairness and order has been the rule. The United States is virtually the only nation in the world still willing to play by the old rules. The United States, with a less comprehensive system of import controls than the European Economic Community, experienced a dramatic surge in imports and, by 1984, over 60 percent of all developing country exports of clothing is estimated to have been destined for the U.S. market. In Japan, the Government has restricted imports administratively since 1974 and penetration levels have remained low in comparison with those in both the U.S. and EEC.

As a result of uncontrolled textile and apparel import growth, over 300,000 hardworking Americans since 1980 have stood and helplessly watched their jobs go overseas. Plant closings nationwide have topped 250, and others are near idled. Import figures continue unabated at a double clip since 1980, and the textile trade deficit is expected to peak at $20 billion in 1985.

Specifically, our bill puts limits on imports from major exporting countries which reflect import growth since 1980 at growth rates contemplated by the 1981 extension of the Multi-Fiber Arrangement. The Textile and Apparel Trade Enforcement Act would cover all textiles, apparel, textile products, and manmade fibers. The act applies to all exporting countries with the exception of Canada and the European Economic Community.

In 1985, imports from the major exporting countries, capturing more than 1.25 percent of the U.S. market would be limited to levels if the MFA had been effectively enforced during 1980 to 1984. In each future year, the growth rates of imports from the major exporting countries would be limited to 1 percent.

In 1985, the smaller countries capturing less that 1.25 percent of U.S. imports, plus Mexico, would be 115 percent of 1984 levels except for import-sensitive categories; that is, categories for which imports equal 40 percent or more of domestic production, in which 1985 import levels would be 101 percent of 1984 levels. After 1985, annual quota growth would be 6 percent for each category except 1 percent for import-sensitive categories. When imports from a smaller exporting country—except countries in the Caribbean region—reach 1.25 percent of U.S. imports, quota growth in all categories would be 1 percent.

In categories in which a country has no or few exports, the country would be allowed to ship to certain minimum levels. Annual growth would then be 1 percent for major exporting countries or 6 percent for smaller exporting countries, unless the category is highly import sensitive, in which case growth would be 1 percent.

Our bill also contains an import licensing system whereby the Secretary of Commerce would establish regulations to govern the entry of imports to conform with this act. The Secretary is also required to establish this licensing system within 6 months of enactment.

The European Economic Community as early as 1977 demonstrated its pragmatism by doing for itself pretty much what H.R. 1562 proposes to do as relief for the U.S. textile industry. In 1977, the EEC was particularly hard hit by textile imports and it unilaterally imposed a global quota concept that worked. No one contradicted this move. Subsequently, the MFA was amended to include the EEC's actions as a precedent for use under extreme conditions.

Obviously, the United States is facing those extreme conditions now, and it is empowered to protect its own textile market from untimely demise by following in the EEC's footsteps. If the administration insists upon wearing binders to the harsh economic and trading realities of today, it is up to Congress to intervene in the national interest. The textile industry is fighting tooth and nail the deadly game of survival, and H.R. 1562 is the only salvation right now.

The President in his trade initiative speech a few weeks ago did not offer a glimmer of hope to the 2 million American men and women who understand the bottom line on textile imports. I am glad the administration is beginning to acknowledge that a huge chunk of our industrial base is breaking away and floating out to sea, never to be retrieved. However, the administration's proposed new get tough policy on unfair trading practices does not extend far enough to get to the heart of the problem. And I fear the new initiative, for what it may accomplish, is almost too late.

The administration had ample opportunity to prove its backing of the textile industry last year when the industry with its labor forces filed countervailing duty petitions against 13 nations which are unfairly subsidizing their exports to the United States. These legitimate cases were all but swept under the carpet. In cases where any action was taken at all, it was absolutely meaningless.

Mr. Chairman, I know this legislation has been compared of late to the Smoot-Hawley Tariff Act of 1930. I do not feel compelled to justify a trade measure that is significantly different from H.R. 1562, and, which was enacted during an era vastly different from 1985. However, I cannot help but wonder if this act deserves the bum rap history has assigned it in connection with the Great Depression, especially since it became law 8 months after the Great Depression began.

In 1929, the U.S. gross national product stood at $103 billion. Of this total, imports comprised $4 billion, or about 4 percent of the total GNP. Exports also represented about 4 percent of the GNP.

During the depths of the Great Depression in 1933, the GNP had dropped, by almost one-half, to $56 million. Yet, imports represented $1.5 billion or nearly 3 percent of the total GNP. Exports also represented about 3 percent of the GNP.

Surely a reduction in imports of $2.5 billion could not have precipitated the $48 billion reduction in GNP during that period of time. The tiny, proportionate share of foreign trade represented in the GNP between 1929 and 1933 would not seem to exert such a potent influence after all.

In conclusion, Mr. Chairman, I implore this body to act favorably upon H.R. 1562, designed to even the score with nations who have had undue leverage in our marketplace for too long. If the U.S. fiber, textile, and apparel complex were not twice as productive as most of its foreign counterparts, I am sure it would have faded away long before now.

This enterprising industry, essential to our national security, has worked diligently to overcome its problems, and it has come a very long way thanks to only itself. But it cannot solve the import crisis without our help.

I include for the RECORD a synopsis of this bill's provisions.

I urge your support of this bill.

TEXTILE AND APPAREL TRADE ENFORCEMENT ACT OF 1985 FACTSHEET

PURPOSE

To achieve the objectives of the Multi-Fiber Arrangement (MFA) by providing orderly and nondisruptive growth of imports of all fiber, textile and apparel products.

To set limits on imports from major exporting countries at the levels which would have existed if import growth since 1980 had been limited to the rates contemplated by the MFA.

To allow the smaller exporting countries an opportunity to increase their share of the U.S. market.

To set the future growth rate of imports at levels provided for in the MFA and the protocol extending the MFA.

RATIONALE

Since 1980 imports of textiles and textile products have grown at an annual rate of 19 percent, far greater than the orderly growth objectives of the Multi-Fiber Arrangement and far in excess of the 1 percent average growth of the U.S. market during that period.

Because fiber, textile and apparel imports are far outpacing the growth of the domestic market, intolerable market disruption, job losses, curtailed production and plant closings have occurred.

The textile and apparel trade deficit has grown to a record $16 billion in 1984 and

now accounts for 13% of the U.S. merchandise trade deficit.

U.S. textile, fiber and apparel companies are continuing to spend billions of dollars annually to modernize and improve worker productivity. The resulting productivity increases have been significantly greater than the rate of productivity growth for all of U.S. manufacturing. Yet despite this investment and increased productivity, U.S. manufacturers continue to lose marketshare.

If import growth is not slowed, future investment in this industry is likely to be sharply curtailed leading to a loss in competitiveness and the continued liquidation of an industry which is a major element of U.S. manufacturing and is recognized as vital to our national security.

PROVISIONS

The Textile and Apparel Trade Enforcement Act would cover textiles, apparel, textile products and man-made fibers. The Act would apply to all exporting countries with the exception of Canada and current members of the European Economic Community.

Smaller Exporting Countries:

Defined as those capturing less than 1.25% of U.S. imports, plus Mexico;

1985 import levels by product category would increase by 1% over 1984 levels for import sensitive categories (see below) and 15% of 1984 imports levels for all other categories;

After 1985, annual quota growth would be one percent for import sensitive categories and six percent for all other categories;

Import sensitive categories are categories for which imports equal 40 percent or more of domestic production (except for countries in the Caribbean region), and all wool categories;

When imports from a small exporting country (except countries in the Caribbean region) reach 1.25% of U.S. imports, quota growth in all categories would be one percent.

Major Exporting Countries:

Defined as those capturing 1.25% or more of U.S. imports;

1985 import levels by product category would be one percent above the levels which would have existed in 1984 had the MFA been effectively enforced during 1980–84;

After 1985, import growth would be one percent each year for each category.

In categories in which a country has no or few imports, the country would be allowed to ship to certain minimum levels. Annual growth would then be one percent (for major exporting countries) or six percent (for smaller exporting countries) unless the category is import sensitive, in which case growth would be one percent.

ENFORCEMENT

The Secretary of Commerce would establish regulations to govern the entry of imports to conform with this Act.

OTHER PROVISIONS

The Secretary of Commerce would establish within six months after enactment an import licensing system to ensure that the Act is efficiently administered.

Each year the President would report to the Congress on the administration of the Act.

The CHAIRMAN. The gentleman from Florida [Mr. GIBBONS] is recognized for 2½ minutes to close the debate.

Mr. GIBBONS. Mr. Chairman, I want to commend the Chair for the excellent way in which this debate has been conducted.

The CHAIRMAN. The Chair thanks the gentleman.

Mr. GIBBONS. Mr. Chairman, I want to commend the vigor and the deep emotion my colleague, the gentleman from Georgia, has about his bill.

Mr. Chairman, I began hearings on this bill within less than 2 weeks from the time the gentleman introduced it. It has not been delayed. It would still be in the subcommittee if I wanted to keep it there, but I do not play that kind of game.

I want to be very accurate in what I say, so I am going to refer to my notes. We have heard all kinds of very wild figures about imports. Let me go back to my notes. These are official statistics of your Government. They are the best that anyone can get.

In 1984, the market import share for textiles and apparel on a dollar basis was 14 percent of the consumption of textiles and apparels in the United States—14 percent, not 50 percent, not 70 percent, but 14 percent. On textiles only, which are the principal products of North Carolina, South Carolina, Georgia, and Alabama, the textiles only were 6.2 percent.

If you measure it by square yard equivalents, they were down to 4.9 percent.

Only in the apparel industry does it even get over 30 percent and that is just slightly over 30 percent.

This bill is mistaken, and even if it was not mistaken, it is aimed at the wrong target. The imports that are hurting this industry, if imports are hurting this industry, are not attacked at all by this bill. The principal increase in imports has come from Canada, with 71-percent increase in imports, from the European Community by an 85-percent increase in imports.

I asked the sponsors of this bill many times during the hearing: "Why did you leave out the European Community and Canada?"

I can only speculate because the owners of the textile and apparel industry in the United States have deep interests in the European Community and Canada.

Whether or not we like it, this bill, as the gentleman from Michigan [Mr. CROCKETT] said, has taken on an aura of being anti-Asian, anti-poor.

Mr. Chairman, I urge my colleagues to reject this mistaken piece of legislation.

Mr. DORGAN of North Dakota. Mr. Chairman, I share the view of most of my colleagues that we need to craft a strong trade bill. I also believe that we must act to restore America's role in the international marketplace, to reduce our ballooning trade deficit, and to market our exports more aggressively.

Unfortunately, the Textile and Apparel Trade Enforcement Act of 1985 is not the right correction for putting our trade back on an even keel. In an effort to shut off a continuing spurt in textile and apparel imports, the bill targets some 12 developing nations for tough import quotas. But I am not convinced that these targeted quotas will really solve the problems in our textile and apparel industries, let alone show the way to a broader solution of our trade problems.

The textile bill overlooks the fact that one reason for unemployment in textile and apparel industries is modernization at home. Investment in advanced textile machinery here has resulted in rising production between 1980 and 1984, even though employment fell by some 100,000 jobs. More important, the bill overlooks the major culprit: the overvalued dollar. In the past 5 years, the dollar has grown 60 percent in value, resulting in an overall slump in exports and a general rise in imports. For example, imports of nonelectrical and electrical machinery, motor vehicles, and auto parts have increased at about the same rate as clothing and fiber imports. But they are not addressed in this bill.

Nor is the flip side of the coin considered here. Our lagging farm exports are a significant reason for our rising trade deficit, since they have fallen off from about $44 billion to $36 billion in the past 4 years. In fact, several of the countries targeted in the textile bill rank in the top 10 buyers of U.S. farm products. Japan and China alone bought over $8 billion worth of farm commodities from us in 1982 and the 12 nations together account for 50 percent of our export sales of unmilled wheat. If these countries choose to retaliate, we can expect an even greater drop in farm exports.

The bill is also strangely silent about our Western European allies. The United States has absorbed a 70-percent increase in textile and apparel imports in the Common Market between 1983 and 1984, but the bill does not address this at all. Ironically, it is Western Europe and Japan that are not keeping pace with our imports of Third World apparels.

Finally, the bill only adds to the basic root of our trade problem: The staggering Federal budget deficit. The net loss in revenues to the U.S. Treasury, as a result of reduced customs collections, would rise to $500 million in 5 years. As the article below clearly shows, we must puncture our ballooning deficits and inflated dollar if we really want to compete in world trade.

I intend to support a comprehensive trade bill in the near future which gets at the root of our trade problems. I respect the authors of the textile bill, but I fear it may only invite retaliation from our farm export buyers at a time when family farmers already face a crisis unseen since the Great Depression.

REDUCE THE DEFICIT TO BALANCE TRADE

(By Martin Feldstein and Kathleen Feldstein)

The Treasury has at last acknowledged that the overvalued dollar is the source of

the overwhelming U.S. trade deficit. Under growing pressure for protectionist trade legislation, the administration has reassessed its policy toward trade and the dollar. The result has been the symbolic tough talk from the president about enforcing fair trade and, more important, the Treasury's implication that it is ready to intervene in international currency markets to force the dollar down.

The current huge trade deficit is not due to any fundamental weakness of American industry or to increases in the unfair trade practices of other nations. There have been no changes in these fundamentals during the five Reagan years. That's why protectionist legislation, aimed mainly at poor countries in Asia and Latin America, is so totally misdirected. That approach would cause those countries as well as our own consumers to suffer, and yet would fail to resolve the real trade problem—the overvalued dollar.

The major and fundamental change that has occurred during the Reagan years is, of course, the unprecedented increase in the federal budget deficit. The government borrowing to finance this deficit has absorbed over half of all net savings generated in the United States and has kept real interest rates much higher here than abroad. These high real interest rates attract investment from abroad and push up demand for the dollar.

Unfortunately, there has been no hint that the administration has yet accepted that the budget deficits are the real reason for the dollar's unacceptable overvaluation. So, instead of dealing with the fundamental task of reducing the budget deficit, the Treasury proposes to sell massive quantities of Treasury bills in exchange for German marks, British pounds and other currencies. Our foreign allies, frightened by the prospect of protectionism, will join us in trying to drive down the dollar in this way.

This kind of government intervention in foreign exchange markets has been tried before with very little and only temporary success. Even multi-billion-dollar intervention is likely to have only a small impact on currency values in a market dominated by private funds that measure in the hundreds of billions of dollars.

The Treasury, aided by the Federal Reserve Bank, may be luckier this time than past experience would imply. Its attempt to depress the dollar will be helped by the general agreement that the dollar must eventually come down by 30 percent or more to bring trade into balance. And intervention may get some initial assistance from frightened investors who have until now been betting that the dollar would continue to be strong for a while longer.

Even if the Treasury is lucky and succeeds in reducing the dollar somewhat further and, after a lag, trimming the trade deficit, there will be side effects that many would consider more harmful than the current trade disease. In particular, a reduction in the trade deficit would mean less capital inflow from abroad. If the government is still borrowing heavily to finance massive budget deficits, the decline in the capital inflow would lead to a rise in U.S. interest rates that could slow down investment in housing and plant and equipment.

Moreover, currency intervention is a risky strategy because it often leads to inflationary changes in monetary policy. If the Federal Reserve wants to help the Treasury drive the dollar down, the bank might be tempted to increase the money supply faster than it would otherwise regard as prudent. And if the Fed tries to stop the rise in interest rates that accompanies a lower capital inflow, that might add further to the inflationary pressure.

The strategy, in sum, is risky and may be impossible. As long as the government persists in spending $200 billion more than it takes in, there will continue to be, at best, a lopsided recovery in which we have either a vast trade deficit or an abysmally low level of investment in housing and plant and equipment, or both.

Now that the administration has reversed its previous position and recognized the link between trade deficits and the dollar, isn't it time to admit that it's the budget deficit that is keeping the dollar so high? The president's best defense against protectionist policies would be to shrink these out-year deficits by turning to his "last resort" of raising tax revenue.

Mrs. LLOYD. Mr. Chairman, I rise in support of this legislation. This bill has become a rallying point for a part of America that is tired of playing a game with what they see as a stacked deck. There is a large segment of American workers who feel existing procedures are no longer practical. And their claims are not to be taken lightly because these are people who believe in the concept of free trade, they just haven't seen any recently.

Should we continue to sacrifice manufacturing jobs in the name of fair trade? Our markets are shrinking, and as Third World nations continue to expand, the fallacy of fair trade becomes even more indefensible. Foreign companies have been successful at utilizing the realities of today's international trade environment to advantage while American manufacturers suffocate. We need this piece of legislation because existing means have failed. We need it for our spirits. It is time to act rather than react. We have walked the proscribed path and for the textile and apparel industry, we've run into a dead end. It's time to turn, take the initiative and save American jobs.

Mr. BEDELL. Mr. Chairman, I readily recognize the widespread support that H.R. 1562, the Textile and Apparel Trade Enforcement Act, enjoys. I also recognize the signals that are sent to our trading partners through passage of this bill—that the United States expects a fair trading system between ourselves and our trading partners. Nevertheless, I have determined to vote present on this particular legislation because of its inclusion of provisions that could be interpreted to apply to the importation and exportation of fishing tackle. I have made this decision so as to avoid any taint that could be associated with my vote for or against H.R. 1562 as a result of my past association with Berkley and Co.

Mr. DONNELLY. Mr. Chairman, I am pleased to see the overwhelming support this House is showing for H.R. 1562, the Textile and Apparel Trade Enforcement Act.

This legislation sends an important signal to our trading partners that we are not about to see one of our critical domestic industries run out of business by predatory foreign competition.

H.R. 1562 is crucial to the continued vitality of America's textile industry, a major employer in many areas of the country. It also offers us an opportunity to offer similar relief to the domestic footwear industry.

My colleagues should note that amendments to this bill were restricted during its consideration in the Ways and Means Committee. I had planned to offer an amendment to grant import relief to the footwear industry. Similar language has been added to the companion bill in the Senate. It deserves to be incorporated in the Textile Trade Enforcement Act when it emerges from the conference committee.

Earlier this year, the U.S. International Trade Commission investigated the impact imports have had on the nonrubber footwear industry in the United States. They documented a steep decline of the American industry in the face of uncontrolled imports. Since 1968, 155,000 Americans have permanently lost their jobs in the shoe industry. More than 500 plants have closed their doors forever. Since the present administration permitted a brief period of imports controls to expire in 1981, imports have grown from 51 percent of the U.S. market to 77 percent this year.

In light of its findings, the ITC declared that the domestic nonrubber footwear industry had been seriously injured by imports, and it proposed a realistic and workable program of import relief to protect what remains of the industry in the United States. Despite the strong recommendations of the ITC based on an exhaustive investigation, the President refused to grant any relief to the footwear industry.

I look forward to working with the conferees on this legislation to assure that this opportunity to throw a lifeline to the footwear industry is not missed.

Mr. DREIER of California. Mr. Chairman, I rise in opposition to H.R. 1562.

I do so, having cosponsored the bill. Realizing that the textile and other industries face the problem of foreign competition, I wanted the White House and our trading partners to get the clear message that we are not going to tolerate foreign governments' subsidization of their industry and subsequent dumping of those products on the American market.

Mr. Chairman, both the White House with its legislative package, of which I am a cosponsor, and foreign governments, have gotten the message. Having put these nations on notice, we can better follow a policy to open their markets rather than close our own as a means to improving the total trade picture. To pass this protectionist legislation at this point is to risk setting a dangerous precedent for the stampede of over 300 additional destructive protectionist measures in the Congress.

The textile and apparel industry is, unquestionably, facing hard times, but may I remind my colleagues this is in spite of its being one of the most highly protected national industries as it is exempt from the General Agreement of Tariffs and Trades. To this argument, the proponents of 1562 have shouted charges of evading and violat-

ing the spirit of existing trade agreements. To these charges, I must respond in favor of renegotiating on the letter of these agreements rather than imposing protectionist legislation. The current Multi-Fiber Arrangement is subject to renegotiation and expires in less than a year.

Mr. Chairman, I continue to be sensitive to the harsh conditions facing the textile industry. However, I feel more confident in a legislative solution which will focus on the positive goal of trade expansion rather than the negative goal of restriction. When the membership decides this and other questions of trade protectionism versus trade expansion, I hope we can keep the broad picture of economic well being in this country in mind in spite of the special interests which would, however unintentionally, have us cut up and parcel it off.

We must remember that the American consumer has the right to purchase the best quality product at the lowest possible prices. Protectionism will only penalize the American consumer with a new inflationary spiral.

Mr. BIAGGI. Mr. Chairman, I rise as a cosponsor and supporter of H.R. 1562, the Textile and Apparel Trade Enforcement Act.

There are many good reasons for this bill, but one thought stands out above all others: The time has come to look after our own for a change. Quite simply, the United States has been too generous for too long. To a large extent, U.S. dollars and U.S. know-how have been used by foreign nations to exploit our virtual open door trade policy and inundate our marketplace with foreign goods. Sure, the world economy benefits as a result, but the U.S. economy has suffered tremendously. Millions of Americans have lost their jobs due to foreign imports and billions of U.S. dollars have been lost due to plant closings, increased unemployment assistance, and the disruption of entire communities that, in some cases, have lost their only industry to foreign imports.

This trade crisis is not getting any better, as some would lead us to believe. In fact, just a few weeks ago the situation reached new depths when we were informed that for the first time in 71 years, the United States had become a debtor nation, meaning we owe foreign governments more than they owe us. The major reason for this embarrassment—a U.S. trade deficit that is expected to reach a record $150 billion by the end of this year. These facts and figures all point to one conclusion—our current trade policies and existing trade agreements are not succeeding. Stronger action is absolutely essential if we are to save some of our Nation's most endangered industries, including the auto, steel, non-rubber footwear and textile industries, to name just a few. Quite frankly, I favor a comprehensive trade reform approach, as called for in the Trade Emergency and Export Promotion Act, H.R. 3035, which I have cosponsored with nearly 100 of my colleagues. However, today we have an excellent opportunity to begin the effort by protecting one of our endangered industries, while at the same time beginning the long ovedue effort to correct our failing trade policies, and this is an opportunity we cannot afford to miss.

The need for the legislation before us today is really quite clear. The U.S. textile industry, which employs about 1.8 million Americans—10 percent of all domestic manufacturing workers—is being decimated by unfair foreign competition. Consider, for example, that since 1980 foreign textile and apparel imports into the United States have increased 104 percent in value, while U.S. textile exports fell 34 percent due in large part to unfair trade barriers that exist in other nations. In 1984, textile imports exceeded exports by $14.8 billion, representing 12 percent of the entire U.S. merchandise trade deficit. In more personal terms, the U.S. textile industry has lost nearly 200,000 workers since 1980, and the textile mill product sector is at its lowest level of employment since 1939.

Some will argue that this legislation is not necessary because the Multi-Fiber Arrangement [MFA] and bilateral agreements between the United States and foreign nations already provide sufficient protection. That argument is flawed, however. The Multi-Fiber Arrangement does not cover the full range of textile products; its procedures are cumbersome and time-consuming; and restraint cannot be imposed for more than 1 year at a time. Our bilateral agreements do not provide enough protection either and some of the provisions that do exist are not being enforced.

The Textile and Apparel Trade Enforcement Act provides a reasonable solution to this serious problem. The bill imposes permanent quotas on textile imports, unlike the MFA, which expires in July 1986. Canada and certain members of the European Common Market—Belgium, Denmark, England, France, Germany, Greece, Ireland, Italy, Luxembourg, and the Netherlands—would be exempted from the bill's quotas, but the limits imposed on other nations are fair and, in fact, the bill would allow foreign countries to increase their textile imports into the United States on a yearly basis. While it is true that some of our "major textile exporting nations"—those whose share of the U.S. import market exceeds 1.25 percent—would have their import cut initially, the countries affected by this bill would be permitted either 1 percent or 6 percent annual increases, depending on the nation of origin and the type of product. While most nations would be subject to 1 percent annual increases, Mexico and the Caribbean Basin countries would be allowed a 6-percent annual increase on most of the their textile products.

Mr. Chim, tougher U.S. trade measures at home would certainly help to encourage "free trade," something we all want, but what is now nothing more than a misused term. We do not have free trade by any stretch of the imagination. Yet, while we cannot create free trade by ourselves, we can help to promote fair trade, and that means giving our domestic industries some of the same protections afforded to foreign competitors. H.R. 1562 would help to accomplish that and I urge that we pass it today by an overwhelming margin. In addition to the good it would do for our Nation's textile industry, it would also send a very strong and necessary signal to our trading partners that the United States will no longer tolerate playing alone by the rules of free trade.

Mr. DASCHLE. Mr. Chairman, I rise in reluctant opposition to H.R. 1562, the Textile and Apparel Trade Enforcement Act. I am in great sympathy with the authors of this bill and their goals. Without question, we need a trade policy designed to force other countries to give our products fair access to their markets. And we need a trade policy that protects American jobs.

But we cannot approach such an important task in a piecemeal fashion. All of us seek to protect the interests of our constituents. Together, we can form a powerful coalition. But if we go it alone, we will fail to build the effective trade policy we seek. By protecting one industry, we will open up other industries to retaliation.

I am committed to the search for a better trade policy. I will support any efforts to bring one about. I regret that I cannot support this piece of legislation.

Mr. MONTGOMERY. Mr. Chairman, as a member of the Congressional Textile Caucus, I rise in support of the Textile and Apparel Trade Enforcement Act. I think it is essential to help save the jobs of the more than 2 million Americans employed in the textile industry.

The flow of textile imports has had a dramatic effect on many U.S. companies and their employees. Already in 1985, more than 66,000 textile/apparel jobs have been lost. That compares to 46,000 lost jobs in all of 1984. Imports now control 50 percent of the U.S. textile market.

The American textile industry employs 10 percent of all manufacturing workers in this country. But the growing threat from textile imports could lead to the collapse of this major industry.

Many textile plants are located in small towns in the South. We have a great number of textile operations in my State of Mississippi. When these plants go out of business and close, it means that hundreds of Mississippians will be adversely affected. First and most important, the workers lose their paychecks. And, they must face the reality that in a small town, there are few alternatives for other employment.

It also means that instead of collecting income taxes and sales taxes, the Government must provide unemployment compensation and other assistance to families who would rather be working in the factories.

But in addition to the workers, others in the community also feel the negative economic impact of a plant closure. Groceries, department stores, appliance stores—they all suffer when the payroll checks are stopped.

Mr. Chairman, I am for free trade. But some of our competitors have engaged in illegal and unfair trading practices in order to gain an advantage with regard to the sale of textiles in this country. We are not asking for special favors—we only want a chance to compete fairly.

Mr. BEILENSON. Mr. Chairman, I oppose H.R. 1562. The bill is protectionism, pure and simple. Its supporters claim that it is not, but rather an effort to force our trading partners to live up to their end of the Multi-Fiber Agreements.

If this were the case, why has the textile industry not sought relief from agencies of the U.S. Government such as the International Trade Commission or U.S. Trade Representative?

Harley Davidson Motorcycles sought relief in 1983 from the International Trade Commission by filing a section 201 escape clause suit and was successful in persuading the President to establish a 5-year series of tariff rate quotas. As reported in the New York Times just last Thursday, these quotas have allowed the company to greatly improve its viability and competitiveness.

Specialty steel producers filed a 301 petition with the U.S. Trade Representative, which allow the President to take "all appropriate action" against foreign government practices that are inconsistent with trade agreements, and they were provided with relief in 1984, the form of a combination of quotas and tariffs for 5 years.

But the textile industry has chosen not to pursue these avenues of relief. Instead, it decided to importune Congress for protectionist legislation. Why is this? The textile industry claims that it has not availed itself of these proven remedies, because it feels that such action would not be conducive to its cause. It is right for one very good reason: The textile industry would lose big if a Government agency were to mount an unfair trade practice investigation.

The textile industry is already one of the most protected in the United States. Eighty percent of all textile and apparel imports are restricted in some manner by over 1,000 negotiated quotas at a cost of almost $25 billion in higher prices for the American consumer.

In addition, the textile industry is hardly suffering as claimed by supporters of H.R. 1562. Textile industry real GNP increased from $8.8 billion in 1972 to $11.5 billion in 1984, a 30-percent rise. Profits as a percent of sales have increased almost 50 percent since 1980. Over 30,000 jobs were added to the textile industry in the year 1983 to 1984. And from 1977 to 1984 productivity growth in the textile industry averaged 5 percent annually. These statistics come from the House Report on H.R. 1562 and from The Textile And Apparel Trade Crisis, done for the Fiber, Fabric and Apparel Coalition for Trade by the law firm of Dewey, Ballantine, Bushby, Palmer and Wood. Now, supporters of this bill also claim that the industry and textile States are losing jobs in droves. But the fact is, the major textile States of South Carolina, North Carolina, and Georgia all have unemployment rates at or below the national level (USA 7.2 percent, NC 5.6 percent, SC 6.7 percent, GA 7.3 percent). However, H.R. 1562 will result in the loss of jobs in the other 47 States.

The study by Data Resources, Inc., [DRI] for Burlington Industries that has provided the foundation for H.R. 1562 is seriously flawed, according to the Congressional Budget Office [CBO]. The study was limited to the positive aspects of protectionism for the textile industry; it ignored increased prices, lowered purchasing power, foreign retaliation, lessened revenues for the Treasury, loss of jobs in export industries, and a reduced market for U.S. exports at a time of $150 billion trade deficits. DRI's study warns of a loss of over 1 million textile and related industry jobs. But it neglects to mention, as CBO reports, that almost all of these workers would eventually find other employment. Of this DRI study, the CBO concludes: "Very little confidence can be placed in DRI's central finding that without further restrictions on textile and apparel imports, increases in output and employment would be significantly slowed. It is more likely that the effects of trade restraints on domestic output and employment would be small and perhaps negative in the long run."

How can we be so sure that the textile industry will utilize the benefits from this legislation to save jobs in the textile industry? We saved jobs in the steel industry at a price of $114,000 per position in increased costs and have witnessed companies such as United States Steel laying off workers and closing plants while using profits to buy Marathon Oil. Protecting auto jobs cost us $241,000 apiece as a result of Japanese voluntary restraint agreements and what did we get: GM purchasing Hughes Aircraft, Chrysler buying Gulfstream Aerospace Corp., and Ford picking up an insurance company. There are no provisions in H.R. 1562 to prevent textile companies from doing the same, so how can we be sure that Congress will not once again force the American consumer to subsidize the mergers and acquisitions of industries that plead poverty?

What will be the global effects of H.R. 1562? Will debtor nations such as Brazil, the Philippines, Indonesia, and South Korea be able to service their obligations to American banks with the United States market reduced—Brazil will lose 81 percent, Philippines 21 percent, Indonesia 90 percent, and South Korea 35 percent of its United States market share.

Will China, Brazil, Indonesia, the Philippines, and Taiwan continue to buy wheat and corn from United States farmers, or look elsewhere as retaliation against H.R. 1562?

In summary, what H.R. 1562 is asking Congress to do is impose upon the United States billions in increased annual costs, spend $140,000 for each job that may or may not be saved, alienate our trading partners and allies, exacerbate the international debt crisis, expose our exporting industries to $5 billion in trade barriers, forfeit over $2 billion in reduced revenues from textile imports in the next 5 years, and suffer a net loss of jobs in 47 States to protect an industry that registered increases in both size of work force and profit margin as recently as last year.

Let the textile industry seek relief in avenues that have been tried and tested. Almost one-third of the U.S. industries that have petitioned the ITC have been successful and granted meaningful relief. On the other hand, all of the protectionist relief granted by Congress has failed to benefit either the American people or our economy, and there is no reason to think H.R. 1562 will be any different.

Mr. EDGAR. Mr. Chairman, I rise today in strong support of H.R. 1562. The Textile and Trade Enforcement Act. This legislation is vital both to the Nation and my home State of Pennsylvania, and I am pleased that we have the opportunity to vote on this issue today.

Our present trade imbalance threatens to seriously damage the industrial base of the U.S. economy and is of special concern to those of us in older industrial States, such as Pennsylvania. Since 1981, the trade deficit has increased fivefold to the point that in 1985 it is predicted to exceed a record $150 billion. So far thousands of workers have lost their jobs, and the agricultural sector has been thrown into its sharpest nosedive since the Great Depression. There can be no long-term prosperity and stability for any segment of the economy if our basic industries are simply allowed to decline and erode.

No one will deny that there are complex reasons for our trade problem—including budget deficits, high real interest rates, and an overvalued dollar—but that does not mean there are no solutions. Failing to take any action affirms what many have suspected: That the United States has no trade policy at all. I believe in managed trade—in a concerted strategy to improve competitiveness and in coordinated policies to address marketplace realities. In managing trade, when unfair trade practices, subsidized industries, and the dumping of foreign products threaten American jobs and industry, we should not be afraid to protect ourselves through the application of carefully chosen restrictions in imports.

In the textile and garment industries, the case for action is clear. The surge of foreign imports resulted in the loss of more than 12,000 jobs in Pennsylvania during 1984 alone! Nationally, imports now account for 52 percent of the market even though the American textile and garment industries are among the most productive in the world.

Foreign manufacturers who dump goods into the United States and pay incredibly low wages are simply unfairly undercutting America's competitive position. Yet the Reagan administration refuses to enforce the existing Multi-Fiber Arrangement [MFA] and threatens to veto this bill. Inaction will not only result in the loss of many more jobs, but will eliminate domestic competition—a consequence which will ultimately hurt American consumers as well.

Mr. Chairman, I urge my colleagues to join me in support today of H.R. 1562 and in continuing our efforts in the future to preserve existing American jobs and put the unemployed back to work.

Mr. RAHALL. Mr. Chairman, while I intend to vote for H.R. 1562, the Textile and Trade Enforcement Act, I would like to

indicate my concern that this legislation comes before us today with a closed rule, thereby preventing any amendment, and, that this legislation deals with only one commodity which although deserving of the protections set forth in the bill, is not the only trade measure before the Committee on Ways and Means that should be brought to the floor for consideration.

I have a concern for the energy security of this Nation. However, today, the United States finds itself in the awkward position of importing coal.

In my view, it is a paradox that a coal-rich America is still struggling for energy independence.

It is shameful that a coal-rich America is home to such high levels of coalfield unemployment.

And, it is ironic that a coal-rich America finds itself importing coal.

The future prosperity of many coal regions of this Nation depends largely on the burgeoning steam coal markets of the South.

Indeed, according to estimates made by the Energy Information Administration, 65,490 megawatts of new coal-fired utility capacity will come on line nationwide by 1990. Out of this amount, the South Atlantic, East South Central, and West South Central States account for 41,267 megawatts—63 percent of the estimated new demand for utility steam coal.

Yet, it is in many of these very States that we find a growing interest in imported coal. The Gulf States especially, readily accessible by water borne commerce, make for tempting prey for foreign coal producers.

We face a number of issues in the consideration of this matter. In my view, none outweigh the potential impact coal imports may have on the economy and employment situation of the Appalachian and other coal-producing regions.

Already faced with high rates of mine injuries and fatalities, the crippling effects of black lung disease and slumping coal demand, our domestic coal labor force can ill afford to see its future stolen by increased coal imports.

The coal industry, laboring under stringent environmental, health and safety standards, high transportation costs, and the prospect of even greater transportation costs in the future, can hardly stand idle as foreign coal producers race to meet new electric generating capacity.

Other industries have watched their domestic markets fall to imports. Often, these imports have a great competitive advantage due to the policies of their governments. Twenty years hence, sectors of the U.S. coal industry may find themselves in the same predicament as is the domestic copper industry today—beseiged by imports and on the verge of collapse.

In light of this situation, I have introduced H.R. 1905, the Coal Trade Equalization Act of 1985, which seeks to impose an $8 per ton duty on imported coal.

It must be noted that currently, no duty whatsoever is collected on coal imports.

Mr. Chairman, it is my hope that legislation such as H.R. 1905 will be given the same consideration by the Committee on Ways and Means as is being given to H.R. 1562.

Mr. STALLINGS. Mr. Chairman, it is fortuitous that this week Congress is debating the two most serious problems facing this Nation: the outrageous Federal budget deficit and the record trade imbalance. It is altogether appropriate that we are debating these two items simultaneously because they are inherently related to each other.

It is not by coincidence that we have two record deficits. We cannot continue to practice bloated fiscal spending policies without paying the price of those policies—an overvalued dollar.

Both the experts and the general public agree that the fundamental cause of our trade woes is the overvalued dollar. The principal reason for the overvalued dollar is the staggering $200 billion Federal budget deficit. In other words, one of the fundamental causes of our trade deficit is our inability to cope with huge budget deficits.

The Textile and Apparel Enforcement Act of 1985 is the first round in the volley of the protectionist legislation which seeks to protect our American industries and reduce our trade imbalance. These are worthwhile goals. But these measures, even if enacted with full power and enforcement, can be nothing more than a Band-Aid on the hemorrhaging trade deficit.

This situation calls for stiffer medicine. Deficit reduction is the only cure. So let us stop deluding ourselves. And let us act promptly and responsibly to reduce our staggering budget deficits.

Mr. FORD of Michigan. Mr. Chairman, I rise in strong support of H.R. 1562, the Textile and Apparel Trade Enforcement Act. This much-needed legislation will assist an industry that is currently being devastated by imports. During the past 4 years, over a quarter of a million American workers have lost their jobs in the textile and apparel industries.

The time is now for the Congress to act to stem the hemorrhage of American manufacturing jobs overseas. Since the first of this year, over 210,000 American manufacturing jobs have been lost. Since 1979, the number of lost industrial jobs totals 1.5 million. Correspondingly, the trade deficit has skyrocketed from $36 billion in 1983 to $123 billion last year. It is estimated that this year's deficit will approach $150 billion. I only wish that the Congress was considering today broader trade legislation that would assist all segments of American industry.

In the absence of an effective administrative trade policy, the Congress must step in to fill this void. Although the administration has belatedly announced a program designed to reduce the mammoth trade deficit, this program is too little, too late.

Even though the American auto and steel industries and the impact of imports on these industries are my primary concern and top priority, the textile and apparel industries desperately need assistance. The Congress must not turn its back on American workers, regardless of the industry in which they are employed. The textile industry currently employs 10 percent of all manufacturing workers in the United States. If we do not act immediately to preserve this industry, these jobs will likewise be threatened by imports.

Foreign manufacturers have targeted the U.S. industry and dumped their products on the American market. In addition, we simply cannot expect American workers to compete against workers who earn less than a quarter an hour. The existing system of quotas has proven to be inadequate in protecting the American industry. H.R. 1562 will protect this industry and remedy unfair textile trading practices by imposing an effective and enforceable quota on textile imports.

I urge my colleagues to support this legislation.

Mr. SHUMWAY. Mr. Chairman, I rise today in strong opposition to H.R. 1562, the Textile and Trade Enforcement Act of 1985. It is certainly true that the national trade deficit, having risen to an unprecedented level of $123 billion, represents a legitimate cause for concern and action. However, this bill, the first in what appears to be an oncoming flood of protectionist legislation moving through Congress, takes a narrow and shortsighted approach to our trade problem. If enacted, H.R. 1562 will exact a heavy price on our economy, one that will be paid through increased consumer prices and through reduced U.S. exports, particularly in agriculture, while it will not fully resolve the textile employment situation at which it is aimed.

We cannot ignore the fact of interdependence in the world economy and its implications for our own actions. Withdrawal by the United States into selective protectionism represents an abdication of our responsibilities under the GATT, and in case of this legislation, under the Multi-Fiber Arrangement [MFA]. Undeniably, the subsidies and nontariff barriers employed by some member nations and the tactics used to elude the import controls of the MFA have progressively chipped away at the effectiveness of our trade agreements. Nevertheless, it is in the interest of the United States, and in the interest of our trading partners as well, to strengthen our multilateral agreements rather than abandon them. It is useful, Mr. Chairman, to recall that our multilateral trading relationships followed from the lesson learned in 1930, in the wake of the Smoot-Hawley Act—that protectionism leads to trade wars, currency distortions, and ultimately a collapse of the world trading system. This is a lesson we ought not to learn twice.

A protectionist approach to trade, I believe, will not only harm our relations with other nations, many of whom are important to us strategically as well as economically, but will place new burdens on American consumers, on American export-oriented businesses, and ultimately, on the American trade imbalance. The legislation before us is no exception to this rule. It is

estimated, for example, that the reductions in imports required by this bill will result in at least a 10 percent increase in clothing prices. This means an added cost to consumers of $14 billion per year, a burden which will fall hardest on the poor. Already, the textile industry is the most protected of all U.S. industries, with tariffs averaging four times those for all other industries and inflating consumer costs by $4.4 billion.

The impact of H.R. 1562 on American industries and agriculture is even more startling. According to the International Business Research Corp. study, at best, this legislation would save 36,000 jobs in the textile industry while 58,000 jobs would be lost in the retail business alone, a net loss of 22,000 jobs. And while the gains in employment will be absorbed by the three major textile States, net losses will be felt in all 47 remaining States; my own State of California, with its strong retail industry, could lose more jobs than any other State—over 7,000. Beyond the retail industry, the costs of reducing imports will fall as well on shippers, port workers, importers, warehousemen, many textile manufacturers, bankers, clerks, and customs brokers. One small pebble of protectionist policy such as H.R. 1562 proposes may seem harmless on its own, but its ripple effects throughout the economy will be almost endless.

One of the serious repercussions we must expect from H.R. 1562 is retaliation against our exports from those nations most severely hurt by the bill. U.S. exports to the 12 major textile suppliers targeted by the bill totaled more than $33 billion in 1984, of which $5.1 billion was in agricultural exports—a large and vulnerable target. It is particularly ironic that Congress should begin consideration of this measure immediately after completing work on the complex and controversial farm bill. After spending months in committee and over a week on the floor devising programs to support farm income and promote agricultural exports, we now turn around and consider erecting severe new import barriers that will almost certainly bring harsh retaliation against American agriculture, leaving farmers with even greater surpluses, depressed prices, and an even more critical need for budget-expanding relief programs. Does it make any sense to approve $141 billion in taxpayer dollars for farm support programs 1 week and invite trade retaliation against our vitally important farm exports the next?

This is not mere pessimistic speculation—the precedent for retaliation in agriculture has already been set. In 1983, the United States imposed unilateral restraints on Chinese textile imports, with the result that the Chinese boycotted United States cotton, soybeans, and synthetic fibers, and cut purchases of United States grain in half. American farmers lost $500 million. Under this bill, China's exports of textiles will be cut by 59 percent, surely a sufficient blow to again bring on retaliation. It can be argued that the other victims of this bill such as Indonesia, whose export will be reduced by 81 percent; Brazil, 80 percent; Thailand, 64 percent; and Taiwan, 47 percent; are not as powerful as China and are therefore less able to consciously repudiate the United States. Nevertheless, these nations will be forced to reduce their exports by economic necessity as their foreign exchange earnings plunge.

Clearly, the concrete economic costs of H.R. 1562 are substantial and will be felt across the Nation. And what will we gain for the price? Because the bill exempts Canada and the European Community from its restrictions, it is likely that the flow of imports will continue unabated, merely shifting in origin from the Asian nations to Europe and Canada. Already textile imports from these two areas are increasing at a faster rate than those from the Pacific rim. Furthermore, the bill does nothing to protect the textile industry from the job losses that have been and will continue to result from technological innovation and increased productivity. Finally, H.R. 1562 does nothing to correct the deeper causes of our trade imbalance, factors such as the overvalued dollar and the need for a new round of multilateral negotiations on trading practices.

Instead, Mr. Chairman, by invoking a protectionist solution of our own, the bill before us makes further negotiation on unfair trading practices virtually impossible. If enacted, H.R. 1562 would violate 38 bilateral trade agreements and would abdicate our commitment to the Multi-Fiber Arrangement. If we are to truly resolve the underlying causes of our serious trade imbalance, we must not abandon the process of multilateral cooperation and discipline; rather we should strengthen it. A long-term approach must both enforce fair trade rules and continue to expand our exports but, as our new committed U.S. Trade Representative, Clayton Yeutter recently noted, he cannot "make the case for opening developing country markets, our major potential growth area, if we pursue the unilateral approach of this bill."

This bill may serve to vent frustration over our expanding trade deficit but it does nothing to solve the problems that produced it and will, in fact, only make our trade situation worse. I urge my colleagues to look beyond the public relations appeal of H.R. 1562, to consider its real costs to the consumer, to American export-oriented businesses, and to the world trading system, and to join me in opposing this bill.

Mr. MINETA. Mr. Chairman, it is with a great deal of reluctance that I rise today in opposition to the Textile and Apparel Trade Enforcement Act.

Like many of my colleagues, I am deeply troubled by the plight of the textile industry in this country. Various industries and regions have become victims of the ecomonic conditions that exist today. Those economic conditions have victimized various industries in my own district. No one among us wants to see any more harm done to those whose careers and financial wherewithal are in these industries.

We here in Congress are charged with the responsibility of serving the greater good of this country. We must stand for policies that will benefit the United States now and in its economic future. We cannot rush to implement a trade policy that provides such a grave disservice to the entire Nation. All facets of our domestic economy are intertwined and when we seek to redress the grievances of one industry, we cannot help but send shock waves throughout the entire economy as well as throughout the entire world marketplace.

Presently, we are demanding of our trade negotiators a better deal for American exporters in foreign markets. We are sending a message that we will no longer tolerate closed markets and persistently unfair trade practices. How then do we explain to our trading partners that when the chips are down, the United States will abrogate treaties such as the Milti-fiber Agreements which governs international textile and apparel trade and unilaterally adopt rigid import barriers that rival their own. What happens to our credibility if we adopt the very tactics that we have decried throughout the world?

It is our overall objective to reduce the trade deficit and to regain our rightful place in the world marketplace. Selecting a single industry for protection doesn't carry us any closer to that objective. It does just the reverse. By choking off textile imports, we would deny major trading partners access to foreign exchange. We would be sending them elsewhere not only to sell their goods, but to make their purchases and to carry on benefical trade relations. The way to improve our trade posture is certainly not to insulate ourselves from full interaction in world commerce. Erecting barriers today starts us on that slow and insidious process that ultimately will harden our trade partners in anti-Americanism and do our country's economy an injustice.

I recognize that we need concrete solutions to our trade problems. I know how dangerous the persistent trade imbalance is to this country and it is unfortunate that easy solutions are not readily available. The economic policies of the last 5 years do not permit this.

But I cannot agree that this feeling of despair is any justification for passing legislation that will be symbolically comforting, but is nonetheless imprudent and sadly misguided. Fifteen years from now, I do not want Americans to look back as they did 15 years after Smoot-Hawley was passed, and say that our leaders did us a disservice by passing that protectionist piece of legislation. Today, I genuinely believe that the United States will suffer a worse economic fate than the situation we find ourselves in today.

Mr. MOLLOHAN. Mr. Chairman, I rise in strong support of the Textile and Apparel Trade Enforcement Act and ask unanimous consent to revise and extend my remarks.

Mr. Chairman, this is a good bill. If enacted, it would reverse the frightening deterioration of one of America's major industries. I am a cosponsor of the bill and I am pleased that the Ways and Means Commit-

tee has reported it to the floor. The facts are undisputed: Between 1980 and 1984 the value of textile and apparel imports more than doubled although domestic consumption increased by only 28 percent. In 1984 the trade deficit in textile and apparel products was almost $15 billion, or 12 percent of our total trade deficit. These economic figures translate into human misery to the tune of some 300,000 lost jobs.

Industrial Darwinists argue that we should simply let our textile industry die. They say this in spite of the 1.8 million individuals, most of them female and many of them minorities, still employed by textile companies. Industrial Darwinism is fine, they say, if one will just take the long view: In two or three decades the American economy will undoubtedly come up with a new industry to replace these 2 million lost jobs. That's all well and good, but I, for one, am just a little concerned about what these 2 million people are going to do while waiting for Adam Smith's invisible hand to take care of them.

Industrial Darwinists also deny the need for an integrated national economy. They do not recognized that we cannot sacrifice one sector of our economy—the textile industry, the steel industry, the glass industry—without serious ramifications to the fabric of our entire economy.

So, this is a good bill, and I am awfully pleased the House will finally get the opportunity to pass it today, but it does emphasize my frustration with our overall trade policy. If this bill were enacted it would address the trade problems of one important sector of our industrial economy, but it does nothing for the other sectors, such as the steel industry, suffering from similar problems. If we decide it is good congressional policy to allow the full House to vote on the textile bill why do we deny the same option for a steel bill? If the Congress decides it is good public policy to enact the textile bill, why is it not good public policy to enact a steel bill? Or a coal bill, or an auto bill?

The President, of course, threatens to veto this legislation. Those of us fighting for American jobs are caught in somewhat of a catch-22 situation with this administration's policies. On the one hand, the administration argues that our trade woes result from an overvalued dollar which in turn is caused by our unprecedented Federal budget deficits. OK, fine. Several months ago this administration once again torpedoed congressional efforts to put together a real deficit reduction plan. Stymied in our efforts to reduce the trade deficit through fiscal action, we adopt the more direct approach of reforming our trade laws. Now the President tells us he will oppose that effort as well. What are we left to do, Mr. President?

The evolution of this administration's—quote, unquote—trade policy has been rather interesting. Last year the fair trade in steel bill progressed almost as far as the textile bill has come this year. Seeing the writing on the wall last year, the President announced his policy of negotiating voluntary steel import agreements. The bottom line is that he did as little as he thought he could get away with politically.

This year, as the textile bill moves through Congress, there is more and more concern on Capitol Hill and throughout the country about the dangers of our trade situation generally. Again, seeing the writing on the wall, the President announces his new trade program. We are finally going to get tough on foreign trade, he says, yet his trade policy does not offer the help our industries need. Again he has done as little as he thinks he can get away with politically. Mr. Chairman, I submit that what this administration offers our American industries is not a trade policy: It is a political damage control policy. I urge my colleagues to reject it and to vote for real trade reform.

Thank you.

Mr. RICHARDSON. Mr. Chairman, I rise today in support of H.R. 1562. My grave concerns about trade issues arise out of seeing the vitality of many of my home State of New Mexico's major industries sapped by unfair foreign trade practices. Our copper, uranium, natural gas, and coal industries have all suffered from foreign barriers to U.S. exports, foreign government subsidization, and "dumping." What is happening in New Mexico is happening all over the country. The textile and apparel industry is no exception.

Over the past 4 years, over a quarter of a million American workers in this industry have lost their jobs. If we do not act, 2 million more jobs will be lost by 1990. These lost jobs translate into the erosion of the economic bases of our communities—which in turn means higher Government costs for unemployment and welfare. These industries are major employers of women and minorities—only half of the workers have completed high school and a high percentage are non-English speaking. They do not have the kinds of skills which can be easily transferred to other jobs. A flood of foreign imports is destroying jobs, job opportunities, and ultimately the industry itself. The textile and apparel industry is one of our Nation's major industries—it must not be allowed to die.

I am very aware of how difficult it is to make ends meet for many of the people in this country. I am also very concerned about the health of our economy—we must take steps to guarantee the future of American jobs. Through the preservation of American jobs and industries, all of the citizens of this country will benefit. For this reason, I urge my colleagues to support with their votes, H.R. 1562. Thank you.

Mr. LAGOMARSINO. Mr. Chairman, I rise in strong opposition to the legislation. Many Members today have discussed the dangers of protectionism and the harmful effect it will have on the U.S. economy. There should be no question about the negative impact protectionism will have for our own exports because of the retaliation we would face from our trading competitors overseas. But, I would urge my colleagues to look also at the effect protectionist legislation would have on our friends and allies who are trying to rescue themselves from being swamped by debt. Singapore Prime Minister Lee Kuan Yew stated it eloquently yesterday.

This legislation singles out Brazil and Mexico among the 12 nations for which special import levels must be established. Those two nations account for the highest foreign debt levels of any nations in the world. Combined, their foreign debt amounts to more than $200 billion. Experts studying the problem of foreign debt in developing countries urge these nations to stimulate exports in order to increase their trade surplus, which can then be used to help pay off the debt.

On the one hand, we are telling these nations to increase their exports, and on the other, with legislation like the textile measure before us, we are putting barriers in the way of their recovery.

No one should feel smug or complacent that if countries like Brazil or Mexcio fail to pay off their debt, we in the United States wouldn't be affected. American banks are extended with more than 40 percent of the loans owed by these developing nations. Defaulting on those loans would create a financial disaster in the United States unparalleled in our memory.

A nation having a trade surplus with the United States is not sufficient cause to retaliate with protectionist measures. It is reported Brazil currently has a $5.6 billion trade surplus with the United States. Some argue that should be changed in order to have a more equitable trading relationship between the United States and Brazil, which would also help to reduce America's serious trade deficit. The truth of the matter is: The United States would be in worse economic shape if Brazil does not pay off its foreign debt, and to do that, Brazil needs an $11 billion trade surplus just to pay the interest on its debt. That doesn't even touch the principal.

I am also confident that my colleagues share my concern about the great tragedy of the earthquake that struck Mexico 3 weeks ago. Under the desperate economic problems that nation faces, we must not proceed with crippling legislation like this that would only complicate further Mexico's efforts to recover and to revitalize its economy.

I urge my colleagues to reject the quick fix, the apparently easy solution of slapping on a tariff to help improve America's trade balance and to protect hard-pressed industry. Such an approach only means disaster in the long run. We must not condemn the United States to financial ruin by passing measures that will promote trade retaliation, international bankruptcy, and our own economic demise. I urge my colleagues to defeat this measure.

Mr. BUSTAMANTE. Mr. Chairman I rise in support of H.R. 1562. If the subject we are discussing today concerned the import of arms and weapons, instead of shirts and fabric, the merits of this bill would not be under debate. If our Arms Control Agreements with the Soviets were as porous as the Multi-Fiber Arrangement [MFA], this Chamber would hear few arguments about

maintaining the sanctity of our international agreements. But we are not talking about the threat to our defense industry. We are discussing the fate of this Nation's ability to clothe itself and the future of the largest part of our national manufacturing sector: The textile and apparel industry.

It is not my intention to engage in an adjectival battle between fair trade versus free trade. Most Members are aware of the problems of managing trade under the MFA, and most of us realize that the United States is often a victim of unfair foreign trading practices. But the one area that has drawn little attention is the nature and extent of textile trade fraud perpetrated by importers and exporter countries.

An internal U.S. Customs Service report prepared in September 1983 concluded: "Widespread conspiracies exist to circumvent quota and import requirements." In another internal document, the Customs Service states it has "identified textile imports as an area of consistent and persistent fraudulent abuse of quota and duty rates."

Unfortunately, our friends in Pacific Basin countries are sources of fraudulent exports to the United States because of unscrupulous practices of some Third World countries—countries we want to help the most—textile and apparel fraud has reached unacceptable proportions. Examples of trade fraud perpetrated on the United States include:

Transshipment schemes where products made in one country are falsely marked "as to country of origin" and shipped to another, which has a liberal quota or no quota restrictions. The merchandise is made to appear that it was produced in the intermediary country.

Falisfication of product classification and decription which allows importers to evade quota restrictions on different product categories.

False declarations of quantities and weights. These practices violate quota and visa restrictions because they misrepresent the actual amount imported and reported under bilateral agreements. As a result, greater quantities of goods are imported to the United States than agreed upon.

These are just three examples of trade fraud which violate our laws and undermine an honest world trading system that could collapse under the weight of widespread fraud and mounting mistrust.

The burden of trade law enforcement is with our Government, and it has neglected its duties. Likewise, the responsibility of honoring our trade agreements is on the major exporting countries and, they, too, have failed to live up to their obligations, as have their export companies and associations.

Even though this Congress has taken action to increase the number of Customs Service inspectors and import specialists, I seriously doubt that the additional resources assigned to this area will do more than just scratch the surface. Little evidence exists that governments of foreign suppliers will crack down on fraudulent trade practices targeted at this country.

The Customs Service conservatively estimates that 450 million dollars' worth of textile and apparel articles were illegally imported in 1983. It projects a 25-percent increase by 1990, totaling $563 million. The dollar amounts may seem small, but all we have are estimates and they are very conservative figures.

Mr. Chairman, the Jenkins bill will make it easier to hold countries to their bilateral obligations, monitor import growth limits on textiles and apparels, and still assure market access for exporting countries at levels consistent with MFA.

Those countries advocating the defeat of this bill do so because other industrial nations have strict limited market accessibility. For example, 2 months ago, Japan implemented its version of the Jenkins bill. However, it did not do it as publicly as we are doing. Instead, it implemented restrictions by an invisible hand which controls that country's importers.

The maintenance of a free and open trading system requires the commitment of all industrial countries. Presently, that commitment is not there. The Jenkins bill is a modest measure that recognizes world trade as it exists, and may help to move it to where it should be. The American economy has been the locomotive that has pulled the world behind it for 2 years. Mr. Chairman, that locomotive is best fueled by large quantities of global good faith and open dealings. The continued high levels of bad faith trade fraud is causing our global economic engine to run out of steam. The Jenkins bill can restore the kind of engine needed by both domestic and foreign trading organizations. Therefore, I urge the passage of this bill.

Mr. PANETTA. Mr. Chairman, I rise in opposition to H.R. 1562, the Textile and Apparel Trade Enforcement Act. While I share in the frustration of my colleagues with regard to the $150 billion merchandise trade deficit that is draining America's economic strength, this legislation is no solution to the problem. Careful analysis of the bill reveals its weaknesses. We must resist the temptation to apply quick-fixes to a situation which demands a comprehensive, long-term approach.

Although there are many factors contributing to the burgeoning trade deficit, the No. 1 culprit is the overvalued dollar. How are we to expect our products to compete with foreign goods when they are marketed with a price tag that reflects a dollar figure that is inflated by 40 percent? We are, in effect, slapping a surcharge on every product that is in competition with a foreign-made counterpart, both here and abroad. The textile bill proposes to restore the competitiveness of our industry by limiting the number of imports that enter our borders in an attempt to reduce foreign competition.

This approach is not going to work, for a number of reasons. First, such an action constitutes an open invitation for retaliation. China, for example, has explicitly proclaimed that upon enactment of this law it will immediately take in-kind action against our agricultural exports. Other nations will certainly follow suit. Who would profit by such an escalation of the trade war? Certainly not the average American.

A consensus has been developing that any rational trade policy must include a call for a new round of GATT to extend and confirm existing agreements. America's hand in these negotiations would be severely undercut by the passage of this legislation, since it is in violation of the Multi-Fiber Agreement, negotiated under the auspices of GATT. In addition, it would abrogate at least 34 existing bilateral agreements. We must enter a new round of international trade negotiations from a position of strength, able to persuade our trading partners to open up their markets as we have opened up ours. H.R. 1562 would seriously undermine that argument.

The cost of this bill to American consumers has been estimated at $28 billion. While approximately 36,000 jobs would be saved through this added protection, 58,000 jobs would be eliminated in the retail industry, thereby resulting in a net loss of 22,000 jobs. Furthermore, the industry currently enjoys a tariff rate of 22 percent, as compared with an average of 5 percent for all other domestic industries. There are over 1,000 quotas already in place for textiles and textile products.

Instead of providing further protection for this industry, I believe we must concentrate our efforts on developing a comprehensive strategy to relieve the trade crisis that would entail: First, easing down the price of the dollar; second, enhancing the productive capacities of our industries; third, strengthening and enforcing our existing trade laws; fourth, assisting our trading partners in the developing world to improve the performance of their own weakening economies; and fifth, assisting domestic industries adapt to the changing economic environment in which they must compete.

I am under no illusions that this prescription is an easy one to follow. However, the situation has so deteriorated that there simply are no painless solutions, neither for the affected industries, and their workers, nor for politicians called upon to solve the problem overnight.

We must not attack the trade problem on a piece-meal basis. America would be better served by a policy designed to place our Nation's manufacturers and industries back on a sound economic footing. Glossing over the problem by applying another coat of protectionism will catch up with us in the long run. I urge my colleagues to vote no on H.R. 1562.

Mr. FUQUA. Mr. Chairman, I stand before you today in support of a measure which has a direct impact, not only on the people of my district, but on the entire Nation. The Textile and Apparel Trade Enforcement Act of 1985 will force adhesion to the objectives of the Multi-Fiber Agreement and set new limits on imports from major exporting countries in order to put a halt to the import explosion which is taking place in our textile and apparel market.

This measure is necessary, in part, due to major flaws in current U.S. regulation practices. At present, uncontrolled countries are producing a great deal of materials and apparel for export to the United States. Many of these countries were not producing or producing very little when current quotas were set, so they did not come under consideration. There has also been a boom in the production of material which has never been regulated under current agreements.

This influx is complicated by lax U.S. regulations and cheating by exporting nations. Current regulations allow countries to borrow quota amounts from previous and/or future years in order to get their products into the U.S. immediately. These nations are even able to switch category assignments of products to fill category voids. But the ultimate insult is the realization that many countries completely circumvent our quota system by rerouting their products through nonquota countries like Japan.

These regulation difficulties are capped-off by the lax inspection and monitoring by the U.S. Customs Agency, the Agency ultimately responsible for control of imports. I realize that the Agency's priorities of the prevention of narcotics into the United States and the close monitoring of high technology import quotas are extremely important; however, the total disruption of our domestic textile and apparel market is equally important.

The ramifications of this disruption are evidenced by the fact that 36 States contain textile plants, 45 States produce apparel and 48 States produce cotton, wool or man-made fiber. But even more important to me is the detrimental effect this flood of imports is having on my own north Florida district. We have approximately 1,050 workers in three northwest Florida manufacturing plants. A fourth plant closed permanently, laying off over 200 workers, and still another plant had to close for several months last spring, a move which affected 120 employees.

This crisis urgently calls for strong and creative leadership by this body. I urge my colleagues to join me in taking a strong stand in support of the quality and pride of the American textile and apparel industry by voting in favor of this measure.

Mr. PORTER. Mr. Chairman, I rise in strong opposition to this legislation.

Two initial observations regarding our domestic textile and apparel industry should be made. First, the problems facing the industry are serious, but they are not new. The industry is already one of the most protected in the United States. Second, the substantial loss of textile and apparel jobs, and the tragedy this creates for many small towns, cannot be blamed entirely on imports.

The industry maintains that it needs a 3-year escape from imports in order to retool and increase productivity. The textile industry, however, has already been granted substantial protection and has already undertaken a modernization effort. This modernization has produced an American textile industry which is less labor intensive than its foreign competitors, an industry which uses fewer workers to produce more goods. Job losses continue while industry profits remain high.

A textile bill which, its proponents claim, is necessary both to save jobs and to allow the industry to modernize must, therefore, be seen as a bill which promises to accomplish two opposing goals. In reality, the bill must be seen as an attempt to insulate a domestic industry from foreign competition so that either continued modernization can be avoided and jobs thereby saved, or industry profits can be protected and strengthened while employment is allowed to decline. Passage of this bill will set off, within the domestic textile and apparel industry, a fight for the benefits of protectionism. Passage of this bill will reinvigorate those institutional forces which resist competition and will ultimately accelerate the decline of U.S. competitiveness. Furthermore, this discriminatory legislation will not affect European imports which, to an even greater extent than Pacific Rim imports, receive a substantial market edge because of the strength of the dollar.

This bill has the distinction of being the first piece of protectionist legislation to be considered by this Congress. There will be many more. This Congress can generate any amount of rhetoric on the subject of international trade that it wishes to, but no amount of rhetoric will change the facts. A Federal budget deficit of $200 billion, and a national debt of $2 trillion is resulting in an unprecedented inflow of foreign capital, a relatively high market interest rate and a dollar that is so strong it is destroying our ability to compete.

Many years from now the historians will remember this Congress with a tone of disrespect. They will remember this Congress as a body which reached the height of hypocrisy. A Congress which exhibited the purest form of cowardice and deceit in addressing the budget deficit and turned instead—with all guns blazing—to the nearby and readily identifiable manifestations of that fundamental failure on the budget.

This legislation represents our unwillingness to address the budget deficit, it represents our unwillingness to demand with one voice that the State Department cease to obstruct the placement of customs fraud specialists in those nations where many currently illegal textile imports originate, and it represents our unwillingness to work with our allies toward a reasonable compromise on this issue.

This legislation gives many Members of this body a bully pulpit to appear strong, to appear concerned, to demonstrate their support for America. But in reality there is no such glory in this bill—it is bad domestic economic policy, it is bad international economic policy and, as the Prime Minister of Singapore so eloquently reminded us yesterday, it is tragically bad foreign policy. Ultimately, we are fooling no one but ourselves with this legislation—it represents not the beginning of a solution to our trade deficit but a barometer for future historians of our failure on the budget deficit. We have met the enemy, and he is us.

Mr. DIXON. Mr. Chairman, I rise in support of the Textile and Apparel Enforcement Act (H.R. 1562), a bill that is supported by colleagues on both sides of the aisle.

Our trade deficit is expected to reach over $150 billion this year, and I am seriously concerned about the deterioration in our country's trade performance. The textile industry, in particular, is besieged by low-cost imports that has resulted in a decline in America's textile productivity, cost American jobs, and is partially responsible for the steady increase in our trade deficit. Congress has a chance today to respond to this crisis, and I believe the bill before us is a reasonable and fair legislative measure that restores order to our textile industry.

This bipartisan measure speaks out on the side of labor—the thousands of textile workers in America whose jobs have been lost and those whose jobs are threatened by the rapid growth of textile imports into the United States. I agree with my colleagues that our domestic industries can compete with other nations, but only when the scales are evenly balanced, not slightly tilted in favor of our foreign competitors' industry which is heavily subsidized by its government.

Some opponents argue that passage will cost more jobs than it will save; that as a protection measure, it will result in retaliation against our major trading partners; and it would drive up consumer prices. But, I cannot agree with these arguments.

Congress has fashioned a meaningful legislative initiative to address the textile problem. The bill seeks to ensure an orderly and nondisruptive system to control the growth of imported fibers, textiles and apparels entering the United States. This bill would not eliminate import growth, but would set a new quota baseline for each major exporting country under the Multi-Fiber Arrangement. Establishing a system to restrain imports is essential if we are to limit the business losses and curb the unemployment which is gripping the textile manufacturing industry.

I realize that imports can also promote jobs and offer a wider variety of consumer goods in the United States. However, we need to maintain a strong domestic apparel industry, and I believe this legislation offers a measured response to excessive growth in imports that threaten textile markets in the United States.

Congress must act decisively and the passage of this bill will send a clear signal to our trading partners that we mean business. Let's protect the jobs of all Americans. Let's protect our American industry by passing this measure.

Mr. GEJDENSON. Mr. Chairman, I rise in support of H.R. 1562, a bill to establish permanent import quotas on imports of textiles and textile products from non-EEC countries. I urge the support of my colleagues for this bill because I believe that passage of H.R. 1562 is the single most powerful thing we can do to send a message to the President that something must

be done—and done soon about the crisis in our domestic textile industry.

Some will say that this legislation is too strong, that we should rely on the magic of the marketplace to sort things out or perhaps continue to work through the mechanism of the multinational Multi-Fiber Arrangement. But I would respond by saying that the time is long past for soft statements of concern by the Congress and a continued reliance on a process that has failed to stem the flood of foreign imports into this country. The crisis we see today in the textile industry is too great for that. In just 4 years, for example, 250 textile factories across the country have closed and more than 250,000 jobs have been lost.

While this legislation may not be perfect—some less prosperous and less democratically stable countries may be hurt more than I would like—I feel that we must pass it without further delay. We, in this body, have the responsibility of considering the 1 in 10 Americans working in manufacturing who are employed by the textile industry. It is the single largest industrial employer of women and minorities. These are people who must live every day with the fear that their jobs will be the next to go. They are our responsibility. I know that in my own State of Connecticut, once the site of vital mill towns, 2,200 textile jobs were lost from 1980 to 1984. And this frightening trend is accelerating: In just the last year alone, from July 1984 to July 1985, another 2,100 textile jobs have been done away with in Connecticut. This cannot go on—the despair, the pain and the frustration felt by workers when they see the factories to which they have devoted years of their working lives close and the towns they grew up in slowly die is something that we in Congress must stop and I believe this legislation could do that.

I think that all of us know that to really remedy the whole trade crisis this Nation is in we have to get serious about the $220 billion Federal deficit before it wreaks any more havoc on our ability to compete on the world market. But as necessary as that more comprehensive solution is, it won't bring any immediate relief to the industries that are being hurt right now. Relief is needed now and that is why I strongly support the measure we have before us today.

The CHAIRMAN. All time has expired under general debate.

Pursuant to the rule, the bill is considered as having been read for amendment under the 5-minute rule. No amendments to the bill are in order except: First, an amendment to strike out the blanks and the comma on page 20, line 4 and the date "1985" on page 20, line 5 of the bill and to insert in lieu thereof "the date of enactment of this Act", which shall be considered as having been adopted; and second, amendments recommended by the Committee on Ways and Means, which shall not be subject to amendment.

The text of the bill is as follows:

H.R. 1562

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Textile and Apparel Trade Enforcement Act of 1985".

SEC. 2. POLICY.

The policy of this Act is—

(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports to textiles and textile products; and

(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

SEC. 3. FINDINGS

The Congress finds that—

(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December, 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from major exporting countries;

(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 per centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts and sweaters exceeds 50 per centum of domestic consumption;

(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

(8) imports of textiles and textile products into the United States are predominantly the product of major exporting countries, with five large exporting countries now accounting for more than 50 per centum of all imports of textiles and textile products;

(9) the domination of import trade by producers in the major exporting countries has limited participation in the United States market by other exporting countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

(10) a change in United States textile trade policy to afford the smaller exporting countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the nation's overall merchandise trade deficit;

(12) the current level of imports of textiles and textile products, nine billion eight hundred million square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and pomotion efforts, have built markets not for themselves but for foreign growers;

(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the United States has long recognized that imports of wool products pose particular problems for the wool products industries in the United States and has therefore adopted a policy of 1 per centum import growth on wool products; this policy has been acknowledged in our bilateral agreements under the Multi-Fiber Arrangement and has been reviewed by the Textile Surveillance Body;

(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more

modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

(A) to require the establishment of import levels for textiles and textile products supplied by major exporting countries that reflect—

(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum or lower annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

(B) to require the establishment of import levels for textiles and textile products supplied by smaller exporting countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

(C) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

(21) the establishment of import levels, and limitation of future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United Staes regarding trade in textiles and apparel;

(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textile and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

SEC. 4. DEFINITIONS.

For purposes of this Act—

(1) The term "textiles and textile products" includes, but is not limited to, all manmade fibers, tops, yarns, piece goods, madeup articles, garments, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, parts 1, 4, 5, 7, or 13 of schedule 7, part 1 of schedule 8, or part 1 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202);

(2) The term "category" means, with respect to textiles and textile products imported from each country, each of the following—

(A) Each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985;

(B) A category consisting of the manmade fiber articles classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

(C) Each category consisting of each of the following products when, because of any fiber content, that product is not subject to the Multi-Fiber Arrangement:

(i) yarn,

(ii) fabric,

(iii) apparel, and

(iv) other textile products;

(3) The term "import sensitive category" means—

(A) A category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and ManMade Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; or

(B) A category covering wool products;

(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on January 1, 1985), a foreign territory, or an insular possession of the United States;

(5) The term "major exporting country" means a country (other than a country in the Caribbean region) from which the United States imported an annual aggregate quantity of textiles and textile products under all categories that equaled or exceeded 1.25 per centum of all textiles and textile products under all categories imported into the United States from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(6) The term "country in the Caribbean region" means the United Mexican States and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702);

(7) The term "wool product" means an article containing over 17 per centum by weight of wool;

(8) The term "exporting country" means a country other than a major exporting country;

(9) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States;

(10) The term "imported" means entered; and

(11) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

SEC. 5 LIMITS ON TEXTILE AND APPAREL IMPORTS.

(a) CALENDAR YEAR 1985.—Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under each category that is entered during calendar year 1985 shall not exceed—

(1) in the case of textiles and textile products that are a product of a major exporting country, the lesser of an amount equal to 101 per centum (A) of the aggregate quantity of such products from such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products from such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or (B) if the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products from such country classified under such category that entered during calendar year 1984;

(2) in the case of textiles and textile products that are a product of an exporting country, an amount equal to the aggregate quantity of such products from such country classified under such category that entered during calendar year 1984, plus an amount equal to (A) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or (B) 1 per centum, in the case of a category that is an import sensitive category.

For purposes of this section, if during any calendar year after 1984 the United States imports from a country, other than a country in the Caribbean region, that is not a major exporting country an aggregate quantity of textiles and textile products under all categories that equals or exceeds 1.25 per centum of all textiles and textile products under all categories imported into the United States from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such country shall be considered to be a major exporting country for all succeeding calendar years.

(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under

each category that may be entered during each such calendar year shall—

(1) in the case of such products that are a product of a major exporting country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

(2) in the case of such products that are a product of an exporting country, be increased by an amount equal to—

(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products from a country that may be entered during a calendar year under a category is—

(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, madeups, and miscellaneous products, other than wool products;

(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products that may be entered from such country under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of imports from such country under such category equals the minimum quantity prescribed under this subsection.

(d) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this Act.

SEC. 6. IMPORT LICENSING.

In order to ensure the equitable and efficient administration of section 5 of this Act, the Secretary of Commerce shall, within six months after the date of enactment of this Act, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system.

SEC. 7. ANNUAL REPORT.

Not later than March 15, 1986, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this Act during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 5. All departments and agencies shall cooperate in preparation of this report as requested by the President.

SEC. 8. EFFECTIVE DATE.

(a) IN GENERAL.—The provisions of this Act shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption after the date of enactment of this Act.

(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall prescribe by regulation the aggregate quantity, if any, of textiles and textile products that may be entered under section 5 (a) or (c) of this Act from each country under each category during the period beginning on the date of enactment of this Act and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products from a country under a category entered after December 31, 1984, and before the date of enactment of this Act exceeds the quantity permitted entry for such country and such category during calendar year 1985 under section 5 (a) or (c), the limit that would otherwise apply under section 5(b) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity.

The CHAIRMAN. Are there any amendments recommended by the Committee on Ways and Means?

Mr. GIBBONS. We have no amendments, Mr. Chairman.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. MAVROULES, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1562) to achieve the objectives of the Multi-Fiber Arrangement and to promote the economic recovery of the U.S. textile and apparel industry and its workers, pursuant to House Resolution 286, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Under the rule, the amendment is considered as having been adopted.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. FRENZEL. Yes, I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. FRENZEL moves to recommit the bill, H.R. 1562, to the Committee on Ways and Means.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that ayes appeared to have it.

□ 1450

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 262, nays 159, answered "present" 1, not voting 12, as follows:

ANSWERED "PRESENT"—1

Bedell

NOT VOTING—12

Addabbo	Lungren	Roth
Hyde	Martin (IL)	Rudd
Kildee	O'Brien	Solomon
Livingston	Porter	Strang

□ 1500

The Clerk announced the following pair:

On this vote:

Mr. Kildee for, with Mr. Hyde against.

Mr. BARTLETT and Mr. MOORHEAD changed their votes from "yea" to "nay."

Mr. LENT changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

ARTS, HUMANITIES, AND MUSEUMS AMENDMENTS OF 1985

The SPEAKER. Pursuant to House Resolution 266 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3248.

□ 1512

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3248), to amend the National Foundation on the Arts and the Humanities Act of 1965, and for other purposes, with Mr. FRANK [Chairman pro tempore] in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore (Mr. OBERSTAR). When the Committee of the Whole rose on Tuesday, September 24, 1985, all time for general debate had expired.

Pursuant to the rule, the committee amendment in the nature of a substitute now printed in the reported bill shall be considered by titles as an original bill for the purpose of amendment, and each title shall be considered as having been read.

The Clerk will designate section 1.

The text of section 1 is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Arts, Humanities, and Museums Amendments of 1985".

The CHAIRMAN pro tempore. Are there any amendments to section 1?

If not, the Clerk will designate title I.

The text of title I is as follows:

TITLE I—AMENDMENTS TO NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES ACT OF 1965

SEC. 101. TECHNICAL AMENDMENT; SHORT TITLE.

The National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 951 et seq.) is amended—

(1) by striking out

"TITLE I—ENDOWMENTS FOR ARTS AND HUMANITIES", and

(2) in section 1 by striking out "title" and inserting in lieu thereof "Act".

SEC. 102. DECLARATION OF PURPOSE.

Section 2 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 951) is amended—

(1) in paragraph (2) by striking out "man's",

(2) in paragraph (3) by striking out "men" and inserting in lieu thereof "people",

(3) in paragraph (7) by striking out "and" at the end thereof,

(4) by redesignating paragraph (8) as paragraph (9), and

(5) by inserting after paragraph (7) the following new paragraph:

"(8) that Americans should receive in school, background and preparation in the arts and humanities to enable them to recognize and appreciate the aesthetic dimensions of our lives, the diversity of excellence that comprises our cultural heritage, and artistic and scholarly expression; and".

SEC. 103. DEFINITIONS.

Section 3 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 952) is amended—

(1) in subsection (a)—

(A) by inserting "and interpretation" after "study" the first place it appears, and

(B) by inserting "to reflecting our diverse heritage, traditions, and history and" after "particular attention", and

(2) in subsection (d)(2)—

(A) by inserting "for purposes of sections 5(l) and 7(h) only," after "(2)",

(B) by inserting "or humanistic" after "artistic", and

(C) by inserting "and the National Council on the Humanities, as the case may be," after "the National Council on the Arts".

SEC. 104. ESTABLISHMENT OF A NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES.

Section 4(a) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 953(a)) is amended—

(1) by striking out "Humanities,," and inserting in lieu thereof "Humanities,", and

(2) by striking out "(hereinafter established)".

SEC. 105. ESTABLISHMENT OF THE NATIONAL ENDOWMENT FOR THE ARTS.

Section 5 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 954) is amended—

(1) in subsection (b)(1) by striking "chairman" and inserting in lieu thereof "Chairperson",

(2) in subsection (c)—

(A) by redesignating paragraphs (4), (5), and (6) as paragraphs (6), (7), and (8), respectively, and

(B) by inserting after paragraph (3) the following new paragraphs:

"(4) projects and productions which have substantial artistic and cultural significance and that reach, or reflect the culture of, a minority, inner city, rural, or tribal community;

"(5) projects and productions that will encourage public knowledge, understanding, and appreciation of the arts;",

(D) by striking out "clause (5)" and inserting in lieu thereof "clause (7)", and

(E) by adding at the end thereof the following:

"In selecting individuals and groups of exceptional talent as recipients of financial assistance to be provided under this subsection, the Chairperson shall give particular regard to artists and artistic groups that have traditionally been underrepresented.", and

(3) in subsection (g)(2)—

(A) in subparagraph (B) by striking out "and" at the end thereof,

(B) in subparagraph (C) by striking out the period at the end thereof and inserting in lieu thereof ", including a description of the progress made toward achieving the goals of the State plan;", and

(C) by inserting after subparagraph (C) the following new subparagraphs:

"(D) provides—

"(i) assurances that the State agency has held, after reasonable notice, public meetings in the State to allow all groups of artists, interested organizations, and the public to present views and make recommendations regarding the State plan; and

"(ii) a summary of such recommendations and the State agency's response to such recommendations; and

"(E) contains—

"(i) a description of the level of participation during the previous 2 years by artists, artists' organizations, and arts organizations in projects and productions for which financial assistance is provided under this subsection;

"(ii) a description of the extent to which project and productions receiving financial assistance under this subsection are available to all people and communities in the State; and

"(iii) a description of projects and productions receiving financial assistance under this subsection that exist or are being developed to secure wider participation of artists, artists' organizations, and arts organizations identified under clause (i) of this subparagraph or that address the availability of the arts to all people or communities identified under clause (ii) of this subparagraph.

No application may be approved unless the accompanying plan satisfies the requirements specified in this subsection.",

(4) in subsection (i) by striking out "he" and inserting in lieu thereof "the Secretary of Labor",

(5) in subsection (l)(1)(D)—

(A) by inserting "and local arts agencies" after "local arts groups", and

(B) by striking out "including support of professional artists in community-based residencies;" and inserting in lieu thereof the following:

"including—

"(i) support of professional artists in community based residencies;

"(ii) support of rural arts development;

"(iii) support of and models for regional, statewide, or local organizations to provide technical assistance to cultural organizations and institutions;

"(iv) support of and models for visual and performing arts touring; and

"(v) support of and models for professional staffing of arts organizations and for stabilizing and broadening the financial base for arts organizations;",

(6) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson",

(7) by striking out "his" each place it appears and inserting in lieu thereof "the Chairperson's", and

(8) by adding at the end thereof the following new subsections:

"(m) The Chairperson of the National Endowment for the Arts shall, in consultation with State and local agencies, relevant organizations, and relevant Federal agencies, develop a practical system of national information and data collection on the arts, artists and arts groups, and their audiences. Such system shall include artistic and financial trends in the various artistic fields, trends in audience participation, and trends in arts education on national, regional, and State levels. Not later than 1 year after the date of the enactment of the Arts, Humanities, and Museums Amendments of 1985, the Chairperson shall submit to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate a plan for the development and implementation of such system, including a recommendation regarding the need for any additional funds to be appropriated to develop and implement such system. Such system shall be used, along with a summary of the data submitted with State plans under subsection (g), to prepare a periodic report on the state of the arts in the Nation. The state of the arts report shall include a description of the the availability of the Endowment's programs to emerging and culturally diverse artists, arts organizations, and communities and of the participation by such artists, organizations, and communities in such programs. The state of the arts report shall be submitted to the President and the Congress, and provided to the States, not later than October 1, 1988, and biennially thereafter.".

SEC. 106. NATIONAL COUNCIL ON THE ARTS.

Section 6 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 955) is amended—

(1) in subsection (b)—

(A) by striking out "Chairman" the first place it appears and inserting in lieu thereof "Chairperson",

(B) by striking out "Chairman of the Council" and inserting in lieu thereof "Chairperson of the Council",

(C) in paragraph (1)—

(i) by inserting "(A)" after "who", and

(ii) by inserting before the semicolon at the end thereof the following: "and (B) have established records of distinguished service, or achieved eminence, in the arts",

(D) in the last sentence by striking out "him" and inserting in lieu thereof "the President", and

(E) by adding at the end thereof the following:

"In making such appointments, the President shall give due regard to equitable representation of women, minorities, and persons with disabilities who are involved in the arts.",

(2) in subsection (c) by striking out "his" each place it appears and inserting in lieu thereof "such member's",

(3) in subsection (d) by striking out "Chairman" and inserting in lieu thereof "Chairperson",

(4) in subsection (e) by striking out "Chairman" and inserting in lieu thereof "Chairperson", and

(5) in subsection (f)—

(A) in the first sentence by striking out "his" and inserting in lieu thereof "the Chairperson's",

(B) in the second sentence by striking out "he" and inserting in lieu thereof "the Chairperson",

(C) in the third sentence by striking out "$17,500" and inserting in lieu thereof "$30,000", and

(D) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson".

SEC. 107. ESTABLISHMENT OF THE NATIONAL ENDOWMENT FOR THE HUMANITIES.

Section 7 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 956) is amended—

(1) in subsection (b)—

(A) in paragraph (1) by striking out "chairman" and inserting in lieu thereof "Chairperson", and

(B) in paragraph (2) by striking out "his" each place it appears and inserting in lieu thereof "the Chairperson's",

(2) in subsection (c)—

(A) by redesignating paragraphs (4), (5), (6), and (7) as paragraphs (6), (7), (8), and (9), respectively, and

(B) by inserting after paragraph (3) the following new paragraphs:

"(4) initiate and support programs and research which have substantial scholarly and cultural significance and that reach, or reflect the diversity and richness of our American cultural heritage, including the culture of, a minority, inner city, rural, or tribal community;

"(5) foster international programs and exchanges;",

(C) in paragraph (3) by striking out "workships" and inserting in lieu thereof "workshops",

(D) by striking out "clause (6)" and inserting in lieu thereof "clause (8)", and

(E) by adding at the end thereof the following:

"In selecting individuals and groups of exceptional talent as recipients of financial assistance to be provided under this subsection, the Chairperson shall give particular regard to scholars, and educational and cultural institutions, that have traditionally been underrepresented.",

(3) in subsection (f)—

(A) in paragraph (2)(A)—

(i) in the first sentence by striking out "the Arts and Humanities Act of 1980" and inserting in lieu thereof "the Arts, Humanities, and Museums Amendments of 1985",

(ii) in clause (ii) by inserting "officer" after "chief executive" each place it appears,

(iii) in clause (v) by striking out "and" at the end thereof,

(iv) in clause (vi) by striking out the period at the end thereof and inserting in lieu thereof ", including a description of the progress made toward achieving the goals of the State plan;", and

(v) by inserting after clause (vi) the following new clauses:

"(vii) provides—

"(I) assurances that the State agency has held, after reasonable notice, public meetings in the State to allow scholars, interested organizations, and the public to present views and make recommendations regarding the State plan; and

"(II) a summary of such recommendations and of the response of the State agency to such recommendations; and

"(viii) contains—

"(I) a description of the level of participation during the previous 2 years by scholars and scholarly organizations in programs receiving financial assistance under this subsection;

"(II) a description of the extent to which the programs receiving financial assistance under this subsection are available to all people and communities in the State; and

"(III) a description of programs receiving financial assistance under this subsection that exist or are being developed to secure wider participation of scholars and scholarly organizations identified under subclause (I) of this clause or that address the availability of the humanities to all people or communities identified under subclause (II) of this clause.

No application may be approved unless the accompanying plan satisfies the requirements specified in this subsection.",

(B) in paragraph (3)—

(i) in subparagraph (G) by striking out "and" at the end thereof,

(ii) in subparagraph (H) by striking out the period at the end thereof and inserting in lieu thereof ", including a description of the progress made toward achieving the goals of the plan;", and

(iii) by inserting after subparagraph (H) the following new subparagraphs:

"(I) provides—

"(i) assurances that the grant recipient has held, after reasonable notice, public meetings in the State to allow scholars, interested organizations, and the public to present views and make recommendations regarding the plan; and

"(ii) a summary of such recommendations and of the response of the grant recipient to such recommendations; and

"(J) contains—

"(i) a description of the level of participation during the previous 2 years by scholars and scholarly organizations in programs receiving financial assistance under this subsection;

"(ii) a description of the extent to which the programs receiving financial assistance under this subsection are available to all people and communities in the State; and

"(iii) a description of programs receiving financial assistance under this subsection that exist or are being developed to secure wider participation of scholars and scholarly organizations identified under clause (i) of this subparagraph or that address the availability of the humanities to all people or communities identified under clause (ii) of this subparagraph.

No application may be approved unless the accompanying plan satisfies the requirements specified in this subsection.",

(4) by striking out the last sentence of subsection (g) and inserting in lieu thereof "The Secretary of Labor shall prescribe standards, regulations, and procedures necessary to carry out this subsection not later than 180 days after the date of the enactment of the Arts, Humanities, and Museums Amendments of 1985.",

(5) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(6) by adding at the end thereof the following new subsections:

"(j) It shall be a condition of the receipt of any grant under this section that the group or individual of exceptional talent or the State, State agency, or entity receiving such grant furnish adequate assurances to the Secretary of Labor that all laborers and mechanics employed by contractors or subcontractors on construction projects assisted under this section shall be paid wages at rates not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a–276a-5). The Secretary of Labor shall have, with respect to the labor standards specified in this subsection, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 5 U.S.C. 133z-15) and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

"(k) The Chairperson of the National Endowment for the Humanities shall, in consultation with State and local agencies, other relevant organizations, and relevant Federal agencies, develop a practical system of national information and data collection on the humanities, scholars, educational and cultural groups, and their audiences. Such system shall include cultural and financial trends in the various humanities fields, trends in audience participation, and trends in humanities education on national, regional, and State levels. Not later than 1 year after the date of the enactment of the Arts, Humanities, and Museums Amendments of 1985, the Chairperson shall submit to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate a plan for the development and implementation of such system, including a recommendation regarding the need for any additional funds to be appropriated to develop and implement such system. Such system shall be used, along with a summary of the data submitted with plans under subsection (f), to prepare a report on the state of the humanities in the Nation. The state of the humanities report shall include a description of the availability of the Endowment's programs to emerging and culturally diverse scholars, cultural and educational organizations, and communities and of the participation of such scholars, organizations, and communities in such programs. The state of the humanities report shall be submitted to the President and the Congress, and provided the States, not later than October 1, 1988, and biennially thereafter.

"(l) Not later than 30 days after the date of enactment of the Arts, Humanities, and Museums Amendments of 1985, the Chairperson of the National Endowment for the Humanities shall transmit to the Equal Employment Opportunity Commission each plan and each report required under any regulation or management directive that is issued by the Commission and is in effect on such date of enactment.".

SEC. 108. ESTABLISHMENT OF THE NATIONAL COUNCIL ON THE HUMANITIES.

Section 8 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 957) is amended—

(1) in subsection (b)—

(A) in the first sentence by striking out "Chairman of the National Endowment for the Humanities, who shall be the Chairman" and inserting in lieu thereof "Chairperson of the National Endowment for the Humanities, who shall be the Chairperson",

(B) in the second sentence by striking out "selected on the basis of" and inserting in lieu thereof "individuals who (1) are selected from among private citizens of the United States who are recognized for their broad knowledge of, expertise in, or commitment to the humanities, and (2) have established records of", and

(C) by adding at the end thereof the following:

"In making such appointments, the President shall give due regard to equitable representation of women, minorities, and persons with disabilities who are involved in the humanities.",

(2) in subsection (c) by striking out "his" each place it appears and inserting in lieu thereof "such member's",

(3) in subsections (d), (e), and (f) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(4) in subsection (f)—

(A) in the first sentence by striking out "his" and inserting in lieu thereof "the Chairperson's", and

(B) in the second sentence by striking out "he" and inserting in lieu thereof "the Chairperson".

SEC. 109. ESTABLISHMENT OF THE FEDERAL COUNCIL ON THE ARTS AND THE HUMANITIES.

Section 9 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 958) is amended—

(1) in subsection (b)—

(A) in the first sentence by striking out "Chairman of the National Endowment for the Arts, the Chairman of the National Endowment for the Humanities" and inserting in lieu thereof "Chairperson of the National Endowment for the Arts, the Chairperson of the National Endowment for the Humanities",

(B) in the second sentence by striking out "Chairman" and inserting in lieu thereof "presiding officer",

(C) in the last sentence by striking out "he" and inserting in lieu thereof "the President", and

(D) by adding at the end thereof the following:

"For the purposes of the Arts and Artifacts Indemnity Act (20 U.S.C. 971 et seq.), the Secretary of the Smithsonian Institution, the Director of the National Gallery of Art, and the members of the Council who are designated by the Chairman of the Senate Commission on Art and Antiquities and the Speaker of the House of Representatives shall not serve as members of the Council.",

(2) in subsection (c)(1) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(3) by striking out subsections (d) and (e) and inserting in lieu thereof the following new subsections:

"(d) The Council shall conduct a study to determine—

"(1) the nature and level of Federal support provided to museums;

"(2) the areas in which such support overlaps or is inadequate, particularly in case of emerging museums;

"(3) the impact of the Institute of Museum Services in carrying out its stated purpose; and

"(4) the impact and nature of conservation and preservation programs being carried out under this Act and other Federal laws and the areas in which such programs overlap or are inadequate.

"(e) Not later than October 1, 1987, the Council shall develop and submit to the President policy recommendations regarding the acquisition of works of art for use on Federal property, the disposal of such works of art, and the maintenance of such works of art. Such recommendations shall—

"(1) address the need for participation by local citizens and by State and local arts agencies in the process of placing works of art on Federal property and removing such works of art from such property,

"(2) provide that planning for Federal commissions of works of art will be included in the preliminary planning of new Federal

buildings and will be an integral part of the architectural design of such buildings,

"(3) provide for making determinations that works of art located or to be located in existing Federal buildings are appropriate for their respective settings and spaces, and

"(4) avoid the development of an official style, in either architecture or associated works of art, and encourage Federal commissions of works of art that will give expression to the full diversity and vitality of American life.".

SEC. 110. ADMINISTRATIVE PROVISIONS.

Section 10 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 959) is amended—

(1) in subsection (a)—

(A) in the matter preceding paragraph (1) by striking out "Chairman of the National Endowment for the Arts and the Chairman of the National Endowment for the Humanities" and inserting in lieu thereof "Chairperson of the National Endowment for the Arts and the Chairperson of the National Endowment for the Humanities",

(B) in paragraph (1)—

(i) by striking out "he" and inserting in lieu thereof "the Chairperson", and

(ii) by striking out "his" and inserting in lieu thereof "the Chairperson's",

(C) in paragraph (2) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson",

(D) in paragraph (3) by striking out "his" and inserting in lieu thereof "the Chairperson's",

(E) in paragraph (4) by striking out "section 15" and all that follows through "representation" and inserting in lieu thereof "section 3109 of title 5, United States Code",

(F) in the matter following paragraph (8) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(G) by adding at the end thereof the following:

"In selecting panels of experts under paragraph (4) to review and make recommendations with respect to the approval of applications for financial assistance under this Act, each Chairperson shall appoint persons who have exhibited expertise and leadership in the field under review, who broadly represent diverse characteristics in terms of aesthetic perspective, and geographical factors, and who broadly represent cultural diversity. Each Chairperson shall assure that the membership of panels changes substantially from year to year, and that no more than 20 per centum of the annual appointments shall be for service beyond the limit of 3 consecutive years on a subpanel. In making appointments, each Chairperson shall give due regard to the need for experienced as well as new members on each panel. Panels of experts appointed to review or make recommendations with respect to the approval of applications or projects for funding shall, when reviewing such applications and projects, not recommend for funding those which, in the context in which they are presented, in the experts view, lack serious literary or artistic merit.",

(2) in subsection (b) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(3) by striking out subsection (d) and inserting in lieu thereof the following new subsections:

"(d)(1) The Chairperson of the National Endowment for the Arts and the Chairperson of the National Endowment for the Humanities, shall each ensure post-award evaluation of financial assistance provided under this Act.

"(2) In the case of financial assistance provided under section 5(c) to any individual, the Chairman of the National Endowment for the Arts shall ensure that—

"(A) post-award evaluation is conducted with respect to the project or production for which such assistance is provided; and

"(B) the results of such evaluation are taken into consideration for purposes of determining whether to provide subsequent financial assistance under such section to such individual.

"(e)(1) The Chairperson of the National Endowment for the Arts and the Chairperson of the National Endowment for the Humanities, with the cooperation of the Secretary of Education, shall conduct jointly a study of—

"(A) the state of arts education and humanities education, as currently taught in the public elementary and secondary schools in the United States; and

"(B) the current and future availability of qualified instructional personnel, and other factors, affecting the quality of education in the arts and humanities in such schools.

"(2) The Endowments shall consult with the Committee on Labor and Human Resources of the Senate and the Committee on Education and Labor of the House of Representatives in the design and implementation of the study required by this subsection.

"(3) Not later than 2 years after the date of the enactment of the Arts, Humanities, and Museums Amendments of 1985, the Endowments shall submit to the President, the Congress, and the States a report containing—

"(A) the findings in paragraph (1);

"(B) the Endowments' views of the role of the arts and humanities in elementary and secondary education;

"(C) recommendations designed to encourage making arts and humanities education available throughout elementary and secondary schools;

"(D) recommendations for the participation by the National Endowment for the Arts and the National Endowment for the Humanities in arts education and humanities education in such schools; and

"(E) an evaluation of existing policies of the National Endowment for the Arts and the National Endowment for the Humanities that expressly or inherently affect the Endowments' abilities to expand such participation.

"(f) Not later than October 1, 1987, each Endowment shall submit to the Congress a report detailing the procedures used in selecting experts for appointment to panels and the procedures applied by panels in making recommendations with respect to approval of applications for financial assistance under this Act, including procedures to avoid possible conflicts of interest which may arise in providing financial assistance under this Act.".

SEC. 111. AUTHORIZATION OF APPROPRIATIONS.

(a) FUNDS AUTHORIZED FOR PROGRAM GRANTS.—Section 11(a)(1) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(a)(1)) is amended—

(1) in subparagraph (A)—

(A) by striking out "$115,500,000" and all that follows through "1984, and" and inserting in lieu thereof "$121,678,000 for fiscal year 1986 and", and

(B) by striking out "fiscal year 1985" and inserting in lieu thereof "each of the fiscal years 1987, 1988, and 1989", and

(2) in subparagraph (B)—

(A) by striking out "$114,500,000" and all that follows through "1984, and" and inserting in lieu thereof "$95,207,000 for fiscal year 1986 and", and

(B) by striking out "fiscal year 1985" and inserting in lieu thereof "each of the fiscal years 1987, 1988, and 1989".

(b) FUNDS AUTHORIZED TO MATCH NON-FEDERAL FUNDS RECEIVED.—Section 11(a) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(a)) is amended—

(1) in paragraph (2)—

(A) in subparagraph (A)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1989",

(ii) by striking out "$18,500,000" the first place it appears and all that follows through "1984, and" and inserting in lieu thereof "$8,820,000 for fiscal year 1986 and", and

(iii) by striking out "fiscal year 1985" and inserting in lieu thereof "each of the fiscal years 1987, 1988, and 1989",

(B) in subparagraph (B)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1989",

(ii) in clause (ii) by inserting "and subgrantees" after "grantees" each place it appears,

(iii) by striking out "$12,500,000" and all that follows through "1984, and" and inserting in lieu thereof "$10,780,000 for fiscal year 1986 and", and

(iv) by striking out "fiscal year 1985" and inserting in lieu thereof "each of the fiscal years 1987, 1988, and 1989", and

(2) in paragraph (3)—

(A) in subparagraph (A)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1989",

(ii) by striking out "$27,000,000" and all that follows through "1984, and" and inserting in lieu thereof "$20,580,000 for fiscal year 1986, and", and

(iii) by striking out "fiscal year 1985" and inserting in lieu thereof "each of the fiscal years 1987, 1988, and 1989", and

(B) in subparagraph (B)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1989",

(ii) by striking out "$30,000,000" and all that follows through "1984, and" and inserting in lieu thereof "$19,600,000 for fiscal year 1986 and", and

(iii) by striking out "fiscal year 1985" and inserting in lieu thereof "each of the fiscal years 1987, 1988, and 1989", and

(C) in subparagraph (C)—

(i) by striking out "Chairman" and inserting in lieu thereof "Chairperson", and

(ii) by striking out "he" and inserting in lieu thereof "the Chairperson", and

(3) in paragraph (4) by striking out "Chairman" each place it appears and by inserting in lieu thereof "Chairperson".

(c) FUNDS AUTHORIZED FOR ADMINISTRATION OF PROGRAMS OF THE NATIONAL ENDOWMENTS.—Section 11(c) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(c)) is amended—

(1) in paragraph (1) by striking out "$14,000,000" and all that follows through "1985" and inserting in lieu thereof "$15,982,000 for fiscal year 1986 and such sums as may be necessary for each of the fiscal years 1987, 1988, and 1989",

(2) in paragraph (2) by striking out "$13,000,000" and all that follows through "1985" and inserting in lieu thereof "$14,291,000 for fiscal year 1986 and such sums as may be necessary for each of the fiscal years 1987, 1988, and 1989", and

(3) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson".

(e) TECHNICAL AMENDMENT.—Section 11(d) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(a)) is amended by striking out "under this title".

AMENDMENTS OFFERED BY MR. WILLIAMS

Mr. WILLIAMS. Mr. Chairman, I offer technical amendments to title I and title II, and I ask unanimous consent that the amendments be considered en bloc, considered as read, and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Montana?

Mr. BARTLETT. Mr. Chairman, reserving the right to object, and I shall not object, I would inquire of the gentleman from Montana [Mr. WILLIAMS], the chairman of the subcommittee, as to the nature of these amendments. It is my understanding that these amendments have been drafted and cleared with this side of the aisle, and I would just inquire if those are the amendments that the gentleman has cleared with this side of the aisle?

Mr. WILLIAMS. That is correct.

Mr. BARTLETT. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

The text of the amendments is as follows:

Amendments offered by Mr. WILLIAMS:

Page 8, line 8, strike out "subsections" and insert in lieu thereof "subsection".

Page 24, line 3, insert "or humanistic" after "aesthetic".

Page 24, line 13, insert "by the National Endowment for the Arts" after "funding".

Page 24, line 16, strike out "experts" and insert in lieu thereof "experts' ".

Page 25, line 4, strike out "Chairman" and insert in lieu thereof "Chairperson".

Page 28, line 20, insert "and" at the end thereof.

Page 29, line 10, strike out "and" at the end thereof.

Page 29, line 19, strike out the first comma.

Page 29, line 22, strike out "and" at the end thereof.

Page 31, line 10, strike out "(e)" and insert in lieu thereof "(d)".

Page 33, line 6, insert "(a)" before "Section".

Page 33, after line 13, insert the following new subsection:

(b) Section 209(d) of the Museum Services Act (20 U.S.C. 967(d)) is amended by striking out "1985" and inserting in lieu thereof "1989".

Mr. WILLIAMS. Mr. Chairman, I would like to offer several technical amendments to the arts and humanities bill to clarify action which we took in committee and to correct several typographical errors in both titles.

First, we have wanted to ensure the openness and diverseness of the expert peer panel review system in both endowments. We have specified that members of the panels, among other things, should represent diverse, aesthetic perspectives. The National Endowment for the Humanities has asked us to include "humanistic" as well as "aesthetic" perspectives to more accurately reflect the types of experts they appoint to panels.

Second, we added language in the committee to ensure that projects are not funded by the National Endowment for the Arts which lack serious literary or artistic merit. This second amendment would spell out the committee's intent which was to apply this directive to the National Endowment for the Arts where several members have had concerns about a few of the many grants they make.

□ 1515

Mr. BARTLETT. Mr. Chairman I rise in support of the amendments.

Mr. Chairman, I support the technical amendments that the gentleman from Montana [Mr. WILLIAMS], the subcommittee chairman has offered, and also plan to support a series of amendments that will be offered today by a number of Members on both sides of the aisle.

I might say preliminarily that I very much appreciate the willingness of the chairman of the subcommittee and the chairman of the appropriations subcommittee and other Members on both sides of the aisle to work with all Members of this body to come up with an acceptable reauthorization of the National Endowment for the Arts.

Now, as I believe most Members of this body know, the National Endowment for the Arts' reauthorization at the full committee level and to some extent on the floor during the appropriations consideration was not as smooth and free of controversy as I think most of us would have liked, both at the full committee markup and subsequently, however, the chairman of the subcommittee and other Members on both sides have expressed a willingness to work together to resolve the differences of opinion which by and large we have resolved today.

I take a few minutes to comment on the bill itself together with the amendments that will be offered. I continue to have some limited reservations about H.R. 3248, but frankly I am generally supportive of the improved legislation which we consider here today together with the amendments that will be offered during the amendment process.

Mr. Chairman, although I have some limited reservations about H.R. 3248, I am generally supportive of the improved legislation which we are considering today.

The full House may be unaware of the improvements made in the bill when it was considered by the Education and Labor Committee. The legislation has received quite a bit of public attention, and most of it was generated prior to its consideration by the committee.

H.R. 3248 was significantly improved in a number of areas which will result in tighter accountability and strengthened procedures at the National Endowments for the Arts and Humanities.

Because of its responsibility to ensure the effective and appropriate use of taxpayer dollars, the authorizing committee approved the following amendments pertaining to use of public funding for the arts:

Post-award evaluation: By requiring that the National Endowment for the Arts conduct evaluations after awards are made and the moneys are used, taxpayers can be kept informed of how their dollars are being spent.

Artistic/literary merit: While this amendment did not directly address the issue of public funding of offensive materials, in conjunction with the preceding amendment for post-award evaluations, there is assurance that high standards will be used in the criteria for judging applications.

Conflict of interest: Requiring that the endowments report to Congress on their procedures will take care of any questionable situations that might have occurred in the past. The committee's concern was that review panels not include someone whose group or organization is applying for a grant.

In addition to the above amendments which strengthen accountability, the committee approved a fourth amendment which encourages better public understanding of the arts. The amendment reflects congressional intent that public funds be used for arts education and not just entertainment.

I commend my colleagues on the Education and Labor Committee for the major improvements already made in the legislation. I understand that there may be efforts today to further strengthen accountability in the arts, and I intend to support such amendments.

Regretfully, the committee erred in one area, in my opinion. H.R. 3248 extends construction authority to the National Endowment for the Humanities for challenge grants and requires that such grants comply with Davis-Bacon provisions. NEH has minimal need for construction authority, and if such authority is granted, the additional burden of Davis-Bacon compliance would increase the costs of construction grants. This would divert funding from other worthwhile NEH initiatives.

Despite my objection to the construction provisions, I intend to support H.R. 3248. It is already a vastly improved bill, and I support the arts and appropriate use of limited public funding for the arts. The Federal Government can best serve as a catalyst for increased public understanding of the arts and their increased private financial support.

Mr. WILLIAMS. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Montana.

Mr. WILLIAMS. Mr. Chairman, I also want to correct an impression that may have been left by the open debate on this bill several weeks ago. During the hearings, we heard from witnesses about the need to increase the funding from the endowments' programs available to emerging and underrepresented groups. The issue was most eloquently stated by Clement Price who testified before our subcommittees on behalf of the National Association for State Arts Agencies. Mr. Price spoke:

*** * *** of the need to open up the funding, professional direction and popular enjoyment of the arts to diverse ethnic groups in the United States. In short, arts administrators, starting with the Endowment, should better reflect the potpourri of culture and artistic expressions in our country. I am distressed over the slow pace toward arts democracy around the Nation. There is enough blame for this patently un-American phenomenon to spread around the entire arts establishment; however, I believe the Endowment should exert more leadership toward the fulfillment of cultural and artistic democracy.

This testimony was seconded by representatives of the American Cultural Alliance, the Women's Visual Arts Center, the Hispanic Inter-Arts Alliance, the D.C. Arts Commission, the National Humanities Alliance, the National Association of Local Arts Agencies, the Association of American Cultures, the Council on Equal Opportunities in the Arts, the Association of Black Museums, the ATLATL, the Native American Arts Service Organization, the Council on Research for Women, and others.

Certainly, many groups testified that they wanted no change in the current arts and humanities programs. That is the situation we in the Congress always face. Those groups who benefit from the status quo often do not want any change. The role of the Federal Government, however, is to ensure access by all to the arts and humanities. This concern for underrepresented and emerging groups has long been the intended focus of the act. I believe that my colleague, Mr. GUNDERSON, is going to submit an amendment to reinforce this access role for rural groups.

As described in section 5 of the current law, the general programs authorized by the chairperson are to include projects and productions of artistic and creative excellence that would otherwise be unavailable to citizens for geographic or economic reasons, that enable artists to achieve wide distribution of their works, that develop the appreciation and enjoyment of the arts by our citizens and that give emphasis to the full scope of American creativity and cultural diversity.

The endowments have established some excellent efforts such as the Expansion Arts Program to support artists and arts organizations that reflect the cultural pluralism and full diversity of our heritage. The intent of the changes in the bill are to continue and expand on these efforts.

We have added language to the general program support for both endowments to fund projects which reflect our full cultural diversity and richness. We also have added that in funding the Chairperson must give particular regard to the funding of traditionally underrepresented groups including women, minorities, rural groups, and inner city groups.

This is not a set-aside. It does encourage the Endowments to address an identified problem. For example, ATLATL has reported that funding for native American artists is one third of their proportion in the population. A study by A.L. Nellum and Associates, Inc., commissioned by the National Endowment, reported 5 years ago that the Endowments funded minorities at one third of their proportion in the population.

The author of that study estimates that the funding has only increased to half of what it should be today. The Council on Research for Women reported dramatic declines from 1981–84 in the funding of black studies and women studies at the National Endowment for the Humanities.

While there has been a strong effort to redress that problem in last year's funding we believe it is critical to continue and improve on these efforts. Women and minorities are still underrepresented in many program fields.

The President's task force report on the arts and humanities stated: "The strength of America's arts and humanities is essential to the well-being of the Nation * * *. There is a clear public purpose in supporting the arts and the humanities: the preservation and advancement of America's pluralistic cultural and intellectual heritage, the encouragement of creativity, the stimulation of quality in American education, and the enhancement of our general well-being." On the 20th anniversary of the founding of this strong local, State, and Federal partnership in support of the arts and humanities, we too have sought to support the Endowments' fine programs, increase access and participation in the arts and humanities, and expand arts and humanities education efforts. This is a good bill which represents the cooperative efforts of the Endowments, established and emerging groups, and both majority and minority members of our subcommittees and I urge your support of it today.

Mr. BARTLETT. Mr. Chairman, I yield back the balance of my time.

Mr. JEFFORDS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I yield to the gentleman from New York [Mr. GREEN].

Mr. GREEN. I thank my colleague from Vermont for yielding and I would like to take a moment to express my support for this legislation to reauthorize the National Endowment for the Arts, the National Endowment for the Humanities, and the Institute of Museum Services.

As a Member from Manhattan, long the cultural center of the country, I cannot overstate the importance of continued Federal support for the arts. I think everyone in this House is familiar with the National Endowment on the Arts and the National Endowment on the Humanities, but I should like to draw particular attention to the Institute of Museum Services, which is extremely important to the many small, nonprofit museums in New York City and elsewhere around the country.

I endorse the bill and urge my colleagues to support its passage.

Mr. JEFFORDS. I thank the gentleman from New York [Mr. GREEN] for those remarks, and I certainly agree with his statements.

I want to thank the chairman of the subcommittee and the ranking Republican and the other members on the committee who work so hard to resolve what could have been very difficult issues in this bill.

I believe that with the amendments that will be offered and accepted that we have done so much to ensure that this very wonderful piece of legislation, the Arts, Humanities and Museum Amendments of 1985, will continue to contribute to our society as much as it has in the past.

Even though the funding is small, the importance of the Endowment and IMS is great. The money that is also generated is so helpful in continuing to emphasize the importance of arts and humanities in our country.

I believe that H.R. 3248 represents a reaffirmation of the need for and the value of the Endowment and IMS. Individually and collectively, these agencies, through their grant programs, protect our heritage, preserve our history, and promote our creativity. Equally important, through their support, they encourage others in the public and private sectors to do as well.

Any Members that have gone, as I have, around this country and seen what has been done with these funds, especially in some of our more troubled areas, whether it be in the ghettoes of our larger cities or in the rural parts of our country, recognize that we have done so much through these programs to enrich the lives of people whose lives have been very restricted.

I would like to take this opportunity to clarify and put into perspective two issues that were raised during the consideration of H.R. 3248 by the Committee on Education and Labor. The first issue focuses on the review process for the fellowships under the Literature Program administered by the National Endowment for the Arts. The second issue centers on NEA's association with some poems written by poets who have received NEA funding through the fellowship program.

The review process for the fellowships is very rigorous. Panelists who are charged with reviewing and recommending fellowship applications for funding do so on a blind basis. That is,

they are not told the names of the applicants. Additionally, the following constraints apply: if a panelist recognizes an applicant's work and has been associated with the individual in publishing the applicant's work in the last 5 years, the panelist cannot vote on the application; the same constraint applies if a panelist has edited or is going to edit the applicant's work for publication, or is going to publish the applicant's work.

Applicants for poetry fellowships must meet the following criteria in order to be considered: The individual must have published a volume of poetry of 48 or more pages of poetry, or 20 or more poems in five or more literary journals, anthologies or publications which regularly include poetry as part of their format.

Given these procedures and standards and a strong commitment to recommending only those individuals with exceptional talent, panelists reject nearly 9 out of every 10 applicants. These stringent standards make it extraordinarily difficult to receive a poetry fellowship award.

I would further like to offer some clarification regarding the association which has been drawn by some between NEA and eight poets who have written some controversial poetry. Specifically, this association has been construed as Federal funding of material that is perceived by some as pornographic. I am convinced that this association is inaccurate.

NEA makes over 5,000 grants per year. We must place the poems in question into perspective so that we do not inadvertently undermine NEA's credibility without adequate understanding of the total picture. Through its fellowship program NEA funds poets, not specific poems. A fellowship is recognition of a wide range of past achievements and an endorsement of future potential.

The poets who wrote the cited poems are 8 out of 1,429 poets funded by the endowment since 1966, or roughly 0.5 percent, and the work cited is an even smaller percentage of all the poetry written by endowment-funded poets. Of the eight poets in question, none wrote the material in question while receiving funds under an NEA poetry fellowship. In fact, all of the poems were written earlier than the period of the grant. Thus, no Federal funds were involved.

Only two of the eight poets submitted poems which have been the subject of this debate as part of their application. This represents only 1 poem out of 20 in one instance, and 3 poems out of 20 in the other. The 4 pages of poetry viewed as being offensive constituted 4 out of 2,260 pages of poetry included for application for funding.

I feel strongly that these figures present a convincing argument that the strength of the system used to review applications far outweighs any of the critcisms we have heard to date. NEA has in place an effective review system which promotes long term artistic benefits for all of us to enjoy. These facts needed to acknowledged and confirmed.

I would urge that the Committee accept the amendments and see that this bill proceed on its merry way to successful fruition.

I yield to the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. I thank the gentleman, and I want to commend him for his long work on behalf of the arts in America. As vice chairman of the Arts Caucus you have been a prime mover of this legislation and a great supporter of the arts and humanities and museum services in America, and I am very grateful.

Mr. JEFFORDS. I thank the gentleman, and as I look back over the history of this legislation, and see that during its up and down periods, I am pleased that we apparently are having it on the way back up.

I yield back the balance of my time.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the gentlewoman from Illinois [Mrs. COLLINS].

Mrs. COLLINS. Mr. Chairman, I rise in strong support to H.R. 3248.

The Government Operations Subcommittee on Government Activities and Transportation, which I chair, has worked closely with the gentleman from Montana, Mr. PAT WILLIAMS, and I want to thank him for incorporating many of the suggestions that resulted from the investigative hearings and reports of this oversight subcommittee during the past 2 years.

In our work on "funding for the arts at the Federal, State and local levels," we emphasized the national need for arts education for all students, regardless of where they live, what their IQ level is, or how much money their parents earn. This bill fully captures the essence of the basic right of all children to have access to the arts and humanities to "enrich daily life, (to) help maintain civility, and (to) develop a sense of community."

Similarly, H.R. 3248 speaks to the foresight necessary to develop our audiences of the future. We can teach the appreciation of well-crafted poem or a painting or a piece of sculpture or a symphonic interlude by exposing both children and adults to such works not only in our schools but in our libraries, in our living rooms through the radio and television, in movies, and in neighborhood centers. And this is to be done with regard to the wonderful cultural diversity that Representative WILLIAMS and his subcommittee colleagues so eloquently highlight in this thoughtful legislation.

On the specific language regarding Council membership on the National Endowments for the Arts and Humanities, we applaud the subcommittee for inclusion of the words, "broad knowledge of or expertise" in the arts and humanities. Let us be wary of those who try to use such appointments only as a political dumping ground, and not for the true advisory purpose, as is stipulated in the statute. I recall last year's recess nomination of seven individuals to the NEH Council and the ensuing debate. Let me assure you that I fully support professional qualifications as a criteria for making any such Council appointments.

In our report on "Future Directions of the Institute of Museum Services," The subcommittee strongly criticized the fact that 7 members of the 15-member board were appointed from one State—in a country that has 50 States. Surely geographical distribution of members is a necessity, as cited in this bill, which limits membership to only three appointees from any one State.

Let me emphatically stress that the IMS now appears to be doing very effectively the job it was created to do—which is providing a small amount of operating support for this country's museums, zoos, planetariums, botanical gardens, and aquariums—the resources which bring us so much pleasure in our leisure time. It is the only Federal agency which offers such assistance. The IMS is also developing a much-needed program to conserve this country's cultural treasures, as a legacy for all future generations.

To abruptly end such a program is to penalize all Americans. The small budget of $21 million currently allotted to the IMS represents less than one-third of the cost of one MX missile for $70 million. Surely we need a visual refuge as much as we need a defense program—and not one at the expense of the other.

Finally, let me offer my unequivocal support to the provision of H.R. 3248 which would require that the National Endowment for the Humanities submit to the Equal Employment Opportunity Commission, within 30 days of passage of this bill, the affirmative action plans mandated by Federal law.

This legislative response grew out of a hearing and subsequent report by the Government Activities and Transportation Subcommittee citing the open defiance by NEH, in conjunction with the Federal Trade Commission and the Department of Justice. Among 110 Federal agencies, only these three openly chose to ignore the law.

This is not a partisan issue since 107 other agency head, all appointed by the President, submitted these plans to the Equal Employment Opportunity Commission in a timely fashion.

All of us who have served in the Federal Government have taken an oath of office to uphold and defend the Constitution of the United States as well as all the laws of this country. Nowhere has it ever been suggested that in accepting a high Government position we would be allowed the discretion of enforcing and upholding only those laws with which we agree. The decision in this case of the NEH, Department of Justice, and the Federal Trade Commission to separate themselves from more than 100 other agencies who have obeyed the law and the EEOC regulations makes one wonder if this is to be a Nation of laws or a Nation of individuals.

Laws that have been passed by the Congress and upheld by the courts cannot arbitrarily be ignored. Thus the NEH is bound to comply with the law—until Congress repeals it or the courts strike it down.

I urge my colleagues to support this important provision of H.R. 3248 so that it is clearly understood that all agencies shall comply with the Federal laws, not may comply.

Contrary to the statements made during the floor debate on H.R. 3248 on September 24, there is no additional cost for complying with the law nor any additional staff burden. It does not expand the original intent of the law. This data has routinely been gathered by NEH and submitted to EEOC as part of the personnel and administrative functions. This is not a massive undertaking but a simple matter.

I would also like to comment on another aspect of the previous floor debate on H.R. 3248 which deals with the allocation of grants.

The General Accounting Office, on a request from the House Government Activities Subcommittee, reviewed categories of NEH grants from fiscal year 1981 through fiscal year 1984 and noted the continual decrease in awards for areas such as women's studies and black studies, which are recognized by scholars as two fields of growing interest.

Out of almost 2,900 grants awarded by NEH for fiscal year 1984, approximately 1 percent was allocated to black studies and only slightly higher for women's studies.

Retain the strong directive in this bill to encourage grants reflecting the cultural, social, political, economic, and philosophical diversity of this country. These varied groups can compete on their own merits, but only if the Endowments and the public recognize that the standard for grants is quality, not merely conformity with some mistaken notion of maintaining the status quo.

Ms. OAKAR. Mr. Chairman, I rise in strong support of H.R. 3248, the Arts, Humanities, and Museum Amendments of 1985. This bill extends the authorization of the National Endowment for the Arts [NEA], National Endowment for the Humanities [NEH], and the Institute of Museum Services through fiscal year 1989.

I believe that it is significant that, on the eve of the 20th anniversary of the founding of the National Endowment for the Arts, September 29, 1965, President Reagan has designated September 23-29 as National Arts Week. I would like to publicly commend the President for scheduling a series of social events, in the District of Columbia, that will coincide with 600 other celebrations throughout the country, commemorating this occasion. Yet, I wish that his support of the NEA would extend also to H.R. 3248 which is the authorization measure for the continuation of the National Endowment for the Arts, the National Endowment for the Humanities, and the Institute of Museum Services.

The President makes public statements in support of the NEA, but his administration has continually sought to cut funding for arts and humanities programs, in every appropriation legislation, in every fiscal year since 1982. This year the Reagan administration requested that the Institute of Museum Services, an important program that provides grants to museums for general operating expense and other purposes, be terminated for fiscal year 1986. We know that these operating grants have served an important function for museums in enhancing their ability to obtain additional funding from private sources for operating expenses not provided for in these grants.

Mr. Chairman, the appropriations levels provided for with the passsage of H.R. 3248 are minuscule in comparison to the total fiscal year 1986 budget. The appropriation level for fiscal year 1986 represents the fiscal year 1985 appropriation level plus $400,000 to cover already approved salary increases for the NEA and the NEH, and $3 million to cover the increased NEA appropriation for the Public Broadcasting System and National Public Radio.

There is an important precedent and symbolism to Federal funding for the arts. For many potential donors, it signifies the value in which the Federal Government puts on culture. When Federal funding declines it becomes much more difficult for the arts to raise the needed funds from the private sector, particularly in those nonprofit areas now served by the Endowments for the Arts and Humanities.

Of the many investments the Federal Government makes in America, the NEA, the NEH, and the Institute of Museum Services give one of the greatest returns to the American people. People of all levels of income, age, and education. For example, the NEA, since its inception in 1965, has provided the largest single source of support for the arts. Concurrently, the number of performing arts has increased dramatically in this country, as has public attendance at art museums. And, while the NEA does not have the capacity to provide complete funding for anyone, it does award 5,000 or more grants annually to artists and nonprofit arts groups around the country. Since 1977, $100 million in Endowment challenge grants have generated more that $800 million in private donations to the arts.

Mr. Chairman, H.R. 3248 also authorizes the NEA and the NEH to fund projects or productions with substantial artistic and cultural significance that relate to minority, innercity, rural or tribal cultures. The measure will authorize assistance to professionally directed, community-based organizations that reflect such cultures. This bill will insure that talented individuals of diverse social and economic backgrounds will be considered for awards; thus, having an equal opportunity to take part in the experience of creating. The Endowments for the Arts and Humanities should never be conceived by, controlled by, or experienced by only one class or segment of the American population. The accountability procedures of H.R. 3248, with regard to the financial intent and the spirit of the NEA and the NEH awards, will help to make participation in the arts and humanities more equitable for all segments of American society.

Mr. Chairman, let me remind my colleagues that, too often, there is a misconception in the minds of some, that the process of making art or the act of participating in the arts or the humanities is impractical to our daily existence and that they are unnecessary fields of study or frivolous professions. Contrary to this myth, artists have contributed and continue to contribute to our society as a whole, whether in their artistic endeavors or by their participation in other occupations, not commonly associated with the arts. Artists have great creative resources to offer the world, especially in the nurturing of the human spirit and particularly in helping to shape this country's self-image and values. Artists have historically, by virtue of their work, brought diverse cultures together through the experience of creation and beauty. These are elements that enrich the soul and appeal to our higher senses as human beings.

The arts and humanities serve as a record, indeed a documentation of mankind, and his feelings about the world around him. Traditionally, the arts and the humanities serve as great stabilizing forces in society, by bringing the individual into relation with the beliefs and the values of his community and his country. The arts and

humanities have also helped define the connections between our past, our present, and our future.

Today we live in a technological society that spends billions on the instruments of destruction. Let us not forget about the importance of the creations of the heart. These are the very things that nuture, rather than destroy, the human spirit—the soul of mankind. Let us not ignore the things that strengthen us as a country, both in culture and in philosophical character. Let us remember that historically a decline in culture was mirrored by a decline in civilization. This legislation provides for the appreciation and rejuvenation of American culture. We should support it enthusiastically.

□ 1525

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Montana [Mr. WILLIAMS].

The amendments were agreed to.

AMENDMENTS OFFERED BY MR. GUNDERSON

Mr. GUNDERSON. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. GUNDERSON:

Page 2, strike out lines 17 and 18, and insert in lieu thereof the following:

(2) in paragraph (3)—

(A) by inserting ", and access to the arts and the humanities," after "education", and

(B) by striking out "people" and inserting in lieu thereof "people of all backgrounds and wherever located".

Page 8, line 17, insert the following after the period: "Such system shall also include information regarding the availability of the arts to various audience segments, including rural communities.".

Page 9, line 5, insert ", rural," after "emerging".

Mr. GUNDERSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The Chairman pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. GUNDERSON. I thank the Chairman.

One of the long-time concerns that I have had over the National Endowment for the Arts and Humanities is that it seems that the Endowment for the Arts and Humanities has focused on the promotion of the arts. I am not opposed to that. But I think also the Endowment, in the justifiable Federal role in the arts, not only to promote the arts but promote the arts for people who otherwise would not nave access to them, the low-income people, people in rural areas, et cetera, who otherwise would not have that opportunity to experience, appreciate, and participate in the arts.

The gentleman from Montana, the chairman of the subcommittee, and the gentleman from Texas have made major strides in the legislation before us today in moving in this direction and guaranteeing that opportunity for all. However, in some discussions that I have had with them and discussions that I have had with Chairman Hodsoll of the Endowment. I have felt there are a couple of areas where we might be able to go even one step further than the committee has in this particular proposal. That is exactly what the amendments before us now would do. The first amendment would include in the purpose of the National Endowment for the Arts and Humanities that one of the purposes is to provide access to the arts and the humanities for all people, regardless of their geographic location, regardless of their economic condition or other reasons that they might be underserved.

It is very interesting that Chairman Hodsoll has made as a part of his mission statement within the National Endowment for the Arts and Humanities two goals: One of excellence and one of access. As we were discussing this whole issue and I was sharing with him my concerns from a rural perspective, he said:

You know, you are right. There is nothing in the compass of the National Endowment that calls on the Government's role as one of providing access to people who otherwise would not have that opportunity.

The second amendment that I have offered is one that deals with section 5, section 5 of the legislation which calls for a national data collection on arts, artists, audiences, financial trends in the arts, et cetera, all of which is intended to allow the National Endowment each year to report back to the Congress and to the respective committees on a state of the arts in America.

What this amendment would do is include some specific directions that would make the rural areas a specific part of that study. This would give us specific information on exactly what the availability of the arts and opportunity to appreciate and enjoy the arts in rural America is.

It also would give us the opportunity to really make an overall review of what the Federal Government can and cannot do in dealing with and promoting the arts for people in geographic or economic conditions which otherwise would prohibit them from enjoying the arts.

In my discussions with Chairman Hodsoll, he indicated that he would very much like to make our concerns about rural America part of this overall study.

This would then give him the opportunity to gain, No. 1, an assessment of the situation in rural America, and, second, it would give him the opportunity to review the viability of our present programs in serving rural America.

There is a problem that for the vast majority of the programs of the National Endowment today are grants, and they are competitive grants. If you do not know about them, if you do not have the training and the talent, if you do not have the ability to raise the matching funds, frankly, rural areas, low-income areas are not able to compete in most of those competitive grants at the present time.

So this would then allow after this review of present statistics, present programs, it would allow the Endowment to make recommendations back to the Congress and to the respective committees as to whether or not new and additional legislation would be necessary to bring the endowments to all the people of America.

So we not only would be promoting arts and artists, art organizations, but we also would be promoting the access to art for all people in this country.

So with that, Mr. Chairman, I yield back the balance of my time.

Mr. WILLIAMS. Mr. Chairman, I move to strike the last word, and I rise in support of the amendments.

Mr. Chairman, I join my colleague from Wisconsin in his concern with rural arts development, and we find that the gentleman from Wisconsin has made substantial contribution to ensuring that the Endowment's programs encourage full access by all geographic groups to the arts and humanities and that the statement of purpose emphasizes the importance that we in Congress give to the rural arts, and the committee on the majority side is pleased to applaud the gentleman from Wisconsin and join in support of his amendments.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS. I would be pleased to yield to the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for yielding.

Mr. Chairman, I would join with the chairman of the subcommittee in his support of the amendments and commending the gentleman from Wisconsin in preparing these amendments that do provide for increased access at the endowment level for those in rural areas to the endowments of the arts.

Mr. Chairman, I commend the gentleman and support the amendment.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Wisconsin [Mr. GUNDERSON].

The amendments were agreed to.

AMENDMENT OFFERED BY MR. ARMEY

Mr. ARMEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment Offered By Mr. ARMEY: Page 24, strike out lines 14 through 17, and insert in lieu thereof the following: when reviewing such applications and projects, recommend for funding only those that in the context in which they are presented, in the experts' view, foster excellence, are reflective of exceptional talent, and have significant literary, scholarly, cultural, or artistic merit.".

Page 24, strike out line 23 and all that follows through line 12 on page 25, and insert in lieu thereof the following:

"(d)(1) The Chairperson of the National Endowment for the Arts and the Chairperson of the National Endowment for the Humanities shall conduct a post-award evaluation of projects, productions, and programs for which financial assistance is provided by their respective Endowments under sections 5(c) and 7(c). Such evaluation may include an audit to determine the accuracy of the reports required to be submitted by recipients under clauses (i) and (ii) of paragraph (2). As a condition of receiving such financial assistance, a recipient shall comply with the requirements specified in paragraph (2) that are applicable to the project, production, or program for which such financial assistance is received.

"(2)(A) The recipient of financial assistance provided by either of the Endowments shall submit to the Chairperson of the Endowment involved—

"(i) a financial report containing such information as the Chairperson deems necessary to ensure that such financial assistance is expended in accordance with the terms and conditions under which it is provided;

"(ii) a report describing the project, production, or program carried out with such financial assistance; and

"(iii) if practicable, as determined by the Chairperson a copy of such project, production, or program.

"(B) Such recipient shall comply with the requirements of this paragraph not later than 90 days after the end of the period for which such financial assistance is provided. The Chairperson may extend the 90-day period only if the recipient shows good cause why such an extension should be granted.

"(3) If such recipient substantially fails to satisfy the purposes for which such financial assistance is provided and the criteria specified in the last sentence of subsection (a), as determined by the Chairperson of the Endowment that provided such financial assistance, then such Chairperson may—

"(A) for purposes of determining whether to provide any subsequent financial assistance, take into consideration the results of the post award evaluation conducted under this subsection;

"(B) prohibit the recipient of such financial assistance to use the name of, or in any way associate such project, production, or program with the Endowment that provided such financial assistance; and

"(C) if such project, production, or program is published, require that the publication contain the following statement: 'The opinions, findings, conclusions, and recommendations expressed herein do not reflect the views of the National Endowment for the Arts or the National Endowment for the Humanities.'".

Mr. ARMEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. ARMEY. Mr. Chairman, my amendment addresses two aspects of the granting process within the Endowment—first, with what type of products should be funded by the endowments, and second what type of reporting requirements should be required of Endowment grantees.

This amendment makes perfectly clear that panels of experts, when reviewing applications for Endowment funding, recommend only those projects which have "significant literary, scholarly, cultural, or artistic merit; are reflective of exceptional talent; and foster excellence."

While I don't think we need to dwell on this point for too long, suffice it to say in my opinion—and in the opinion of the large number of people who have called our offices after the Christian Broadcasting Network report—the National Endowment for the Arts has in the past funded material which does not meet the above criteria.

While my amendment could be more specific, it is my hope that panelists and the officials at the National Endowment for the Arts, who are entrusted with making decisions about how the taxpayers' money will be spent, will be conscious of these concerns and will be extra diligent to fund only those works which meet this criteria.

The second part of my amendment deals with the post award evaluations process, specifically what type of reporting requirements the Endowment should have, and what the Endowment should do if a grant recipient does not meet these requirements. My amendment establishes guidelines for compliance, and certain sanctions against those who do not meet these minimal standards.

In our hearings on this reauthorization we found a certain inconsistency among different programs with regard to compliance with Endowment reporting requirements. While some programs seem to have higher rates of compliance than others, we have heard in some programs compliance is less than 50 percent. The fact is everyone who receives Federal moneys should report what they did with it.

My amendment would require recipients of financial assistance to submit materials to the Endowments to ensure that funds were expended in accordance with the terms and conditions under which the money was provided. This would include a financial report, a report describing the project, production, or program, and also, where practicable, a copy of the product produced with Endowment funds.

It also mandates that these reports be submitted on a timely basis—within 90 days—and that extensions will be granted only if the recipient shows good cause why such an extension should be granted.

I commend the committee for actions it took with regard to sanctions against those who don't meet reporting requirements. Unfortunately, I don't think the committee went quite far enough.

While considering noncompliance in applications of repeat grantees is a step in the right direction, it is the least severe and the most commonsense form of sanction. What type of response would an individual who gets a grant from a private foundation receive from that foundation if they hadn't even submitted documentation they had spent the funds in accordance with their grant?

My amendment gives the Endowments two options with regard to works produced with Federal funds by those who don't meet reporting requirements:

The Endowments can prohibit the grantee from using the name of or associating the work with the Endowment.

If the project, production, or program is published, it can force the following disclaimer:

The opinions, findings, conclusions, and recommendations expressed herein do not reflect the views of the National Endowment for the Arts or the National Endowment for the Humanities.

Frankly, if we don't get compliance with these minimal reporting requirements in the future, we might have to go further and enact procedures to recover funds from grantees who don't report in a timely manner.

Mr. WILLIAMS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the committee has worked vigorously with the gentleman from Texas in efforts to provide an appropriate review of the methods by which fellowships and grants are made, and we are satisfied that the endowments will continue to take into account the fostering of excellence and exceptional talent, significant literary, scholarly, and cultural, and artistic merit, and we are also, as a committee, convinced that we have improved, with the gentleman's amendment, the postaward evaluation of projects and productions and programs for which financial assistance is provided.

Mr. Chairman, the committee is pleased to accept the amendments of the gentleman.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS. I yield to the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for yielding.

Mr. Chairman, I, too, rise in support of the amendments of the gentleman

from Texas, my colleague and neighbor, Mr. ARMEY.

I would add to the gentleman from Montana's comments that I think that Mr. ARMEY, in particular, has done an exceptionally good job on these amendments in demonstrating some persistence, leadership, and determination to stick to his guns and yet a willingness to work to solve the difficulties in a legislative way.

□ 1540

So I commend the gentleman both for his persistence and also for these amendments which strengthen the accountability of the National Endowment for the Arts.

I thank the gentleman for yielding.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Texas [Mr. ARMEY].

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. DE LAY

Mr. DELAY. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN pro tempore. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. DELAY: Page 27, strike out line 7 and all that follows through 13 on page 31, and insert in lieu thereof the following:

SEC. 111. AUTHORIZATION OF APPROPRIATIONS.

(a) FUNDS AUTHORIZED FOR PROGRAM GRANTS.—Section 11(a)(1) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(a)(1)) is amended—

(1) in subparagraph (A)—

(A) by striking out "$115,500,000" and all that follows through "1984, and" and inserting in lieu thereof "$121,678,000 for fiscal year 1986 and", and

(B) by striking out "1985" and inserting in lieu thereof "1987", and

(2) in subparagraph (B)—

(A) by striking out "$114,500,000" and all that follows through "1984, and" and inserting in lieu thereof "$95,207,000 for fiscal year 1986 and", and

(B) by striking out "1985" and inserting in lieu thereof "1987".

(b) FUNDS AUTHORIZED TO MATCH NON-FEDERAL FUNDS RECEIVED.—Section 11(a) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(a)) is amended—

(1) in paragraph (2)—

(A) in subparagraph (A)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1987",

(ii) by striking out "$18,500,000" the first place it appears and all that follows through "1984, and" and inserting in lieu thereof "$8,820,000 for fiscal year 1986 and", and

(iii) by striking out "1985" and inserting in lieu thereof "1987", and

(B) in subparagraph (B)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1987",

(ii) in clause (ii) by inserting "and subgrantees" after "grantees" each place it appears,

(iii) by striking out "$12,500,000" and all that follows through "1984, and" and inserting in lieu thereof "$10,780,000 for fiscal year 1986 and", and

(iv) by striking out "1985" and inserting in lieu thereof "1987",

(2) in paragraph (3)—

(A) in subparagraph (A)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1987",

(ii) by striking out "$27,000,000" and all that follows through "1984, and" and inserting in lieu thereof "$20,580,000 for fiscal year 1986 and", and

(iii) by striking out "1985" and inserting in lieu thereof "1987",

(B) in subparagraph (B)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1987",

(ii) by striking out "$30,000,000" and all that follows through "1984, and" and inserting in lieu thereof "$19,600,000 for fiscal year 1986 and", and

(iii) by striking out "1985" and inserting in lieu thereof "1987", and

(C) in subparagraph (C)—

(i) by striking out "Chairman" and inserting in lieu thereof "Chairperson", and

(ii) by striking out "he" and inserting in lieu thereof "the Chairperson", and

(3) in paragraph (4) by striking out "Chairman" each place it appears and by inserting in lieu thereof "Chairperson".

(c) FUNDS AUTHORIZED FOR ADMINISTRATION OF PROGRAMS OF THE NATIONAL ENDOWMENTS.— Section 11(c) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(c)) is amended—

(1) in paragraph (1) by striking out "$14,000,000" and all that follows through "1985" and inserting in lieu thereof "$15,982,000 for fiscal year 1986 and such sums as may be necessary for fiscal year 1987",

(2) in paragraph (2) by striking out "$13,000,000" and all that follows through "1985" and inserting in lieu thereof "$14,291,000 for fiscal year 1986 and such sums as may be necessary for fiscal year 1987", and

(3) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairman".

(d) TECHNICAL AMENDMENT.— Section 11(d) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(a)) is amended by striking out "under this title".

Page 33, strike out lines 5 through 13, and insert in lieu thereof the following:

SEC. 203. AUTHORIZATION OF APPROPRIATIONS.

(a) Section 209(a) of the Museum Services Act (20 U.S.C. 967(a)) is amended—

(1) by striking out "$25,000,000" and all that follows through "1984, and" and inserting in lieu thereof "$21,600,000 for fiscal year 1986 and", and

(2) by striking out "1985" and inserting in lieu thereof "1987".

(b) Section 209(d) of the Museum Services Act (20 U.S.C. 967(d)) is amended by striking out "1985" and inserting in lieu thereof "1987".

Mr. DELAY (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DELAY. Mr. Chairman, this amendment will reduce the reauthorization for the National Endowment for the Arts, the National Endowment for the Humanities, and the Institute of Museum Services from a 4-year reauthorization to a 2-year reauthorization. I would like to take a moment to explain to Members the reasons behind my offering this amendment.

As most Members are aware, earlier this year, Mr. ARMEY and I expressed concern about the fact that the NEA was receiving a 7.1-percent increase in their appropriation at a time whan we were freezing or cutting the budgets of almost every other agency. We questioned this decision and decided to investigate the various projects which the NEA funds, the methods they employ to make grants, and the auditing procedures the NEA uses to verify that the taxpayers' dollars are being spent properly. As the elected Representatives of over 1 million Texans, we felt that it was within our prerogative if not our duty to question the types of projects our constituents were being required to subsidize.

To say that we opened a Pandora's box might be somewhat of an exaggeration. We found that the NEA funds many worthwhile projects such as the symphony, museum exhibits, various ballet companies, operas across the country, and other projects which help stimulate artistic awareness in our country. However, we also found a number of problems at the agency. We found documentation which indicated that in the past, the NEA had funded poetry which was of extremely questionable taste. We found that panelists had been awarding grants to their friends in clear violation of NEA's conflict of interest rules. And we found documentation which indicated that the agency had an extremely poor record of scrutinizing the way taxpayer dollars were being spent. And while we found that under Chairman Hodsell's able leadership, the scope of these problems had decreased, we discovered that these problems have not ceased to exist. Because these problems continued to plague the agency, I felt obligated to my constituents to bring these concerns to the attention of the appropriate members of this House. The chairman of the subcommittee responsible for the reauthorization, Mr. WILLIAMS from Montana and the ranking Republican on the subcommittee, Mr. BARTLETT shared my concern on these matters. I wish to thank both of them and their respective staffs for their cooperation. They held five hearings on the NEA and addressed many of my concerns in their committee work. Despite the changes

which were made in subcommittee, I believe it is essential that we send a clear message to the agency that we in Congress do not want them to continue with a business as usual-type attitude. At a time when we are running record high deficits we can not afford to squander any taxpayer dollars on ridiculous projects. We can not afford lax follow up or allow grants to be awarded in violation of conflict of interest rules. In short we can not afford for the NEA or any other Federal agency to operate at 85 percent efficiency. We must demand, in this time of financial crisis, that all agencies operate at 100 percent. The NEA must make changes to ensure that these problems are addressed and we in Congress must hold their feet to the fire and demand accountability.

As Members of Congress, we are held accountable to the people we represent by having to participate in elections every 2 years. At that time, we must reearn the right to serve our constituents. I can think of nothing fairer than requiring the same from a Federal Bureaucracy. My amendment will provide for accountability by requiring the Endowments and the Institute to come before Congress in 2 years and be subjected to another reauthorization bill. Only through an amendment such as this, will the agency know that we intend to carefully scrutinize its actions. Any agency that has the power to distribute taxpayers dollars must be held accountable to those taxpayers. This accountability is difficult to uphold when the agency only has to be submitted to congressional oversight once every 5 years. I believe passage of my amendment will address this concern.

I am not an advocate of excessive governmental regulation. It is for this reason that I am not trying to pass a series of amendments to address every problem I have uncovered at the NEA. I would like to leave the agency's hands free to administratively address my concerns about conflict of interest, professional grant seekers and questionable grants. But every time my staff looked into a new division of the NEA I discovered that my constituents were paying $10,000 to redesign the bathtub, or $25,000 to produce a film on cannibalism. So that Congress may be sure that the NEA makes progress in these areas I feel it is essential that they report back to us in 2 years and allow us the opportunity to review their achievements.

In a democratic republic, rule is by the majority. The NEA must keep this fact in mind as they award taxpayer funded grants. While they should do all in their power to promote the arts in this country, they must also remain focused to the desires of the majority of the people and should look for ways to fund arts that will give enjoyment to the greatest number of people in this country.

Mr. Chairman, again I wish to thank the majority for their cooperation on this amendment. It is my understanding that Mr. WILLIAMS supports this amendment and I urge its passage.

Mr. WILLIAMS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the committee appreciates the work of the gentleman from Texas [Mr. DELAY], specifically on his amendment concerning the authorization of appropriations, and we are pleased to accept that amendment.

Mr. BARTLETT. I appreciate the gentleman yielding, and, like the chairman of the subcommittee, I support these amendments and commend the gentleman from Texas, one of my neighbors, Mr. DELAY, for the diligence and the research that he has done on this and for his willingness to craft a legislative solution to the difficulties.

I thank the gentleman from Montana for yielding.

AMENDMENTS OFFERED BY MR. ARMEY TO THE AMENDMENTS OFFERED BY MR. DE LAY

Mr. ARMEY. Mr. Chairman, I offer amendments to the amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. ARMEY to the amendments offered by Mr. DELAY: Page 24, strike out lines 14 through 17, and insert in lieu thereof the following: "when reviewing such applications and projects, recommend for funding only those that in the context in which they are presented, in the experts view, foster excellence, are reflective of exceptional talent, and have significant literary, scholarly, cultural, or artistic merit.".

Page 24, strike out line 23 and all that follows through line 12 on page 25, and insert in lieu thereof the following:

"(d)(1) The Chairperson of the National Endowment for the Arts and the Chairperson of the National Endowment for the Humanities shall conduct a post-award evaluation of projects, productions, and programs for which financial assistance is provided by their respective Endowments under sections 5(c) and 7(c). Such evaluation may include an audit to determine the accuracy of the reports required to be submitted by recipients under clauses (i) and (ii) of paragraph (2). As a condition of receiving such financial assistance, a recipient shall comply with the requirements specified in paragraph (2) that are applicable to the project, production, or program for which such financial assistance is received.

"(2)(A) The recipient of financial assistance provided by either of the Endowments shall submit to the Chairperson of the Endowment involved—

"(i) a financial report containing such information as the Chairperson deems necessary to ensure that such financial assistance is expended in accordance with the terms and conditions under which it is provided;

"(ii) a report describing the project, production, or program carried out with such financial assistance; and

"(iii) if practicable, as determined by the Chairperson a copy of such project, production, or program.

"(B) Such recipient shall comply with the requirements of this paragraph not later than 90 days after the end of the period for which such financial assistance is provided. The Chairperson may extend the 90-day period only if the recipient shows good cause why such an extension should be granted.

"(3) If such recipient substantially fails to satisfy the purposes for which such financial assistance is provided and the criteria specified in the last sentence of subsection (a), as determined by the Chairperson of the Endowment that provided such financial assistance, then such Chairperson may—

"(A) for purposes of determining whether to provide any subsequent financial assistance, take into consideration the results of the post award evaluation conducted under this subsection;

"(B) prohibit the recipient of such financial assistance to use the name of, or in any way associate such project, production, or program with the Endowment that provided such financial assistance; and

"(C) if such project, production, or program is published, require that the publication contain the following statement: 'The opinions, findings, conclusions, and recommendations expressed herein do not reflect the views of the National Endowment for the Arts or the National Endowment for the Humanities.' ".

Page 1 of the amendment, line 3, strike out the dash and all that follows through line 8, and insert in lieu thereof the following: by striking out "$25,000,000" and all that follows through "1985" and inserting in lieu thereof "$21,600,000 for fiscal year 1986 and $22,464,000 for fiscal year 1987".

Mr. ARMEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. ARMEY. Mr. Chairman, I have two amendments at the desk and ask unanimous consent they be considered en bloc.

Mr. Chairman, I ask unanimous consent that the amendment be considered as read.

As you might remember, in July of this year we reached a compromise with regard to funding for the National Endowment for the Arts. The National Endowment for the Humanities, and the Institute for Musuem Services for fiscal year 1986. In light of the increases the Appropriations Committee was recommending, I thought the freeze levels we adopted was a reasonable compromise. I was pleased to see the committee adopt these reauthorization levels for fiscal year 1986; however, I am concerned with the committee's use of "such sums as may be necessary" language for the outyears.

Mr. Chairman this type of language is all too indicative of the type of problem we have in this Congress. It is our responsibility as members of authorizing committees to provide some direction to the Appropriations Committee with regard to funding. "Such sums as may be necessary" amounts to little more than writing a blank check. And with $200 billion budget deficits and a $2 trillion national debt, I think it's pretty clear that we have written and cashed too many of these blank checks.

My amendment is simple and straightforward. It merely eliminates "such sums as may be necessary" for fiscal year 1987, and replaces this with an authorizations ceiling for these agencies.

While my amendment sets a authorizations ceiling 4 percent above fiscal year 1986 levels, let me make it clear that I take this as an absolute maximum, and that we are not obligated to increase funding by this amount. I would hope—and I will work to see—that the appropriations for these agencies in future years are reflective of our progress in reducing our Federal deficits.

Mr. YATES. Mr. Chairman, will the gentleman yield for a question?

Mr. ARMEY. I yield to the gentleman from Illinois.

Mr. YATES. I did not hear the gentleman state what the amounts would be that he was proposing. Would the gentleman state those?

Mr. ARMEY. Yes; my amendment limits the amounts to 4 percent above fiscal year 1986 for 1987.

Mr. YATES. If the gentleman will yield further, the gentleman's increase for the outyear assumes a 4-percent inflation factor, if my understanding is correct.

Mr. ARMEY. Yes; I believe these are figures that are consistent with what has been worked in the other body.

Mr. YATES. What if the inflation rate were higher than 4 percent, would the gentleman be willing to increase it to that inflation figure?

Mr. ARMEY. I think that would require a special effort or a new legislative effort.

Mr. YATES. But that is the gentleman's intention?

Mr. ARMEY. Mine sets a cap at 4 percent, and my intent is to see that cap as an absolute maximum.

Mr. YATES. I thank the gentleman.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. ARMEY. I yield to the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for yielding, and I do support and appreciate his amendments in the name of fiscal responsibility. I support the amendments and appreciate the gentleman offering them.

Mr. ARMEY. I thank the gentleman.

Mr. WILLIAMS. Mr. Chairman, will the gentleman yield?

Mr. ARMEY. I yield to the gentleman from Montana.

Mr. WILLIAMS. I thank the gentleman for this amendment. I just want to be certain that I understand the specificity of the amendment and the gentleman's intention.

It is my understanding that the gentleman's amendment to the amendment results in establishing our fiscal year 1987 authorized level at precisely what the Senate has already agreed to; is that correct?

Mr. ARMEY. Yes. It sets that as a maximum level.

Mr. WILLIAMS. If the gentleman will yield further, I understand his answer to the gentleman from Illinois to be that the gentleman from Texas is supportive of an inflationary increase fiscal year 1987, which currently is assumed to be 4 percent.

Mr. ARMEY. It is currently assumed to be 4 percent. My amendment, if accepted and passed, would more or less lock us into that 4 percent figure and would take, I think, legislation at that time to break above that level.

Mr. WILLIAMS. Just for purposes of having the gentleman's intention clear, if inflation—we hope to be protected from this—should go above 4 percent, would the gentleman consider supporting an effort to move the authorized and appropriated levels to reflect that increase in inflation above 4 percent?

Mr. ARMEY. Well, I guess this gentleman is so optimistic I would have to say I have not even thought of that option yet because I am so confident we will hold inflation under that.

The CHAIRMAN. The time of the gentleman from Texas [Mr. ARMEY] has expired.

(On request of Mr. WILLIAMS and by unanimous consent, Mr. ARMEY was allowed to proceed for 1 additional minute.)

Mr. ARMEY. I would not want to make a statement that could be construed as a promise or guarantee with respect to that at this point.

Mr. WILLIAMS. I thank the gentleman.

If the gentleman will yield further, the committee is pleased to accept the gentleman's amendment to the amendment.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Texas [Mr. ARMEY] to the amendments offered by the gentleman from Texas [Mr. DELAY].

The amendments to the amendments were agreed to.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Texas [Mr. DELAY], as amended.

The amendments, as amended, were agreed to.

□ 1555

AMENDMENT OFFERED BY MR. DE LAY

Mr. DELAY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DELAY: Page 24, line 17, insert before the close quotation marks the following:

Whenever there is pending an application submitted by an individual for financial assistance under section 5(c), such individual may not serve as a member of any subpanel (or panel where a subpanel does not exist) before which such application is pending. The prohibition described in the previous sentence shall commence on the date the application is submitted and continue for so long as the application is pending.

Mr. DELAY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DELAY. Mr. Chairman, I have an amendment at the desk. Mr. Chairman, I ask unanimous consent that the amendment be considered as read.

Mr. Speaker this amendment stipulates that no individual who sits on a panel may receive funding from that panel during the time they are a member of that panel. Earlier this year, I was shocked to discover that a gentleman who sat on an NEA Media Arts panel had received a $25,000 grant from that same panel to produce a film on elephant roundups in Thailand. Mr. WILLIAMS' staff discovered that 67 percent of NEA literary panelists had received NEA grants from that panel during the past 10 years. This type of activity cannot be allowed. My amendment would eliminate these types of problems by stipulating in law that a panelist cannot receive a grant from his or her panel while they are serving on that panel.

During our investigation, I also discovered that many panelists are affiliated with groups which receive huge grants from the NEA. The organizations that these panelists represent or are employed by, do very well—collecting hundreds of thousands of dollars through the various NEA programs. For example, Haleakala, a New York-based institute received 16 grants from the NEA totaling $340,950. The director of Haleakala served on two of the panels which awarded over half of these funds. I wish that this was the only example I found, but I found many.

As I noted earlier, it is not my intent to attempt to micromanage the agency. And it is for this very reason that I am not attempting, at this time, to legislatively address the conflict of interest between panelists and organizations they represent. It is my fervent hope, however, that the NEA

closely monitor this situation during the next 2 years and attempt to find some administrative remedies to this problem.

Mr. Chairman, again, I would like to thank Mr. WILLIAMS and Mr. BARTLETT for their cooperation on these amendments. I truly believe that the NEA can become a better agency through effective congressional oversight. I look forward to working with both of these gentlemen during the next 2 years to ensure that fiscal responsibility and the highest degree of integrity are the principles which guide the NEA's behavior.

I urge passage of this amendment.

Mr. WILLIAMS. Mr. Chairman, will the gentleman yield?

Mr. DELAY. I yield to the gentleman.

Mr. WILLIAMS. I thank the gentleman for yielding.

Mr. Chairman, I want to be sure that I understand the gentleman's amendment. Of course, I understand the intention of his amendment from having visited with him, and I support the intention of his amendment.

As the gentleman from Texas is aware, the difficulty here is that we have to effect this for subpanels, otherwise, we would severely restrict the number of people in America available to sit on these panels. As I read the amendment and understand the gentleman's intention, he restricts membership to the panel but not to subpanels. Is that correct?

Mr. DELAY. Our intent was to restrict it to the subpanels. From the panels and to the subpanels by this amendment.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. DELAY. I yield to the gentleman.

Mr. YATES. I am trying to understand the gentleman's amendment. I believe that I agree with the intent of it, but let me give the gentleman an example and ask for his interpretation.

Suppose Baylor University or Southern Methodist University has an application pending with the National Endowment for the Arts for a grant. May a professor of Baylor University or Southern Methodist sit on that panel under the gentleman's amendment?

Mr. DELAY. This only applies to individuals. Only the individuals. It does not apply to the institutions.

Mr. YATES. It does not apply to institutions. I thank the gentleman for that clarification.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. DELAY. I yield to the gentleman.

Mr. BARTLETT. To further clarify the gentleman's point, as I understand the amendment it would also only apply to the subpanel which actually makes the recommendation so that the individual could serve on the full panel and another subpanel but would be prohibited from serving on the subpanel which looks at his own grant application.

Mr. DELAY. That is the intent of this gentleman.

Mr. BARTLETT. I thank the gentleman.

Mr. WILLIAMS. Mr. Chairman, will the gentleman yield?

Mr. DELAY. I yield to the gentleman.

Mr. WILLIAMS. There are three panels which do not have subpanels: Folks Arts; Arts in Education; and State Grants. How does the gentleman's amendment affect those?

Mr. DELAY. If an individual applies to one of those three panels, that individual cannot be sitting on that panel and get the grant.

The CHAIRMAN pro tempore. The time of the gentleman from Texas [Mr. DELAY] has expired.

(On request of Mr. WILLIAMS and by unanimous consent, Mr. DELAY was allowed to proceed for 1 additional minute.)

Mr. DELAY. If I may answer the chairman's question, where a subpanel does not exist, my amendment applies to the panel. Especially in those three instances.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. DELAY. I yield to the gentleman.

Mr. YATES. If the National Endowment for the Arts, in selecting the panels chose to create subpanels for those three categories, that would be possible under the gentleman's amendment, would it not? The interpretation that came from the question of the gentleman from Texas [Mr. BARTLETT] would apply to that as well?

Mr. DELAY. That is correct.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. DELAY. I yield to the gentleman.

Mr. BARTLETT. I think it is important to get on the record that the intent of, and in fact the words of this amendment would say that whoever is making the recommendation for the funding, whatever body that is, that no panelist may serve as a member of that body and make a recommendation on his or her own funding. I think that is the gentleman's intent.

Mr. WILLIAMS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will take but 1 minute to say that with those understandings, and I know from having visited with the gentleman earlier that indeed the understandings that we have is the gentleman's original intention. The subcommittee is pleased to accept the amendment.

Mr. JEFFORDS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to say that in view of the last colloquy and dialog, I have no objection to the amendment.

In addition, I would like to offer several points of clarification on two funding issues raised by my colleague from Texas, Mr. DELAY.

The Kitchen is an umbrella organization which helps artists develop grant applications for funding for their projects. It serves as the administrative entity often when an artist receives funding. Concerns have been raised regarding Mary MacArthur's participation on NEA review panels.

Mary MacArthur left the Kitchen (Haleakala), where she had been director, in March 1984. She served on two panels that recommended 1984 grants to the Kitchen; one of those two panels (Opera-Musical Theater) met before she left the Kitchen, the other one (Inter-Arts) met after she left. Therefore, the implication that she directly participated on panels which awarded 16 grants to the Kitchen is absolutely false. In the single instance where she served on a panel recommending funds to the Kitchen while she was its director, she left the room during the discussion and vote.

It is a separate issue that the Kitchen received 16 grants in fiscal year 1984. The Kitchen is a unique institution in the American, indeed international, art world. It is, for starters, interdisciplinary, that is, it produces and presents and tours work in nearly all art forms—visual art, music, media arts, opera-musical theater, and dance. As such the Kitchen is eligible to apply under different programs and categories, and compete on the merits with all other applicants under each of those categories. In addition, the Kitchen frequently applies in behalf of individual artists; the money doesn't benefit the Kitchen per se, but rather the artists for whom they apply. Further, the Kitchen has occupied a unique position nationally because of its focus on more experimental or avant-garde work among all the disciplines. Since this type of work tends to be underrepresented in the artistic mainstream, and since its overall quality was seen to be high by various panels of exports, the Kitchen succeeded in fiscal year 1984 in receiving grants for different types of projects.

I would also like to offer a comment on the "Elephant Round-Up" video grant.

The $25,000 grant was made under the media arts program's production grants category to video artist Skip Blumberg.

The primary consideration in the awarding of grants in this category is the quality of the artist's past work. Mr. Blumberg is a highly regarded video artist. He has produced a number of successful, award-winning video works and television shows. The media arts panel which reviewed Mr. Blumberg's application called his work highly creative, witty, dynamic, and visually exciting. It is important to note that the competition for these grants was exceedingly stiff in 1984: More than 92 percent of the applicants were rejected.

I am confident that the amendment offered by my colleague from Texas will complement and strengthen existing controls used by NEA to prevent conflict of interest and promote funding of quality work.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Texas [Mr. DELAY].

The amendment was agreed to.

The CHAIRMAN pro tempore. Are there other amendments to title I? If not, the Clerk will designate title II.

The text of title II is as follows:

TITLE II—AMENDMENTS TO MUSEUM SERVICES ACT

SEC. 201. NATIONAL MUSEUM SERVICES BOARD.

Section 204 of the Museum Services Act (20 U.S.C. 963) is amended—

(1) in subsection (a)—

(A) in paragraph (1) by striking out the second sentence and inserting in lieu thereof the following:

"Such members shall be selected from among citizens of the United States who are members of the general public and who are—

"(A) broadly representative of the various museums, including museums relating to service, history, technology, art, zoos, and botanical gardens, and of the curatorial, educational, and cultural resources of the United States; and

"(B) recognized for their broad knowledge, expertise, or experience in museums or commitment to museums.

Members shall be appointed to reflect various geographical regions of the United States. The Board may not include, at any time, more than three members from a single State. In making such appointments, the President shall give due regard to equitable representation of women, minorities, and persons with disabilities who are involved in such museums.", and

(B) in paragraph (2)(A) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(2) in the last sentence of subsection (b) by striking out "his" each place it appears and inserting in lieu thereof "such member's", and

(3) in subsections (c) and (d) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson".

SEC. 202. DIRECTOR OF THE INSTITUTE.

Section 205(a)(2) of the Museum Services Act (20 U.S.C. 964(a)(2)) is amended by striking out "his" and inserting in lieu thereof "the Chairperson's".

SEC. 203. AUTHORIZATION OF APPROPRIATIONS.

Section 209(a) of the Museum Services Act (20 U.S.C. 967(a)) is amended—

(1) by striking out "$25,000,000" and all that follows through "1984, and" and inserting in lieu thereof "$21,600,000 for fiscal year 1986 and", and

(2) by striking out "fiscal year 1985" and inserting in lieu thereof "each of the fiscal years 1987, 1988, and 1989".

The CHAIRMAN pro tempore. Are there any amendments to title II?

If not, the Clerk will designate title III.

The text of title III is as follows:

TITLE III—AMENDMENTS TO ARTS AND ARTIFACTS INDEMNITY ACT

SEC. 301. INDEMNITY AGREEMENT.

Section 5(b) of the Arts and Artifacts Indemnity Act (20 U.S.C. 974(b)) is amended by striking out "$400,000,000" and inserting in lieu thereof "$650,000,000".

The CHAIRMAN pro tempore. Are there any amendments to title III?

If not, the Clerk will designate title IV.

The text of title IV is as follows:

TITLE IV—EFFECTIVE DATE; APPLICATION OF AMENDMENTS

SEC. 401. EFFECTIVE DATE.

This Act and the amendments made by this Act shall take effect on October 1, 1985.

SEC. 402. APPLICATION OF AMENDMENTS.

The amendments made by sections 105(3) and 107(3) shall not apply with respect to plans submitted for financial assistance to be provided with funds appropriated for fiscal year 1986.

The CHAIRMAN pro tempore. Are there any amendments to title IV?

If not, are there any other amendments to the bill?

Mr. MANTON. Mr. Chairman, both as a member of the Congressional Arts Caucus and as one who appreciates and enjoys the arts, I rise in strong support of H.R. 3248. This legislation reauthorizes the National Endowment for the Arts and Humanities and the Institute of Museum Services through fiscal year 1989.

These programs increase the opportunities available for all citizens to enjoy the arts. These programs also provide the opportunity for aspiring artists of all types to develop their talents and share their creativity.

These programs are of particular importance to the constituents of the Ninth Congressional District of New York, which I represent. One of my constituents was recently awarded 1 of 12 National Heritage Fellowships by the National Endowment of the Arts, Folk Arts Program. The National Heritage Fellowships recognize a variety of folk artists around the country who are preserving a vanishing folk art and reflect the cultural diversity of our nation.

My district is also the home of Project Studios 1. Project Studios 1 provides an alternative space for contemporary artists. Originally a public school that was scheduled to be demolished, members of the community supported instead Project Studios 1 which is the main exhibition site for the Institute for Art and Urban Resources.

P.S. 1, which receives grants under these programs, is unique in the United States. At P.S. 1, artists have access to both studio and display space. P.S. 1 is also able to accommodate artists who are unable to find space, for reasons of size or adaptability, elsewhere in the United States. In addition, artists from all over the world work and display their projects at P.S. 1.

Mr. Chairman, in conclusion, I strongly urge my colleagues to vote in favor of this important reauthorization. These programs renew our Federal commitment to the arts and will help to encourage the development and preservation of our Nation's cultural diversity.

Mr. SCHEUER. Mr. Chairman, I rise in support of H.R. 3248, which reauthorizes the National Endowment for the Arts, the National Endowment for the Humanities, and the Institute for Museum Services.

As a member of the executive board of the Congressional Arts Caucus, I applaud the efforts of the distinguished chairman of the Select Education Subcommittee and my colleague on the executive board, PAT WILLIAMS, for his able leadership in bringing this bill before the House today.

This legislation provides Congress with an opportunity to reaffirm the need for and the value of the endowments and the IMS. With a Federal deficit of $200 billion, we are constantly challenged to reassess our Nation's priorities.

In this context, there are some among us who suggest that Federal support for the endowments receive a low rating as a national priority.

Mr. Chairman, I disagree strongly with this narrowminded and nearsighted notion.

We have a wealth of talent and resources in this Nation which need to be encouraged and nourished for the betterment of us all.

The grant programs of the NEA, NEH, and IMS, both individually and collectively, protect our heritage, preserve our history, and promote our creativity.

In addition, these agencies have assumed a major catalytic role in encouraging more private sector funding for America's culture.

For example, $110 million in NEA challenge grant funding has been matched by more than $800 million in private contributions since 1977.

Our Federal cultural agencies have served us well for two decades.

The Endowments have captured who we are, where we are, and where we are headed.

By approving the original legislation when I was a freshman Congressman in 1965, and by reaffirming it periodically since then, Congress has shown that cultural concerns belong firmly on the national agenda.

H.R. 3248 is a reflection of this spirit which has guided the NEA, NEH, and IMS for 20 years and, as such, deserve our strongest support.

Mr. CONYERS. Mr. Chairman, I rise in support of H.R. 3248, the Arts, Humanities, and Museums Amendments of 1985, legislation which extends the authorization of the National Endowment for the Arts [NEA], National Endowment for the Humanities [NEH], and the Institute of Museum Services [IMS] through fiscal year 1979.

The bill contains new language which recognizes the fact that for the last 20 years, the endowments have failed to comply adequately with their original legislative mandate, to make arts and humanities available to all of our citizens and to represent the full cultural diversity and richness of our heritage.

Section 105 of the bill adds section 5(c)(4) to the National Foundation on the Arts and Humanities Act of 1965, specifically authorizing the chairperson of the NEA to establish projects and productions which have substantial artistic and cultural significance and that reach, or reflect the culture of, a minority, inner city, rural, or tribal community.

This subsection also specifies that in selecting the individuals and groups that are to be recipients of financial assistance for all programs, the chairperson must give "particular regard" to artists and artistic groups that have been traditionally underrepresented.

Section 107 of the bill adds section 7(c)(4) to the act requiring the chairperson of the NEH to do the same as above.

In order to provide for the measurement of the endowments' progress in achieving these and other goals, the bill requires that the NEA produce a National State of the Arts Report and the NEH produce a National State of the Humanities Report. These reports are to be submitted to the President and the Congress and provided to the States not later than October 1, 1988, and every 2 years thereafter. These reports must include information on the availability of the Endowments' programs to emerging and culturally diverse artists, arts organizations, and communities, and the level of their participation therein. They must also contain a summary of each State's annual report to the endowment—which shall include a description of how the State is providing assistance to all of its people and communities. The States receive 20 percent of the funds appropriated for each of the endowments.

Congressman PAT WILLIAMS, chairman of the Education and Labor Subcommittee on Select Education is to be thanked for his work in developing these new provisions. I plan to work more closely with him in the future to monitor their implementation because in spite of them, the past record of performance at the Endowments leaves me with the following concerns:

First, the NEA's Expansion Arts Program—established in 1971—has been the major source of funding for minority, inner city, rural, and tribal communities. Over the past 8 years, it has received only an average of 5.6 percent of the total NEA Program allocations. Approximately 2 percent of the NEA's funds have gone to support projects for these groups in all of the other 12 program areas. This situation is intolerable.

Second, within the Music Program at NEA, I find that from 1970 to 1984, symphony orchestras have received 10 times the support that all jazz related activities have received. Opera has received three times the support. This reflects an incredible bias toward European music forms, yet jazz stands unquestionably as America's only original classical music.

Third, authorizing the NEA and NEH to expend funds specifically to address the needs of culturally diverse and underrepresented groups and individuals is a good thing, but without the specific set-aside of funds for that purpose, in each of the program areas, these groups and individuals will have to compete in what is essentially the same decisionmaking environment as they have done in the past. Will there be a difference?

Fourth, because the Endowment utilize peer review panels to assist them in making funding decisions, it is critically important that these panels be broadly representative of the diverse groups and cultures in America. Much concern has been expressed about cronyism and conflict of interest affecting the work of these panels. It is my hope that the improved oversight which will result from requiring the NEA and NEH report to Congress annually on their procedures for selecting panelists eliminates the unfairness which has existed in the past.

Fifth, while the state of the arts and humanities reports will enable the Congress for the first time to see exactly who is receiving the funds so that we can determine whether they are now being fairly allocated, it will be 3 years before they become available. The need to see improvement is immediate.

Sixth, there are few minorities at the NEA in policymaking positions while at the NEH there are none at all. NEH has no minorities above the GS–8 level. At NEA, while 96 (30 percent of the agency's 315 employees are minorities, most of them, 77, are in grades 11 or below (41 in grades 1 to 6 and 36 in grades 7 to 11). These figures are not surprising when one considers the fact that the endowments are long overdue in their responsibilities to fulfill compliance with the Civil Rights Acts.

Since 1980, both the NEA and NEH have failed to issue an updated set of regulations to implement title VI. The NEH is 1 of only 2 of 106 Federal agencies that has failed to file a complete affirmative action plan with the EEOC. I am pleased to see that this legislation directs the endowments to comply promptly with the law in this important area. I only hope that those responsible for enforcement will take the steps necessary to ensure that what is required gets done.

Mr. DOWNEY of New York. Mr. Chairman, I rise in support of the Arts, Humanities, and Museum Act of 1985 (H.R. 3248). On behalf of the nearly 200 Members of the Congressional Arts Caucus, I would like to thank Chairman PAT WILLIAMS and the other members of the Select Education Subcommittee for their outstanding work on this legislation.

It is appropriate that as we celebrate the 20th anniversary of the National Foundation on the Arts and Humanities we are able to reaffirm our commitment to our Nation's cultural heritage by approving this legislation today. For the past two decades, strong bipartisan congressional support has been maintained for our national endowments—and since 1976, for the Institute of Museum Services. The existence of these small, but extremely important, Federal agencies indicates that America in the 20th century has come to recognize that an enlightened society places cultural concerns proudly on its national agenda.

The legislation before us today preserves the essential features of our national endowments that have served us so well for 20 years—the matching grant features which have encouraged millions in private support; the peer panel review system ensuring the choice of excellence; and the outstanding State programs which have been so successful in each of our States and territories. In addition, the bill strengthens the agencies' involvement with arts and humanities education and seeks to ensure that all segments of our population benefit from the programs of the agencies.

Mr. Chairman, I urge my colleagues to give swift approval to H.R. 3248 in order that we may continue to bring the best of our Nation's culture to all Americans.

Mr. LEVINE of California. Mr. Chairman, I rise in strong support of H.R. 3248, which extends the authorization for the National Endowment for the Arts, the National Endowment for the Humanities, and the Institutes of Museum Services.

I would like to focus my remarks on the exemplary work of the Art Endowment, which for the past 20 years has enabled the performing, visual, and literary arts to become a regular part of our lives. In addition to contributing to our esthetic well being, Federal support for the arts has lent an economic boost to thousands of our communities. It is estimated that for every dollar spent in the arts, $3 to $5 are generated on the local level.

Although funding for the Arts Endowment represents a small fraction of the total Federal budget, this limited allocation has resulted in much enthusiasm and financial support for the arts nationwide. Because most Endowment grants require matching funds, initial Government support serves as a necessary catalyst in sustaining most programs and projects.

We must be careful to avoid allowing private donors to become the sole patron of the arts. Without the National Endowment's seal of approval, private donors are less likely to support innovative art projects and artists. Were we to eliminate public funding for the arts, lesser known theater troupes, dance companies, and orchestras, which are often the source of new young talent, might cease to exist.

In my district, the Endowment has recently funded the work of various independent filmmaking, the Los Angeles Theatre Works Co. in Venice, an outdoor sculpture in Santa Monica, and a concert series of the Pro Musicis Foundation. It is conceivable that without Endowment support, these artists would not have had a public forum to express themselves and audiences would have been denied the pleasure enjoying their work.

I would like to commend the committee for suggesting that the Endowment place additional emphasis on supporting women, minorities, and the handicapped in the arts. The Endowment's support of traditionally underrepresented artistic groups and artists should remind us that we cannot understand or appreciate our diverse culture unless we draw on the artistic talent and skill of our diverse population.

I also appreciate the additional steps the Education and Labor Committee has taken to ensure the accountability of the Endowment's grant selection process. As recommended by the committee, the NEA grant review process will be composed of persons who represent different aesthetic perspectives and geographical regions. The com-

mittee has also agreed to reemphasize that the NEA will fund only those projects of artistic merit that reflect exceptional talent and excellence.

Adoption of these additional peer review provisions should not suggest that Congress is dissatisfied with the work of the Endowment. With its peer review panel, the Endowment has ensured that professional artists, without partisan leanings, judge all grant applications on their merits alone. Congress would undermine the essential autonomy and integrity of the Endowment were it to establish any additional standards of artistic acceptability.

Several Members of this body have complained about the contents of works by artists receiving Endowment support. I understand these concerns but would remind this body that if artists are suddenly forced to conform to the artistic standards of a few, then the Endowment will have lost its purpose and our Government will have ceased to promote free artistic expression.

Instead, let us congratulate the Endowment on its dedicated attention to promoting our rich and diverse artistic culture. Let us also continue to allow the Endowment to carry out its mandate to sustain a climate encouraging freedom of thought, imagination, and inquiry. Once again, I urge my colleagues to support this vital piece of legislation.

Mr. HOYER. Mr. Chairman, I rise in support of H.R. 3248 which extends the authorization of the National Endowment for the Arts, National Endowment for the Humanities, and Institute of Museum Services through fiscal year 1989 and commend my colleague, Representative WILLIAMS, chairman of the Education and Labor Subcommittee on Select Education for his outstanding leadership on this bill. It is my understanding that the chairman has resolved attempts both at the committee level as well as here on the floor to amend this bill to deny grants to artists producing works that may be patently offensive to certain segments of the American public.

Next week, the United States will join 34 other signatories to the Helsinki Final Act in Budapest at a cultural forum. This conference, one of a series of experts' meetings mandated by the Madrid Review Conference of the Conference on Security and Cooperation in Europe, is the first CSCE meeting to be held in a Warsaw Pact country and the first to deal exclusively with the cultural content of the Final Act. One of the premises for the U.S. position at the forum is that the role of government in culture should be facilitative, not regulatory or restrictive. Intellectual freedom is an expression of a nation's power and soul and it must be protected if we are to remain truly a free society.

In Budapest, 35 states will be discussing creative freedom, jamming, censorship, and suppression of minority cultures, languages, and religions. The U.S. delegation will be led by Ambassador Walter Stoessel, former Deputy Secretary of State and a very able and dedicated diplomat, with whom I have met to discuss U.S. objectives at Budapest. Ambassador Stoessel shares my belief that human rights is inextricably intertwined with culture. The right to create and disseminate ideas is a human right. Intellectual repression is a crime against the essence of the individual. And that is occurring in Eastern Europe and in the Soviet Union where information is strictly controlled.

So, Mr. Chairman, I want to congratulate my colleague for his leadership on this bill. I also would like to point out that under the bill, there is an attempt to preserve the diversity of cultures, recognizing the rights and interests of minorities within the United States. The bill authorizes the NEA to fund projects or productions with substantial artistic and cultural significance that relate to minority, inner city, rural, or tribal cultures. The bill also specifies that in selecting individuals or groups of exceptional talent for awards, the NEA must give special regard to artists and artistic groups that have traditionally been underrepresented, such as women, minorities, the disabled and, members of inner city, rural, and tribal communities.

I think this is an excellent example of how government can facilitate the cultural achievements of minorities within the United States. I believe that this bill strengthens the U.S. position at Budapest and for that we are indebted to the leadership of my colleague, Representative WILLIAMS.

H.L. Mencken, a Baltimorian, once stated:

Culture itself is neither education nor lawmaking: it is an atmosphere and a heritage.

As the United States participates in Budapest, it can claim that its cultural heritage remains protected from government regulation and engulfed within an atmosphere of respect.

Mr. BIAGGI. Mr. Chairman, I rise in support of H.R. 3248, which would extend the authorization for the Endowments and Institute of Museum Services through fiscal year 1989. This bill would authorize a total of $328.5 million for these programs, including $167.1 million for the NEA and $139.9 million for the NEH, as well as $21.6 million for the Institute of Museum Services.

I specifically want to note here that I support the amendments that will be offered by Representatives DELAY and ARMEY, that I believe, will strengthen the review process for funded projects—to assure the highest possible quality—and to hopefully eliminate support for any works that are patently objectionable to the average patron.

Mr, Chairman, the issue of the Arts Endowment supporting works of questionable artistic merit has been before this committee before. Last year, I took up this issue with the Endowment's support of a production of the opera "Rigoletto." The production depicted characters in the dress of members of organized crime—and the advertisements on the production were patently offensive to those of us in the Italian-American community—which believe that such a depiction was a gross misrepresentation—and a misuse of public funds. I contacted the Endowment and Chairman Hodsell—and they were forthcoming in their response. However, this issue remains today—how do we assure that Endowment funds—are not used to subsidize products that are patently offensive to the general public?

The amendments that will be offered today—are a step in the right direction—that will place an additional gatekeeper within the Endowments to assure that events like Rigoletto—and others do not occur.

The need for the amendments has been most recently demonstrated in New York City—where the New York Film Festival has screened a foreign film by Jean-Luc Goddard entitled "Hail Mary." This movie has drawn a storm of protest from across Europe where it has been shown—and most recently in New York City by our own Archbishop O'Connor. The film depicts the immaculate pregnancy of a young woman named Mary who works in a gas station in modern-day Switzerland. There is considerable nudity as well as dialog that is reprehensible not only to me, as a Roman Catholic, but to many others.

Cardinal O'Connor has said himself, "We, of the Roman Catholic faith are deeply saddened and regret what many must construe as an act of contempt for our sacred beliefs." He also noted that harmonious relations in ethnically mixed New York were difficult enough to maintain without "the most sacred values of any group are perceived to be assaulted."

I immediately contacted Chairman Hodsell—and was assured that NEA funds were not being used to directly support the production of this film—by a foreign film maker. However—$35,000 of the NEA budget did support the film festival itself. I am pleased—first and foremost—that this project was not supported. More importantly—I think that it dramatically demonstrates—that it is not that difficult to identify works of arts that are patently offensive to large numbers of people.

The fact is—I think that it is very easy to draw this distinction. Clearly—many people even in New York—which has a higher-than-average tolerance for the avant guard—are disgusted, shocked, and appalled, by its content and tone. These amendments will further prevent such heinous events from occuring again.

The amendment offered by Mr. DELAY will prohibit any person from serving on any grant review panel that is reviewing his or her own application for funding. In a second, perfecting amendment, our colleague Mr. ARMEY will offer a second amendment that will institute a pre- and post-award evaluation of projects to assure that those of questionable—or objectionable artistic merit—will not be funded. I supported the efforts by my colleagues in the committee to address these issues—and I believe that these amendments offer a fair and reasonable response to their—and my own—concerns in this area.

I recognize the difficulties built into a process that is responsible for making de-

terminations about products of art and their relative merit. However, I do believe that it is fair to say that there is a resonable standard of taste that can be applied—when reasonable people have the opportunity to participate in the process.

I commend the gentleman from Montana, Mr. WILLIAMS, for his effort to accommodate these concerns. I believe that this bill—will go a long way toward bringing the arts to the people—all people.

Mr. FORD of Tennessee. Mr. Chairman, extending the authorization of the National Endowment for the Humanities, the National Endowment for the Arts, and the Institute of Museum Services through 1989 at the proposed levels is of the utmost importance. Art enriches the lives of all citizens regardless of age, race, color, or religious belief whether in Memphis, TN, my own district, or throughout the country. Artistic expression makes our communities a better place to live.

As a member of the Congressional Arts Council, it is my pleasure each year to announce the winners of the Ninth Congressional District Arts Competition for High School Students. I always marvel at the remarkable and diverse talents of these students and think of the fine works of art that these young people will produce in the future, which is why I am an ardent supporter of this bill.

Congress decided in 1965 that a National Endowment for the Arts should be established to encourage and support national progress in the arts and to help create and sustain a climate encouraging freedom of thought, imagination, and inquiry, and most importantly, to support the material conditions facilitating the release of this creative talent. It would be hypocritical for us to sponsor a congressional arts competition for high school students, encouraging these young people to develop their talents, without providing the funds and museum facilities for them to continue.

Abundant artistic expression is much of what makes our country a civilized and enjoyable place to live. In Memphis, we have an active and visible artistic community whose contribution to the fine quality of life in Memphis is immeasurable. I support this bill as an investment in the civilized future of our communities and our Nation.

The CHAIRMAN pro tempore. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN pro tempore. Under the rule, the Committee rises.

□ 1605

Accordingly the Committee rose; and the Speaker pro tempore. [Mr. DONNELLY] having assumed the chair, Mr. OBERSTAR, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3248) to amend the National Foundation on the Arts and the Humanities Act of 1965, and for other purposes, pursuant to House Resolution 266, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WILLIAMS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 349, nays 57, not voting 28, as follows:

[Roll No. 355]

□ 1615

Messrs. ARCHER, THOMAS of California, HENDON, ENGLISH, SWEENEY, and LATTA changed their votes from "yea" to "nay."

Mr. SCHUMER and Mr. BURTON of Indiana changed their votes from "nay" to yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 3248

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that in the engrossment of the bill (H.R. 3248) to amend the National Foundation on the Arts and the Humanities Act of 1965, and for other purposes, the Clerk be authorized to correct section numbers, punctuation, and cross-references and to make such other technical and conforming changes as may be necessary to reflect the actions of the House in amending the bill, H.R. 3248.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

GENERAL LEAVE

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 3248.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1264) to amend the National Foundation on the Arts and Humanities Act of 1965, the Museum Services Act, and the Arts and Artifacts Indemnity Act, to extend the authorization of appropriations for such Act, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1264

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Foundation on the Arts and the Humanities Amendments of 1985".

PROJECT DEFINITIONS; CONSTRUCTION OF FACILITIES

SEC. 2. Section 3(d)(2) of the National Foundation on the Arts and the Humanities Act of 1965 (hereafter in this Act referred to as the "Act") is amended by inserting "for the purposes of section 5(l) only," after "(2)".

APPLICATION APPROVAL OF NATIONAL COUNCIL ON THE ARTS

SEC. 3. The last sentence of section 6(f) of the Act is amended by striking out "$17,500" and inserting in lieu thereof "$30,000".

STATE HUMANITIES COUNCILS

SEC. 4. Section 7(f)(2)(B)(i) of the Act is amended—

(1) by striking out "four" and inserting in lieu thereof "six"; and

(2) by striking out "20 per centum" and inserting in lieu thereof "25 per centum".

NATIONAL COUNCIL ON THE HUMANITIES

SEC. 5. The second sentence of section 8(b) of the Act is amended by inserting after "selected" the following: "from citizens of the United States who are recognized for their knowledge of, expertise in, or commitment to the humanities and".

AUTHORIZATION OF APPROPRIATIONS

SEC. 6. (a) EXTENSION OF AUTHORIZATIONS.—(1)(A) The first sentence of section 11(a)(1)(A) of the Act is amended to read as follows: "For the purpose of carrying out section 5(c), there are authorized to be appropriated to the National Endowment for the Arts $118,678,000 for fiscal year 1986, $123,425,120 for fiscal year 1987, $128,362,125 for fiscal year 1988, and such sums as may be necessary for each of the fiscal years 1989 and 1990.".

(B) The first sentence of section 11(a)(1)(B) of the Act is amended to read as follows: "For the purpose of carrying out section 7(c), there are authorized to be appropriated to the National Endowment for the Humanities $95,207,000 for fiscal year 1986, $99,015,280 for fiscal year 1987, $102,975,891 for fiscal year 1988, and such sums as may be necessary for each of the fiscal years 1989 and 1990.".

(2)(A)(i) The matter preceding clause (i) of section 11(a)(2)(A) of the Act is amended by striking out "1985" and inserting in lieu thereof "1990".

(ii) The exception at the end of section 11(a)(2)(A) of the Act is amended to read as follows:

"except that the amounts so appropriated to the National Endowment for the Arts shall not exceed $8,820,000 for fiscal year 1986, $9,172,800 for fiscal year 1987, $9,539,712 for fiscal year 1988, and such sums as may be necessary for each of the fiscal years 1989 and 1990.".

(B)(i) The matter preceding clause (i) of section 11(a)(2)(B) of the Act is amended by striking out "1985" and inserting in lieu thereof "1990".

(ii) Clause (ii) of section 11(a)(2)(B) of the Act is amended by inserting "and subgrantees" after "grantees" each time it appears in such clause.

(iii) The exception at the end of section 11(a)(2)(B) of the Act is amended to read as follows:

"except that the amounts so appropriated to the National Endowment for the Humanities shall not exceed $10,780,000 for fiscal year 1986, $11,211,200 for fiscal year 1987, $11,659,648 for fiscal year 1988, and such sums as may be necessary for each of the fiscal years 1989 and 1990.".

(3)(A)(i) The matter preceding clause (i) of section 11(a)(3)(A) of the Act is amended by striking out "1985" and inserting in lieu thereof "1990".

(ii) The exception at the end of section 11(a)(3)(A) of the Act is amended to read as follows:

"except that the amounts so appropriated to such Endowment shall not exceed $20,580,000 for fiscal year 1986, $21,403,200 for fiscal year 1987, $22,259,328 for fiscal year 1988, and such sums as may be necessary for each of the fiscal years 1989 and 1990.".

(B)(i) The matter preceding clause (i) of section 11(a)(3)(B) of the Act is amended by striking out "1985" and inserting in lieu thereof "1990".

(ii) The exception at the end of section 11(a)(3)(B) of the Act is amended to read as follows:

"except that the amounts so appropriated to such Endowment shall not exceed $19,600,000 for fiscal year 1986, $20,384,000 for fiscal year 1987, $21,199,360 for fiscal year 1988, and such sums as may be necessary for each of the fiscal years 1989 and 1990.".

(b) AUTHORIZATION FOR ADMINISTRATION.—(1) Section 11(c)(1) of the Act is amended to read as follows:

"(1) There are authorized to be appropriated to the National Endowment for the Arts $15,582,000 for fiscal year 1986, $16,205,280 for fiscal year 1987, $16,853,491 for fiscal year 1988, and such sums as may be necessary for each of the fiscal years 1989 and 1990, to administer the provisions of this Act, or any other program for which the Chairman of the National Endowment for the Arts is responsible.".

(2) Section 11(c)(2) of the Act is amended to read as follows:

"(2) There are authorized to be appropriated to the National Endowment for the Humanities $13,891,000 for fiscal year 1986, $14,446,640 for fiscal year 1987, $15,024,506 for fiscal year 1988, and such sums as may be necessary for each of the fiscal years 1989 and 1990, to administer the provisions of this Act, or any other program for which the Chairman of the National Endowment for the Humanities is responsible.".

(c) AUTHORIZATION MAXIMUMS.—Section 11 of the Act is amended—

(1) by redesignating subsection (d) of subsection (e), and

(2) by inserting after subsection (c) the following new subsection:

"(d)(1) The total amount of appropriations to carry out the activities of the National Endowment for the Arts shall not exceed—

"(A) $163,660,000 for fiscal year 1986,

"(B) $170,206,400 for fiscal year 1987, and

"(C) $177,014,656 for fiscal year 1988.

"(2) The total amount of appropriations to carry out the activities for the National Endowment for the Humanities shall not exceed—

"(A) $139,478,000 for fiscal year 1986,

"(B) $145,057,120 for fiscal year 1987, and

"(C) $150,859,405 for fiscal year 1988."

REPEALERS

SEC. 7. (a) EXECUTED INDEMNITY STUDY REPEALED.—Subsections (d) and (e) of section 9 of the Act are repealed.

(b) EXECUTED PROPERTY STUDY REPEALED.—Subsection (d) of section 10 of the Act is repealed.

MUSEUM SERVICES AUTHORIZATION

SEC. 8. Section 209(a) of the Museum Services Act is amended to read as follows:

"(a) For the purpose of making grants under section 206(a), there are authorized to be appropriated $21,600,000 for fiscal year 1986, $22,464,000 for fiscal year 1987, $23,362,560 for fiscal year 1988, and such sums as may be necessary for each of the fiscal years 1989 and 1990.".

ARTS AND ARTIFACTS INDEMNITY PROGRAM AMENDMENTS

SEC. 9. (a) FEDERAL COUNCIL MEMBERSHIP.—Section 2(b) of the Arts and Artifacts Indemnity Act is amended—

(1) by inserting "(1) after the subsection designation; and

(2) by adding at the end thereof the following new paragraph:

"(2) For purposes of this Act, the Secretary of the Smithsonian Institution, the Director of the National Gallery of Art, the member designated by the Chairman of the Senate Commission of Art and Antiquities and the member designated by the Speaker of the House of Representatives shall not serve as members of the Council.".

(b) ELIGIBILITY FOR INDEMNITY.—(1) Section 3(b)(1) of the Arts and Artifacts Indemnity Act is amended by striking out ", or elsewhere when part of an exchange of exhibitions, but in no case shall both parts of such an exhibition be so covered" and inserting in lieu thereof "or elsewhere preferably when part of an exchange of exhibitions".

(2) The amendment made by paragraph (1) shall apply with respect to any exhibition which is certified under section 3(a) of the Arts and Artifacts Indemnity Act after the date of enactment of this Act.

(c) INDEMNITY AGREEMENT LOSS LIMITATIONS.—(1) Section 5(b) of the Arts and Artifacts Indemnity Act is amended by striking out "$400,000,000" and inserting in lieu thereof "$650,000,000".

(2) Section 5(c) of the Arts and Artifacts Indemnity Act is amended by striking out "$50,000,000" and inserting in lieu thereof "$75,000,000".

STUDY OF ALTERNATIVE FEDERAL FUNDING OF THE ARTS AND THE HUMANITIES

SEC. 10. (a) STUDY REQUIRED.—(1) The Comptroller General of the United States shall conduct a study to determine the feasibility of supplementing expenditures made from the general fund of the Treasury of the United States for the National Endowment for the Arts, the National Endowment for the Humanities, and the Institute of Museum Services through other Federal funding mechanisms. The study required by this section shall consider, but is not limited to, the consideration of the following funding sources:

(A) A revolving fund comprised of payments made to the Federal Government through an extension of the existing Federal copyright period for artistic, dramatic literary, and musical works.

(B) A revolving fund comprised of payments made to the Federal Government for the right to use or publicly perform artistic, dramatic, literary, and musical works in the public domain.

(2) In carrying out the study required by this section, the Comptroller General shall frequently consult with and seek the advice of the Chairman of the National Endowment for the Arts, the Chairman of the National Endowment for the Humanities, the Director of the Institute of Museum Services, the Register of Copyrights, the Chairman of the Labor and Human Resources Committee of the Senate, and the Chairman of the Education and Labor Committee of the House of Representatives, concerning the scope, direction, and focus of the study.

(3) In conducting the study required by this section, the Comptroller General shall consider the impact which the implementation of each supplemental funding mechanism would have on—

(A) any international copyright treaties, commitments, and obligations to which the United States is a party;

(B) public participation in the arts and the humanities;

(C) private, corporate, and foundation support for the arts and the humanities;

(D) the overall quality of arts and the humanities in the United States;

(E) the creative activities of individual authors and artists; and

(F) the activities and operations of private copyrighting organizations.

(b) REPORT.—The Comptroller General shall prepare and submit to the Congress not later than one year after the date of enactment of this Act a report of the study required by this section, together with such recommendations as the Comptroller General deems appropriate.

EDUCATION PROGRAM FOR THE COMMEMORATION OF THE BICENTENNIAL OF THE CONSTITUTION OF THE UNITED STATES AND THE BILL OF RIGHTS

SEC. 11. (a) GENERAL AUTHORITY.—(1) The Commission on the Bicentennial of the United States Constitution shall, in accordance with the provisions of this section, carry out an education program for the commemoration of the bicentennial of the Constitution of the United States and the Bill of Rights.

(2) To commemorate the bicentennial anniversary of the Constitution of the United States and the Bill of Rights, the Commission—

(A) is authorized to make grants to local educational agencies, private elementary and secondary schools, private organizations, individuals, and State and local public agencies in the United States for the development of instructional materials and programs on the Constitution of the United States and the Bill of Rights which are designed for use by elementary or secondary school students; and

(B) shall implement an annual national bicentennial Constitution and Bill of Rights completition based upon the programs developed and used by elementary and secondary schools.

(3) In carrying out the program authorized by this section, the Chairman of the Commission shall have the same authority as is established in section 10 of the National Foundation on the Arts and the Humanities Act of 1965.

(b) DEFINITION.—For the purpose of this section, the term "Commission" means the Commission on the Bicentennial of the United States Constitution.

(c) AUTHORIZATION OF APPROPRIATIONS.—(1) There are authorized to be appropriated $5,000,000 for each of the fiscal years 1987, 1988, 1989, 1990, and 1991 to carry out the provisions of this section.

(2) Amounts appropriated pursuant to paragraph (1) may be used for necessary administrative expenses, including staff.

POET LAUREATE CONSULTANT IN POETRY

SEC. 12. (a) RECOGNITION OF THE CONSULTANT IN POETRY.—The Congress recognizes that the Consultant in Poetry to the Library of Congress has for some time occupied a position of prominence in the life of the Nation, has spoken effectively for literary causes, and has occasionally performed duties and functions sometimes associated with the position of poet laureate in other nations and societies. Individuals are appointed to the position of Consultant in Poetry by the Librarian of Congress for one- or two-year terms solely on the basis of literary merit, and are compensated from endowment funds administered by the Library of Congress Trust Fund Board. The Congress further recognizes this position is equivalent to that of Poet Laureate of the United States.

(b) POET LAUREATE CONSULTANT IN POETRY ESTABLISHED.—(1) There is established in the Library of Congress the position of Poet Laureate Consultant in Poetry. The Poet Laureate Consultant in Poetry shall be appointed by the Librarian of Congress pursuant to the same procedures of appointment as established on the date of enactment of this section for the Consultant in Poetry to the Library of Congress.

(2) Each department and office of the Federal Government is encouraged to make use of the services of the Poet Laureate Consultant in Poetry for ceremonial and other occasions of celebration under such procedures as the Librarian of Congress shall approve designed to assure that participation under this paragraph does not impair the continuation of the work of the individual chosen to fill the position of Poet Laureate Consultant in Poetry.

(c) POETRY PROGRAM.—(1) The Chairman of the National Endowment for the Arts, with the advice of the National Council on the Arts, shall annually sponsor a program at which the Poet Laureate Consultant in Poetry will present a major work or the work of other distinguished poets.

(2) There are authorized to be appropriated to the National Endowment for the Arts $10,000 for the fiscal year 1987 and for each succeeding fiscal year ending prior to October 1, 1990, for the purpose of carrying out this subsection.

MOTION OFFERED BY MR. WILLIAMS

Mr. WILLIAMS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WILLIAMS moves to strike out all after the enacting clause of the Senate bill, S. 1264, and to insert in lieu thereof the text of H.R. 3248, as passed by the House, as follows:

SECTION 1. SHORT TITLE.

"including—

"(i) support of professional artists in community based residencies;

"(ii) support of rural arts development;

"(iii) support of and models for regional, statewide, or local organizations to provide technical assistance to cultural organizations and institutions;

"(iv) support of and models for visual and performing arts touring; and

"(v) support of and models for professional staffing of arts organizations and for stabilizing and broadening the financial base for arts organizations;",

(6) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson",

(7) by striking out "his" each place it appears and inserting in lieu thereof "the Chairperson's", and

(8) by adding at the end thereof the following new subsection:

"(m) The Chairperson of the National Endowment for the Arts shall, in consultation with State and local agencies, relevant organizations, and relevant Federal agencies, develop a practical system of national information and data collection on the arts, artists and arts groups, and their audiences. Such system shall include artistic and financial trends in the various artistic fields, trends in audience participation, and trends in arts education on national, regional, and State levels. Such system shall also include information regarding the availability of the arts to various audience segments, including rural communities. Not later than 1 year after the date of the enactment of the Arts, Humanities, and Museums Amendments of 1985, the Chairperson shall submit to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate a plan for the development and implementation of such system, including a recommendation regarding the need for any additional funds to be appropriated to develop and implement such system. Such system shall be used, along with a summary of the data submitted with State plans under subsection (g), to prepare a periodic report on the state of the arts in the Nation. The state of the arts report shall include a description of the the availability of the Endowment's programs to emerging, rural, and culturally diverse artists, arts organizations, and communities and of the participation by such artists, organizations, and communities in such programs. The state of the arts report shall be submitted to the President and the Congress, and provided to the States, not later than October 1, 1988, and biennially thereafter.".

SEC. 106. NATIONAL COUNCIL ON THE ARTS.

Section 6 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 955) is amended—

(1) in subsection (b)—

(A) by striking out "Chairman" the first place it appears and inserting in lieu thereof "Chairperson",

(B) by striking out "Chairman of the Council" and inserting in lieu thereof "Chairperson of the Council",

(C) in paragraph (1)—

(i) by inserting "(A)" after "who", and

(ii) by inserting before the semicolon at the end thereof the following: "and (B) have established records of distinguished service, or achieved eminence, in the arts",

(D) in the last sentence by striking out "him" and inserting in lieu thereof "the President", and

(E) by adding at the end thereof the following:

"In making such appointments, the President shall give due regard to equitable representation of women, minorities, and persons with disabilities who are involved in the arts.",

(2) in subsection (c) by striking out "his" each place it appears and inserting in lieu thereof "such member's",

(3) in subsection (d) by striking out "Chairman" and inserting in lieu thereof "Chairperson",

(4) in subsection (e) by striking out "Chairman" and inserting in lieu thereof "Chairperson", and

(5) in subsection (f)—

(A) in the first sentence by striking out "his" and inserting in lieu thereof "the Chairperson's",

(B) in the second sentence by striking out "he" and inserting in lieu thereof "the Chairperson",

(C) in the third sentence by striking out "$17,500" and inserting in lieu thereof "$30,000", and

(D) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson".

SEC. 107. ESTABLISHMENT OF THE NATIONAL ENDOWMENT FOR THE HUMANITIES.

Section 7 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 956) is amended—

(1) in subsection (b)—

(A) in paragraph (1) by striking out "chairman" and inserting in lieu thereof "Chairperson", and

(B) in paragraph (2) by striking out "his" each place it appears and inserting in lieu thereof "the Chairperson's",

(2) in subsection (c)—

(A) by redesignating paragraphs (4), (5), (6), and (7) as paragraphs (6), (7), (8), and (9), respectively, and

(B) by inserting after paragraph (3) the following new paragraphs:

"(4) initiate and support programs and research which have substantial scholarly and cultural significance and that reach, or reflect the diversity and richness of our American cultural heritage, including the culture of, a minority, inner city, rural, or tribal community;

"(5) foster international programs and exchanges;",

(C) in paragraph (3) by striking out "workships" and inserting in lieu thereof "workshops",

(D) by striking out "clause (6)" and inserting in lieu thereof "clause (8)", and

(E) by adding at the end thereof the following:

"In selecting individuals and groups of exceptional talent as recipients of financial assistance to be provided under this subsection, the Chairperson shall give particular regard to scholars, and educational and cultural institutions, that have traditionally been underrepresented.",

(3) in subsection (f)—

(A) in paragraph (2)(A)—

(i) in the first sentence by striking out "the Arts and Humanities Act of 1980" and inserting in lieu thereof "the Arts, Humanities, and Museums Amendments of 1985",

(ii) in clause (ii) by inserting "officer" after "chief executive" each place it appears,

(iv) in clause (vi) by striking out the period at the end thereof and inserting in lieu thereof ", including a description of the progress made toward achieving the goals of the State plan;", and

(v) by inserting after clause (vi) the following new clauses:

"(vii) provides—

"(I) assurances that the State agency has held, after reasonable notice, public meetings in the State to allow scholars, interested organizations, and the public to present views and make recommendations regarding the State plan; and

"(II) a summary of such recommendations and of the response of the State agency to such recommendations; and

"(viii) contains—

"(I) a description of the level of participation during the previous 2 years by scholars and scholarly organizations in programs receiving financial assistance under this subsection;

"(II) a description of the extent to which the programs receiving financial assistance under this subsection are available to all people and communities in the State; and

"(III) a description of programs receiving financial assistance under this subsection that exist or are being developed to secure wider participation of scholars and scholarly organizations identified under subclause (I) of this clause or that address the availability of the humanities to all people or communities identified under subclause (II) of this clause.

No application may be approved unless the accompanying plan satisfies the requirements specified in this subsection.",

(B) in paragraph (3)—

(i) in subparagraph (G) by striking out "and" at the end thereof,

(ii) in subparagraph (H) by striking out the period at the end thereof and inserting in lieu thereof ", including a description of the progress made toward achieving the goals of the plan;", and

(iii) by inserting after subparagraph (H) the following new subparagraphs:

"(I) provides—

"(i) assurances that the grant recipient has held, after reasonable notice, public meetings in the State to allow scholars, interested organizations, and the public to present views and make recommendations regarding the plan; and

"(ii) a summary of such recommendations and of the response of the grant recipient to such recommendations; and

"(J) contains—

"(i) a description of the level of participation during the previous 2 years by scholars and scholarly organizations in programs receiving financial assistance under this subsection;

"(ii) a description of the extent to which the programs receiving financial assistance under this subsection are available to all people and communities in the State; and

"(iii) a description of programs receiving financial assistance under this subsection that exist or are being developed to secure wider participation of scholars and scholarly organizations identified under clause (i) of this subparagraph or that address the availability of the humanities to all people or communities identified under clause (ii) of this subparagraph.

No application may be approved unless the accompanying plan satisfies the requirements specified in this subsection.",

(4) by striking out the last sentence of subsection (g) and inserting in lieu thereof "The Secretary of Labor shall prescribe standards, regulations, and procedures necessary to carry out this subsection not later than 180 days after the date of the enactment of the Arts, Humanities, and Museums Amendments of 1985.",

(5) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(6) by adding at the end thereof the following new subsections:

"(j) It shall be a condition of the receipt of any grant under this section that the group or individual of exceptional talent or the State, State agency, or entity receiving such grant furnish adequate assurances to the Secretary of Labor that all laborers and mechanics employed by contractors or subcontractors on construction projects assisted under this section shall be paid wages at rates not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a–276a–5). The Secretary of Labor shall have, with respect to the labor standards specified in this subsection, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 5 U.S.C. 133z–15) and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

"(k) The Chairperson of the National Endowment for the Humanities shall, in consultation with State and local agencies, other relevant organizations, and relevant Federal agencies, develop a practical system of national information and data collection on the humanities, scholars, educational and cultural groups, and their audiences. Such system shall include cultural and financial trends in the various humanities fields, trends in audience participation, and trends in humanities education on national, regional, and State levels. Not later than 1 year after the date of the enactment of the Arts, Humanities, and Museums Amendments of 1985, the Chairperson shall submit to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate a plan for the development and implementation of such system, including a recommendation regarding the need for any additional funds to be appropriated to develop and implement such system. Such system shall be used, along with a summary of the data submitted with plans under subsection (f), to prepare a report on the state of the humanities in the Nation. The state of the humanities report shall include a description of the availability of the Endowment's programs to emerging and culturally diverse scholars, cultural and educational organizations, and communities and of the participation of such scholars, organizations, and communities in such programs. The state of the humanities report shall be submitted to the President and the Congress, and provided the States, not later than October 1, 1988, and biennially thereafter.

"(l) Not later than 30 days after the date of enactment of the Arts, Humanities, and Museums Amendments of 1985, the Chairperson of the National Endowment for the Humanities shall transmit to the Equal Employment Opportunity Commission each plan and each report required under any regulation or management directive that is issued by the Commission and is in effect on such date of enactment.".

SEC. 108. ESTABLISHMENT OF THE NATIONAL COUNCIL ON THE HUMANITIES.

Section 8 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 957) is amended—

(1) in subsection (b)—

(A) in the first sentence by striking out "Chairman of the National Endowment for the Humanities, who shall be the Chairman" and inserting in lieu thereof "Chairperson of the National Endowment for the Humanities, who shall be the Chairperson",

(B) in the second sentence by striking out "selected on the basis of" and inserting in lieu thereof "individuals who (1) are selected from among private citizens of the United States who are recognized for their broad knowledge of, expertise in, or commitment to the humanities, and (2) have established records of", and

(C) by adding at the end thereof the following:

"In making such appointments, the President shall give due regard to equitable representation of women, minorities, and persons with disabilities who are involved in the humanities.",

(2) in subsection (c) by striking out "his" each place it appears and inserting in lieu thereof "such member's",

(3) in subsections (d), (e), and (f) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(4) in subsection (f)—

(A) in the first sentence by striking out "his" and inserting in lieu thereof "the Chairperson's", and

(B) in the second sentence by striking out "he" and inserting in lieu thereof "the Chairperson".

SEC. 109. ESTABLISHMENT OF THE FEDERAL COUNCIL ON THE ARTS AND THE HUMANITIES.

Section 9 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 958) is amended—

(1) in subsection (b)—

(A) in the first sentence by striking out "Chairman of the National Endowment for the Arts, the Chairman of the National Endowment for the Humanities" and inserting in lieu thereof "Chairperson of the National Endowment for the Arts, the Chairperson of the National Endowment for the Humanities",

(B) in the second sentence by striking out "Chairman" and inserting in lieu thereof "presiding officer",

(C) in the last sentence by striking out "he" and inserting in lieu thereof "the President", and

(D) by adding at the end thereof the following:

"For the purposes of the Arts and Artifacts Indemnity Act (20 U.S.C. 971 et seq.), the Secretary of the Smithsonian Institution, the Director of the National Gallery of Art, and the members of the Council who are designated by the Chairman of the Senate Commission on Art and Antiquities and the Speaker of the House of Representatives shall not serve as members of the Council.",

(2) in subsection (c)(1) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(3) by striking out subsections (d) and (e) and inserting in lieu thereof the following new subsections:

"(d) The Council shall conduct a study to determine—

"(1) the nature and level of Federal support provided to museums;

"(2) the areas in which such support overlaps or is inadequate, particularly in case of emerging museums;

"(3) the impact of the Institute of Museum Services in carrying out its stated purpose; and

"(4) the impact and nature of conservation and preservation programs being carried out under this Act and other Federal laws and the areas in which such programs overlap or are inadequate.

"(e) Not later than October 1, 1987, the Council shall develop and submit to the President policy recommendations regarding the acquisition of works of art for use on Federal property, the disposal of such works of art, and the maintenance of such works of art. Such recommendations shall—

"(1) address the need for participation by local citizens and by State and local arts agencies in the process of placing works of art on Federal property and removing such works of art from such property,

"(2) provide that planning for Federal commissions of works of art will be included in the preliminary planning of new Federal buildings and will be an integral part of the architectural design of such buildings,

"(3) provide for making determinations that works of art located or to be located in existing Federal buildings are appropriate for their respective settings and spaces, and

"(4) avoid the development of an official style, in either architecture or associated works of art, and encourage Federal commissions of works of art that will give expression to the full diversity and vitality of American life.".

SEC. 110. ADMINISTRATIVE PROVISIONS.

Section 10 of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 959) is amended—

(1) in subsection (a)—

(A) in the matter preceding paragraph (1) by striking out "Chairman of the National Endowment for the Arts and the Chairman of the National Endowment for the Humanities" and inserting in lieu thereof "Chairperson of the National Endowment for the Arts and the Chairperson of the National Endowment for the Humanities",

(B) in paragraph (1)—

(i) by striking out "he" and inserting in lieu thereof "the Chairperson", and

(ii) by striking out "his" and inserting in lieu thereof "the Chairperson's",

(C) in paragraph (2) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson",

(D) in paragraph (3) by striking out "his" and inserting in lieu thereof "the Chairperson's",

(E) in paragraph (4) by striking out "section 15" and all that follows through "representation" and inserting in lieu thereof "section 3109 of title 5, United States Code",

(F) in the matter following paragraph (8) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(G) by adding at the end thereof the following:

"In selecting panels of experts under paragraph (4) to review and make recommendations with respect to the approval of applications for financial assistance under this Act, each Chairperson shall appoint persons who have exhibited expertise and leadership in the field under review, who broadly represent diverse characteristics in terms of aesthetic or humanistic perspective, and geographical factors, and who broadly represent cultural diversity. Each Chairperson shall assure that the membership of panels changes substantially from year to year, and that no more than 20 per centum of the annual appointments shall be for service beyond the limit of 3 consecutive years on a subpanel. In making appointments, each Chairperson shall give due regard to the need for experienced as well as new members on each panel. Panels of experts appointed to review or make recommendations with respect to the approval of applications or projects for funding by the National Endowment for the Arts shall, when reviewing such applications and projects, recommend for funding only those that in the context in which they are presented, in the experts' view, foster excellence, are reflective of exceptional talent, and have significant literary, scholarly, cultural, or artistic merit. Whenever there is pending an application submitted by an individual for financial assistance under section 5(c), such individual may not serve as a member of any subpanel (or panel where a subpanel does not exist) before which such application is pending. The prohibition described in the previous sentence shall commence on the date the application is submitted and continue for so long as the application is pending.".

(2) in subsection (b) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(3) by striking out subsection (d) and inserting in lieu thereof the following new subsections:

"(d)(1) The Chairperson of the National Endowment for the Arts and the Chairperson of the National Endowment for the Humanities shall conduct a post-award evaluation of projects, productions, and programs for which financial assistance is provided by their respective Endowments under sections 5(c) and 7(c). Such evaluation may include an audit to determine the accuracy of the reports required to be submitted by recipients under clauses (i) and (ii) of paragraph (2). As a condition of receiving such financial assistance, a recipient shall comply with the requirements specified in paragraph (2) that are applicable to the project, production, or program for which such financial assistance is received.

"(2)(A) The recipient of financial assistance provided by either of the Endowments shall submit to the Chairperson of the Endowment involved—

"(i) a financial report containing such information as the Chairperson deems necessary to ensure that such financial assistance is expended in accordance with the terms and conditions under which it is provided;

"(ii) a report describing the project, production, or program carried out with such financial assistance; and

"(iii) if practicable, as determined by the Chairperson a copy of such project, production, or program.

"(B) Such recipient shall comply with the requirements of this paragraph not later than 90 days after the end of the period for which such financial assistance is provided. The Chairperson may extend the 90-day period only if the recipient shows good cause why such an extension should be granted.

"(3) If such recipient substantially fails to satisfy the purposes for which such financial assistance is provided and the criteria specified in the last sentence of subsection (a), as determined by the Chairperson of the Endowment that provided such financial assistance, then such Chairperson may—

"(A) for purposes of determining whether to provide any subsequent financial assistance, take into consideration the results of the post award evaluation conducted under this subsection;

"(B) prohibit the recipient of such financial assistance to use the name of, or in any way associate such project, production, or program with the Endowment that provided such financial assistance; and

"(C) if such project, production, or program is published, require that the publication contain the following statement: 'The opinions, findings, conclusions, and recommendations expressed herein do not reflect the views of the National Endowment for the Arts or the National Endowment for the Humanities.' ".

"(e)(1) The Chairperson of the National Endowment for the Arts and the Chairperson of the National Endowment for the Humanities, with the cooperation of the Secretary of Education, shall conduct jointly a study of—

"(A) the state of arts education and humanities education, as currently taught in the public elementary and secondary schools in the United States; and

"(B) the current and future availability of qualified instructional personnel, and other factors, affecting the quality of education in the arts and humanities in such schools.

"(2) The Endowments shall consult with the Committee on Labor and Human Resources of the Senate and the Committee on Education and Labor of the House of Representatives in the design and implementation of the study required by this subsection.

"(3) Not later than 2 years after the date of the enactment of the Arts, Humanities, and Museums Amendments of 1985, the Endowments shall submit to the President, the Congress, and the States a report containing—

"(A) the findings in paragraph (1);

"(B) the Endowments' views of the role of the arts and humanities in elementary and secondary education;

"(C) recommendations designed to encourage making arts and humanities education available throughout elementary and secondary schools;

"(D) recommendations for the participation by the National Endowment for the Arts and the National Endowment for the Humanities in arts education and humanities education in such schools; and

"(E) an evaluation of existing policies of the National Endowment for the Arts and the National Endowment for the Humanities that expressly or inherently affect the Endowments' abilities to expand such participation.

"(f) Not later than October 1, 1987, each Endowment shall submit to the Congress a report detailing the procedures used in selecting experts for appointment to panels and the procedures applied by panels in making recommendations with respect to approval of applications for financial assistance under this Act, including procedures to avoid possible conflicts of interest which may arise in providing financial assistance under this Act.".

SEC. 111. AUTHORIZATION OF APPRROPRIATIONS.

(a) FUNDS AUTHORIZED FOR PROGRAM GRANTS.—Section 11(a)(1) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(a)(1)) is amended—

(1) in subparagraph (A) by striking out "$115,500,000" and all that follows through "1985" and inserting in lieu thereof "$121,678,000 for fiscal year 1986 and $123,425,120 for fiscal year 1987"; and

(2) in subparagraph (B) by striking out "$114,500,000" and all that follows through "1985" and inserting in lieu thereof "$95,207,000 for fiscal year 1986 and $99,015,280 for fiscal year 1987".

(b) FUNDS AUTHORIZED TO MATCH NON-FEDERAL FUNDS RECEIVED.—Section 11(a) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(a)) is amended—

(1) in paragraph (2)—

(A) in subparagraph (A)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1987"; and

(ii) by striking out "$18,500,000" the first place it appears and all that follows through "1985" and inserting in lieu thereof "$8,820,000 for fiscal year 1986 and $9,172,800 for fiscal year 1987", and

(B) in subparagraph (B)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1987",

(ii) in clause (ii) by inserting "and subgrantees" after "grantees" each place it appears; and

(iii) by striking out "$12,500,000" and all that follows through "1985" and inserting in lieu thereof "$10,780,000 for fiscal year 1986 and $11,211,200 for fiscal year 1987", and

(2) in paragraph (3)—

(A) in subparagraph (A)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1987"; and

(ii) by striking out "$27,000,000" and all that follows through "1985" and inserting in lieu thereof "$20,580,000 for fiscal year 1986, and $21,403,200 for fiscal year 1987",

(B) in subparagraph (B)—

(i) by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1987"; and

(ii) by striking out "$30,000,000" and all that follows through "1985" and inserting in lieu thereof "$19,600,000 for fiscal year 1986 and $20,384,000 for fiscal year 1987", and

(C) in subparagraph (C)—

(i) by striking out "Chairman" and inserting in lieu thereof "Chairperson"; and

(ii) by striking out "he" and inserting in lieu thereof "the Chairperson", and

(3) in paragraph (4) by striking out "Chairman" each place it appears and by inserting in lieu thereof "Chairperson".

(c) FUNDS AUTHORIZED FOR ADMINISTRATION OF PROGRAMS OF THE NATIONAL ENDOWMENTS.—Section 11(c) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(c)) is amended—

(1) in paragraph (1) by striking out "$14,000,000" and all that follows through "1985" and inserting in lieu thereof "$15,982,000 for fiscal year 1986 and $16,205,280 for fiscal year 1987",

(2) in paragraph (2) by striking out "$13,000,000" and all that follows through "1985" and inserting in lieu thereof "$14,291,000 for fiscal year 1986 and $14,446,640 for fiscal year 1987", and

(3) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson".

(d) TECHNICAL AMENDMENT.—Section 11(d) of the National Foundation on the Arts and the Humanities Act of 1965 (20 U.S.C. 960(a)) is amended by striking out "under this title".

TITLE II—AMENDMENTS TO MUSEUM SERVICES ACT

SEC. 201. NATIONAL MUSEUM SERVICES BOARD.

Section 204 of the Museum Services Act (20 U.S.C. 963) is amended—

(1) in subsection (a)—

(A) in paragraph (1) by striking out the second sentence and inserting in lieu thereof the following:

"Such members shall be selected from among citizens of the United States who are members of the general public and who are—

"(A) broadly representative of the various museums, including museums relating to science, history, technology, art, zoos, and botanical gardens, and of the curatorial, educational, and cultural resources of the United States; and

"(B) recognized for their broad knowledge, expertise, or experience in museums or commitment to museums.

Members shall be appointed to reflect various geographical regions of the United States. The Board may not include, at any time, more than three members from a single State. In making such appointments, the President shall give due regard to equitable representation of women, minorities, and persons with disabilities who are involved in such museums.", and

(B) in paragraph (2)(A) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson", and

(2) in the last sentence of subsection (b) by striking out "his" each place it appears and inserting in lieu thereof "such member's", and

(3) in subsections (c) and (d) by striking out "Chairman" each place it appears and inserting in lieu thereof "Chairperson".

SEC. 202. DIRECTOR OF THE INSTITUTE.

Section 205(a)(2) of the Museum Services Act (20 U.S.C. 964(a)(2)) is amended by striking out "his" and inserting in lieu thereof "the Chairperson's".

SEC. 203. AUTHORIZATION OF APPROPRIATIONS.

(a) Section 209(a) of the Museum Services Act (20 U.S.C. 967(a)) is amended by striking out "$25,000,000" and all that follows through "1985" and inserting in lieu thereof "$21,600,000 for fiscal year 1986 and $22,464,000 for fiscal year 1987".

(b) Section 209(d) of the Museum Services Act (20 U.S.C. 967(d)) is amended by striking out "1985" and inserting in lieu thereof "1987".

TITLE III—AMENDMENTS TO ARTS AND ARTIFACTS INDEMNITY ACT

SEC. 301. INDEMNITY AGREEMENT.

Section 5(b) of the Arts and Artifacts Indemnity Act (20 U.S.C. 974(b)) is amended by striking out "$400,000,000" and inserting in lieu thereof "$650,000,000".

TITLE IV—EFFECTIVE DATE; APPLICATION OF AMENDMENTS

SEC. 401. EFFECTIVE DATE.

This Act and the amendments made by this Act shall take effect on October 1, 1985.

SEC. 402. APPLICATION OF AMENDMENTS.

The amendments made by sections 105(3) and 107(3) shall not apply with respect to plans submitted for financial assistance to be provided with funds appropriated for fiscal year 1986.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "An act to amend the National Foundation on the Arts and the Humanities Act of 1965, and for other purposes.

A motion to reconsider was laid on the table.

A similar House bill (H.R. 3248) was laid on the table.

APPOINTMENT OF CONFEREES ON S. 1264

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that the House insist on its amendment to the Senate bill, S. 1264, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

The Chair hears none and, without objection, appoints the following conferees: Messrs. HAWKINS, FORD of Michigan, BIAGGI, WILLIAMS, OWENS, HAYES, JEFFORDS, COLEMAN of Missouri, BARTLETT, and ARMEY.

There was no objection.

□ 1630

LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I take this time in order to discuss the pending legislative situation regarding the debt extension bill, and the actions in the other body, and our options of response thereto.

The Members are entitled to know where the situation stands at the moment. I think the Members are entitled to some certainty as to what our schedule will be.

The other body is debating amendments to the amendment offered by Senators GRAMM and RUDMAN. They have, for the fourth or perhaps the

fifth time, postponed cloture. The latest effort is to bring cloture at 7 o'clock. The probabilities point to a very late session this evening in the other body. The leadership in the other body advises us that it intends to complete action on the bill, House Joint Resolution 372, which was our simple extension of the debt ceiling, together with its amendments, and send them to the House before adjourning for their recess period. That would be tonight or early in the morning.

Rather than our sitting around indefinitely, without any idea of when they will finish or if they will finish tonight, or if it be in the wee, small hours of the morning, there are two options. Obviously, we do not intend for the House of Representatives to walk off and leave this unattended business, without having taken some action, dangling like a sword of Damocles in the air. After the other body has diligently worked this long and hard, we are not going to walk off on a recess, leaving it unattended.

So we can do one of two things. We can take it up now. We can vote, according to precedent, if unanimous consent is obtained, that it shall be in order for the House to consider a motion deeming that when the Clerk of the House receives a message from the Senate indicating that that body has passed this joint resolution with amendments, and has requested a conference with the House, or has insisted on its amendments, in either event, that the House be deemed to have disagreed to the amendments of the Senate and to have agreed to the conference asked by the Senate or request a conference with the Senate, whichever would be appropriate, and that the Speaker be deemed to have appointed conferees.

I have discussed with the minority leader the proposal of the Speaker for appointments of conferees and the numbers as between the two sides, and such motion would be debatable for not to exceed 1 hour, to be equally divided and controlled, one-half by the gentleman from Illinois [Mr. ROSTENKOWSKI] and the other half by such designee as may be selected by the minority leader on the other side, and the previous question shall be considered as ordered.

Following such vote, it would be in order, and certainly we would protect the right of the minority to offer any motion to instruct conferees which they deemed appropriate, and they would be entitled to get a vote on that motion.

If they wanted to agree to this procedure tonight and get it behind us so that the conferees could be appointed and start meeting, and understanding what is at stake in this extremely important legislation, if they would agree to that, if we could get unanimous consent, we could have the hour's debate, have a vote the minority would be entitled to its motion to instruct conferees, vote on that, and we would have no intervening motion to table. If that were to come tonight we would get a straight vote on it. That is what I understand the minority desires.

This would be an orderly means, for which there is precedent in the House, in order that we might follow our orderly schedule, and upon our adjourment tonight, be adjourned for pro forma sessions for the purposes of the Columbus Day home district work period.

If that is not agreed to, obviously we will have to be in session tomorrow. If the unanimous-consent agreement is not agreed to, then we will be in at 10 o'clock tomorrow morning and would hope to follow this same procedure at that time, the procedure being that there would be an hour's debate allowed on a motion to go to conference on the bill.

The gentleman from Illinois or his designee would have every right to offer a motion to instruct conferees if he so deemed proper.

I would like to urge our friends, in the interest of orderly planning and Members of this body knowing when they can go home tonight, that this unanimous consent be agreed to. If we were to order the motion at this moment and proceeded for an hour of debate, we could be out of here at approximately 6 o'clock tonight. Otherwise we will have to come in at 10 o'clock in the morning.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Of course I yield to my distinguished friend, the minority leader.

Mr. MICHEL. I appreciate the majority leader bringing the Members of the House up to date on what we had discussed within the last hour.

There is no question but that there have been instances some consider a precedent for doing this, although the last time we did it, I think on the tax bill, we did have a little better idea of precisely what that measure was going to be coming over from the other body.

I guess my big reservation here is not knowing. I was hoping, quite frankly, from all the indications we were getting from the other body, that by this time they would have had or surely by 5 o'clock would have had the final vote and a final version, and then it would be in hand and we would know how it was amended or modified.

Let us face it. It is very important to the Members, particularly in incorporating a motion to instruct, that we know exactly what we are attempting to instruct the conferees to do. There is still a measure of doubt as to exactly what the final form of Gramm-Rudman will be. The Senator from New Mexico, the chairman of the Budget Committee, it is my understanding, has a very significant substitute that probably is pending now or will be voted on later on this evening that would make quite a bit of difference, I think, in Members' assessment of what that final product is.

Because of that, as much as I would like to accomodate the majority side and the Members who I know on both sides have got plans for what we had scheduled earlier as a Columbus Day recess, I would probably object to the request that we do this immediately and that we wait until we see what happens over in the other body late tonight, hopefully a final resolution, and then deal with this subject in an orderly way tomorrow.

I know that is going to put some Members at discomfort. By the same token, I think it is such a significant issue that, from this gentleman's point of view, I would like to know specifically what is in that measure when it comes over to us so that we could vote with good conscience and with a full knowledge of what we are voting on. I would not want to attempt to have Members railroaded and bamboozled into voting for something they know nothing about.

Mr. WRIGHT. I certainly do agree with the gentleman's logic, and I find it flawless. I cannot fault his judgment, and I certainly emphatically agree that before Members vote to instruct conferees to follow a certain course of action, particularly in a complicated matter of this kind and one as important to the constitutional balances that were guaranteed by the Constitution of the United States, they ought to know exactly what they are instructing conferees to do.

For that reason, I do not think any intelligent Member of the House, cognizant of his responsibilities, sworn to uphold and defend the Constitution, would want ever to instruct conferees to do something that he did not fully understand. So under the gentleman's impeccable logic, I accede to his request and we will be in at 10 o'clock tomorrow morning for this purpose.

□ 1640

EXPRESSING CONCERN FOR PEOPLE OF PUERTO RICO AND SENSE OF THE HOUSE TO DECLARE PUERTO RICO A DISASTER AREA FROM TROPICAL STORM ISABEL

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the resolution (H. Res. 293) expressing concern for all the people of Puerto Rico affected by the devastation caused by tropical storm Isabel, support for Puerto Rico's effort to cope with this tragedy and the sense of the House of Representatives

that the Commonwealth of Puerto Rico should be declared a disaster area and provided with all necessary assistance, and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from New York?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, I shall not object because I support the resolution very strongly. But at this point, I would yield to the gentleman from Puerto Rico [Mr. FUSTER].

Mr. FUSTER. Mr. Speaker, on behalf of the people of Puerto Rico, I rise to call attention to a major national tragedy. For 3 days, from October 3 to October 7, Puerto Rico was subjected to torrential rains, resulting in catastrophic floods, mudslides, and landslides throughout the island. The impact of the disaster is grave and widespread: 33 towns have been severely stricken; the hilly section of the second largest city, my former hometown of Ponce, suffered what the U.S. Geological Survey has termed the most lethal landslide in U.S. history. Although rescue operations are still continuing, the toll of casualties is estimated to be possibly as high as 500 persons. Health officials on the island have asked the Governor to consider permanently sealing off the area in question—in effect making it a mass grave—in order to prevent the spread of a health threat to surrounding communities. This is, without question, the worst natural disaster to strike the island in the last 50 years. For these reasons, and pursuant to, section 301(b) of Public Law 93-288, the Governor of Puerto Rico has declared a state of emergency and has requested Federal assistance from a variety of Federal agencies to provide individual and family grants, temporary housing, disaster unemployment assistance, home loans, and other public assistance.

At present, the government of the Commonwealth is working closely with the Federal Emergency Management Agency in providing urgent help to the victims of the disaster. Nonetheless, Mr. Speaker, I believe that this House should express its sympathy and solidarity with those that have been stricken by this tragedy in Puerto Rico, voicing at the same time its concern that Puerto Rico be able to obtain whatever is needed for the reconstruction efforts that will ensue. In particular, it is important that this House express its interest in helping Puerto Rico take whatever measures are appropriate and possible to prevent this tragedy from occurring again. For this reason, Mr. Speaker, I have coauthored a sense of the House Resolution 293, with my fellow Puerto Rican, Congressman BOB GARCÍA, and with Mr. UDALL, Mr. YOUNG, and Mr. LAGOMARSINO on which I hope this House will approve shortly.

Mr. LAGOMARSINO. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from the Virgin Islands [Mr. DE LUGO].

Mr. DE LUGO. I thank the gentleman from California for yielding.

At this time, Mr. Speaker, I will include a letter that I wrote yesterday to the Governor of Puerto Rico for the RECORD.

I would just like to say in my letter I expressed the condolences of the people and the sympathy of the people of the U.S. Virgin Islands to our neighbors in Puerto Rico.

But I also said that I am concerned about some of the dire consequences of this storm to our islands, and I feel that some of it might have been averted had a more comprehensive analysis and reporting of the potential storms be made available to both the governments in the area and the public. I have written to the chairman of the Science and Technology Subcommittee with jurisdiction over the U.S. Weather Service with our concerns, not only about the quality of the forecasting on this storm, but on forecasting in general in our area in the Caribbean.

HOUSE OF REPRESENTATIVES,
Washington, DC, October 9, 1985.

Hon. RAFAEL HERNANDEZ COLON,
Governor of Puerto Rico, La Fortaleza, San Juan, PR.

DEAR GOVERNOR HERNANDEZ COLON: I was deeply saddened to hear of the tragic loss of so many lives and the severe consequences of the recent storm in the Commonwealth of Puerto Rico. The people of the U.S. Virgin Islands extend their condolences and sympathy to the families of the victims in our neighboring islands of Puerto Rico.

While the U.S. Virgin Islands were spared the loss of lives, we too suffered extensive damage to public and private property, and we commiserate with our neighbors.

I am concerned that some of the dire consequences of this storm in our islands might have been averted had a more comprehensive analysis and reporting of its potential been made available to the Governments and the public. I have written to the Chairman of the Science and Technology Subcommittee with jurisdiction over the U.S. Weather Service with my concerns not only about the quality of the forecasting on this storm, but on forecasting in general in our area of the Caribbean.

Please accept, Governor, my personal sympathy. Recognizing your deep commitment to the people of Puerto Rico, and the strength of the sense of community spirit in the people of Puerto Rico, I know that the consequences of this adversity will be addressed quickly and with vigor. My thoughts and prayers, and those of the people of the U.S. Virgin Islands are with you and your community.

Sincerely,

RON DE LUGO,
Member of Congress.

Mr. LAGOMARSINO. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. GONZALEZ. Mr. Speaker, reserving the right to object, I rise to join my voice to that of my colleague, the delegate from Puerto Rico, and my distinguished colleague from New York [Mr. GARCIA] and to urge the House to expedite the approval of this resolution.

Puerto Rico has suffered a very damaging catastrophe, and the least we can do is expedite this resolution expressing our desire that that be done.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I will be happy to yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Speaker, I want to join the chairman of my committee and my colleagues, and the delegate from Puerto Rico, and the chairman of the Census Subcommittee in strongly supporting this resolution.

Puerto Rico is very, very important to us. The people of Puerto Rico certainly deserve our concern and compassion and assistance, and therefore, I hope that we can pass this resolution unanimously.

I thank the gentleman for yielding.

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I will be glad to yield to the gentleman from New York.

Mr. GARCIA. I thank my colleague for yielding and would just like to say that that part of Puerto Rico which has been hit the hardest has been the south coast of Puerto Rico. Both my mother and my father were born in that part of the island, and I can tell you that it is a magnificent, beautiful area within the Caribbean.

I would like you to also know that the U.S. Geological Survey has said that that landslide, which was caused by the storm, appears to be the most lethal in U.S. history. The town of Mameyes, PR, has been completely destroyed. There are many victims of the storm that today are in need of emergency assistance.

I also must say, and I hope the figures are not accurate, but some of the lists that have been coming out indicate that there is a possibility that we may have up to 500 people who have died and who have been buried alive in that mudslide.

I would ask my colleagues in Congress, as they did when we responded to the earthquake in Italy, when we responded to the earthquake in Mexico not too long ago, that what has happened here in America, in the United States, in Puerto Rico, has been one of the worst disasters we

have ever faced, and I say that to you because only with the assistance of the United States Government and all of the powers that this administration has, are we going to be able to at least bring some sense of normalcy back to Puerto Rico.

On behalf of all of the Puerto Ricans, not just those who live on the island, but those who I represent here on the mainland, I ask all of us to join together in solidarity. This is a moment of grave concern obviously for us. I hope it never happens again.

Mr. Speaker, I would be remiss if I did not thank the gentleman from Arizona [Mr. UDALL], Chairman of the Interior and Insular Affairs committee, as well as the gentleman from Alaska [Mr. YOUNG] for permitting myself and the gentleman from New York [Mr. RANGEL] and the gentleman from California [Mr. LAGOMARSINO] to bring this resolution before us.

Mr. HAYES. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I will be delighted to yield to the gentleman from Illinois.

Mr. HAYES. Mr. Speaker, I ask the gentleman to yield just to lend my voice in support. I would request also that we unanimously approve this resolution.

I have had some real knowledge of the kind of poverty that is faced by many of the people who live on this beautiful island, and I know when it comes to a catastrophic devastation of this sort as a result of nature, immediate action should be taken. I want you to know, Mr. Speaker, I am in full support of this resolution and would do everything I can if it is passed, and I think it may well be, to see that it is really a meaningful resolution, not just a multiplicity of words.

Mr. UDALL. Mr. Speaker, the reports that we have so far tell us that tropical storm Isabel caused destruction in Puerto Rico so awful that it is difficult to comprehend.

The storm may be the worst natural disaster ever to strike the island. The landslide caused by the storm is thought to be the most deadly ever to occur in the United States.

Over 100 people are known to be dead or missing; 500 or more lives may have been taken by the flood and the mud.

Some 5,000 people are homeless now. A reliable estimate of the total damage is not yet available but published accounts put it at over $100 million.

It is beyond the capability of the Commonwealth to cope with the devastation by itself, as it would be beyond the capability of any State. Federal assistance should be substantial and swift.

As chairman of the committee with jurisdiction over matters concerning Puerto Rico, I, therefore, joined our colleagues from New York and Puerto Rico in sponsoring House Resolution 293. It supports whatever assistance may be necessary and possible to meet the needs caused by the storm and prevent similar devastation in the future. Congressmen FUSTER and GARCIA have done a service to the people of Puerto Rico, as they always do, by calling the attention of the House to this terrible situation and recommending that we act.

As fellow human beings, our sympathies go to the people who have suffered because of this storm. As fellow Americans, we have a special responsibility to help.

Mr. GONZALEZ. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 293

Whereas Tropical Storm Isabel was one of the most devastating natural disasters in the history of Puerto Rico;

Whereas an official of the United States Geological Survey has said that the landslide caused by the storm "appears to be the most lethal in U.S. history;"

Whereas Mameyes, Puerto Rico has been completely destroyed;

Whereas many victims of the storm are in need of emergency assistance;

Whereas over 500 persons are feared dead as a result of this disaster;

Whereas the House of Representatives is concerned about the effect this tragedy has had on Puerto Rico;

Whereas the Governor of Puerto Rico has determined that the disaster is of such severity that the Commonwealth of Puerto Rico will not be able to meet all of the needs of its people created by the storms without federal aid; Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that:

(1) the House of Representatives supports the efforts of the government of Puerto Rico to meet the needs created by the disaster;

(2) the President should declare Puerto Rico a disaster area so that federal emergency assistance can be provided to the island and the affected people;

(3) whatever assistance is necessary and appropriate to assist Puerto Rico in response to this disaster and to prevent the reoccurrence of such a disaster should be provided.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

REQUEST FOR REMOVAL OF NAME OF MEMBER AS COSPONSOR OF HOUSE JOINT RESOLUTION 192

Mr. SAXTON. Mr. Speaker, I ask unanimous consent that my name be withdrawn as a cosponsor of House Joint Resolution 192.

The SPEAKER pro tempore (Mr. HAYES). The Chair will advise the gentleman from New Jersey that his request cannot be entertained at this time as the bill has already been reported from committee.

SAVINGS ACCOUNT FOR A VALUED EDUCATION OF 1985

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute, and to revise and extend his remarks and include extraneous matter.)

Mr. SMITH of New Jersey. Mr. Speaker, today I am introducing a bill which I believe will provide an unprecedented opportunity for parents to plan and SAVE for their children's college education. The Savings Account for a Valued Education Act of 1985, otherwise known as SAVE, allows parents, family and friends to contribute tax deductible funds up to $1000 per child per year.

While SAVE is similar to a couple of other bills which are currently pending, I believe this bill, Mr. Speaker, is more focused on the absolute costs of tuition, fees, and books and is carefully written to ensure that the funds are used exclusively for education, either by redirecting excess funds into another education savings account or donating the funds to an institution of higher learning.

As we all know, the cost of college tuition and textbooks has increased dramatically over the last decade and we can assume that these costs will continue to rise in the future. In fact, estimates derived from current college cost figures provided by the college board indicate that, in 10 years, a student attending an average-priced State university can expect to spend approximately $3,700 per year for tuition, fees, and textbooks. Mr. Speaker, this is about twice the amount needed in this academic year.

With this figure in mind, it is clearly obvious that careful saving is necessary to afford a college education in the future. SAVE will provide a sensible tax incentive not only to parents but also family and friends who may have the means, especially in the early years, to begin the account.

The possibilities are tremendous: if $1,000 were contributed each year for only 10 years at a rate of 10 percent, when the child is ready to attend college, $17,916.83 in tax deferred savings would have accumulated in the education savings account. This would be

51-059 O-86-4 (Pt. 20)

sufficient to pay for at least 4 full years of college tuition, fees, and books. The tax on these accumulated funds will be deferred until the student reaches age 28. For 10 years thereafter, 10 percent of the total used for educational expenses will be added to the gross income of the former student.

Mr. Speaker, I believe this bill will greatly assist parents in planning for their children's education. SAVE will help pave the way for tremendous educational opportunities which otherwise may not be available to many young scholars. I urge my colleagues to join me by cosponsoring this Savings Account for a Valued Education Act of 1985.

SAVE allows a tax deduction for contributions to an education savings account. The contributions and the accumulated tax-free earnings may be used by the beneficiary—the student—for the expenses of postsecondary education.

Up to $1,000 may be contributed into a SAVE per year. Contributions may be made by parents, family, or friends for 18 years—until the calendar year in which the student reaches age 19. The maximum principal in account is $18,000.

Assets must be used by age 28, or will be distributed within 30 days to an eligible educational institution, or to the SAVE of a sibling—if the value of that account at the time of transfer is less than $18,000.

Educational expenses applies only to tuition, fees, books, and supplies. The similar bills which are pending allow funds to be used for reasonable room and board.

Postsecondary education includes universities, colleges, 2-year colleges, and vocational schools.

Some of the lost tax revenues would be recovered. Beginning in the taxable year beneficiary reaches age 28, beneficiary will, for a total of 10 years, include as gross income 10 percent of the total amount used from the trust fund for educational purposes.

Figures are indexed to inflation.

Possible savings.—Assuming a 10-percent rate on the account and $1,000 contributed on the first day of each calendar year, in 10 years the account will have $17,916.83; in 15 years $36,149.04; and in 18 years $52,283.54.

Possible college costs.—Assuming a 7-percent increase in college costs—this is the figure used by the College Entrance Examination Board, or College Board—the costs in 10 years will be approximately twice the amount of current figures. The costs for tuition, fees, and books in 1985-86 at Rutgers and Trenton State are $2,472 and $1,855, respectively. In 1995-96, it is estimated that Rutgers will cost $4,862 and Trenton State will be $3,649.

AID TO PUERTO RICO

(Mr. GARCIA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GARCIA. Mr. Speaker, for the third day in a row the New York Times has had a front-page story on the recent tragedy in Puerto Rico. Earlier this week a tropical storm struck Puerto Rico devastating parts of the southern coast.

Today health officials on the island have asked the Government to consider sealing off a small town north of Ponce—in effect making it a mass grave—in order to prevent the spread of a health threat to surrounding communities. The most conservative estimate of the number of dead in the small town of Mameyes is 200.

Puerto Rico's capable Governor, Rafael Hernandez Colon called the disaster the worst to strike the island in this century. The U.S. Geological Survey termed it the worst landslide in U.S. history. The people of Puerto Rico need our help.

I am calling on the President to declare those places in Puerto Rico that were hardest hit a disaster area. We cannot neglect the many families that have lost loved ones or who have been left homeless. The southern coast of Puerto Rico is quite beautiful, it can become beautiful again—but only with our help.

I am inserting as part of my statement an article from the New York Times that describes the tragedy, as well as numbers you can contact in the New York area to send aid to Puerto Rico.

[From the New York Times, Oct. 10, 1985]

HANDFUL OF SURVIVORS RECALL FIRST MOMENTS

(By Joseph B. Treaster)

PONCE, P.R., Oct. 9.—Some people recall hearing a thunderous crack and seeing a flash of light that momentarily set the hillside aglow. Others recall only the driving rain. Some felt their frail houses shudder.

Others say the first they realized anything was wrong was when neighbors began pelting their roofs with stones and yelling for them to run outside. Still others awoke with their houses breaking apart or skittering wildly down the steep hillside.

But many victims of the devastating landslide that struck in early morning darkness Monday never knew what hit them. The authorities say as many as 500 people are buried under tons of debris.

For years, people with little money and little hope of finding work had been stitching together houses of tin and wood and cement blocks on the steep hill rising above the poor northern edge of this city on the south coast of Puerto Rico. Most of the houses in what is known as the Mameyes neighborhood had electric lights, but many were without running water or indoor plumbing.

NO THOUGHT OF DANGER

Jesus Villegas Torres, a 22-year-old unemployed maintenance man whose leaky old frame house still stands, said he never liked living in Mameyes. But he added, "The thought of danger never really passed through my mind."

He said, however, that he became frightened early Monday morning as heavy rain continued to pound the tin roof of his house for a third day and thunder and lightning assaulted the hillside. He said he feel asleep praying.

"Then we heard neighbors throwing rocks on our roof," he said. "I opened the door and they were yelling: 'Get out. All the houses are coming down. Grab your kids. Get out.' "

Out in the narrow stairway that served as a thoroughfare for the neighborhood climbing nearly 700 feet from the bottom of the hill to the ridge at the top, Mr. Torres said he saw neighbors standing in the rain, but not much else.

About 40 yards away, he said, he saw a house squeezed up against a wall and a utility pole. He found a woman stuck in the house and with a friend broke a window and dragged her out. Up the hill, he found another house half filled with mud.

DESTRUCTION SEEN AT DAYLIGHT

Then he settled in with neighbors in what seemed like a sturdier house. It was not until daylight, Mr. Torres said, that he saw that two-thirds of the houses on the hillside had either been buried or swept into a ravine at the bottom of the hill.

Near the top of the hill, a slab of yellow limestone had sheered off, then plummeted downward in an inexplicable horseshoe arc, sparing a central swath of houses and palm trees where the Torres and 30 or 40 other families lived.

Standing on the ridge above the ruined community this afternoon, he pointed to stretches of what looked like crudely plowed earth where he said clusters of tin-roofed houses had once stood, jammed so close together that their eaves almost overlapped.

The curving tracks of destruction were littered with sheets of tin roofing and splintered wood siding. Near the bottom there was a pink house on its side. Off to one side, a yellow house with brown trim sat upright, but its walls yawned outward from its foundation.

Here and there, stood knobs of earth where some survivors said they huddled in the rain until daybreak, hoping against hope that the earth would remain steady.

William Echevaría, 31, and his wife, Lillian, said they were jolted awake by the sensation that their house was sinking. The cement floors cracked open, they said, and the house filled with mud up to their waists. The house tilted to one side and the entrance was partly blocked. But they managed to crawl out.

STUMBLING THROUGH MUD

All around them, Mr. Echevaría said, people were screaming. He and his wife each took one of their two infants in their arms and then with about a dozen neighbors linked hands and made their way down the hill stumbling in the dark with mud and water swirling around them.

Jaime Ortiz and his pregnant wife, Maria, heard a cement block fence topping and dashed from their house to a neighbors on the edge of the main line of destruction.

"I looked out of the neighbor's yard just a few feet away and saw all these houses rolling down the mountain," he said. "There were people inside with furniture flying around. Some of the people were being thrown out the windows and doors."

One elderly man told relief workers his house seemed to slide down the hillside before it came to a sudden, jerky halt and broke apart. Of seven people in the house, the relief workers said, only the old man and a young boy survived.

Saúl Torres, 16, awoke to find walls breaking around him. He was on the second floor of one of the few two-story houses. He clutched his mattress and bed frame with his arms and wrapped his legs around his 11-year-old brother Nilson. Together they rode safely to the ground and dragged themselves out of the wreckage. Two sisters in a ground floor bedroom between were crushed.

WHERE TO GET DISASTER FACTS

For information about casualties in the Puerto Rican landslide, the extent of the damage and where the emergency zones are, call the Office of Civil Defense in Ponce, P.R., (809) 842-2323 or the Civil Defense office in San Juan (809) 724-0124.

Similar information is also available from the Office of the Commonwealth of Puerto Rico in Washington (202) 383-1300.

To find out where to offer to help in Puerto Rico, call the Commonwealth of Puerto Rico's office in Manhattan (212) 260-3000.

For information about what aid is needed, call the American Red Cross in Ponce (809) 842-2121.

Banco Popular de Puerto Rico is organizing a relief fund—Ayuda-Help—and people who wish to contribute can send checks and money orders to the bank's main branch at 7 West 51st Street in Manhattan. The bank's phone number is (212) 399-1200.

Donations can also be sent to the American Red Cross, Puerto Rico Relief Fund, P.O. Box 37243, Washington, D.C. 20013.

□ 1655

OVERSIGHT BY THE PENSION BENEFIT GUARANTY CORPORATION OF ERISA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa [Mr. TAUKE] is recognized for 5 minutes.

Mr. TAUKE. Mr. Speaker, for several years the Committee on Education and Labor has endeavored to perfect and refine the Single Employer Pension Plan Termination Program under ERISA.

The Labor Management Subcommittee under the leadership of Chairman Clay and Ranking Minority Member Roukema, has undertaken the monumental task of exercising oversight of the Pension Benefit Guaranty Corporation's enforcement of ERISA, which has culminated in a legislative resolution of controversial aspects of plan termination enforcement.

As a member of the full Committee on Education and Labor and also the ranking minority member of the Aging Committee's Subcommittee on Retirement Income and Employment, I have taken a particular interest in the problems beneficiaries encounter when a defined pension plan terminates, especially as a result of a plant shutdown or the sale of a business.

Our free-market economy allows transactions of this nature to produce winners and losers. Unfortunately, the losers in a plant shut-down or sale are often the participants in defined benefit pension plans. ERISA was enacted in 1974 to protect pension plan participants from the loss of benefits when their pension plans terminate.

While younger employees with more flexible training may experience greater resiliency in obtaining or retaining their jobs when plants are closed or sold, the older workers may experience temporary or permanent unemployment. However, the major loss these older employees face is the security of their pension coverage and the key to their economic survival during retirement.

In Dubuque, IA, the closing and reopening of a meatpacking plant resulted in the temporary and long-term loss of jobs for my constituents. Moreover, the termination of the defined benefit pension plan which accompanied this change in ownership resulted in a reduction of benefits of some of my constituents and a loss of benefits for others. Among the losers in this incidence were those who were receiving plant shutdown benefits. The loss my constituents experienced occurred not because of management, but because PBGC adhered to a narrow interpretation of the plan document when they assumed the terminated pension plan. This has resulted in a legal dispute involving the United Food and Commercial Workers union and PBGC.

Finally, this case illustrates a trend we have observed on the Aging Committee: Pension plan terminations often rob the most vulnerable workers in an industry of adequate pension coverage.

I am optimistic that the legislation which we passed in the Education and Labor Committee, H.R. 2811, H.R. 3128 and H.R. 3500, all of which address the same issues, will help to curb abuses in the termination of single employer pension plans which leave workers in a variety of U.S. industries without adequate pension coverage and protection during retirement.

The mark-up also provided an opportunity for me to have the committee clarify the intent of existing law under ERISA, for the record, through my colloquy with Chairman Clay. Chairman Clay was kind enough to reiterate our understanding in the following correspondence.

Finally, I am working with Senator GRASSLEY toward further resolution of this matter when this legislation is considered by the Senate.

CONGRESS OF THE UNITED STATES,
October 9, 1985.

Hon. WILLIAM L. CLAY,
Chairman, Subcommittee on Labor Management, Committee on Education and Labor, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to our colloquy during mark-up of H.R. 2811, 2812, 2813 and 3128 on September 11, I would like to confirm an important clarification in present law relating to the pension plan termination insurance program under Title IV of the Employee Retirement Income Security Act of 1974 (ERISA).

Upon the termination of most tax-qualified defined benefit pension plans, the Pension Benefit Guaranty Corporation (PBGC) generally guarantees the payment of benefits provided under the terms of the plan. If a terminated plan has insufficient assets to pay guaranteed benefits, PBGC's funds are used to help pay the benefits, and the PBGC has a claim for reimbursement against the employer that maintained the plan. This program is crucial in assuring that pension plan participants actually receive the benefits that they have been promised and upon which they depend.

My constituents, formerly employed by Dubuque Packing Co., were entitled to plant closing benefits, in addition to other benefits, in the pension plan in which they participated. Dubuque Packing closed the plant at which the plan participants worked, which triggered entitlement to the plant shut-down benefit provided for in the pension plan. The plan administrator approved payment of the plant shut-down benefits and eligible participants began receiving these important benefits. This had the intended effect of plant closing benefits—it eased the burden of the plant closing.

The company then purported to terminate the pension plan. Unfortunately, the PBGC then retroactively revoked payment of the plant closing benefit. In doing so, the PBGC ignored its proper role, the intent of the statute, as well as the clear plan language, the decision of the plan administrator and past practice. In some cases, not only has the PBGC taken the position that the benefit is not payable; it has also stated that it will recoup from the participants the benefits already paid.

During September 1985, the Committee on Education and Labor took up consideration of bills designed to make significant and necessary changes in the single employer plan termination program. This committee has primary jurisdiction over that program and the Members have expertise in intricacies of ERISA and the plan termination insurance system. The committee reports that accompanied H.R. 2811 and 3128 addressed the question of the circumstances under which plant shut-down benefits are payable. Thus, the full committee consideration of the single employer plan termination program presented the opportunity to have this committee help clarify this important issue.

As the sponsor of H.R. 2811, and the chairman of the subcommittee that considered it, you were kind enough to address this question and clarify the full committee's view of the current state of the law regarding the payment of plant shutdown benefits in the Dubuque Packing situation and ones like it. Given the importance of the issue, I think it is appropriate to quote the colloquy that took place on September 11, 1985, and subsequently reiterated on September 19 during consideration of H.R. 3500 during the Committee on Education and Labor's review of the pension plan termination insurance program.

"Congressman Tauke—I wish to clarify the statement in the committee report that, the term "plant closing benefit" encompasses any benefit payable to participants and beneficiaries in connection with the partial or total closing, shutdown, or cessation of operations by an employer at a plant or facility. In situations in which a previously closed facility is reopened whether plant closing benefits are payable will depend on all of the facts and circumstances in each case, including the plan provisions.

"In the case of Dubuque Packing, a meatpacking company in Iowa, the PBGC to date has taken an unduly narrow reading of the plan document and has refused to pay cer-

tain plant shut-down benefits when the facility at which the plan participants were employed was sold to an entirely new company. The facility was closed and the new company subsequently reopened it.

"Prior to the date of termination, the board of administration of the pension plan approved the payment of the benefit payable upon a plant shut-down. Some of the employees were reemployed by the new company but at far lower wages and benefits than they were previously paid. Not only was the payment of needed benefits stopped, but the PBGC took the position that it would recoup benefits paid to rehired employees as a result of the plan administrator's determination that they were entitled to the plant shut-down benefit. Consequently, as a result of the PBGC's failure to follow the express terms of the plan document, these employees are receiving a far lower benefit than they are entitled to.

"Under ERISA, plan administrators and the PBGC must interpret the plan document in accordance with the plan language, the intent of the drafters of the plan and past practice. In this case, PBGC did not follow this clear rule.

"I want it to be clear that the committee report language I have quoted contemplates that the plant closing benefit in a situation at Dubuque Packing Co. will be paid. My constituents have been adversely affected by the PBGC's improper interpretation of the Dubuque Packing Co. plan and I want to be sure that it is understood that the committee agrees that plant shut-down benefits will be paid in such situations.

"Congressman Clay—Your comments are quite helpful. The committee report language to which you refer contemplates that plant shut-down benefits will be paid in situations like the one you have described. Plant shut-down benefits are designed to provide benefits in such situations.

"Plan participants deserve to be paid the benefits promised to them. That is what the plan termination insurance system is all about. This is what Congress intended when it passed ERISA in 1974."

I was glad that we had the opportunity to confirm these points in a colloquy during the committee's consideration of its budget reconciliation bill, to which we added provisions relating to the single employer plan termination insurance program.

I trust that this clarifies the committee's intent that plant closing benefits are payable in the Dubuque Packing situation and ones like it. I wish to thank you, as well as the entire Committee on Education and Labor, for clarifying this important matter. It is comforting to the plan participants at Dubuque Packing, as well as other pension plan participants promised closing benefits, to know that these benefits, because they are guaranteed by the plan termination insurance program, should be provided to them. Participants at Dubuque Packing and situations like Dubuque Packing should be able to rest assured that the plant shut-down benefit, which they were promised, and upon which they relied, will be paid by the PBGC.

Unless you have objections, I plan to enter this letter and your response in the CONGRESSIONAL RECORD.

Best wishes.

Sincerely,

THOMAS J. TAUKE,
Member, Committee on Education and Labor.

COMMITTEE ON EDUCATION AND LABOR, SUBCOMMITTEE ON LABOR-MANAGEMENT RELATIONS,
Washington, DC, October 9, 1985.

Hon. THOMAS J. TAUKE,
U.S. House of Representatives, Washington, DC.

DEAR MR. TAUKE: Thank you for your letter of October 9, 1985. It is indeed important that the House of Representatives Committee on Education and Labor clarified the Pension Benefit Guaranty Corporation's obligation to guarantee plant shut-down benefits in the Dubuque Packing situation and ones like it.

We were disappointed and concerned when we learned that the PBGC had ignored its obligations and has thus far refused to pay the plant shut-down benefits earned by plan participants formerly employed by Dubuque Packing. The PBGC's decision to recoup benefits already paid to the participants, pursuant to the plan administator's specific authorization, only makes matters worse.

As the committee reports accompanying H.R. 2811 and 3128 and our colloquies on September 11 and 19, 1985, make clear, the PBGC is required to guarantee the payment of plant shut-down benefits in the Dubuque Packing case and other situations like it. As I said at the markup, I appreciate the opportunity you gave the committee to clarify this important issue. I thank you for writing, and quoting our colloquy, so there is no misunderstanding as to the applicable legal requirements.

I agree that it is important that plant shut-down benefits be paid in these situations. Workers who are displaced by plant shut-downs, as occurred at Dubuque Packing, must be able to rely on the guarantee of these pension benefits by the PBGC.

Very truly yours,

WILLIAM L. CLAY,
Chairman, Subcommittee on Labor-Management Relations, Committee on Education and Labor.

STATUE OF LIBERTY-ELLIS ISLAND COMMEMORATIVE COINS GO ON SALE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognize for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, on October 18, the U.S. Mint will begin striking the Statue of Liberty-Ellis Island Commemorative coins. The sale of these coins will provide much needed funds for the continuing restoration of the Statue of Liberty and Ellis Island.

There will be three coins in all—a $5 gold piece; a silver dollar and a cupro-nickel half dollar. The $5 gold piece will commemorate the centennial of the Statue of Liberty in 1986; the silver dollar coin will be emblematic of the use of Ellis Island as a gateway for immigrants to America; and the half dollar will honor the contributions of immigrants to America.

One-half million gold coins will be minted with a surcharge of $35 per coin; 10 million silver dollars will carry a $7 per coin surcharge; and 25 million half dollars will carry a $2 per coin surcharge. The coins will be sold directly to the public by the U.S. Mint, and will be available through federally insured financial institutions, coin shops, and other outlets which wish to carry them.

All surcharges which are received by the Secretary of the Treasury from the sale of these coins will be turned over to the Statue of Liberty-Ellis Island Foundation, Inc. to be used to restore and renovate the Statue of Liberty and the facilities used for immigrants at Ellis Island, and to establish an endowment to ensure the continued upkeep and maintenance of these monuments.

Through December 31, 1985, the pre-issue prices for the coins will be:

	Half dollar	Silver dollar	$5 gold coin
Proof	$6.50	$22.50	$170
Uncirculated	5.00	20.50	160

In addition, until December 31, a three-coin proof set may be purchased for $175, and a three-coin uncirculated set may be purchased for $165. Other various sets of coins will be available at prices ranging from $28 to $375, and bulk sales at reasonable discounts will be available.

Persons may receive the pre-issue offer by writing to: Statue of Liberty Coin Program, 1730 K Street NW., Washington, DC 20220.

If all the coins are sold, the coins could raise as much as $137.5 million toward restoration of two of America's most treasured symbols of freedom.

Mr. Speaker, I urge Members in both bodies to bring the sale of these coins to the attention of their constituents so that every American can have the opportunity to share in the restoration of the Statue of Liberty and Ellis Island, and can have a piece of history to treasure as the immigrants of long ago treasured their newfound freedom in America.

TRIBUTE TO OSCAR SUTERMEISTER AFTER 32 YEARS OF GOVERNMENT SERVICE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut [Mr. MCKINNEY] is recognized for 5 minutes.

Mr. MCKINNEY. Mr. Speaker, I rise today to pay tribute to Oscar Sutermeister, a distinguished urban planner and public servant, on the occassion of his retirement for the Federal Government. Oscar Sutermeister has worked untiringly and effectively in his chosen field since receiving his Master of Regional Planning from the Harvard Graduate School of Design in 1940. Today, he is both nationally and internationally known for his knowledge of community planning and development and for his special experience and expertise in an unusually wide variety of its many subdisciplines.

Oscar Sutermeister has always excelled. He was first in his class in high school in Kansas City, MO, where he was born. As an undergraduate at Harvard University, he was a member of the U.S. intercollegiate

track team, which competed against Oxford and Cambridge. Later, as the Lionel de Jersey Harvard Scholar at Emmanuel College, Cambridge, he was a member of the British track team which competed against the United States.

While still a graduate student, Mr. Sutermeister accepted his first Federal job with the National Resources Committee. He also found time from his studies to serve on the staff of the Massachusetts State Planning Board and the New England Regional Planning Commission. During World War II, he worked for the U.S. Army Corps of Engineers and Naval Air Intelligence as an officer and as a civilan. When the war was over, he became a consultant to the National Security Resources Board and other Federal offices concerned with industrial dispersion and production in wartime.

During the 1960's, Mr. Sutermeister worked for the Public Health Service of the Department of Health, Education and Welfare as an environmental health consultant. In 1968, he was recruited by the prestigious National Commission on Urban Problems, the Douglas Commission, where he contributed his knowledge of housing and codes to its landmark study, "Building the American City." When the study was completed he became senior program officer and transportation specialist in the Department of Housing and Urban Development. Subsequently he contributed significantly to developing the Department's oversight role on urban policy. His scholarly advice on urban policy and legislative developments affecting urban affairs has since been of great assistance to HUD's Assistant Secretaries for Community Planning and Development.

We in the Capitol Region have been particularly fortunate in having Mr. Sutermeister to advise us. In addition to his Federal Government service, he has acted as a consultant to the Maryland State Planning Commission, the Baltimore Regional Planning Council, the Northern Virginia Regional Planning and Economic Development Commission, the Arlington County Planning Commission, and a number of Maryland counties and Maryland and Virginia cities as well as the District of Columbia.

As this partial account of Mr. Sutermeister's activities shows, his career has been enormously varied and fruitful. While we, along with his colleagues at HUD, regret his retirement from Federal service, we share their appreciation of his abilities and his friendship and we look forward to the continued contribution of his many talents to whatever endeavor he chooses to undertake in the future.

BRING ORDER TO PRESIDENTIAL NOMINATING PROCESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, I have introduced H.R. 3542, legislation aimed at bringing a measure of order to the present chaotic process whereby we nominate candidates for President of the United States.

The way we have elected the President of the United States has evolved over two centuries. Originally, the President was chosen in the Electoral College by electors picked by the various State legislatures. That system went out well before the Civil War. It was followed by the popular election of the electors who cast their votes for the Presidential and Vice Presidential nominees of their respective political parties.

The nominating of Presidential candidates has also undergone profound evolution. After the obvious choices among the Founding Fathers, such as Washington, Adams, and Jefferson, the emerging parties began to choose their Presidential and Vice Presidential nominees in caucuses of their Members in the Congress. This was followed by the national party convention system which was inaugurated by the supporters of Andrew Jackson.

In our own time, Presidential preference primaries and grass-roots caucuses have come to play a major role in choosing the Presidential nominees. This has contributed to the popular nomination of our Presidential candidates, corresponding with the popular election of the members of the Electoral College, who now essentially rubber stamp the results of the popular vote in the presidential election.

The chaotic element comes from the competition from the various States for the honor and business benefits of having early primaries, which extend the primary period and exhaust the candidates, and from the local caucus system which puts a premium on special interest activists who turn out for the caucuses and lay claim to bits of the candidate's political soul. The result can be the nomination of an exhausted candidate, who has been running all over the country to campaign in widely scattered primary and caucus States, and a candidate who has been forced to take positions that prevent him from offering mainstream leadership to the American people.

I think we need another major change in the way we choose our chief executive—to move from the chaotic Presidential primary and caucus system of recent years to an orderly system of regional Presidential primaries.

My legislation would reform the nominating process by dividing—divide the country into 10 regions and provide for primaries or caucuses in the States of two of the regions at a time—on one of five dates over a 4-month period.

The States could decide, with the respective national and State party committees, on whether to have a primary or a caucus or to choose their national convention delegates in some other way. But the dates of primaries and caucuses would be specified according to lot and would be limited to the five dates separated by four week periods. Candidates would be able to concentrate on the States in two areas, instead of running all over the country in a frantic effort to meet primary and caucus schedules set by competing State legislatures.

To encourage States to conduct presidential primaries, I have provided in my legislation for Federal funding of such preferential and delegate-selection primaries.

I think the result would be a more orderly and rational system of selecting the Chief Executive of the greatest country on earth. It would make the Presidential selection process less of a mad scramble and would strengthen our basic democratic institutions.

I have suggested in my legislation that the country be divided in to the following 10 regions (including States and territories choosing convention delegates) for purposes of conducting presidential primaries and caucuses:

One. Alaska, Washington, Oregon, Idaho, Montana.

Two. Hawaii, California, Nevada, Utah, Arizona, Guam.

Three. North Dakota, South Dakota, Wyoming, Nebraska, Colorado.

Four. New Mexico, Texas, Oklahoma, Arkansas, Louisiana.

Five. Minnesota, Iowa, Wisconsin, Michigan, Ohio.

Six. Kansas, Missouri, Illinois, Indiana, Kentucky.

Seven. Maine, New Hampshire, Vermont, Massachusetts, Rhode Island.

Eight. New York, Connecticut, Pennsylvania, New Jersey, Delaware.

Nine. Maryland, Virginia, West Virginia, North Carolina, South Carolina, District of Columbia.

Ten. Tennessee, Mississippi, Alabama, Georgia, Florida, Puerto Rico, Virgin Islands.

I wish to include at this point the text of H.R. 3542, the Regional Presidential Primary and Caucus Act:

A bill to provide for regional primary elections and caucuses for selection of delegates to political party presidential nominating conventions and for Federal funding of Presidential primary elections.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. SHORT TITLE. This Act may be cited as the "Regional Presidential Primary and Caucus Act of 1985."

SEC. 2. FINDINGS.—The Congress finds that—

(1) presidential preference primaries, popular election of delegates, and caucus selection of delegates have become integral parts of the process of electing the chief executive of the land;

(2) orderly regulation of the process is necessary to fulfill the Constitutional requirement for the Congress to determine the time of choosing presidential electors and the manner in which they cast their votes; and

(3) establishment of an orderly system of conducting presidential primaries and caucuses is necessary to promote the general welfare and to insure domestic tranquility.

"SEC. 3. REGIONAL PRIMARY ELECTIONS AND CAUCUSES.

(a) SELECTION OF DELEGATES TO CONVENTIONS.—The delegates to each national convention for the nomination of candidates of a political party for the offices of President

and Vice President shall be selected by primary election or by caucus, as provided by State law. Such State law shall conform to the requirements of the national political executive committee and the national nominating convention of the political party involved.

(b) TIMING OF PRIMARY ELECTIONS AND CAUCUSES.—The primary elections and caucuses referred to in subsection (a) shall be conducted—

(1) in 10 regions (comprised of entire States), with primary elections and caucuses to be conducted in 2 regions (selected by lot by the Federal Election Commission) on each day referred to in paragraph (2); and

(2) in 2 regions on the first Tuesday in February of each presidential election year and in 2 regions at the end of each of the next 4-week intervals.

The Federal Election Commission shall assure, to the greatest extent practicable, that primary elections and caucuses are not conducted in contiguous regions on the same day.

(c) ESTABLISHMENT OF REGIONS.—The regions referred to in subsection (b) are as follows:

Region 1. Alaska, Washington, Oregon, Idaho, and Montana.

Region 2. Hawaii, California, Nevada, Utah, Arizona, and Guam.

Region 3. North Dakota, South Dakota, Wyoming, Nebraska, and Colorado.

Region 4. New Mexico, Texas, Oklahoma, Arkansas, and Louisiana.

Region 5. Minnesota, Iowa, Wisconsin, Michigan, and Ohio.

Region 6. Kansas, Missouri, Illinois, Indiana, and Kentucky.

Region 7. Maine, New Hampshire, Vermont, Massachusetts, and Rhode Island.

Region 8. New York, Connecticut, Pennsylvania, New Jersey, and Delaware.

Region 9. Maryland, Virginia, West Virginia, North Carolina, South Carolina, and the District of Columbia.

Region 10. Tennessee, Mississippi, Alabama, Georgia, Florida, Puerto Rico, and the Virgin Islands.

SEC. 4. FEDERAL FUNDING OF PRESIDENTIAL PRIMARY ELECTIONS.—The cost of each presidential primary election conducted under this Act shall be paid for from the general fund of the Treasury. There are authorized to be appropriated such amounts as may be necessary to carry out the preceding sentence.

SEC. 5. REGULATIONS.—The Federal Election Commission shall prescribe such regulations as may be necessary to carry out this Act.

SEC. 6. DEFINITION.—As used in this Act, the term "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Territory of Guam and the Territory of the Virgin Islands. Any other jurisdiction entitled under the rules of a political party to delegate representation at the national presidential nominating convention of that party may conduct a presidential primary or caucus on any one of the five dates established in Section 3 (b)(2).

COMPETITIVE POSITION OF U.S. AGRICULTURE IN WORLD MARKETS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee [Mr. SUNDQUIST] is recognized for 60 minutes.

Mr. SUNDQUIST. I thank the Chair. The special orders that have been requested are to share with my colleagues the testimony that was taken at two field hearings by the Republican Task Force on International Trade.

Joining me in this special order is the distinguished gentleman from Mississippi, WEBB FRANKLIN.

Mr. Speaker, we had over 500 farmers in attendance at these two trade task force hearings to discuss the competitive position of U.S. agriculture in the world market.

The first hearing was held on August 19 in Lexington, TN; the second hearing was held on August 20, 1985, in Greenville, MS.

To share this special order, I would like to yield to the distinguished gentleman from Mississippi, WEBB FRANKLIN, to relate to our colleagues the experience and testimony of those in agriculture from his district in Mississippi.

Mr. FRANKLIN. I thank the Chair and my colleague from Tennessee for yielding, and I compliment my colleague, the chairman of the Republican Task Force on Trade, in taking this time to share with our colleagues the input that we received at two very good field hearings concerning agricultural trade.

We thought it would be important to go down into the country where the people who are directly affected by some of the decisions we make here in Washington, and listen to them and get their input to determine what they felt we as a government should do in this area so vitally important to Mississippi and to Tennessee and the other agricultural producing States.

I think it is extremely enlightening to find the things that were said by people who were directly involved in small businesses and the farmers who directly till the land, and even the larger businesses who deal with trading with our foreign countries and trying to move some of the American agricultural products that we produce so abundantly in this country.

If the gentleman and my colleagues will bear with me, I would like to go over just a few things that some of these people told us as we met, I guess over a period of about 6 hours in Mississippi, and about 4 hours in Tennessee, talking to farmers, small businessmen, and those representatives from the corporate structure that actually deal in large overseas agricultural sales.

When we went to Mississippi, we tried to have a representative group of these people, and the first witness to testify was Mr. Rex Morgan. He is the vice president of the Farmers Grain Terminal in Greenville, MS. He, along with his colleague, Mr. Bill Bullard, who is the general manager of that Farmers Grain Terminal, an organization which represents producers in four States; Mississippi, Arkansas, Louisiana, and Alabama, and is a marketing cooperative for field grains with over 2,000 individual farmer members, shared his views with us.

First of all, he told us something that I guess we already knew, that projections for this 1985 crop and the marketing year were that we would again have surpluses at the levels where we were in 1982 when we had to implement the PIK Program.

This comes only 2 years after that pretty drastic action on behalf of the agricultural community by the Secretary of Agriculture and the President of this country; and that was designed to clear those surpluses out of our storage bins in America, and move those products in world trade so that the prices would go up, and now we find ourselves right back in that position.

Mr. Morgan told us that by any standards, world production of oilseeds and grains is on the rapid increase all over the world, and that the U.S. share of that world market in all of these commodities is shrinking at an alarming rate.

Mr. Morgan told us that the factors that were working against the world market include, of course, first of all, high foreign production, combined with the inability of these producing nations to consume or store the commodities they produce, or to market them in an orderly manner. He said that there was a keen demand for these nations to export that production because of their need for foreign exchanges to allow them to pay the debts that they have accumulated.

I think that we should realize, and this is not what Mr. Morgan said, but the United States stores approximately 65 percent of the world's grain, and that the other nations who produce grain and who have an excess in production have no place to put it, so they obviously have to sell it once it is produced or it will spoil, and that leads to a process of dumping and lowering the price, and I think that that was what Mr. Morgan was trying to tell us there.

He also pointed out that the standard of living that we have in this country prevents us from being completely competitive with foreign nations such as Brazil where day labor in farm country is $2 per day.

Most of our technology, he indicated, has been programmed toward increasing production in agriculture, and he also pointed out that very little of our research and the funds that we spend for the development of agriculture have been programmed toward the cost per unit of these commodities that we do produce, and he suggested that more of our research funds be directed toward trying to reduce the cost

of production of our farmers as opposed to increasing production per se.

I think that he was right on target, and I think that the farm bill that we passed out here last week does in the research areas redirect some of those research grants and funds to the research that actually helps farmers reduce their production and it also keeps the basic research that is essential for us to move into the next generation of production.

Mr. Morgan also said that we have supplied the technology and have financed the production and infrastructure of the emerging nations of the world to allow them to become more self-sufficient in food production, and I do not think there is any doubt about that.

All we have to do, according to Mr. Morgan, is to look to the countries of Brazil and Argentina in the area of soybeans, to Thailand, Bangladesh, and Indonesia in our basic crop commodity, rice; and Saudi Arabia, India, Argentina, and Mexico with the surplus wheat that they are now producing in those countries.

Venezuela and Argentina and even now sections of Africa are self-sufficient or surplus in the feed grain areas.

Mr. Morgan indicated also in that testimony that we continue to be our own worst enemy in this country, and he indicated that the figures that were available to him, in 1984 showed that AID grants to expand foreign production totaled $341 million that our Government spent on assisting foreign countries in developing their agriculture, while the U.S. Department of Agriculture spent only $90 million to expand U.S. export markets.

Other examples of the problems in gaining or regaining a share of the world markets were pointed out very vividly. Mr. Morgan indicated that a large part of the production in the rest of the world is produced for the explicit purpose of trying to fulfill a Government-designed program of need for export. In most cases, the Government itself is the exporting entity, making it extremely difficult for individuals or individual businesses or individual corporations to compete for those world markets when foreign governments are their chief competitors in world trade.

He also indicated, as we all know in this body, those of us who are familiar with agriculture, that too many times in this country, foreign policy implications and interference have affected our ability to gain world markets in agricultural trade.

He went on to mention cargo preference and the threat of embargo, which undermined the development of a consistent, stable market and scare our trading partners and those who buy agricultural commodities to death.

Mr. Morgan went further to say that our Nation is not the most loved nation. From his experience, in dealing with foreign buyers who come to Greenville, MS on the mighty Mississippi River, where we have those commodities stored and available to sell; he said that those traders that come to him really would rather be doing business with other countries, and that we are no longer loved by all the countries of the world, and not only are we not the loved country that we used to be in trade; many of those people who come by to buy tell him that they would in fact rather do business elsewhere because of the lack of a sound economic and trade policy in this country that they can expect to do business with and do business under.

□ 1705

Most important, I think, in the testimony of Mr. Morgan was the statement that he made about the United States seeming to have no recognizable trade policy. He indicated that the economic trade policy must be elevated to a level comparable to national security, and I certainly have a tendency to agree with that statement. He pointed out that the other industrialized nations of the world have learned that a coordinated, comprehensive domestic and international economic and trade policy lies at the very core of our national survival. I think that these statements that he made ring true today, particularly as we in this House have taken up the textile import bill. I hope that we in this House have sent the message to the rest of the world that we are demanding, as an institution representing the people of this country, that our Nation do establish a trade policy that is understood, that is strong, and that, first of all, represents Americans.

I think that is what Mr. Morgan was trying to summarize when he told us what he felt was most important that we could do here in Washington in order to remedy some of the problems in agricultural trade.

I have taken a considerable amount of time, I state to the gentleman from Tennessee, summarizing just the first witness, and I do not want to dominate this. I think it would be probably best for this discussion if I was to stop now and relinquish the time back to the gentleman from Tennessee. I will be glad to participate later on, outlining some of the other testimonies.

So I yield back to the gentleman from Tennessee and again thank him for allowing me to participate with him in this special order. I will remain if the gentleman would see fit, and be perfectly happy to go over some more of this testimony.

Mr. SUNDQUIST. I thank the gentleman from Mississippi for his relating what happened in Mississippi. I hope he will stay and participate as we have another 50 minutes approximately left on our special order. I think it is important that someone who is a Member of the House Agriculture Committee, as my distinguished colleague from Mississippi is, take part in this discussion. We discovered that the expertise, when it comes to agriculture, and I guess it could be said on almost any subject, not just agriculture, the expertise is back home, it is not in Washington, DC. So it is a privilege for us tonight to relate the testimony from real experts in Mississippi and Tennessee on agriculture.

I would take this opportunity, Mr. Speaker, to relate a few minutes of testimony from Hon. Jerry Griggs. Mr. Griggs has been in farming and cotton ginning, grain elevator operation for a number of years. As a matter of fact, in 1979 he was appointed commissioner of agriculture in Tennessee. He led several trade missions to foreign countries and served as a special trade advisor on foreign trade to Governor Alexander.

In 1981 Mr. Griggs resigned that position as commissioner and joined Eddie Flynn and Bill Morris, Jr., in forming a company called MPG International. He serves as president of that company, specializing in the exportation of coal and agricultural commodities.

Former Commissioner Griggs said that Congress should, one, improve policies and processing affecting trade; two, expand U.S. trade; and, three, give higher priority to negotiations strengthening, expanding the international trading system.

This tells me that we as decisionmakers here in this body should not make the decision to build a fence around this country, but we do not need to produce less, we need to sell more.

Mr. Griggs mentioned that, of the two Cabinet-level committees that deal with trade policy, the Trade Policy Committee and the Cabinet Council on Commerce and Trade, neither one is authorized to consider the number of international economic issues of fundamental importance to trade policy effectiveness.

That includes exchange rates, credit, debt, taxation, multilateral financial institution matters that are the responsibility of other departments and committees.

He also said that a congressional committee has come to the conclusion that the current ad hoc policymaking structure fails to protection national interest and harms the United States in some basic ways.

We do not focus on national, we do not have presidential attention on trade as a national priority. We divide trade leadership and leave our Gov-

ernment without a strong trade advocate and impede the development of a coherent strategic trade policy. It causes managerial inefficiencies, requiring policy officials to devote considerable time to coordination rather than implementation of effective trade policy. We do not adequately support improvements in U.S. competitiveness.

Our policy does not adequately, according to Mr. Griggs, assess the impact of proposed regulatory and legislative actions on U.S. trade.

He suggested that we have a well-integrated policymaking process that places trade considerations on a par with other domestic policy issues and provides for prior identification of the impact of proposed regulatory and legislative changes on trade. That is going to be essential to our competitiveness. Enactment of legislation establishing a Cabinet-level Department of Trade can resolve these issues, according to Mr. Griggs. And I agree with what he said. I think too often in agriculture we find that the State Department, OMB, or DOD are making decisions that relate to other areas, particularly agriculture, on our commercial decisions. And if we had a Cabinet-level Department of Trade, I think these issues could be resolved.

So to sum up the testimony of this distinguished gentleman from Tennessee, Mr. Griggs, we must make trade a national priority, and we must enunciate a trade policy with a single voice.

I think that was testimony that had a great deal of planning and thought, and, obviously, having been in Government and then moving on, Mr. Griggs moved on to the private sector where he is in fact trading agricultural goods and selling agricultural goods internationally. I think it would behoove our colleagues to listen to that testimony.

I would be happy at this time to yield to my colleague from Mississippi.

Mr. FRANKLIN. I thank the gentleman for yielding.

I want to point out that I was extremely impressed with Commissioner Griggs' testimony in Tennessee. He seemed to have a handle on the problems from not only a Government perspective but from a perspective of being in the business of now having to deal under the rules and regulations that we set and, at the same time, to be competitive in the world. I think one of the things he was strongest in saying, as I recall it, was that we needed to elevate the issue of trade in this country at least to a Cabinet-level position and possibly designate a Cabinet officer to be responsible for trade.

He pointed out that we have several people who are trying to set trade policy for this country that many times work at cross purposes.

The State Department, through the Secretary of State, is interested in its own bailiwick, and of course we need to listen to the State Department.

The Department of Agriculture, of course, is looking to move agriculture products out of this country, and the Secretary of Agriculture is there to take care of that.

We also have Commerce, Interior, and other areas that affect trade in the United States, but the U.S. Trade Representative is not a Cabinet-level official, and, as Mr. Griggs pointed out to us very vividly, if that position was elevated to a Cabinet-level position that possibly we could have a stronger ear directly to the President of the United States in an area that all of us in this Congress are very concerned with.

I think our concern was evidenced today when this body passed the textile bill, and hopefully we sent that message to this administration, my administration, which I am proud of, that they have got to listen to us in coming up with some things to alleviate the suffering out there with people who have to rely on the export of commodities in this Nation.

If the gentleman will allow me to go through some statistics, agriculture still has a trade surplus, and I think Mr. Griggs indicated that to us in Tennessee. But we are losing that trade surplus in our balance of trade with the rest of the world rapidly. We lost $10 billion of it last year alone. We in Congress, and particularly in the House Agriculture Committee, whose bill got through this Congress almost intact, with few exceptions, tried to design a program so that we could move these commodities more readily in the world.

Mr. Griggs indicated we should do that. I just wanted to point that out.

While I do have this time, one other thing that I want to point out to my colleagues, that my Mississippi friend, Rex Morgan, told us, while we were in Mississippi, somewhat on the same subject, when we are dealing with agricultural trade, he indicated to us that we had better watch out in that our domestic markets were not at all safe. He pointed out to us, and he is a rice producer in addition to being the vice president to the farmers grain terminal, that more frequently we see imported rice appearing on the grocery shelves of the west coast supermarkets and that our competitors around the world, particularly in Thailand, can ship rough rice across the Pacific Ocean to California millers and that rice can be milled at a more competitive price than the California rice farmers can supply to that mill.

He indicated that we should try to adopt a policy that would allow us to be competitive and yet, at the same time, we could not do it in a manner that would increase the urge of business to buy the cheaper raw product to sell on the American market; that somewhat of the same problem that we just went through in this House today on the textile bill, and Mr. Griggs also pointed that out to us in Tennessee. Mr. Morgan also pointed that out to us in Mississippi. Not one witness that we listened to during the entire hearings in both places failed to indicate that we need strong provisions in our laws and particularly in the agriculture bill with mechanisms that would allow American agricultural products to reenter world markets while, at the same time, those provisions would not lower prices or price supports to farmers who are already in desperate shape.

Hopefully, this agriculture bill that we did come up with last week recognized that fact. I hope that the Secretary of Agriculture and this administration will understand that this is a strong message coming from this Congress, that it was a strong message coming from the grassroots of the people that we talked to in this trade hearing.

I think that the consensus that we got there was that we do not need a policy of less production and more protection in the farm communities by tremendous set-asides of agricultural lands that are so productive; we need to come up with better methods of selling those products that we grow so abundantly.

Mr. Griggs and Mr. Morgan both pointed that out.

I did not mean to interrupt and butt in, but I did want to say that these two witnesses do understand that we cannot increase our exports in agricultural commodities without first protecting our domestic markets so that those who, because of circumstances, can produce cheaper than we can, will be allowed access to the American markets.

I think we sent that strong message today on the textile bill.

I would hate for us to get into a position of where we would not do something about it, as Mr. Morgan said, in the commodity crop of rice.

Mr. SUNDQUIST. I thank the gentleman for his contribution and would like to ask a question.

I recall that I was impressed with all the testimony that we had both in Lexington, TN and Greenville, MS, where you had Mr. W.T. Robertson who, as I recall, is president of delta council. He touched upon rice, saying that it is a fairly new product in Mississippi, that it has great potential, but that it has been staggered by a strong dollar and less-than-aggressive trade policy, I think were his words.

Would the gentleman care to comment on that?

Mr. FRANKLIN. Yes, I would. Mr. W.T. "Billy" Robertson is the president of the delta council. It is one of the finest farm organizations that I

know of, not only because it is located right in my own backyard in the Mississippi Delta but because of some of the things that they have been instrumental in doing in helping us here in this Congress to set national policy in agriculture for the benefit of all the farmers in the Nation.

Mr. Robertson did give us a classic example in the crop commodity of rice and the impact of trade policy export on agriculture, as illustrated through the rice production in this area during recent years. Rice, as he pointed out, is a relatively new crop in Mississippi. Rice production requires almost twice the investment in land, buildings, machinery, and equipment as other crops, basically because of the leveling process that you have to go through with the land, drilling of wells to irrigate those crops, which do grow underwater. Consequently, rice producers have been suffering under the stress of attempting to build a very capital-intensive production system during the 1970's only to enter the 1980's with a deflationary economy and monetary and trade policy that has reduced their ability to compete, according to Mr. Robertson.

□ 1720

Rice production in the United States relies almost entirely upon the export potential, the domestic market is growing, but it is not growing nearly as fast as the ability of the rice produced in Mississippi, California, Arkansas, and Louisiana to increase their production. That potential has been staggered by the strong dollar and, as he said, less than an aggressive trade policy.

The decline in the U.S. exports cannot be traced back to an inefficiency or a waste on the part of the American farms, but Mr. Robertson said that you can trace that decline to our Government's inability to meet the challenge of our foreign competitors.

He indicated that foreign countries design government-to-government contracts as trading instruments to preempt the export of U.S. commodities in our traditional markets. Continuing interference in the U.S. agricultural trade by U.S. defense policy, national security interests and monetary policy have counterbalanced the advantages that the U.S. agricultural interests have always enjoyed due to a superiority of productive efficiency and capability.

Mr. Robertson went further to say that he recognized that the problems of agricultural trade were very complex and that they must be studied from every perspective. However, the serious financial condition of the farm sector, he indicated, cannot be resolved simply by the passage of farm legislation which addresses domestic commodity prices only and programs only, and he stressed the significance of that farm legislation that he was advocating for us to pass at the time. It contains strong export incentives to move American products back into world trade.

I hope that we have given him the kind of bill that he wanted, and I hope that those discretionary things that are contained in that bill that the Secretary of Agriculture and the administration now has, to try to get back into the world markets and be more competitive, will be implemented and that we will regain some of those markets.

Mr. Robertson continued to indicate that low commodity prices over a long period of time can only attest to our Government's lack of resolve in the area of competitive world agriculture. In our Government's efforts to establish strong diplomatic and defense related alliances with foreign nations, Mr. Robertson says, we have overlooked the domestic agricultural industry which has contributed to the strength we have always enjoyed at the world bargaining table. I think he is absolutely correct.

He indicated that his organization, delta council, would like to request that Congress initiate steps to make our foreign policy serve as the standard by which other foreign competitors would compare the degree of their success. Unless the United States makes a commitment to stake out a firm trading position that reacts positively to other economic forces, such as monetary and fiscal policy, Mr. Robertson said, it is apparent that no domestic farm program will succeed in sustaining agriculture as it exists in this country today.

I completely agree with that statement and the policy decision that delta council, that farm organization in my area, has proposed.

Mr. SUNDQUIST. I thank the gentleman for sharing Mr. Robertson's testimony, and I think it is our strong feeling that agriculture can be a competitive industry.

I would like to turn, if we could, for a few moments—we have maybe 25 minutes left—to Mr. Sam Hollis, who is from Memphis, TN, and is the 1985 president of the National Cotton Council. I know the gentleman from Mississippi raises lots of excellent cotton, and if we could spend maybe 5 or 10 minutes in that area I think it might be appropriate. Mr. Hollis is a Memphis warehouseman and is president of Southwide Inc., and its subsidiary, Federal Warehouse and Compress Co.

He pointed out two changes that have had such an impact on the world's cotton market. One, China has increased its cotton production by 176 percent in the last 5 years. They have become the No. 2 source of U.S. textile imports. They have piled up 18 million bales of cotton stocks, and they are depressing the world prices and causing uncertainty.

China's move from being the largest importer of cotton just 5 years ago—and I know the gentleman from Mississippi does not need to be reminded of that.

Mr. FRANKLIN. Will the gentleman yield on that one point?

Mr. SUNDQUIST. Absolutely.

Mr. FRANKLIN. I thank the gentleman for yielding.

I would like for my colleagues to understand in this area of cotton the statistics that my colleague from Tennessee just gave, which was related to us by the president of the cotton council, Sam Hollis. China this year is carrying over more cotton in surplus than we in the United States of America will produce this year. I wanted to point that out to my colleagues. And that is a startling fact, particularly when we look back just 3 years ago, that that vast country, with more people in it than any other country in the world, was buying U.S. cotton. China this year will carry over more surplus cotton than we will produce in the United States of America.

Mr. SUNDQUIST. That is a very important point, and I thank the gentleman from Mississippi for making it. They have moved from being the largest importer of cotton 5 years ago to the point today they are the third largest exporter. And the gentleman from Mississippi has described the huge surplus. Interestingly enough, who helped China become an effective cotton grower? We had some other testimony it was the United States.

The other major change in cotton's economic environment is the dollar exchange rate. The 60 percent value increase of the dollar has stifled our ability to export raw cotton and has stimulated an avalanche of textile imports.

Hopefully, the message that we send today from the House of Representatives to the world, to this administration, but to the world, is that the United States of America and the Congress of the United States of America is not going to stand back and let us be trampled over. We want fair trade. We want to compete in a fair world market. Unfortunately, that is not true today, and if we had enforcement of trade policy we would not need a textile bill that we passed through this body today.

The recent surge of foreign textile and apparel imports, a current rate of 29 percent, further contributes to destroying a viable U.S. cotton industry when you consider that 4 out of 5 bale equivalence of cotton is imported.

The world price reduction of cotton and the loss of market share resulted in a total lost revenue for cotton farmers of $900 million in 1983 alone. The only recourse, according to Mr. Hollis,

is for the Congress to bring down the value of the dollar—and, hopefully, we are going to start on that road tomorrow with the Deficit Reduction Act—and limit the imports of foreign textiles in the country.

The National Cotton Council, according to Mr. Hollis, endorses the passage of the Textile and Apparel Trade Enforcement Act that we passed today.

I would be honored to yield to the gentleman from Mississippi if he would care to make any further comments on cotton.

Mr. FRANKLIN. I thank the gentleman for yielding, and I certainly would, because in the district that I represent, the Second Congressional District of Mississippi, cotton is still king. It is our major agricultural commodity, and in the past it has been very good to us. However, I am afraid that if we do not make some corrections in the programs and get stronger in the way we try to enforce some of our trading policies with other countries that cotton no longer will be king in my district or anywhere else in the United States and we will have to relinquish our past position as leaders in the textile industry to some other nations.

I would like to point out, when we talk about agricultural trade, and particularly trade with China, that huge country, that China has established a policy that encourages their peasant farmers to produce cotton, and I would like for my colleagues to realize that they do not have large farms. The Chinese are allowed to plant their individual sections of land. I believe the average is about eight-tenths of 1 acre that each Chinese family is allocated to raise cotton on. Through that policy, where they are given an incentive to meet a quota and then able to sell that quota and put that money in their pocket, opening the door, so to speak, to foreign trade in that country has encouraged this type of production, and we, to some extent, helped it by the supplying of seed technology and other information from our Government agencies to that country. Maybe we should do that, but the voice that we heard in Mississippi, from all of those that we talked to, indicated to us that we should stop spending U.S. taxpayer dollars in assisting other countries of this world in being able to compete with us in agriculture. That message was heard loud and clear over and over again from everyone we talked to.

Another thing I want to point out to my colleagues and the gentleman from Tennessee is that I was very fortunate to be able to go on a task force trade mission with the Foreign Affairs Committee last year to the country of China, and through the request that I made to Sam Hollis at the Cotton Council it was arranged for me to meet with the people in the Chinese Government who are responsibile for the buying and selling of cotton. That is an organization called Chinatex. And these gentleman were very kind to me and asked me to go out to dinner with them. Through the dinner we were having to converse through the interpreter. The conversation got around to the 1985 farm bill. The head of Chinatex asked me about subsection (h) of title VII of paragraph (3) of H.R. 2100, in Peking, China. And, my colleagues, don't you think for a minute that the rest of the world is not ready, willing, and able to compete with us and knows exactly what we do in this body and how it affects them. I was so stunned that I was afraid that I was coming up against an adversary in the People's Republic of China who probably knew more about the 1985 farm bill than I did as a member of the Agriculture Committee, and he had it memorized line and verse and recited it back to me, and his major concern with that farm bill was what provisions we were going to have to increase our ability to be competitive in world markets. And when I started discussing with him the theories of marketing loan, where we would give our producers the money and then allow our price to go down so we could be competitive, he turned and he looked at his compatriot who was there with him, and he said, "I hope they don't do that, because we are going to have to get another job if they do."

I think that one conversation clearly indicates to all of us that we have got to become tougher in the way we set our policies to represent American interests and to see that the agricultural producers of this country are given a fairer shake so that those products can be competitive on world markets, when we particularly realize that in the area of cotton the major competitor to the American cotton farmer is the Chinese Government, the People's Republic of China, which has more people in it than any other country in the world.

Now, I dare say, my friends and colleagues, it is going to be mighty difficult for my Mississippi cotton farmer or the California cotton farmer to compete in world trade with the largest country in the world and that country's government. I think that we have got to establish our trading policy so that that American farmer can at least be put on an equal playing field and have the assistance and have the support and backing of the U.S. Government to be right there with him when he is fighting on the battlefield out there of world trade.

I thank the gentleman again for yielding.

Mr. SUNDQUIST. I thank the gentleman from Mississippi. The gentleman makes an excellent point. Our farmers are not asking for anything. They are asking that they be allowed to be competitive. We can compete with anybody in the world. We in agriculture do a better job of production than anything else we do in the United States. The farmer has less to do with the problems that the farmer has than perhaps any other industry.

There were two other statements I would like to briefly summarize.

Mr. John L. Roberts grows cattle and hogs. In fact, he is the owner and operator of a 950-acre farm in Tennessee. He described the current situation of the beef industry, that the number of cattle is down as well as the price of beef. And that goes against the common dictates of supply and demand. It does not seem to be working in the livestock industry. As I recall, he made the point that we, as this Federal Government, are helping assist in some of the countries in Central and South America to build transportation mechanisms, I think train tracks, to market their beef cattle, to be shipped into the United States to compete against us.

□ 1735

For every 1 pound of export meat products, that we export from the United States, we import 10 pounds. There is somethng wrong with that ratio.

Mr. John Anderson is a grain farmer from Bolivar, TN, he grows soybeans, wheat, and white corn. He is the owner-operator of Anderson Grain Farms. He has been very active in agricultural organizations and he has spent a term as president of the Soybean Promotion Board. He said that in the 1970's the American farmer had 92 percent of the soybean export market. Now we have 70 percent.

We have become a debtor nation for the first time since 1914, and I think the agricultural reductions in exports have had great impact on that. He said it is time for U.S. export expansion and to make it a national priority and elevate export policy to a level of foreign policy. It is what we discussed earlier. The farmers do not want domestic content legislation; it is going to harm them. The farmers do not want a 25-percent import duty on goods in this United States, because others will retaliate; they have been hurt enough. But we have to have this fairplaying field. I am confident whether it is agriculture or anything else, we can compete if we do have the level playing field.

Mr. Anderson said Congress should make export expansion a national priority. All Government agencies should be required to review all current and proposed laws and regulations to determine their impact on export growth. We should continue the efforts to reduce the Federal deficit be-

cause it does have impact on our dollar.

Restrict the Agency for International Development and other Government agencies from providing grants and technical assistance directly, and restrict U.S. representatives for the World Bank and other multinational financial institutions to vote and work against the approval of loans or grants to nations to expand the production or export of commodities exported by the United States that are in surplus in the world. That is what I described a few minutes ago.

Then authorize the USDA to use export incentive programs broadly to permit all potential customers access to soybeans and soybean products.

Would the gentleman from Mississippi care to comment on what Mr. ANDERSON said or Mr. ROBERTS in light of the agriculture bill that was passed this week in the House?

I yield to the gentleman for his response.

Mr. FRANKLIN. Yes, I would. I think that they reemphasized what almost every witness told us. I have two more witnesses that I would like to mention here. They are Mr. J.L. Slade, who is with the Farm Bureau in my great State of Mississippi who testified, and Mr. L.A. Davidson, my good friend from Indianola, MS, who is the local coordinator for the American Agriculture Movement who appeared before that hearing.

Basically they had all the same thing to say. With the exception of Mr. Davidson and what his recommendations were, about what kind of farm bill we should come up with, without exception each one of these witnesses reemphasized the fact that we as a Nation are dead in the water unless we can regain some of our markets overseas for moving our agricultural products. I think that that is what the two witnesses that you mentioned told us in Tennessee, and that is what all of the witnesses told us, both in Tennessee and in Mississippi.

Since we are running out of time.

Mr. SUNDQUIST. We have 17 minutes left, so we have some time.

Mr. FRANKLIN. OK. I will not take that all, but the last witness that testified before this trade task force hearing in Mississippi probably wrapped it up in two sentences what we have been talking about for almost an hour here on this House floor. That witness was Mr. Seymour Johnson. Seymour is a past president of the American Soybean Association. He is a businessman involved in agribusiness and he is also a farmer producing catfish, cotton, soybeans, and rice in the Mississippi Delta, and he was one of the individuals that was considered as a prime candidate for Secretary of Agriculture.

As I said, he summed it up pretty vividly when he said we should adopt a policy which says, and I quote:

> We hereby declare to the world that we intend to maintain our historical market share in the commodities we in the United States grow. We are going to maintain and preserve them, and we are willing to pay to get it done regardless of the cost.

Now if we would proclaim those two sentences to the rest of this world concerning our desire, our need, and our ability to get back some of these agricultural markets that we have lost, and if we would do it as emphatically as it was stated by Mr. Johnson in Mississippi, then I think we would send a message to the rest of the world that we are serious about regaining those markets, and I think that is what those farmers and businessmen in Mississippi and Tennessee were trying to tell us to do. That is what I hope that this Congress will take the lead in, and I think we have taken a giant step in that direction today in passing the textile bill and declaring that we are going to be firmly behind American products and we are going to demand that those products reenter world trade and that the U.S. Government is going to stand behind that policy.

Again, I want to comment that the leadership of the gentleman from Tennessee on this Republican trade task force has been outstanding and exemplary over the last year, and I thank you for listening to me when I came to you and asked you if you would bring that task force to my district to listen to my farmers, and I commend you for your leadership, and I thank you for taking time on this most important subject, and I thank you for allowing me to participate with you in this special order.

Mr. SUNDQUIST. I thank the gentleman from Mississippi, an important member of the House Agriculture Committee. You made both meetings more successful and more educational for this Member by your presence and the questions you asked and the kind of people you had present at the task force hearing in Mississippi.

It is amazing that it did not make any difference whether we were in Mississippi or Tennessee, the feelings and the conclusions were quite similar. I would like to mention Mr. Joe Gaines, who is the director of marketing for the Tennessee Department of Agriculture. He pointed out and I suspect the same thing is true in Mississippi: Agriculture in Tennessee is a big business. About $2 billion a year. As a matter of fact, 25 percent of the jobs in Tennessee, are either directly or indirectly related to farming.

Then Dr. Ray Humberg who is a professor and a leader of the Agriculture and Economic Resource Development Section of the Agricultural Extension Service, he sort of summed things up when he said:

> We should continue to strive for open markets and reduce barriers to our exports. Trade considerations deserve our best thoughts, experience and wisdom to assure that government aids and facilitates rather than hinders.

Last, the gentleman from Mississippi mentioned the Mississippi Farm Bureau. We were delighted to have Mr. Dan Wheeler testify who was assistant to the president of the Tennessee Farm Bureau. His testimony was right on target. He said we have had an almost apologetic attitude for too long. In many instances, we have had a foreign trade policy with some of the countries around the world that amounts to no more than foreign aid. He said there is lots of room for the Government to help farmers out by creating a level playing field for everyone involved.

So agricultural decisions are being made every day by the State Department, by OMB and DOD. It is critical that as we make those decisions that more of those decisions be made by the Department of Agriculture and by our U.S. Trade Representative.

The distinguished gentleman from Mississippi who joined us in the last few minutes, between the two of us we had almost 500 farmers in attendance in 2 days. They were farmers and small businessmen. They brought in the testimony that we are going to include in the RECORD from these experts, there are overwheming consensus that we must reduce the budget deficit to bring interest rates down, and we are going to address that tomorrow. Because since 1981 we have lost almost one-third of our world market share for agricultural products. In the last 4 years, U.S. agricultural exports have dropped from $44 billion to $33 billion per year. That is an $11 billion loss in business for the farmers of this country.

For many years we have relied on American surplus in agricultural exports to help offset the imbalance in the deficit. It is very obvious that we have eroded one of our most reliable sources for stability in international trade. In 1981 we had a $27 billion surplus in agriculture. Today, we only have a $16 billion surplus in agriculture. Our agricultural trade balance has deteriorated to half its size in only 4 years.

The farmers and small businesspeople we all heard from all agree that we must improve commodity export programs. We must ease credit for farmers and importers. We must tie price supports to the market. Negotiate better international trade agreements. Foremost, reduce the Federal deficit in order to restore balance to the American position in global markets.

It is crucial that the U.S. reevaluate our position and priorities in the World Bank and the International Monetary Fund.

□ 1745

We cannot afford to negotiate away economic advantage and fund foreign competition.

Too many times the United States has forsaken the commercial interests of our own business people to accomplish foreign policy objectives. Our own Agency for International Development gave away United States technology for soybean farming to Brazil, and now Brazil, using subsidized exports, has taken over markets that the United States once occupied.

We realize we are in a global market, but it is time we start thinking of our farmers and our people at home.

I thank the Speaker for the time he allowed for this very important testimony, and I yield the balance of my time.

HUGE DEFICIT GREATLY ALARMS AMERICAN PEOPLE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. ECKERT] is recognized for 20 minutes.

Mr. ECKERT of New York. Mr. Speaker, the huge Federal budget deficit—and the failure to date of the Congress and the President to make the tough decisions necessary to preclude a future of persistently large deficits—greatly alarms the American people.

The American people understand that unless Congress and the President face the deficit head on and make the necessary disciplined decisions to bring the deficit under effective control, the day is not long off when we shall have to pay the unpleasant costs mandated by Washington's prolonged indecision—higher interest rates, diminished capital for investment and economic growth, destructive decline in foreign trade, and the rekindling of the flames of inflation.

Suddenly sweeping the Congress are proposals to set into law certain maximum deficit target levels which, if not adhered to by the Congress, could be imposed by the President simply by ordering cuts that could uniformly impact upon all non-Social Security programs—the good and the bad, the needed and the unneeded, the well run and the poorly run.

The only rationale for such proposals is a conclusion that the Congress of the United States is incapable of making judgments about the relative worth of different Federal programs. Such a conclusion finds the Congress indicting itself as incapable of doing its job.

Congress should not abrogate its responsibility. Rather, Congress should face up to its responsibility. Why admonish ourselves to do the right thing—later? Why not do the right thing—now?

Congress is like the person who makes solemn resolutions every New Year's—and always breaks them. The American people are going to judge us by what we do—not by what we say we intend to do. Having just weeks ago rejected most of the major cost-cutting proposals, having cut dimes when we should have been cutting dollars, Congress is unconvincing when it now says it resolves to truly cut spending—later. We sound like a person who is saying that his New Year's resolution is to give up his bad habit—but not right now, maybe in a couple years. Indeed, we sound like a person who is saying he will give up his bad habit by having someone else do it for him.

I disassociate myself from those Members of Congress who would claim that the responsibility for our soaring deficit can be placed mainly at the feet of the President of the United States. The truth is that it is Congress that is primarily to blame for the deficit. The truth is that the President has shown a far greater willingness to make truly significant cuts in Federal spending than have those carping critics who refuse to support reducing the size and scope of the Federal Government while simultaneously professing surprise at the consequence of their actions and denying blame for it.

Critical though I am of an approach that would have Congress abrogate its decisionmaking responsibility and substitute fixed formula for thoughtful judgment, if it comes down to that versus the status quo approach, then, great though the defects be, that is better than prolonging the current course, and, reluctantly, and with profound regret for what it says of the Congress, I would support it.

But why should we conclude that the decision must be between making but minimal cuts and surrendering control over which cuts to make? There is a better approach. And that approach is simply to start now, not later; to accept responsibility, not shrink from it; to face up to hard choices, not run from them.

The fact that we passed a budget resolution that calls for $973 billion in expenditures for fiscal year 1986 does not compel Congress to spend every one of those billions. Just because over the years Congress has shown a propensity to exceed its own budget does not mean that Congress cannot for a change spend less than it has resolved to spend. No law prohibits us from coming in under budget. It may not be a tradition here, but it's not a prohibition. The very fact that Congress is considering a drastic new approach is a public admission that we fell far short when we adopted the budget resolution August 1.

Does anyone believe—does anyone expect the American people to believe—that what we refuse to do now we will be willing to do later?

Is there anyone who does not see that the real measure of congressional resolve to significantly reduce the deficit is our willingness—or refusal—to return to the cost-cutting proposals the President submitted earlier this year and reconsider them?

It is fun to fantasize about what we hope to do. It is far less pleasant to face up to the reality of what we are doing.

Consider, for example, taxpayer subsidies for Amtrak. The President asked Congress to terminate that subsidy this year. He argued, rightly, that it should be relatively easy to end a subsidy program which was created 14 years ago as a 2-year emergency program and should have, therefore, ended 12 years ago. That subsidy has cost taxpayers nearly $12 billion to date and will, if not checked, cost taxpayers an additional $8 billion over the next 10 years. A Congress truly intent on cutting the deficit would have done what Congress should have done 12 years ago—terminated the three-quarters of a billion dollars a year Amtrak subsidy. But this Congress refused to end the costly subsidy and instead passed a budget resolution that only cut Amtrak 15 percent—and then 6 weeks later Congress reneged on its resolution and passed an appropriations measure which immediately restored some of the cut and which included a loophole that may lead to restoration of all of the cut.

Mr. Speaker, a Congress that cannot make stick for more than 6 weeks a minor cut in a subsidy that was slated for extinction 12 years ago strains credibility when it now asks the American people to take it on faith that we will make the necessary cuts the year after next and 6 years from now.

Pretending that we are going to make cuts later is fun and easy. But actions speak louder—and look how Congress is acting now, this very week.

Look at the farm bill. The budget resolution we passed 10 weeks ago committed Congress to cutting farm program expenditures by $8 billion over the next 3 fiscal years. But the farm bill we passed Tuesday does no such thing and everyone knows it. The bill schedules certain payments due in 1 fiscal year to be made, instead, on the first day of the following fiscal year—a neat little 1-day push back that lets us pretend that a liability of a couple billion dollars has miraculously vanished. And we have converted certain agricultural loans from direct loans, which would have to be included in the budget, into guaranteed loans, which do not have to be included in the budget, despite the fact that the fiscal implications of a default on either direct or guaranteed loans are the same—another neat little gimmick that allows us to pretend that

a liability of a few more billion dollars has also miraculously vanished.

Close our eyes to a couple billion here. Close our eyes to a few billion there. And bury our heads, too. Admonish ourselves to make cuts of a magnitude that surely would require elimination of some entire programs and truly deep cuts in other programs. And do it when? Maybe next year. Maybe a few years from now.

But this year? This year, for example, the President asked Congress to terminate the Job Corps, the least cost-effective job training program in the budget, a program whose 40,500 slots cost the American taxpayer $15,200 each, an amount equal to the cost of sending a student to Harvard and three times more costly than the annual cost of education at the average 4-year public university, a program that cost taxpayers three times as much per participant and five times as much per job placement as an alternative Federal program, the Job Training and Partnership Program.

And this Congress that says it will make cuts next year and a few years from now, what did this Congress do? Eliminate the wasteful Job Corps program that is costing taxpayers more than a half-billion dollars a year? No way. Would Congress at least freeze spending for the program? No way. The House voted to increase Job Corps spending by $23 million.

This year, the President asked Congress to terminate the Small Business Administration's subsidized loan program, a costly bureaucracy that passes out the benefit of subsidized credit to a tiny percentage of business operators—only two-tenths of 1 percent—who have the political savvy to figure out how to get the American taxpayer to give them a nice little advantage over their business competitors. We like to pretend this helps launch new businesses and creates new jobs. We like to ignore the fact that a huge share of the people who get SBA taxpayer subsidized loans are repeat customers. And this Congress that now says it will make real cuts next year and a few years from now, what did this Congress do? Eliminate the costly and wasteful subsidized loans? No way. In fact, on July 17, the House voted to continue the direct loan program to the tune of $121 million for next year—a $121 million contribution to the deficit that could have, and should have, been eliminated.

Amtrak, the Job Corps, and Small Business Administration subsidized loans are but three examples of programs the President asked Congress to terminate this year, and the reasons given in support of those terminations are typical of reasons given in support of elimination of other Federal programs.

The President also asked Congress to terminate the health professions training subsidies on the argument that the problem it was created to deal with no longer exists. It was created in the 1960's because in virtually every health profession discipline there was a shortage of trained personnel. But, in the 1980's, the reverse is true. Yet Congress refused to terminate the program. Congress just could not summon the will to eliminate a program that it could have, and should have, said is no longer needed precisely because it has fulfilled its mission. We could easily have lifted this quarter-billion dollars a year from the deficit. We chose not to.

The President also asked Congress to terminate the Appalachian Regional Commission on the argument that this temporary program created 20 years ago which has cost taxpayers $5 billion serves no national economic purpose and instead simply caters to local and regional political interests. But Congress refused. And the temporary program now enters its 21st year, adding more billions to the deficit.

The President also asked Congress to terminate urban development action grants on the argument that such Federal economic development subsidies only reshuffle the national economic pie and do not in any way expand it and that it makes little sense to subsidize wealthy corporations like General Motors, Sherwin-Williams, and the Hyatt Hotel Corp. We could cut the deficit by nearly a half-billion dollars a year here. We chose not to.

And so it was with each of the more than a dozen major Federal programs that the President asked Congress to eliminate. Not one of them was abolished. Not one. Some may point out that the President asked Congress to terminate Federal revenue sharing at the end of fiscal year 1986 and note that the congressional budget resolution does do that—but the truth is that Federal revenue sharing was scheduled to expire then anyhow.

Not only did the Congress refuse to eliminate a single, major Federal program, it also steadfastly refused to make spending reductions approaching anywhere near the President's recommendations in almost every category of the Federal budget.

Blatantly wasteful, minor Federal programs roll on because a Congress that says trust us to make real cuts next year and a few years from now refuses to act now.

A good example of one of the many minor programs we should have sharply cut but didn't is the Legal Services Corporation. The President this year asked Congress to sharply cut back this public corporation of taxpayer-financed lawyers and restrict it to its original purpose of providing legal assistance for the poor. But despite continuing and mounting criticism of widespread abuse, mismanagement, and waste, despite LSC's disdain for the law as evidenced by its improperly using taxpayer money to advance partisan, political causes and to finance public relations campaigns designed to lobby for retention of unnecessary federally financed jobs, a Congress that now promises to make tough cuts later, a Congress that has permitted this wasteful public corporation to grow tenfold in only 10 years, wasn't able to cut this pack of arrogant, irresponsible lawyers down to size and instead voted to grant them more than $300 million a year, senselessly adding more millions to the deficit.

The list goes on and on. Major and minor programs that could have, and should have, been eliminated were not. Other programs, major and minor, that could have, and should have, been cut were not.

The spending goes on and on. And so does the deficit. We wait in vain for effective action from Congress. But on the horizon all we see is a promise that Congress will act later. Later. Later is too late. Later gives Congress too much time to find the sand where it can bury its head.

Mr. Speaker, if Congress is serious about cutting the deficit, the way to prove we are serious is to proceed to sharply cut the deficit. Not talk about cutting it later. Cut it sharply now.

Not 1 of the 13 appropriations bills to implement the budget resolution has passed both Houses of the Congress. Nothing stands in the way of our simply altering the appropriations bills to make the deep cuts we claim we would be willing to make later. We could, if we wished, make the hard choices right now—over the next several weeks. All we have to do is resurrect the issues and vote now to make the cuts we claim we will be willing to make later.

It isn't enough to stand up and brag that we are going to be brave in future budget battles. We need to march to the frontlines and get into the thick of the fight right now.

□ 1755

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. McDADE] is recognized for 5 minutes.

Mr. McDADE. Mr. Speaker, I was unavoidably absent on official business pertaining to the federally declared disaster in my district when final passage of the farm bill occurred. Had I been present, I would have voted "aye."

REFORMING TELEVISION MUSIC COPYRIGHT LAW

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from Virginia [Mr. BOUCHER] is recognized for 10 minutes.

Mr. BOUCHER. Mr. Speaker, this week I have introduced, along with our colleague, the gentleman from Illinois [Mr. HYDE], copyright reform legislation to remedy an inequity which has for many years benefited a small group of copyright owners at the expense of local broadcasters and the public interest.

The copyright law is unusual among our Nation's economic laws because it is one of the responsibilities specifically entrusted to the Congress by the Constitution. In other words, our responsibility as Members of Congress to regulate and balance the rights of owners and users of intellectual property is something which has never been in question from the founding days of the Republic. It is a responsibility which arose through custom and judicial interpretation—as is the case with so many of Congress' other economic powers.

As a Member of Congress from the State of Virginia, I can't help being constantly reminded of the enduring wisdom of the Founding Fathers and the drafters of our Constitution. Some of the leading architects of that document were citizens of my State. As I commute between Washington and my district, I literally travel the highways and byways used by men such as Washington, Jefferson, Madison, and Blair.

When those men gathered in Philadelphia nearly 200 years ago, they entrusted all future Congresses with the responsibility to "promote the progress of science and the useful arts, by securing for limited times to Authors and Inventors the exclusive rights to their respective writings and discoveries."

Those few words from our constitution sum up the guiding principles behind the bill which we have introduced. The purpose of copyright law is to promote, not retard, progress in the arts. It is very clear that the existing copyright law does not strike the balance that the writers of the Constitution had in mind as it is applied to theme and background music which is used in syndicated television programs. There is very little about the present system which either encourages authors or promotes progress in creativity.

Since the early days of television, music copyright owners have licensed all rights to broadcast their compositions through blanket licenses issued by performing rights societies. Currently, two societies, ASCAP and BMI, issue licenses covering more than 95 percent of all copyrighted compositions.

The practice of blanket licensing has its roots in the time when almost all television programs were broadcast live. Since the music accompanying these early live performances was not "synchronized" with the visual aspects of the program in advance, it was impossible to license songs on an individual, title-by-title, basis. A station in those days could never know for sure before a broadcast which songs would be played. Since these live programs were actually produced by the stations themselves, the individual broadcasters took responsibility for securing, through a blanket license, the right to "perform" all music which they used. Because the market for licensing music copyrights in the late 1940's and early 1950's was controlled by only two organizations, ASCAP and BMI, uniform price structures for TV performance rights quickly became established throughout the industry.

In the nearly 40 years since these marketing systems were developed, television technology has changed dramatically. Few entertainment programs broadcast locally are live. Most are "syndicated" programs. That is, they are prerecorded reruns, movies, or series which are produced in Hollywood by major studios and sold "in the can" for broadcast locally by individual television stations. Today, when a local station buys the right to broadcast a syndicated program, it receives all the performance copyrights embodied in that program except one—the right to broadcast the music on the soundtrack. The station must obtain permission to use the music separately, through a blanket license from ASCAP or BMI. The effect of this procedure is to require that the station buy the "blanket" right to use all 3 million of ASCAP's compositions or all 1 million of BMI's works, even though the actual soundtrack of the program involved may contain no more than one or two copyrighted songs, and even though it should be possible for the producers of these prerecorded programs to acquire and then convey the performance rights for these few compositions at the same time that the rights in the works are acquired and conveyed.

When television stations seek to clear the right to broadcast the music on a prerecorded soundtrack, they have almost no bargaining power as the term is ordinarily understood in the marketplace. They have already purchased broadcast rights in a program, but those rights are virtually worthless without the right to broadcast its soundtrack. By the time negotiations for the use of the music take place, ASCAP and BMI have the broadcaster over a barrel. Local broadcasters confront two monopolistic giants which offer them "take it or leave it" terms. The only economically feasible means for local broadcasters to obtain music performance rights in prerecorded audiovisual works is to pay a percentage of total station revenue to ASCAP, BMI, and SESAC in return for a blanket license.

Television stations are treated differently from movie theaters, even though they use the same or similar products. As a result of a court decision in a lawsuit brought against ASCAP by theater owners many years ago, the performing rights societies are not permitted to use the blanket license for movie theaters. Instead, the studios which produce the films obtain all of the rights needed to exhibit the film, and the rental fee the theaters pay to the studios covers all of those rights. There is no logical reason why different rules should apply to movies shown in a theater and movies or other prerecorded programming shown on television.

The current system is inconsistent with the fundamental purpose of the copyright laws and fails to advance the public interest. It diverts into the hands of a few music writing companies funds which otherwise could be used to enhance the creative efforts of local broadcasters—their local news, public affairs, and community-oriented programming.

It appears that the only way to change this state of affairs is through exercising Congress' historic right to restore balance to the copyright laws.

The courts have interpreted the law as leaving them powerless to act. Efforts by broadcasters to negotiate a marketplace remedy have proven fruitless because of the enormous disparity in bargaining power between copyright owners who are concentrated in a few organizations on the one hand and the over 700 individual buyers on the other.

Our bill will mandate that all copyrights, including those in music on a soundtrack, be licensed at the same time a syndicated audiovisual program is marketed to television stations. This requirement will bring music copyright into the real marketplace at last. The current system of charging stations a percentage of revenue will end.

The result will be that music will take on value at the time broadcast rights to a program are purchased. It will no longer be an irrelevant factor to be paid for later by a flat levy.

Passage of the bill will improve the value of good music—it will demand a higher price—bad music will receive less.

With this kind of marketplace incentive, perhaps true creativity will be rewarded and Congress' constitutional mandate to promote progress in the arts will be realized. A copy of the legislation follows:

H.R. 3521

A bill to amend title 17, United States Code, to prohibit the conveyance of the right to perform publicly syndicated television programs without conveying the right to perform accompanying music

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Title 17, United States Code, is amended by redesignating sections 113 through 118 as sections 114 through 119, respectively, and by inserting after section 112 the following new section:

"§ 113. Limitations on exclusive rights: use of musical works in syndicated televison programs

"(a) Notwithstanding the provisions of section 106, no owner, assignee, or licensee of a copyrighted audiovisual work may convey the right to perform publicly such work by non-network commerical television broadcast without simultaneously conveying the right to perform in synchronization any copyrighted music which accompanies such audiovisual work.

"(b) Notwithstanding section 101 of this title, for purposes of this section, the term 'audiovisual work' means any motion picture, prerecorded television program, or commerical advertisement."

SEC. 2. Section 106 of title 17, United States Code, is amended by striking out "118" and inserting in lieu thereof "119".

SEC. 3. The amendments made by this Act shall take effect on the date of enactment of this Act, except that the amendment made by section 1 shall not affect a public performance occurring during the one-year period beginning on the date of enactment of this Act pursuant to a contract executed before such date of enactment.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MCCANDLESS) to revise and extend their remarks and include extraneous material:)

Mr. TAUKE, for 5 minutes, today.

Mr. RITTER, for 60 minutes, on October 22.

Mrs. BENTLEY, for 30 minutes, on October 16.

Mr. MCKINNEY, for 5 minutes, today.

(The following Members (at the request of Mr. MCCLOSKEY) to revise and extend their remarks and include extraneous material:)

Mr. NELSON of Florida, for 5 minutes, today.

Mr. CROCKETT, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. FRANK, for 60 minutes, on October 16.

Mr. VOLKMER, for 60 minutes, on October 22.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BIAGGI, at end of debate on H.R. 3248, in Committee of the Whole, today.

(The following Members (at the request of Mr. MCCANDLESS) and to include extraneous matter:)

Mr. GINGRICH in two instances.
Mr. GALLO.
Mr. MCCAIN.
Mr. KINDNESS.
Mr. GEKAS.
Mr. SENSENBRENNER.
Mr. BOEHLERT in three instances.
Mr. BROOMFIELD.
Mr. GREEN.
Mr. VANDER JAGT.
Mr. COUGHLIN.
Mr. EVANS of Iowa.
Mr. HUNTER.
Mr. GILMAN in two instances.
Mr. SWINDALL.
Mr. CONTE.
Mr. GUNDERSON in two instances.
Mr. DANNEMEYER.
Mr. BLAZ.
Mr. EMERSON.
Ms. SNOWE.
Mr. SHUMWAY.
Mr. SMITH of New Jersey.
Mr. LIGHTFOOT.
Mr. BROYHILL.

(The following Members (at the request of Mr. MCCLOSKEY) and to include extraneous matter:)

Mr. HOWARD.
Mr. ST GERMAIN.
Mr. RANGEL.
Mr. MATSUI.
Mrs. BOXER.
Mr. PANETTA.
Mr. COELHO.
Mr. GEPHARDT in two instances.
Ms. OAKAR.
Mr. STARK.
Mr. MARTINEZ.
Mr. FLORIO.
Mr. LANTOS in two instances.
Mr. DE LUGO.
Mr. OLIN.
Mr. LELAND in two instances.
Mr. JACOBS.
Mr. BORSKI.
Mr. EDGAR.
Mr. EDWARDS of California.
Mr. BARNES in three instances.
Mr. WEISS.
Mr. MILLER of California.
Mr. CONYERS.
Mr. TRAXLER.
Mr. DIXON.
Mr. SMITH of Florida.

ENROLLED JOINT RESOLUTIONS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

S.J. Res. 155. Joint resolution to designate the month of November 1985 as "National Hospice Month";

S.J. Res. 183. Joint resolution to provide for the designation of the week of October 6 through October 12, 1985, as "Myasthenia Gravis Awareness Week";

S.J. Res. 194. Joint resolution to designate the week beginning October 1, 1985, as "National Buy American Week"; and

S.J. Res. 197. Joint resolution to designate the week of October 6, 1985, through October 13, as "National Housing Week."

ADJOURNMENT

Mr. ECKERT of New York. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 3 minutes p.m.), the House adjourned until tomorrow, Friday, October 11, 1985, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2121. A communication from the Director, Office of Management and Budget, transmitting a cumulative report on rescissions and deferrals of budget authority, pursuant to 2 U.S.C. 685(e) (H. Doc. No. 99-115); to the Committee on Appropriations and ordered to be printed.

2122. A letter from the Secretary of Housing and Urban Development, transmitting the quarterly report on HUD-owned multifamily project negotiated sales; to the Committee on Appropriations.

2123. A letter from the Director, Strategic Defense Initiative Organization, transmitting notification of the first award recipients in research investigating the application of short-wavelength free-electron laser [FEL] technology for medical and materials research; to the Committee on Armed Services.

2124. A letter from the Auditor, District of Columbia, transmitting a report entitled: "Revenue Report for July 1985", pursuant to Public Law 93-198, section 455(d); to the Committee on the District of Columbia.

2125. A letter from the chairman, Council of the District of Columbia, transmitting D.C. ACT 6-86, "D.C. Regional Interstate Banking Act of 1985", and Report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2126. A letter from the chairman, Council of the District of Columbia, transmitting D.C. Act 6-90, "District of Columbia Regional Airports Authority Act of 1985", and report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2127. A letter from the chairman, Council of the District of Columbia, transmitting D.C. Act 6-87, "Ban on Possession of Open Alcoholic Beverage Containers Act of 1985", and report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2128. A letter from the chairman, Council of the District of Columbia, transmitting D.C. Act 6-92, "Washington Hospital Center Corporation Revenue Bond Act of 1985", and report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2129. A letter from the chairman, Council of the District of Columbia, transmitting D.C. Act 6-88, "Closing of a Public Alley in Square 4248, S.O. 68-107, Act of 1985", and report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2130. A letter from the chairman, Council of the District of Columbia, transmitting D.C. Act 6-89, "Student Health Care Act of 1985", and report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2131. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Department of the Air Force's proposed Letter of Offer to Oman for defense articles and services, pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2132. A letter from the Assistant Secretary of the Treasury, transmitting notice of an altered Federal records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2133. A letter from the Commissioner, Immigration and Naturalization Service, transmitting a report on waivers granted from certain admissibility requirements for refugees, pursuant to INA, section 207(c)(3) (94 Stat. 103); to the Committee on the Judiciary.

2134. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a report from the Chief of Engineers, Department of the Army, on Missis-

sippi Sound and adjacent areas; to the Committee on Public Works and Transportation.

2135. A letter from the Acting Commissioner of Social Security, transmitting a report related to treatment of terminally ill people, pursuant to Public Law 95-265 and Public Law 98-460; to the Committee on Ways and Means.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ACKERMAN:

H.R. 3546. A bill to prohibit for 3 years the conversion of residential rental units to residential units offered for sale, to authorize the Secretary of Housing and Urban Development to make grants to units of general local government to assist persons whose residential units are subject to such conversion, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BROWN of Colorado (for himself, Mr. STRANG, Mr. SCHAEFER, Mr. KRAMER, Mrs. SCHROEDER, and Mr. WIRTH):

H.R. 3547. A bill to amend the Wild and Scenic Rivers Act to designate certain segments of the Cache la Poudre River and the South Ford of the Cache la Poudre River in Colorado as a component of the national Wild and Scenic River System; to the Committee on Interior and Insular Affairs.

By Mr. DE LUGO:

H.R. 3548. A bill providing duty free treatment for gold jewelry manufactured in the insular possessions of the United States, and for other purposes; to the Committee on Ways and Means.

By Mr. DORGAN of North Dakota:

H.R. 3549. A bill to require retailers to collect sales and use taxes on interstate sales; to the Committee on the Judiciary.

By Mr. KASTENMEIER (for himself, Mr. MOORHEAD, Mr. MAZZOLI, Mr. SYNAR, Mr. FRANK, Mr. BOUCHER, and Mr. KINDNESS):

H.R. 3550. A bill to amend the provisions of titles 18 and 28 of the United States Code commonly called the enabling acts to make modifications in the system for the promulgation of certain rules for certain Federal judicial proceedings, and for other purposes; to the Committee on the Judiciary.

By Mr. LIVINGSTON:

H.R. 3551. A bill to repeal the War Powers Resolution; to the Committee on Foreign Affairs.

By Mr. RANGEL (for himself, Mr. GILMAN, and Mr. FAUNTROY):

H.R. 3552. A bill to authorize additional appropriations to enable the Drug Enforcement Administration Mid-Atlantic Laboratory to meet the needs of the District of Columbia Metropolitan Police Department for analysis of suspected controlled substances; to the Committee on the Judiciary.

By Mr. SMITH of New Jersey:

H.R. 3553. A bill to amend the Internal Revenue Code of 1954 to provide for the establishment of, and deduction of contributions to, education savings accounts; to the Committee on Ways and Means.

By Mr. ROBERT F. SMITH:

H.R. 3554. A bill to provide for the restoration of the Federal trust relationship with, and Federal services and assistance to, the Klamath Tribe of Indians and the individual members thereof consisting of the Klamath and Modoc Tribes and the Yahooskin Band of Snake Indians, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. SUNIA:

H.R. 3555. A bill to amend the "Joint resolution to provide for accepting, ratifying and confirming the cessions of certain islands of the Samoan group to the United States, and for other purposes"; jointly, to the Committees on Interior and Insular Affairs and the Judiciary.

By Mr. WHITEHURST:

H.R. 3556. A bill to provide for the exchange of land for the Cape Henry Memorial site in Fort Story, VA; jointly, to the Committees on Interior and Insular Affairs and Armed Services.

By Mr. EVANS of Iowa:

H.R. 3557. A bill to amend the Soil Conservation and Domestic Allotment Act to authorize the acquisition of conservation easements; to the Committee on Agriculture.

By Mr. SUNDQUIST:

H.J. Res. 420. Joint resolution designating the month of October 1985 as "National Quality Month"; to the Committee on Post Office and Civil Service.

By Mr. BORSKI:

H. Con. Res. 210. Concurrent resolution expressing the sense of the Congress with respect to human rights in Poland; to the Committee on Foreign Affairs.

By Mr. HALL of Ohio (for himself, Mr. FASCELL, Mr. CONTE, Mr. DOWNEY of New York, Mr. GRAY of Pennsylvania, Mr. JEFFORDS, Mr. LELAND, Mr. LEVINE of California, Mr. MOORHEAD, Mr. OBEY, Mrs. ROUKEMA, Mr. SMITH of New Jersey, and Mr. YATRON):

H. Con Res. 211. Concurrent resolution in support of universal access to immunization by 1990 and accelerated efforts to eradicate childhood diseases; to the Committee on Foreign Affairs.

By Mr. McCAIN (for himself, Mr. UDALL, Mr. STUMP, Mr. RUDD, Mr. KOLBE, and Mr. SUNDQUIST):

H. Con. Res. 212. Concurrent resolution condemning the Government of the Soviet Union for the killing of Charles Thornton, an American journalist working in Afghanistan; to the Committee on Foreign Affairs.

By Mr. MAVROULES (for himself and Mr. SKELTON):

H. Con. Res. 213. Concurrent resolution on reducing the threat of international terrorism; to the Committee on Foreign Affairs.

By Mr. DENNY SMITH (for himself and Mr. DORNAN of California):

H. Con. Res. 214. Concurrent resolution expressing the sense of Congress with respect to the deterioration of conditions in Poland; jointly, to the Committee on Foreign Affairs, and Banking, Finance and Urban Affairs.

By Mr. WEISS:

H. Con. Res. 215. Concurrent resolution condemning the hijacking of the Achille Lauro and the murder of Leon Klinghoffer; to the Committee on Foreign Affairs.

By Mr. MICHEL:

H. Res. 292. Resolution electing certain Representatives to the Committee on Government Operations and Small Business; considered and agreed to.

By Mr. GARCIA (for himself, Mr. FUSTER, MR. UDALL, Mr. YOUNG of Alaska, Mr. LAGOMARSINO, and Mr. RANGEL):

H. Res. 293. Resolution expressing concern for all the people of Puerto Rico affected by the devastation caused by tropical storm Isabel, support for Puerto Rico's effort to cope with this tragedy and the sense of the House of Representatives that the Commonwealth of Puerto Rico should be declared a disaster area and provided with all necessary assistance; considered and agreed to.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 43: Mr. CARR.

H.R. 385: Mr. GONZALEZ.

H.R. 479: Mr. EDGAR and Mr. ROWLAND of Georgia.

H.R. 508: Mr. DELLUMS, Mr. FLORIO, and Mr. SUNIA.

H.R. 585: Mr. RICHARDSON and Mr. ENGLISH.

H.R. 605: Mrs. LLOYD, Mr. GINGRICH, Mr. BENNETT, Mr. JONES of North Carolina, and Mr. GREGG.

H.R. 651: Mr. QUILLEN.

H.R. 864: Mr. FRANK and Mr. FLIPPO.

H.R. 1059: Mr. BEREUTER.

H.R. 1401: Mr. STAGGERS.

H.R. 1402: Mr. MARTINEZ and Mr. STAGGERS.

H.R. 1403: Mr. MARTINEZ.

H.R. 1616: Mr. FLORIO, Mr. FASCELL, Mr. MADIGAN, Mr. DONNELLY, and Mr. FISH.

H.R. 1682: Mr. YOUNG of Alaska.

H.R. 1780: Mr. RAHALL.

H.R. 1877: Mr. SMITH of New Hampshire, Mr. VANDER JAGT, Mr. WEAVER, Mr. DWYER of New Jersey, Mr. MAVROULES, Mr. LOWRY of Washington, and Mr. MOODY.

H.R. 2001: Mr. McCAIN, Mr. TAUZIN, Mr. MANTON, and Mr. JACOBS.

H.R. 2015: Mr. HUNTER.

H.R. 2119: Mr. LEHMAN of California.

H.R. 2274: Mr. CAMPBELL, Mr. CRANE, Mr. DORGAN of North Dakota, Mr. GREGG, Mr. HOPKINS, Mr. JACOBS, Mr. PRICE, Mr. RANGEL, and Mr. VANDER JAGT.

H.R. 2298: Mr. McEWEN and Mr. KEMP.

H.R. 2354: Mr. ROGERS.

H.R. 2492: Mr. COBEY, Mr. BEREUTER, Mr. MCGRATH, Mr. NATCHER, Mr. YOUNG of Florida, Mr. BONER of Tennessee, Mrs. LLOYD, and Mr. LEVIN of Michigan.

H.R. 2539: Mr. COOPER, Mr. MARLENEE, MCCLOSKEY, Mr. WORTLEY, Mr. GINGRICH, Mr. BRYANT, Mr. WHITEHURST, Mr. JONES of North Carolina, Mr. BENNETT, Mr. TRAFICANT, Mr. SWEENEY, Mr. DURBIN, and Mr. GREGG.

H.R. 2591: Mr. BARNES and Mr. MRAZEK.

H.R. 2607: Mrs. JOHNSON and Mr. PANETTA.

H.R. 2795: Mr. GROTBERG, Mr. DURBIN, and Mr. MOLLOHAN.

H.R. 2833: Mr. WEAVER, Mr. CONYERS, Mrs. BYRON, Mr. MILLER of Ohio, and Mr. BEVILL.

H.R. 2854: Mr. DONNELLY.

H.R. 3066: Mr. SUNIA, Mrs. JOHNSON, Mr. BEVILL, Mr. SEIBERLING, Mr. NIELSON of Utah, Mr. TAUKE, Mr. MINETA, and Mr. BOSCO.

H.R. 3173: Mr. MCKERNAN.

H.R. 3292: Mr. EDWARDS of Oklahoma, Mr. BEVILL, Mr. COBEY, Mr. SHUMWAY, Mr. ARMEY, and Mr. KASICH.

H.R. 3305: Mr. PEPPER, Mr. FROST, Mr. HAYES, Mr. WHITEHURST, Mr. REID, Mr. EDWARDS of Oklahoma, Mr. BEVILL, Mr. CONYERS, and Mr. DWYER of New Jersey.

H.R. 3346: Mr. HILER, Mr. WORTLEY, Mr. LAGOMARSINO, Mr. NICHOLS, and Mr. YOUNG of Florida.

H.R. 3404: Mr. STARK, Mr. SCHEUER, Mr. AKAKA, Mr. MATSUI, Mr. FAUNTROY, Mr. ORTIZ, Mr. TOWNS, Mr. ADDABBO, Mr. MANTON, Mr. COELHO, Mr. DORNAN of California, Mr. WORTLEY, Mr. HORTON, Mrs. BOXER, Mr. PORTER, Mr. HAYES, Mr. HOWARD, Mr. ROE, Mr. CONYERS, Mr. ROSE, and Mr. CROCKETT.

H.R. 3420: Mr. ROBERTS, Mr. SHUMWAY, Mrs. JOHNSON, Mr. HORTON, and Mr. FISH.

H.R. 3436: Mr. TRAFICANT and Ms. OAKAR.

H.R. 3448: Mr. LAGOMARSINO and Mr. MORRISON of Connecticut.

H.R. 3522: Mrs. MEYERS of Kansas, Mr. FAWELL, Mr. WORTLEY, Mr. CRAIG, Mr. BURTON of Indiana, Mrs. SMITH of Nebraska, Mr. SLAUGHTER, Mr. DANNEMEYER, and Mr. HANSEN.

H.J. Res. 126: Mr. GILMAN, Mr. RODINO, Mr. SWINDALL, and Mr. ROWLAND of Connecticut.

H.J. Res. 141: Mr. COBLE, Mr. DANNEMEYER, Mr. CHENEY, Mr. VALENTINE, Mr. BLILEY, Mr. DORGAN of North Dakota, Mr. EVANS of Iowa, Mr. FRANKLIN, Mr. TAYLOR, Mr. BROOMFIELD, Mr. CARNEY, Mr. GOODLING, Mr. KILDEE, Mr. LEWIS of California, LOEFFLER, Mr. PASHAYAN, Mr. PORTER, Mr. ROBERTS, Mrs. SCHNEIDER, Mr. SMITH of New Hampshire, Mr. ROBERT F. SMITH, Mr. COLEMAN of Texas, Mr. CONYERS, Mr. OBERSTAR, Mr. LATTA, Mr. BROOKS, Mr. BEVILL, Mrs. SMITH of Nebraska, Mr. NOWAK, Mr. RINALDO, Mr. ANDREWS, Mr. BEILENSON, Mr. BILIRAKIS, Mr. BROWN of Colorado, Mr. COUGHLIN, Mr. COURTER, Mr. DELAY, Mr. DELLUMS, Mr. EDWARDS of California, Mr. FRANK, Mrs. LLOYD, Mr. MURPHY, Mr. PERKINS, Mr. BROYHILL, Mr. HEFTEL of Hawaii, Mr. GINGRICH, Mr. FUSTER, Mr. BROWN of California, Mr. CLAY, Mr. RICHARDSON, Mr. YOUNG of Florida, Mr. ACKERMAN, Mr. SCHUETTE, Mr. DAVIS, Mr. HOPKINS, Mr. IRELAND, Mr. MCCANDLESS, Mr. LIVINGSTON, Mr. HAMMERSCHMIDT, Mr. STANGELAND, Mr. PETRI, Mr. TAUKE, Mr. TRAXLER, Mr. CAMPBELL, Mr. TOWNS, Mr. PEPPER, Mr. TALLON, Mr. TORRICELLI, Mr. BRYANT, Mr. DASCHLE, Mr. DICKINSON, Mr. LEACH of Iowa, Mr. REGULA, Mr. GALLO, Mr. YATRON, Mr. GEJDENSON, Mr. GEPHARDT, Mr. GRADISON, Mr. HALL of Ohio, Mr. HUCKABY, Mr. JONES of North Carolina, Mr. MADIGAN, Mrs. MARTIN of Illinois, Mrs. MEYERS of Kansas, Mr. MILLER of California, Mr. MORRISON of Washington, Mr. NIELSON of Utah, Mr. PRICE, Mr. QUILLEN, Mr. ROEMER, Mr. ROSE, Mr. ROTH, Mr. ROYBAL, Mr. SKEEN, Mr. SNYDER, Mr. STENHOLM, Mr. STRANG, Mr. STUDDS, Mr. WALKER, Mr. WEAVER, and Mr. WHITLEY.

H.J. Res. 275: Mr. BUSTAMANTE, Mr. TORRICELLI, Mr. RINALDO, Mr. SUNIA, Mr. GREEN, Mr. LEVINE of California, Mr. LAGOMARSINO, and Mr. MATSUI.

H.J. Res. 336: Mr. AUCOIN, Mr. BARTON of Texas, Mr. BONIOR of Michigan, Mr. EDGAR, Mr. MOLLOHAN, Mr. MURPHY, Mr. OLIN, Mr. RICHARDSON, Mr. SAVAGE, Mr. SPRATT, Mr. WHITTAKER, Mr. WOLPE, Mr. STUDDS, Mr. HUGHES, Mr. GRAY of Pennsylvania, Mr. HALL of Ohio, Mr. NEAL, and Mr. GUARINI.

H.J. Res. 396: Mr. ADDABBO, Mr. TOWNS, Mr. SCHUMER, Mr. SEIBERLING, Mr. LAGOMARSINO, and Mr. FAUNTROY.

H.J. Res. 413: Mr. SABO, Mrs. BENTLEY, Mr. BERMAN, Mr. KEMP, Mr. YATES, Mr. BONER of Tennessee, Mr. CALLAHAN, Mr. COELHO, Mr. DANIEL, Mr. DELLUMS, Mr. LENT, Mr. MCEWEN, Mr. CARPER, Mr. FAZIO, Mr. FAUNTROY, Mr. GRAY of Illinois, Mr. GUNDERSON, Mr. RALPH M. HALL, Mr. HANSEN, Mr. MURPHY, Mr. ORTIZ, Mr. PRICE, Mr. RODINO, Mr. OWENS, Mr. SCHEUER, Mr. DORNAN of California, Mr. DE LA GARZA, Mr. TOWNS, Mr. WYDEN, Mr. ACKERMAN, Mr. CARR, Mr. MOLLOHAN, Mr. TAUZIN, Mr. CAMPBELL, Mr. DIXON, Mr. GALLO, Mr. MRAZEK, Mr. HILER and Mr. HAYES.

H.J. Res. 416: Mr. HUNTER and Mr. BATES.

H. Con. Res. 69: Mr. BERMAN.

H. Con. Res. 117: Mr. ROE and Mr. WHITEHURST.

H. Con. Res. 190: Mr. ROE, Mr. MONSON, Mr. VALENTINE, Mr. KINDNESS, Mrs. MARTIN of Illinois, and Mr. SUNIA.

H. Con. Res. 202: Mr. OWENS, Mr. TORRES, Mr. FRANK, Mr. LEVINE of California, Mrs. BURTON of California, Mr. MATSUI, Mr. BEDELL, and Mr. DELLUMS.

H. Res. 40: Mr. BLILEY and Mr. NIELSON of Utah.

H. Res. 74: Mr. BROWN of California, Mr. CHANDLER, Mr. LANTOS, Mr. SMITH of Florida, and Mr. DAUB.

H. Res. 141: Mr. LOEFFLER, Mr. RUDD, Mr. MCCAIN, Mr. SKEEN, Mr. DORNAN of California, and Mr. BARTON of Texas.

H. Res. 183: Mr. DYSON, Mr. FAZIO, Mr. BATES, Mr. MORRISON of Connecticut, Mr. SWIFT, Mr. BEDELL, Mr. MRAZEK, and Mr. SHELBY.

H. Res. 194: Mr. CHAPMAN, Mr. EDGAR, and Mr. MARTINEZ.

H. Res. 247: Mr. WILSON.

H. Res. 259: Mr. MILLER of Washington.

H. Res. 268: Mr. SCHAEFER, Mr. PARRIS, Mr. NEAL, Mr. MORRISON of Connecticut, Mr. WHITTEN, Mrs. SMITH of Nebraska, and Mr. BENNETT.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

233. The SPEAKER, presented a petition of the Jorge Espinosa de los Reyes, Ambassador to Mexico, relative to the earthquake; which was referred to the Committee on Foreign Affairs.

SENATE—*Thursday, October 10, 1985*

(Legislative day of Monday, September 30, 1985)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, this has been an exhausting week, physically and emotionally for the Senators, and a stressful exercise in futility for our leaders. They have been like maestros conducting a symphony while each musician plays his own music. All have been dealing with stubborn realities which do not easily yield to resolution.

Gracious God, with profound gratitude we praise Thee for the refreshing interlude of the joint meeting yesterday, as in his quiet, rational, persuasive, profound way, Prime Minister Lee Kuan Yew of Singapore, reminded us of the incalculable influence of Congress. "Decisions made in this Chamber," he said, "especially in the decades since 8 December 1941, have determined the course of human history and settled the shape of the contemporary world * * *. Much of the credit for peace and an unprecedented degree of human progress must go to American leadership."

As a weary Senate works its way to debt and deficit solutions, dear God, grant that the inspiring record of the past may energize as they recall the closing words of the Prime Minister: "In your hands * * * lie the future of the world." God help us! Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each followed by special orders in favor of Senators CHAFEE, BAUCUS, LEAHY, and PROXMIRE.

At the hour of 10:30 a.m. the live quorum will begin under the provisions of rule XXII to be followed by a cloture vote on the minority leader's motion to invoke cloture on House Joint Resolution 372, the debt limit extension, as amended, by Gramm-Rudman-Hollings.

If cloture is not invoked, the second cloture vote will occur unless both motions are vitiated by unanimous consent. I will indicate that unless we can work out some agreement on final passage, there will not be any unanimous consent to vitiate. So I think if anyone has any idea of keeping us here all day and into the night with additional amendments, we ought to find out where those amendments are coming from.

If cloture is not invoked or vitiated, the Senate will resume the pending business which is House Joint Resolution 372, and if we can go through the list of amendments we have pending, there will be at least seven or eight rollcall votes plus hopefully final passage today.

If that occurs fairly early in the afternoon, it would be my hope at least that we turn to the consideration of the reconciliation bill so that we can lay that down, have some discussion on that legislation, and that would be the pending business when the Senate returns on Tuesday next.

It would also be my hope that when we do that—I will discuss this with the minority leader—we might spend the mornings next week on appropriations bills, and the afternoons on reconciliation.

In addition, we still have—as I indicated to Senators THURMOND and HOLLINGS and others—the textile bill to be considered. And, of course, it is very urgent in my view that we move quickly on farm legislation. I know it is going to take probably a couple of weeks in the Senate.

The House has passed a very extensive bill. It seems to me that must have a priority particularly because in many parts of the country farmers have already planted wheat, for example, not knowing what the program would be.

So I hope we can complete action on that in the next couple of weeks.

EXTENSION OF DEBT CEILING

Mr. DOLE. Mr. President, on another matter I was asked by a reporter earlier whether or not we extended the debt ceiling? I think the answer is yes, if you look at the practical result of specifically authorizing $5 billion of Federal Financing Bank financing. It was the judgment of those who offered the extension that had we not passed this provision, Treasury would not only have had the $5 billion just specifically authorized, but also $15 billion in general FFB authority. This would have meant they could have gone beyond November 1 without facing up to reality.

I must say that I disagree with Treasury's judgment that FFB financing was necessary yesterday. But that was the word that we had received. In my view, at least, there is some evidence that the FFB was never intended to be used for that purpose. But that has now been done. It would be my hope that maybe Congress would take a look at this particular area and restrict the ways in which Treasury may finance public debt. But in any event, we still hope to complete action on the larger extension today.

Mr. President, I reserve the balance of my time.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. DOLE. I am happy to yield.

The PRESIDING OFFICER (Mr. ANDREWS). The Senator from South Carolina is recognized.

ACTION URGED ON NOMINATIONS

Mr. THURMOND. Mr. President, I am getting continuous inquiries why the Senate does not act on nominations we reported from the Judiciary Committee. On September 12, as chairman of the committee, I reported Alex Kozinski, of California, to be U.S. circuit judge for the ninth circuit; Ralph B. Guy, Jr., of Michigan, to be U.S. circuit judge for the sixth circuit; Stephen H. Anderson, of Utah, to be U.S. circuit judge for the tenth circuit; Ferdinand F. Fernandez, of California, to be U.S. district judge for the central district of California; Glen H. Davidson, of Mississippi, to be U.S. district judge for the northern district of Mississippi; Robert B. Maloney, of Texas, to be U.S. district judge for the northern district of Texas; David Bryan Sentelle, of North Carolina, to be U.S. district judge for the western district of North Carolina; and Brian B. Duff, of Illinois, to be U.S. district judge for the northern district of Illinois.

On September 19, as chairman of the committee, I reported to the Senate Edmund V. Ludwig, of Pennsylvania, to be U.S. district judge for the eastern district of Pennsylvania; Stephen V. Wilson, of California, to be U.S. district judge for the central district of California; David Sam, of Utah, to be U.S. district judge for the district of Utah.

Mr. President, it required quite some time to consider these nominees and

decide whom the Justice Department was going to appoint. It took quite some time for those individuals to be investigated by the FBI. It took quite some time for the investigators on the Judiciary Committee to investigate these individuals. They are badly needed on the bench.

The PRESIDING OFFICER. The time allotted to the majority leader has expired.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, I yield to the distinguished Senator from South Carolina, the President pro tempore, whatever time he desires.

Mr. THURMOND. I thank the distinguished minority leader.

Mr. President, as I stated, these judges are badly needed on the bench. I am getting continuing inquiries from all over the country asking, "Why do you not get action on these judges?"

I have done the best I can. I have urged the Department of Justice to hasten these investigations and get them to the Judiciary Committee. We have added an extra investigator there to get them investigated. We have reported the nominations to the Senate. Why can they not be acted upon? The Judiciary Committee unanimously approved these judges.

Mr. President, I do not see why they cannot be approved.

I have not had a chance to go over this with the majority leader, but I would like to have his view as to why the Senate has not taken up these nominations and approved them.

I see other nominations here, too, but these concern the administration of justice. Right now, in Florida and other places, they are badly in need of judges. They have to assign them from other places. Why can those judges not be acted upon, I think more expeditiously than others?

There are other judgeships and important nominations involved.

On September 26, David Nelson, of Ohio, to be U.S. circuit judge; James L. Ryan, of Michigan, to be U.S. circuit judge; Henry T. Wingate, to be U.S. district judge.

There is another group on the calendar. Here it is.

Paul H. Robinson, of New Jersey, to be a member of the U.S. Sentencing Commission. This was October 2. Michael K. Block, of Arizona, to be a member of the Sentencing Commission; Helen G. Corrothers, of Arkansas, to be a member of the Sentencing Commission; George E. Mackinnon, of Maryland, to be a member of the Sentencing Commission; Ilene H. Nagel, of Indiana, to be a member of the Sentencing Commission; William W. Wilkins, of South Carolina, to be a member of the Sentencing Commission. Mr. Wilkins is named as Chairman of that Commission.

Mr. President, under the comprehensive crime bill that we passed, which is the finest crime bill the Congress has ever passed, we have a provision concerning sentencing, to try to improve that situation. This Commission has been appointed to do that.

Mr. Wilkins happens to be from my State. He is Chairman of this Commission. He has to arrange for quarters, he has to arrange for personnel, and he only has a limited time. It seems to me this Commission ought to be acted upon.

Mr. President, this Commission has to get to work. Other judicial nominations still pending before the Senate are Alan H. Nevas, of Connecticut; Paul N. Brown, of Texas; and Alan A. McDonald, of Washington. Furthermore, Mr. President, Mr. William A. Maddox, of Nevada, to be U.S. attorney.

The tell me they need that U.S. attorney to go to work out there.

And Roger Hilfiger, of Oklahoma, to be a U.S. attorney. These are but some of the important nominations reported by the Judiciary Committee.

Mr. President, all of these are Department of Justice people. As chairman of the Judiciary Committee, we have tried to investigate these people thoroughly. The Judiciary Committee has acted upon them. They are ready to go to work. What is holding it up?

I have not had a chance to go over this with the majority leader. I would like to know what is holding up these judges.

Mr. President, I cannot emphasize too much the importance of this. This Sentencing Commission is a very important Commission. They have a limited time in which to operate. They have to get quarters; they have to get personnel. There has been $2.3 million appropriated for the work. They have to make a report by a certain time. If not, then we will probably have to start that all over again. That may take months and months, or maybe another year if we do not do it.

This Commission needs to be acted upon immediately by the Senate. I see no need in holding up these people.

We hear people criticizing the Federal Government about how slowly it acts, why do they not act and go forward and do things. Here we have acted. The executive branch has acted. The Judiciary Committee has acted. Why does the Senate not act?

Where is the majority leader? I would like to see if he has any response to this.

Does anyone know why they are being held up? I would like to know. I have not had a chance to talk to people about this. I have expected every day for them to be approved.

I see the able and distinguished Democratic leader here. Can he tell us any reason?

Mr. BYRD. The distinguished Senator, if he does not already know, may find out about these nominations by inquiring at the White House.

Mr. THURMOND. By inquiring at the White House? The White House does not have anything to do with this. The White House has acted. The Judiciary Committee has acted. Now it is up to the Senate to act. If anybody in the Senate is holding them up, I think they ought to speak up and give the reason. The majority leader is not in the Chamber now. I do expect to pursue this with him.

Mr. President, action ought to be taken. It is not right to delay the promotion of justice. It is not right to hold up the criminal justice system or the civil justice system of this country. It is not right to delay the Sentencing Commission, which has only a limited time in which to act.

Mr. President, I want to say now that I think whoever is holding up the confirmation of these people is taking a great responsibility upon themselves.

The Justice Department has some Assistant Attorneys General and they have to go to work. It has always been considered that the President has a right to choose his main people. Here you have Assistant Attorneys General who have important responsibilities and they need to be confirmed and go about their duties.

Mr. President, I hope the Senate will act on these matters and do it promptly. It has been weeks now, from way back in early September, but there has been no action yet on these people.

I yield the floor.

The PRESIDING OFFICER. The Democratic leadership has 4 minutes of his time remaining.

Mr. BYRD. Mr. President, I yield the remaining 4 minutes to Mr. SPECTER.

Mr. SPECTER. Mr. President, I thank the distinguished minority leader for his time. I would like to use the time at the conclusion of Senator CHAFEE's special order. I have asked him to reserve some of his time for me if I need it at that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR CHAFEE

The PRESIDING OFFICER. Under the previous order, the Senator from Rhode Island is recognized for not to exceed 15 minutes.

Mr. CHAFEE. I thank the Chair.

WORLD TERRORISM

Mr. CHAFEE. Mr. President, first, let me comment on the terrorism that has taken place just recently. Of course, we have had it in the past. I just want, on behalf of myself and the

constituents from my State, and I think I speak for all Americans, to voice the shock and outrage which we feel at what has taken place in the Mediterranean, especially at the loss of Mr. Leon Klinghoffer.

What we cry out for is an end to terrorism in this world. It is my hope that the United States will use every method and tool at its disposal to bring to justice those who have committed this most recent crime; namely, the killing of Leon Klinghoffer. It is my hope that those other criminals who have participated in hijackings and murders of Americans and other nationals—it is not just restricted to Americans. We have seen Russians seized and killed and nationals from other countries as well. I hope those who have participated in each of these hijackings, murders, and terrorism will be sought out and prosecuted by those having jurisdiction.

S. 873—THE COMMUNITY AND FAMILY LIVING AMENDMENTS OF 1985

Mr. CHAFEE. Mr. President, I would like to discuss briefly S. 873, the Community and Family Living Amendments of 1985, which I introduced in April of this year.

I believe that reform of the Medicaid system as it applies to the developmentally disabled is long overdue. Consequently, I introduced the community and family living amendments, S. 873, in April of this year. This legislation is a revised and refined version of S. 2053 which I introduced in 1983.

A policy change at the Federal level is long overdue. Federal Medicaid funds flow primarily toward large facilities. Since 1977, less than 20 percent of the dollars for intermediate care facilities for the mentally retarded have gone to support persons with mental retardation and developmental disabilities in the community.

While there is a great deal of interest in supporting people in the community and removing the emphasis on institutional care, there is much variation in the rate at which States approach the task. Since 1977, more than one-half of the residents of large facilities in Vermont, Michigan, Ohio, and Nebraska have returned to the community. In other States, this figure is less than 10 percent. Three States—Louisiana, Tennessee, and Mississippi—have actually increased the number of persons living in institutions in the last 7 years.

My legislation is an attempt to encourage all States to move in the direction of allowing individuals with developmental disabilities to live in the community, either at home, on their own or in a group home. My bill makes this possible by providing resources to the States to offer a better level of care than that available in most larger facilities.

The past year has proven that any proposal to phase down Medicaid support for institutions and increase such support for community based services is a highly charged issue. Clearly the idea evokes tremendous emotion and controversy.

Most of the debates about the bill tend to revolve solely around whether institutions are good or bad. I believe those debates are a waste of time; the real issue is whether we can improve our current system of care. I believe that S. 873 contains the necessary elements of such a reform. I'd like to spend a few moments talking about the provisions of my legislation—many of which are ignored in the heat of these debates.

Some critics say that my proposal will allow only one kind of service, everyone must be in a 12- or 15-bed group home.

Nothing could be further from the truth.

My bill will allow Medicaid expenditures to support people in a wide variety of settings: their family home; foster homes; adoptive homes; special living arrangements for 2 or 3 or more people with special needs; new community residences up to about 12 people; existing residences up to 15; and existing clusters of up to 3 homes.

In addition, S. 873 would allow approximately 15 percent of a State's total Medicaid budget to be used to support facilities which are larger than those I have just outlined.

Thus I offer, for the first time, a continuum of services. What more could we ask for?

Some critics of my bill argue that it proposes dumping people from institutions into the streets without needed services. However, under my bill, there are services which States must provide to each person who is deinstitutionalized: respite care, personal attendant care as appropriate, case management, and protection and advocacy services.

My bill says that each person must have an individual written plan of habilitation; that the plan must be developed by an interdisciplinary team, and that family members, guardians, or, in some cases, the disabled person himself, can participate on that team.

My bill further stipulates that any one who is to be moved out of an institution must be given 60 days written notice, opportunity for a due process appeal, and that the services specified in the written plan must be in place before the individual is moved.

For the most part what we have seen in the past in the name of deinstitutionalization is really dumping. My bill is an antidumping bill. My bill stands for the proposition that we are moving people back to the community—we are not moving protoplasm or objects. We are moving people into homes where they can live safely, with the security and support they need along with the opportunity to grow and develop as individuals.

My bill says that community residences need to be certified, licensed, or accredited, that staff need to be retrained to work in the community. My bill requires States to develop a plan of action for the next 15 years—a plan which must be approved by the Secretary of Health and Human Services. My bill contains a private right of action clause: If an individual is not being properly served because the State is failing to live up to its agreement in the State plan, the individual may sue.

When people state that they oppose my bill, one must ask what provisions of the bill they oppose. Are they opposed to independent case management services? Are they opposed to written program plans, or 60-day notice of moves? Are they opposed to respite services or protection and advocacy services? Are they opposed to helping families stay together by supporting families who wish to keep their children at home?

I hope that my colleagues can see that this is not just a mindless dumping bill. I hope that they can see that we can make deinstitutionalization a reality. Given the proper support required by my bill, I hope they can see that by the year 2000, we can live with many fewer institutional placements than we have today.

I ask all of my colleagues in the Senate to join me in developing a system where each person, no matter how disabled, is cared for, supported and served in his or her own community—where we all belong—together.

KASTEN REQUIRES WORLD BANK TO CONSIDER ENVIRONMENT

Mr. CHAFEE. Mr. Chairman, I call the Senate's attention to the exceptional job Senator KASTEN has done in requiring the Multilateral Development Banks to consider the environmental implications of their lending policies.

For years now, many of us who are deeply concerned about the environmental conditions of our country and the environmental conditions of other nations, have watched in horror as the Multilateral Development Banks have sponsored devastating projects.

These projects have led to the clearing of million of acres of tropical rainforests, the expansion of deserts in Africa, and the squandering of valuable water resources. But what makes many of these projects most abhorrent, is that they lead to human suffering.

As Senator KASTEN has so frequently pointed out, development projects

that are not sensitive to local environmental conditions or cultural practices may lead to the widespread loss of a region's environmental resources. Once the resource base is destroyed, the economy declines and poverty becomes more widespread.

What the Senator has done, largely through his position as chairman of the Foreign Operations Subcommittee of the Appropriations Committee, is to apply many of the same conservation principles that we commonly use in this Nation to other parts of the world. He has insisted that simple principles such as soil conservation, watershed management, and forest management are critical not only to the ecological health of developing nations, but also to their economy.

In a time when the world debt problem is growing, and the administration is calling on the multilateral lending institutions to expand their lending programs, Senator KASTEN's work could not be more important.

Finally, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD at this point a recent article describing some of the work Senator KASTEN has done to force one of the Multilateral Development Banks to be more concerned about the environmental implications of their lending policies.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE WORLD BANK'S WATCHDOG

(By Jack Anderson and Dale Van Atta)

Sen. Robert Kasten (R-Wis.) has become the point man for critics of the World Bank and other international lending agencies that show a reckless disregard for the damage and multimillion-dollar projects they finance wreak on the environment and the people supposedly being helped.

Cynics might suggest that Kasten's environmental advocacy is a Johnny-come-lately move by a conservative freshman worried about his reelection chances next year. But Kasten's credentials as a conservationist are solid, and the Third World people he's trying to protect can't vote in Wisconsin.

As chairman of the subcommittee that approves or disapproves U.S. contributions to the "multilateral development banks," Kasten is in an excellent position to make his criticism felt. Last spring, for example, he was able to force the World Bank to hold up nearly $500 million in loans to a project that has devastated huge areas of the fragile Amazon rain forest in Brazil.

The U.S. contribution to the World Bank and the others comes to more than $1.2 billion a year—roughly one-fifth of their total budgets and three times as much as the next largest contributor. So when Kasten speaks, the banks listen. The Brazilian project, called Polonoroeste, is an ambitious effort to carve a 900-mile highway into the heart of the rain forest. It also includes a network of secondary roads that will open up a large portion of the Amazon basin to agriculture and industry. Alerted by Natural Resources Defense Council attorney Bruce Rich, Kasten was appalled to learn that World Bank loans to Polonoroeste have already helped destroy millions of acres of tropical rain forest.

"What is most amazing about this project," Kasten said, "is that the World Bank continued to fund this project for more than two years after it had identified, through its own supervisory missions, that the program was producing environmental devastation of this scale."

The Senator also discovered that experts had warned from the very beginning of the Polonoroeste project that the soil being cleared by destruction of the rain forest was probably too fragile to support the agriculture and cattle operations planned for the area.

Like any native of Wisconsin, Kasten is aware of the destruction in the 19th century of what had once been one of the world's greatest white pine forests. Clearcutting by lumber companies stripped the northern half of the state under the supposedly less enlightened practices and government policies of 100 years ago. Yet here it is happening again in Brazil—with World Bank encouragement.

Kasten got word this summer while vacationing in the Wisconsin woods that the World Bank was about to resume its loans to Polonoroeste despite his objections. He then called the bank's president, A.W. Clausen, and demanded that action be held up until he and environmentalists could be briefed.

Meanwhile, Treasury officials have also expressed concern at the development banks' attitude on the environment. The banks "tend to overemphasize the quantity of lending rather than the quality," a Treasury official said, explaining: "If environmental considerations threaten expeditious project processing, the environment is assigned low priority and is left to be dealt with later."

Our associate Donald Goldberg has found confirmation of this in other costly projects financed by the World Bank and/or its affiliated international lending agencies:

A loan to the Philippines approved last year included substantial amounts for pesticides. But the loan proposal did not include a discussion of the methods that would be used to apply the poisons. Philippine experts have found a significant correlation between the twice-yearly pesticide spraying and increases in the incidence of serious illness among male workers in the affected rural areas.

A 1979 loan financed a hydroelectric dam in Ecuador. Officials were warned that the project would be rendered useless in about seven years because of silt buildup, unless a second dam is built upstream. Construction on the first dam is progressing, but the plans for the upstream dam have been shelved altogether.

Another dam—in Togo—was approved last year before a study of health concerns could be completed. Less than a month later, the study was finished; it warned that the lake behind the dam would be an ideal breeding ground for snails that carry schistosomiasis, a disease that affects some 250 million people worldwide. But the loan had already been approved; work is going ahead on the dam.

Mr. CHAFEE. Mr. President, I yield to the Senator from Pennsylvania the remainder of my time.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. SPECTER. I thank the distinguished Senator from Rhode Island.

Mr. President, how much time do I have, with the time from the Senator from Rhode Island and the Democratic leadership time?

The PRESIDING OFFICER. The Senator has a total of 13 minutes.

Mr. SPECTER. I thank the Chair.

TERRORISM MUST NOT GO UNPUNISHED

Mr. SPECTER. Mr. President, I strongly urge that the United States take the strongest possible diplomatic action, accompanied by economic sanctions, to secure custody of the four terrorist-pirates who hijacked the Italian cruise ship and murdered Mr. Leon Klinghoffer, a U.S. citizen.

While the latest reports state that the four hijackers are "heading out of Egypt," it may yet be possible that Egypt has sufficient control, or could exert sufficient influence, to retain or require custody of the pirates.

Under 1984 legislation, the United States has extra-territorial jurisdiction to try those hijackers in U.S. courts. It is astounding, under any conceivable standard, for any responsible government to release such murderers without seeing to it that they are brought to justice and are punished. Any agreement to set such criminals free, as a precondition to releasing hostages, is null and void since it violates any standard of public policy under diplomatic or international law.

I am shocked by the decision of the Egyptian Government to release the terrorists in light of President Mubarak's firm denunciation of terrorism on the mining of the Red Sea in August 1984. I had occasion to meet with President Mubarak in August 1984 at the time of that mining incident and personally heard him decry in the strongest possible terms such terrorist activity.

If it is determined that Egypt was responsible, in whole or in part, for the release of the terrorists, then I believe the United States should take forceful action to demonstrate our outrage by cutting foreign aid to Egypt by $1 billion, if we do not cut it out entirely.

The initial press reports suggest that Egypt may not have known that a United States citizen was murdered. I frankly find that hard to believe, but if they had no specific knowledge of the murder of Mr. Klinghoffer, they were under an absloute duty to find out what the scope was of the criminal activity and what the hijacker-terrorists had done when they had custody and control of some 500 innocent people. Egypt or Italy, or whoever was responsible for letting those hijackers go, must be held accountable.

In my judgment, Mr. President, the time has long passed for the United State to take a "business as usual" attitude in the face of terrorist murders, supported by countries which harbor terrorists, and tolerated by nations which make unconscionable deals with them. If the U.S. Government fails to take such forceful action now, in the wake of this shocking international situation, then it is obvious that all of our tough talk is just a national embarrassment.

The failure of our national policy to deal with terrorism is underscored by our inaction as soon as the most recent terrorist acitivity recedes from the front pages.

I have today written to Secretary of State Shultz urging that he act in a forceful way, if not as I suggest here this morning, then in some alternative manner which expresses not only in rhetoric but in action U.S. outrage, accompanied by some specific sanction and by some specific penalty.

Repeatedly, these matters have been called to the attention of the Department of State, and I have done so personally in hearings, through legislative initiatives, by letter, and in private conversations with the Secretary of State and other ranking officials of the State Department.

For example, I believe that the U.S. Government should forthwith cut off trade with Libya. Following the murder of the british policewoman by the Libyan diplomat, I urged the Secretary to take action to cut off such trade in a hearing before the Foreign Operations Subcommittee on March 1, 1985.

It seemed to me, simply stated, unconscionable, and really dealing in blood money for any nation to deal with Libya after the murder of the British policewoman. The Secretary of State responded that there was not statutory authority to take that action. Congress has since passed legislation authorizing the President to cut off trade with Libya in an amendment which this Senator introduced on the Foreign Assistance Authorization Act of fiscal year 1986. Yet the United States continues to trade with Libya.

Our Nation ought to take action immediately to cut off trade with Libya, both in terms of our own policy and as a leadership matter to urge other nations to follow suit.

Second, as a concrete action, the United States should now move ahead to indict the three terrorists who hijacked the TWA plane and murdered the young Navy diver, Mr. Stethem.

Those terrorists have been identified and there have been published reports acknowledging that a grand jury in Washington, DC, has been considering that case. The grand jury in Washington, DC, under 1984 legislation which Congress passed on hostage taking, has authority to indict those terrorists. There are procedures available where those terrorists could be extradited to the United States for trial in a U.S. district court right here in Washington, DC. It would be a great day in specific, forceful action against international terrorism to bring those terrorists to trial and to punish them.

There are ways, Mr. President, where we can deal in a concrete, specific manner with nations that sponsor terrorists, as, for example, the cutoff of trade to Libya. And there are specific ways in which we can deal with the individual terrorists. International crime is really another breed of the crime that is evidenced on the streets of this country every day, and we arrest robbers and we arrest rapists and we arrest murderers and we bring them to trial and we convict them and we punish them. We have the means at our disposal to take that kind of forceful action with respect to international terrorist-criminals, if we just have the will and the courage to do so.

Those who talk about retribution for such action must be aware by this time that retaliation against us is possible regardless of what action we take. And U.S. citizens, U.S. airplanes, and international cruise ships are sitting targets for action by terrorists.

It is no more justifiable not to act for fear of retribution than it is for a victim in a rape case to refuse to identify the rapist and step forward in a courtroom and testify because she is afraid of retribution. As a prosecuting attorney, I used to hear those concerns expressed by victims in criminal cases, but it is important for those who have been victimized to step forward, to identify the perpetrators, to use the processes of law so that perpetrators may be brought to justice. Only in this way is there any hope at all of taking some forceful action and seeing to it that there is an end to international terror.

Mr. President, I further call the attention of this body to Senate bill 1508, which this Senator introduced on July 26, 1985, to impose the death penalty for murder of U.S. citizens by international terrorists.

Mr. President, these actions have just been unfolding in the course of the past 24 hours, and it is only the latest reports which suggest that the four hijackers have been released. The time has long since passed for mere rhetoric on these subjects. The U.S. Government now has at its disposal specific, concrete action which can be taken.

First thing this morning, I prepared a letter for the Secretary of State embodying much of what I have just said, and that will be delivered forthwith, but I urge my colleagues in this body to join me in pressing our Government officials, who have the power to do so, to act now to see to it that these four terrorists are returned to the United States for trial or to take and impose sanctions against any Government within our power to do so. And we certainly have the power, where we grant foreign aid, to make the reduction which this Senator has suggested.

I thank the Democratic leader for yielding me some of his time, and I thank the Senator from Rhode Island for yielding some of his time. I yield the floor.

RECOGNITION OF SENATOR BAUCUS

The PRESIDING OFFICER (Mr. WEICKER). The Senator from Montana is recognized for not to exceed 15 minutes.

INTERNATIONAL TRADE COMMISSION'S CANADIAN SOFTWOOD LUMBER REPORT

Mr. BAUCUS. Mr. President, I rise to remind my colleagues about the Canadian softwood lumber imports problem.

Mr. President, America faces a trade crisis.

We are practicing "vampire economics," inhaling goods and currency from around the world.

Last year, our trade deficit was $123 billion.

To put it another way, for every $2 worth of U.S. goods going out, $3 worth of foreign goods were coming in.

As a result, U.S. industries are losing their footholds in foreign markets, and drowning in a flood of imports here at home.

These are not just declining "sunset" industries. They also include some of our most efficient and competitive industries.

THE FOREST PRODUCTS INDUSTRY

The forest products industry is a perfect example.

Our mills are modern and efficient.

Nevertheless, the industry has become a victim of the international trade war.

Since 1980, the industry has gone from a $400 million trade surplus to a $2 billion trade deficit. Last year, exports declined 5 percent and imports rose 10 percent.

This has had a devastating effect.

U.S. sawmills are operating at only 83 percent of capacity.

Last year, U.S. companies reported pretax losses of $550 million.

And 250 sawmills have closed and 30,000 U.S. lumber industry workers have lost their jobs since 1978.

The overvalued dollar is a large part of the problem. But so are unfair foreign trade practices.

On one hand, the U.S. industry has been shut out of the huge Japanese market by a system of high tariffs that protect inefficient Japanese mills.

On the other hand, the U.S. industry has been inundated by subsidized Canadian imports, which have risen from 19 percent of U.S. consumption in 1975 to about 32 percent now.

CANADIAN SUBSIDIES

Let me explain why these imports are unfairly subsidized.

In the United States, about half the softwood lumber comes from public land. The price for cutting rights, which is called "stumpage," is set by either an open auction or competitive bidding, and naturally rises to the fair market level.

In Canada, about 95 percent of the softwood lumber comes from public land, but the pricing system is very different from ours. A handful of huge companies have monopoly leases over vast tracts of timberland. From time to time, the Government sets a stumpage price.

There is no auction, no bidding, no competition.

As a result of this cozy system, Canadian sawmill operators can buy stumpage for about one-tenth what United States operators can.

Mr. President, a Canadian forester named Ken Drushka just published an exposé of the stumpage system in British Columbia, where most Canadian softwood lumber originates, in a book called "Stumped." I ask unanimous consent that chapter 5 of this book be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so orderd.

(See exhibit 1.)

THE 1983 DECISION

Mr. BAUCUS. Mr. President, the Canadian system gives Canadian producers an unfair advantage over United States producers, because the Canadian Government provides them with raw materials at a fraction of the market price.

In 1983, a coalition of United States sawmill operators brought a countervailing duty petition, charging that the Canadian system constituted an illegal subsidy under United States trade law.

But the Commerce Department rejected the coalition's petition.

The linchpin to the Commerce Department's decision was the legal holding that stumpage was "generally available" throughout the Canadian economy because it was provided to the furniture industry and other wood products industries.

Mr. President, this is a cramped, unreasonable interpretation. I have looked at the GATT, the subsidies code, and our own CVD law from every possible angle, and I cannot find this "general availability" test anywhere.

And even if it does exist, it makes no sense to interpret "general availability" as broadly as Commerce did in the softwood lumber case.

As trade law expert Gary Hufbauer says in his recent treatise on subsidies:

> The general availability standard should be used sparingly to excuse only those incentives that in practice and design are used by a broad range of industries and geographic areas. Otherwise, the international community risks taking countermeasures against little subsidies while big subsidies run free.

Hufbauer goes on to say that:

> Neither in practice nor intent were cheap stumpage rights in Canada • • • generally available.

LEGISLATIVE SOLUTIONS

I have introduced legislation, S. 1292, that would overturn the Commerce Department's interpretation by clearly prohibiting certain natural resource subsidies. Congressman GIBBONS has introduced identical legislation in the House.

The original version of this legislation was criticized for "stacking the deck" against the Canadians in any future countervailing duty case.

In response to this criticism, I have drafted a modified provision, which I plan to offer when the Finance Committee considers S. 1292.

This modification provides that cutting rights are subsidized if they are sold for less than what a willing buyer would pay a willing seller in an arms-length transaction. I ask unanimous consent that a copy of my proposed modified version of S. 1292 be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2).

YESTERDAY'S ITC REPORT

Mr. BAUCUS. Mr. President, the softwood lumber controversy is complicated. To resolve it, we need sophisticated information about the United States and Canadian systems.

To provide this information, the U.S. trade representative recently asked the International Trade Commission to report on conditions relating to U.S. softwood lumber imports.

We received the report yesterday, and it confirms what we have believed all along.

Mr. President, I ask unanimous consent that a copy of the executive summary of the ITC report be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 3.)

Mr. BAUCUS. Mr. President, the report confirms the Canadian stumpage prices have generally been much lower than United States prices and notes that:

> Since 1982, stumpage prices • • • have fallen and stabilized at a point where United States prices are roughly 10 times the Canadian price.

Mr. President, let me repeat that statistic, from page 59 of the ITC report. United States prices—which are set in a free, competitive marketplace—are 10 times Canadian prices.

The report also undercuts two main Canadian arguments.

First, the report shows that the high value of the United States dollar has not had nearly the impact the Canadians have claimed, rising by only 8.5 percent against the Canadian dollar from 1978 to 1984. What's more, the real value of the Canadian dollar has remained relatively constant since the end of 1978, but the Canadian share of the United States market has risen by more than 12 percent.

Second, the ITC report shows that the noncompetitive Canadian system gives Canadian producers an advantage even after logging costs are added.

The Canadians have repeatedly asserted that a comparison of delivered logs costs would show that Canadian prices were no lower than United States prices. To the contrary, the ITC finds that Canadian delivered log costs average $28 less than United States costs, and are $59 less in the comparable Northwest and Coastal British Columbia markets.

Mr. President, this delivered cost advantage is a direct result of the Canadians' subsidy. And it is the fundamental reason that Canadian producers can charge from $23 to $76 less than United States producers can for similar lumber.

CONCLUSION

Mr. President, the ITC report confirms the obvious.

The Canadians are using bargain-basement Government resources to expand their market share.

I call that a subsidy.

And I think that we ought to do something about it.

A few weeks ago, our trade representative, Ambassador Yeutter, wrote that "Once we have the ITC report, we will move quickly on this matter."

Well, we have the report in hand.

I urge Ambassador Yeutter to move, quickly and decisively, to end Canada's unfair subsidy.

This will be especially important as our two countries consider negotiating a free trade agreement.

As President Reagan recently noted, if trade is not fair, it is free in name only. That is why I and nine Finance Committee colleagues recently wrote Ambassador Yeutter, urging him that resolving the lumber issue would "facilitate Finance Committee consideration of any administration proposals relating to the negotiation of a free trade agreement."

I earnestly hope that the release of the ITC report will expedite the resolution of the lumber issue and thereby enable the United States and Canada to take further steps that strengthen trade ties between our nations.

EXHIBIT 1

[From "Stumped," by Ken Drushka]

WHAT IS OUR TIMBER WORTH?

As the history of Peter Pearse and his Royal Commission indicates, economists have had their effect on the forest industry. They have asked some difficult and penetrating new questions; they have caused some old questions to be examined from new points of view. But economics is not an exact science, and economists are often better at asking questions than at answering them. Although asking the right question is halfway to the answer, in some areas halfway is as far as we get.

One area where we need answers is the matter of "economic rent." This is a fundamental concept in resource economics. Most simply put, economic rent is the true value, in dollars, of any given resource. In the forest industry, it is usually seen as the real worth of the standing trees, the price the owner should charge for them. If the owner charges too much, no buyers will be attracted, or the buyer will find it difficult to be competitive in the marketplace, or the owner will attract buyers who have some unusual advantage, such as particularly efficient processing techniques or an existing operation conveniently located nearby. Generally speaking, however, it would be extremely disadvantageous for the purchaser to pay more than the economic rent. Similarly, it is disadvantageous for the seller to accept less than the economic rent. If that seller happens to be a government, the shortfall must be made up by the taxpayer. The amount of that shortfall will essentially be a subsidy to the purchaser.

Establishing the correct economic rent, therefore, is absolutely fundamental. In theory, this is easy. The trees are simply put up for open bid in a freely competitive market. In almost every case, the selling price will be an entirely satisfactory, practical approximation of the economic rent.

In calculating the amount of this bid, the would-be purchaser must first consider the market in which he must sell his own finished product, whether that product be pulp chips, logs, two-by-fours or what have you. He must judge what a competitive price will be when he has finished processing the trees he is bidding on. From that selling price he will first deduct his own processing costs, then he must deduct a competitive profit for himself—competitive in two ways: it must be high enough to satisfy present investors and attract new ones when needed, and it must be low enough to give his bid a reasonable chance of success. Thus, both the product market and the money market are factors in his bidding calculations. Having judged his selling price and deducted processing costs and profit, he knows how much he can bid for his raw material, the standing trees. Yet that bid must be as high as he can make it because without the raw material to process and sell, all is for naught. There is considerable pressure on him to run a lean operation with efficient processing techniques and the minimum attractive profit.

This, at least, is the theory. In reality, only a very small part of North America's publicly owned timber is sold through competitive bidding. (Washington and Oregon are among the few areas where competitive bidding is the norm.) In British Columbia, certainly, there is virtually no open market for the province's timber resources. Since the introduction of competitive bidding for Small Business Timber Sale Licenses, the amount of B.C. timber sold on the open market is in the neighborhood of 10 percent of the allowable annual cut. However, even this system is far removed from the classic free-market model because the market is restricted to certain recognized bidders. Here in British Columbia, where the major industry is forestry, the beautifully constructed models of resource economics break down. As a result, no one quite knows how much a B.C. tree is worth.

It is also on this very point—competitive bidding for the standing timber—that the traditional left-wing-versus-right-wing categories of B.C. politics break down. Most politicians of the right and almost all big businessmen in the province actively oppose competitive bidding for Crown timber; many politicians of the left and most small businessmen strongly favour it. Mason Gaffney, an economic advisor to former NDP minister of forests Bob Williams, was forced to conclude:

. . . There is nothing essentially right wing about the free market. In fact the free market is one of the most radical things there is, which is why big businesses don't really like it . . . and nowhere is this better exemplified than in the relationship between the big forest giants and the [B.C.] Crown in their leases on Crown lands which they like to hold without competitive bidding . . .

Nor is the idea of a government collecting economic rent necessarily a left wing notion. . . . The position that the income of natural resources should be taken for public purposes . . . isn't a socialist position . . . [it's] simply saying that taxation socializes whatever it taxes (and I'm saying you should tax "A" instead of "B," "A" being natural resources and "B" being human beings). When you tax the income of workers, you are socializing the human being. When you tax the resources, you are socializing resources through the tax system.

British Columbia's forest tenure policies also confound the standard left-right arguments over free enterprise. In British Columbia, the privilege to buy timber is restricted to a few buyers, or even to a single buyer, by means of Tree Farm Licenses, quota systems and Timber Sale Licences. Sustained yield policies further compromise the free market. Restricting yearly harvests to an allowable cut in a particular sustained yield unit means that there is a point above which the supply cannot be increased no matter what price buyers are willing to pay. In practice, this figure is not quite absolute since higher prices will make some of the inaccessible and low-quality stands worth harvesting while encouraging more complete use of trees previously harvested. A good example of this is to be found in European forests where even roots and branches are converted to pulp and paper. Yet in spite of this marginal flexibility, sustained yield practice is generally considered one of the major obstacles to the working of a free market economy and is especially so considered by economists such as Gaffney: The shorter the period of time between planting a tree and cutting it, the more labour is used in adding value to the final products and the less capital . . . and the less land is tied up per worker.

Publicly owned forests are not administered economically. They are administered by foresters who have this drilled out of them in forestry school. [When you looked closely] you discovered that a degree in forestry is a licence to stop thinking and that our forests both in B.C. and the U.S. are administered by the name of "even-flow sustanined yield," which causes them to hold timber much too long before they cut it [and] to carry an excess inventory of timber at very low productivity, and causes them to develop an ideology which is entirely geared to justifying and supporting this way of doing things.

All these departures from the free-market economy are rationalized on the same basis as sustained yield policy: they are supposed to enable the provincial government to direct and control regional economic development and stability. However, as Mason Gaffney points out, this rationalization is questionable:

If you look at this argument about employment stability and look at the rate of turnover that occurs in the labour force anyway, you'll find the rate of turnover is extremely high. So what you are subsidizing in a meaningful sense is not really jobs in a particular place—especially way up north, because people come and go very fast anyway—what you are stabilizing is the return on the capital that people have invested there.

In a system of competitive bidding for standing timber, the timber's economic rent is a result of the market for the processed product, the money market, and harvesting and processing costs. However, in the absence of competitive bidding, it should still be possible to determine the economic rent through a system of appraisal. Given an open and active market for the product, one could simply work backward from the selling price to appraise the value of the uncut timber. To use a simple example: a logger believes he can sell and deliver a fire log to a buyer for $50; if the cost of cutting down, hauling out and delivering that log, including an allowance for profit, is $40, the economic rent for the log as standing timber would be $10 and the logger should pay no more and no less than that. The process could be complicated a bit by extending the cost calculation through the manufacturing stage and working backward from lumber or pulp prices. In that instance, the costs and profit allowances for milling or chipping would also be taken into account; but theoretically, the figure for economic rent would be the same.

In British Columbia, this apparently simple process has become an elaborate, little understood and, at times, highly contentious system, partly because there is almost no open market within the province for either finished forest products or standing timber. Most of British Columbia's forest products are exported to the United States where they must sell at a price that is competitive with the home product. This means that to arrive at an economic rent for B. C. timber, economists would have to work backward from prices on the American market. This, in turn, would imply that the value of B. C. timber depends on the value, or economic rent, of American timber. This conclusion is so upsetting to B. C. economists that some of them refuse to acknowledge it.

In the absence of a competitive log market in British Columbia, economists and bureaucrats alike have abandoned the concept of economic rent in favour of a system called "stumpage," which is simply the price a logger pays for access to the trees. Stumpage dates back to 1884, when the B. C. legislature passed an act allowing for a levy of fifteen cents for each tree felled and twenty cents for every thousand feet of lumber scaled at the mill. Prior to this, the govern-

ment obtained its forest revenues from the outright sale of forest land or, after 1880, from the sale of timber lease rentals. In 1888 the levy on trees was replaced with a royalty system which charged fifty cents for every thousand board feet measure of timber cut on Crown lands. Receipts in the first year of royalty payments totalled $13,286.

In 1914, following the invasion of British Columbia by American lumbermen during the first decade of this century, the Timber Royalty Act was passed which allowed the government to adjust royalty rates in relation to the selling price of lumber. By this time, annual revenues were about $2.5 million from royalties. The 1912 Forest Act also included provisions for selling standing timber by public competition. Bids were in the form of sealed tenders and were expressed as the amount the buyer was willing to pay above a minimal, or "upset," stumpage rate. The upset rate was determined by subtracting the exploitation costs from the selling price, with allowances for profits, carrying charges, interest and risk. The prices and costs used would represent "normal" conditions and were calculated for each timber stand by a Forest Service appraiser who based his calculations on personal knowledge and experience.

Stumpage in its modern form developed after World War II with the adoption of the Rothery System of appraisal in 1948. Currently used by both the U.S. and B.C. forest services, though to somewhat different ends, the great virtue of the Rothery System was the establishment of a uniform method of calculating operating costs and selling prices and relating them to each other. During the 1950s, most of the timber sold in British Columbia was priced by a combined appraisal and bidding system. The appraisal was used to establish the minimum, or upset, rate, below which the timber would not be sold. Competing buyers bid on an additional amount, or bonus, they were willing to pay above that upset price. The timber boom in the 1950s resulted in some very high bidding on timber sales, and out of fear that a drop in the market would bankrupt the loggers holding these high-priced cutting contracts, the government adopted a sliding stumpage scale that allowed for adjustments in the stumpage rates according to changing market values.

Many in the industry look on this era as the golden age of free enterprise. The post-war building boom was in full swing, and a large number of independent operators were competing for timber. Supposedly, thie efficient survived and the provincial treasury reaped the benefits in the form of high stumpage rates. Reality was somewhat different, however. All loggers were buying from a single seller, the government, and they had a collective interest in keeping the stumpage rate low. Thus, in the normal course of events, they worked out a sort of gentleman's agreement, not bidding up the price on another's application. Whenever spirited bidding did occur, it was usually from a newcomer trying to establish himself, with existing operators driving up the stumpage to discourage him. Other means were available to shrink the government's perception of true economic rents: prospective bidders at auctions might be offered a cash payment to refrain from bidding; a larger firm could offer a small one a lucrative logging contract in exchange for its withdrawal from bidding; bankers and other lenders could influence the amount of competition by granting or withholding credit to prospective bidders. Everyone except the government had a vested interest in keeping stumpage rates down.

In recent years, the lack of an active timber market in British Columbia has further obscured the true value of the province's forest resource. Theoretically, stumpage should equal economic rent. However, the appraisal system for determining stumpage assumes the presence of a market in order to arrive at a number of its essential figures. Since no such market exists in the province, stumpage is based on pretence. Consequently, the system of stumpage has become a potentially explosive forest policy issue.

The basic question in determining the price of a publicly owned resource is whether the price is fair to both the buyer and the seller. But is stumpage fair? The forest industry looks upon stumpage as a royalty or even as a tax. Economists and many others still consider stumpage to be a form of economic rent, but critics of the appraisal system declare that the rent is too low. Increasingly, public policy is tending towards collecting the full economic rent, defined as everything remaining after operating costs, allowances for profit and certain risks are deducted from the final selling price. However, this formula works better in words than in practice. Despite numerous academic studies and official enquiries, no one has ever come up with widely accepted figures for any of the variables in the equations used to determine stumpage. The result is that comparisons of appraised stumpage rates with returns derived from the few existing open timber auctions are of considerable amusement to those with a sardonic sense of humour.

One indication of the way the appraisal system undervalues number is the black market value of "quota." The quota system arose in 1948 with the passage of sustained yield legislation, according to which the large amounts of timber allocated in Tree Farm Licenses were priced according to the appraisal system. In the Public Sustained Yield Units, however, timber was still sold at auction, but with a limit on the amount that could be cut annually in each unit. To this, by administrative fiat, was added a quota system which parcelled out the annual cut in each PSYU according to an operator's historical production level and performance record. Existing quota holders were allowed to match any offer on timber they had requested, with the losers in the quota sale forfeiting a bidding deposit of 10 per cent of the estimated stumpage.

At first, quota was not considered a salable commodity, for the transfer of timber cutting rights required the approval of the minister of forests. Under minister Ray Williston, however, the sale of quota became a common, though unofficial practice. One justification for this was that it encouraged small, inefficient operators to get out of the business by selling their timber rights, along with their worn-out equipment, to a more efficient operator. The value they received was considered a reward for having persevered and having helped build up the industry. Although the fact was rarely discussed openly, by the mid-1970s quota sales had become the most common means of acquiring additional timber rights for expansion. Since then, it has been widely recognized in the industry that the real profits are to be made when a company sells out.

Since the unofficial market value of quota can be roughly established by these sales, critics of the appraisal system have argued that quota sales provide a way of measuring the amount of the economic rent the government is losing on the sale of public timber. The value of the timber rights sold can be determined by subtracting the value of the operating equipment and other assets from the selling price of the company. A survey conducted in early 1981 concluded that the usual price paid for quota in British Columbia over the previous couple of years ranged from about $25 per m^3 ($71 per cunit) in the Interior to $30 per m^3 ($86 per cunit) on the coast.

According to the critics, the money a company receives by selling its future rights to cut timber is an unearned revenue which properly belongs to the public. They say that it is the timber, not the rights, that should have value and that, if the timber had been properly valued in the first place, the future cutting rights would be of relatively insignificant value. They also argue that if buyers can afford to pay another company for those rights, then they could afford to pay higher stumpage rates instead. They see the black market value of quota as a direct measure of the extent to which the appraisal system undervalues timber.

While this argument has some merit, it would be unwise to accept too hastily a dollar-for-dollar measurement which implies a four- or fivefold shortfall in stumpage rates. In 1980 the average stumpage price on all species logged in PSYUs throughout British Columbia was $5.54 per m^3 ($16 per cunit). At the same time, quota was valued from $25 to $30 per m^3 ($71 to $86 per cunit). Yet apples are not being compared with apples here, because quota confers the right to cut a specified amount of timber each year for an indefinite period. That time element itself has a value. Yet again, even if the government were realizing a full economic rent from timber sales, as long as there is an upper limit on the volume to be cut each year, quota will have an additional value. However, as the rules work now, the only revenue the government realizes from quota values is a light tax on the capital gains when a company sells its quota.

In 1980 the B.C. Ministry of Forests issued a discussion paper on appraisals which stated that the prinicpal objective of timber pricing is "to enhance the management and use of the forest resource for the maximum long term socio-economic benefits of the province." Secondary objectives were that the appraisal system be adaptable to rises and falls in forest product markets; that it be able to collect the full value of the resources being harvested; that it allows for an equitable charge upon timber coming from widely divergent logging conditions and changing economic factors; that it encourage an internationally competitive timber processing industry; that it be applicable to a wide variety of changing management objectives, and that it be as simple a system as possible.

The Rothery appraisal system used in British Columbia calculates stumpage as the value remaining after operating costs and a profit and risk allowance are subtracted from the selling price. The difficulty lies in determining realistic values for each of these factors for a particular stand of timber. The general approach of the Forest Service is to appraise to the value of the end product at the first point in the production process where (a) the quality of the timber can be taken into account, (b) a free market price can be determined and (c) the production costs of the end product can be isolated from other costs. To this end, the province

is divided into two zones, the coast, where the end product is logs, and the Interior, where lumber and pulp chips are produced. The explanation for this is that on the coast, where logs can move easily and cheaply by water, there is—in theory—a log market, known as the Vancouver Log Market. In the Interior there is no log market because of the high cost of transporting logs, so the point of appraisal has been moved along the production process to the point where a market theoretically does exist—the production of lumber and chips. Because there is a great deal of variation in the percentage of lumber or chips that can be recovered from logs of different species, size and grade, it is necessary to apply lumber recovery factors to Interior timber stands.

On the coast, the problem is that the Vancouver Log Market is more myth than reality. Twenty or thirty years ago, when there was a significant number of independent loggers and mill owners, a large volume of logs was brought and sold on the open market. The subsequent concentration of the industry in the hands of a few large, integrated companies means that most of the log transactions on the coast now consist of trades between the big companies.

Log market data are collected by the Council of Forest Industries (COFI), which accounts for about 95 percent of the timber harvested in the province. And while it has never been seriously suggested that COFI alters the figures it receives from its members, it is widely believed that the dollar values assigned by the companies to the trading transactions—particularly transactions involving higher grades of logs—do not reflect the true value of the logs. This suspicion appears to be borne out by comparing prices paid by some of the smaller independent mills in the southern coastal area with the published Vancouver Log Market prices. Obviously, it is in the best interests of the companies to keep these dollar values as low as possible and the Forest Service has no way of checking the individual transactions. If Company A trades a boom of medium-grade cedar saw logs with Company B for a boom of medium-grade fir saw logs and reports the transaction as such, there is nothing to prevent Company A from sorting out the best of the fir and using it to make plywood, which would give it a much larger return in processing. Or, because the market is largely a trading operation, if a mill owner is willing to pay $60 per m^3 ($171 per cunit) for a certain grade of saw log, but has no logs to offer in exchange for them, he will be unable to obtain the logs he needs even though their trading value might be listed as low as $40 per m^3 ($115 per cunit) in transactions conducted by the larger companies.

One of the chief weaknesses of the coastal system is that logs are no longer a representative end product and the market for them is now very restricted. This was one justification for creating the Small Business Program—the government's desire to re-establish an independent and competitive logging sector which would inject new life into the Vancouver Log Market. Another approach, long seriously considered, might be to put the coastal appraisal system on the same end-product basis as the Interior's—lumber and chips. While this makes some sense—because it would preclude the possibility of companies trading "cheap" logs and increasing their revenues in the stumpage-free conversion process—it would be a much more complex system, containing its own weaknesses.

The initial difficulty with the Interior system lies in establishing recovery factors. In making its calculations, the Forest Service does not measure a stand of timber before it is harvested and then tally the volume of lumber and chips produced from that stand. Instead, it bases its calculations on what it thinks the "average efficient operator" will be able to recover from the various sizes, grades and species of logs. Two problems are involved here. The average efficient operator is a figment of the Forest Service imagination. He is not the statistical average of all operators, but is an operator "using methods, men and equipment that are efficient for the task to be done in the light of the prevailing state of technology development."

There are a lot of jokes, few of them printable, about the average efficent operator. Since very few members of the Forest Service have had any direct experience logging or milling, the only source of information is industry itself, and it is only recently that the government has had access to company books. And because it is in the best interests of the companies for the Forest Service estimation of the average efficient operator's productive abilities to be as low as possible, the method tends to create some bizarre circumstances. An operator who knows his performance is being evaluated for the purpose of establishing production standards is naturally going to become rather lethargic. Any suggestion by Forest Service personnel that operators are working below average efficiency is apt to produce a flood of caustic remarks regarding efficiency of the Forest Service—considered by many of its own members to be a bureaucratic nightmare.

The main problem, however, lies with the enormous technical difficulty of establishing recovery factors and then applying those factors to an actual stand of timber and the conversion process it passes through to create lumber and chips. The conversion factors themselves have been derived from almost 100,000 trees felled and measured. When an actual stand is being considered, a small percentage of it is sampled and the results applied to the whole stand. Without actually cutting the tree, the cruiser is expected to calculate the gross volume of the tree) excluding the stump and unusable top), the volume of decay, the volume of recoverable soundwood to within 2.5 cm (1 inch) of decayed wood in the tree, the volume of unrecoverable soundwood that will be left on the logging site in logs that are more than 50 per cent defective, and the volume of soundwood that will be broken during falling and yarding and, as a result, left in the woods—all this within a 15 per cent margin of error.

The next stop is to calculate the volume of lumber which can be obtained from the soundwood available in the stand. The factors used in this stage make allowance for a host of items including the amount of wood turned into sawdust during sawing, edging and planing, the volume lost in kiln drying, irregular log shapes and so on.

The object of this exercise is to come up with figures for the lumber and chip volumes on which stumpage will be charged. If the operator feels, over time, that he is obtaining less volume than the Forest Service is billing him for, he will complain about the inaccuracy of the calculations. If he gets more, he might still complain for appearance' sake, but he is unlikely to volunteer the information that the estimates are low.

The problem is that the measurements taken, and the decay and recovery estimates made during the cruise, must all be accurate if the appraisal is to be at all valid. Many of the participants—including several members of the Forest Service—feel there is considerable error throughout the process. For just one example, consider the world of the timber cruiser, which is not the world of executives, bureaucrats, economists or beer commercials. It is near the end of the day; it has been cold, with rain and snow. The truck is parked a kilometer away, and the timber cruiser is wet to his skin and chilled to the marrow. Yet he is still measuring the timber stand, trying to be accurate with 15 per cent, though he feels scarcely 15 per cent alive. He will make errors.

Even if he does not err, the standard methods of processing his findings are likely to be quite inadequate. Once the volume calculations for a stand have been obtained and processed, they are matched with lumber and chip prices provided each month by the mills. These prices are calculated at the point when the products are loaded on railcars for shipment and are averaged over whichever of four Interior pricing zones the timber comes from.

As might be expected, there are many arguments concerning the technical aspects of this stage of the appraisal process. But probably more important is the determination of what constitutes a real selling price. Most Interior lumber is sold in eastern Canada and the United States. Much of it is logged, milled and sold by integrated companies. Many of them own or work through marketing companies which occasionally extend to the retail level.

It is one matter for Joe Littleman's Sawmill of Prince George, B.C., to sell a carload of two-by-fours to the Neighborhood Lumberyard in Wichita, Kansas, for $150 a thousand board feet and to report this sale to the Forest Service. But is is quite a different matter for International Consolidated Enterprises, of the same city, to sell four carloads of similar quality two-by-fours to its subsidiary marketing company, International Consolidated Lumber Brokers, also of Wichita, for $100 a thousand board feet—and report that sale to the Forest Service. If those were the only sales in the zone for that month, the average selling price to be used for stumpage calculations would be $110 per thousand board feet.

The "average efficient operator" concept mentioned earlier is used to determine operating costs. These costs include logging expenses on the coast and logging plus milling costs in the Interior. Because operating costs normally exceed stumpage rates many times over, a small percentage of error in cost calculations results in a large percentage of error in stumpage.

In calculating logging costs, the appraiser's task is to estimate what the costs will be to the average efficient operator to log a particular cutting block. Again, it is not an average cost calculation but the appraiser's estimate of what an average logger, using the most efficient and suitable logging technique, will spend getting out the timber. If the operator can do it at a lower cost, so much the better for him; if not, he is the loser.

The Forest Service obtains its cost information from a number of sources: contractual labour rates; time-motion study data; information supplied by logging companies, and the prices charged by logging contractors working for other timber companies. These contractor prices are considered the most reliable guide: contractors are recognized as the most efficient loggers; there are

few circumstances under which it is beneficial to the company holding the timber rights to pay inflated contract costs, and contract costs reflect capital as well as operating expenses.

As with other facets of the appraisal process, cost determination is subject to a lot of criticism and is a matter of ongoing negotiation and conflict between industry and government. Industry usually considers the Forest Service estimation of the mythical operator's ability to be too high. But critics, including market loggers who bid for their timber, look on the average efficient operator as an unproductive dolt who would soon starve in a free and open timber market.

The allowances for production costs create a curious situation in an industry which, in the final analysis, must compete in the international forest product market. It is in the timber companies' best interests to see these allowances established at the highest possible level. The more evidence they can provide to support higher costs, the lower their stumpage will be. To some degree there is a disincentive to be efficient. Why bother to keep costs down if efficiency would lead to lower cost allowances during the appraisal process, and thus higher stumpage? Yet to boost profits and compete on the selling market, efficient operations are a decided advantage. The trick can be turned by keeping costs as low as possible while attempting to hide these real costs from the Forest Service.

At this point in our study, we enter the strange world of the resource accountants. These great but unrecognized geniuses have created an environment as arcane, as obscure as laws and regulations will allow—and tax laws and resource regulations allow plenty of obscurity. The result is a surreal landscape bestrewn with sinking funds, deferred charges, accelerated depreciation, depletion allowances, reserves, offsets and other figments of the double-entry imagination—all to paint a picture of desperately high costs and desperately low profits, resulting in compassionately low stumpage rates. These resource accountants are artists who make Dali seem a dilettante, for they paint on a canvas as large as the entire forest area of British Columbia. To the extent that they succeed in their endeavours and gain lower stumpage rates, to that same extent all B.C. taxpayers become unwitting patrons of their art. So surreal and obscure is the result that today no one knows what it really costs to cut a tree in British Columbia.

The price of labour is yet another controversial component of logging and milling costs. Many critics argue that the timber companies have no incentive to take a tough stance when negotiating contracts with the forest industry unions because increased labour costs will automatically be passed through the appraisal process, probably with a healthy markup, and end up as reduced stumpage revenue to the public, thus costing the companies nothing. In effect, the argument goes, the public is subsidizing wages in the forest industry. Union and management spokesmen vigorously deny this argument. But in other contexts, the industry is quick to attribute British Columbia's relatively low stumpage rates in large part to the high costs of labour.

The lack of incentive to keep costs down is further reflected in the final stage of the appraisal process, the application of profit and risk allowances. The object of these allowances is to encourage the maintenance and growth of the provincial forest industry by insuring a sufficient return on investment to attract capital. There are several components: the profit margin is set at 10 percent on the coast and 12 percent in the Interior, and there are many risk categories that operate on a sliding scale, depending on economic circumstances at a given time and the financial hazards involved in harvesting and milling timber from particular stands. Although in theory a risk allowance could be as high as 18 percent, it is normally much lower.

An anomaly of the profit and risk factor is that while its objectives are tied up with ensuring investment, it does not relate to the investment involved in a particular operation. Instead, it is expressed as a percentage of operating costs and appraised stumpage. The implications of assessing profit and risk against operating costs and stumpage were not lost upon competitive timber buyers when the appraisal system was first introduced to calculate stumpage rates for Three Farm Licenses in the late 1940s. One of the central arguments against noncompetitive timber sales was that such a system would put the forest industry on a cost-plus operating basis. Inasmuch as this is true, it makes profits a function of operating costs—the higher the cost, the higher the profits.

In reality, the profit and risk allowance ends up as a percentage of selling price. Although this is now common practice in most industries, economists insist that profit should properly be considered in terms of the investment involved in making that profit. Yet in the forest industry, "ultimately, profit and risk allowances hinge on the selling prices of end products, and therein lies the basic weakness of the method, for there is no consistent relationship between sales values of end products and the investment underlying production." But while the deficiencies in the present system are widely recognized, and several alternative methods have been proposed over the years, the system is retained because of its "simplicity."

Once profit and risk allowances and operating costs have been deducted from the selling price, what remains is the appraised stumpage. This is the basic rate applied against noncompetitive timber sales and is the upset price, above which buyers bid in competitive sales. It is not, however, the final stumpage rate. There is a minimum upset rate—3 percent of lumber and chip prices in the Interior and either 6 or 8 per cent of log prices on the coast, depending on the area in which the logging occurs. The rationale for this stipulation is to establish a stumpage price below which the government will not sell timber. Above that price, the government and the operator share the proceeds.

Revisions in a number of appraisal factors are made periodically. Allowances for logging costs are revised annually and milling costs monthly. Stumpage rates are also adjusted monthly in response to changes in selling prices on the basis of the latest three-month averages. In addition, a company with a considerable portion of its timber supply in Old Tenures which carry a very low stumpage rate (such as MacMillan Bloedel, with about half its timber supply so arranged) can simply switch to cutting on these Old Tenure lands when normal stumpage rates are high. Later, it can cut on its regular TFLS in more depressed times, when normal stumpage rates are lower.

Further, Section 88 of the Forest Act allows operators to receive a credit against stumpage for certain tasks performed on public lands which are commonly accepted as being the responsibility of the landowner, that is, the Crown. These include the construction of logging access roads and reforestion or other silvicultural treatments. These expenditures must be approved in advance if credit is to be received and are calculated on the basis of actual costs. In effect, the licence holder is undertaking this work on a cost-plus basis as a contractor to the government, on lands over which he has tenure.

At this point, a quiet word of reminder: all the foregoing, the labour factors, the operating costs, the risk write-offs, the profit allowances, the average efficient operators, the inflated and deflated selling prices and the rest; all the argument, conniving, fiddling, analyzing, conferring, manipulating; all that effort is expended for just one reason—because there is no open competitive bidding for standing Crown timber in British Columbia.

This description of the timber pricing system used in British Columbia is necessarily sketchy. Moreover, the system is subject to constant change. Pearse's 1974 task force report on Crown timber disposals filled almost two hundred pages and, according to many, still failed to explain how the system works. In addition, the technical details of the procedure are constantly being altered in day-to-day negotiations between the government and the timber companies.

The important question, however, is the end result—the revenue collected from the sale of publicly owned resources. When the figures are tallied up at the end of each year, the pros and cons of the pricing system are usually the subject of a hot, though not necessarily informed, debate. Part of the problem during this phase of the debate is that there is no such thing as a typical year in the forest industry. Market demand and prices for forest products fluctuate dramatically, as do stumpage rates, making comparison difficult and risky.

During 1979, the B.C. forest industry produced a record harvest, logging 76,000,000 m^3 (26.8 billion cubic feet) of timber. The value of this timber, before processing, was estimated at $3.2 billion—or almost $42 per m^3 ($120 per cunit). Stumpage payments on this timber were $9.75 per m^3 ($28 per cunit) on Tree Farm Licences and $7.57 per m^3 ($22 per cunit) on Timber Sale Harvesting Licences and Timber Sales. Almost $417 million was collected in stumpage that year, along with an additional $43 million for rentals, royalties, fees and other charges on industry. (See appendices for 1980 data.)

The matter at issue is whether this stumpage revenue collected by the government constitutes the full economic rent. The answer to this question requires, among other things, a realistic appraisal of the market value of timber. Because there is no reliable timber market in British Columbia, comparisons are often made with prices and stumpage rates obtained in Washington and Oregon, where most public timber is sold at public auctions. While great caution must be used, such comparisons are useful because both areas sell in the same international markets and because the forests and terrain are similar, as are logging techniques.

A study published in 1980 by David Haley, a forestry economist from the University of British Columbia, has brought out some rather startling results. According to Haley's calculations, average stumpage for public timber in Washington and Oregon in

1978 was $39.11 per m³ ($112 per cunit) or more than eight and a half times British Columbia's stumpage of $4.58 per m³ ($13 per cunit).

Between 1963 and 1978, stumpage revenues in Washington and Oregon have risen at a real rate of 11 percent a year—over 478 percent—after discounting inflation. Over the same period, they did not rise at all in British Columbia. Indeed, in the vital Vancouver District, they fell by 2 percent in real terms, despite the fact that while in Washington and Oregon the allowable cut increased by only 13 percent during that time, in British Columbia it rose by over 336 percent.

Haley further calculated that in 1977 log prices in Washington, where timber sold on a competitive basis, were more than double the prices in comparable situations in British Columbia—$59.03 per m³ ($169 per cunit) for Douglas-fir, compared to a B.C. price of $28.82 per m³ ($82 per cunit) for Douglas-fir logged in the Quadra PSYU. Although logging costs and profit allowances were slightly lower in British Columbia, the Washington risk allowances were substantially higher. Using the prevailing selling price and operating costs, the B.C. Forest Service appraisal system indicated a stumpage rate of $0.17 per m³ ($1 per cunit), with the upset, or minimal, rate being $2.72 per m³ ($8 per cunit). In the comparable Washington situation, the indicated stumpage rate was $18.96 per m³ ($54 per cunit) and the average stumpage price under competitive bidding of Douglas-fir that year in the National Forest under examination was $59.22 per m³ ($169 per cunit).

The obvious question arises: why does the same species of tree, logged under roughly comparable circumstances at approximately equivalent costs and sold on the same markets, produce almost twenty-two times the revenue for the U.S. Forest Service than for its counterpart in British Columbia? If these comparative figures are applied to the 1979 B.C. harvest of 76,000,000 m³ (26.8 billion cubic feet), the magnitude of the issue is staggering and suggests that B.C. public coffers are being shortchanged by several billion dollars a year.

Naturally, the forest industry has a whole raft of explanations. One of the most legitimate involves the higher quality timber found in Washington and Oregon. Haley made an allowance for such differences in his study, which increased the B.C. appraised stumpage price from $0.17 per m³ ($1 per cunit) to $7.13 per m³ ($20 per cunit), still only 38 percent of the appraised price in Washington.

A further argument accounts for an unmeasurable part of the difference between the appraised price usually charged on timber in British Columbia and the bid price in the United States. During periods of rising demand for timber—as in 1977—buyers at open timber auctions are willing to pay more than the actual value of timber because they are speculating that prices will rise even farther by the time the trees are logged. Evidence of this argument was to be found during 1981 and 1982, when U.S. loggers were clamouring for relief from high stumpage rates during a period of depressed markets. But it is impossible to compute what portion of the $59.22 bid for Douglas-fir in Washington during 1977 could be called speculative. One indication is that even during the worst of the 1982 recession, stumpage rates in the U.S. did not substantially decline.

It is during a period of depressed markets that the issue of comparative stumpage rates becomes particularly contentious. Traditionally, in such a situation, U.S. Pacific Northwest loggers complain bitterly about the low-stumpage B.C. lumber flowing south across the border to compete against their high-stumpage timber. They argue that in effect B.C. forest products are being subsidized, and they usually end up calling for trade restrictions. It was for good reasons that in 1982 the U.S. government trade agency ruled in Portland that these low stumpage rates amount to a subsidy of Canadian lumber and that Canadian lumber therefore deserves a tariff when entering the United States. This would have the U.S. government, rather than the B.C. government, collecting the economic rent on B.C. timber. (Following the Portland ruling, the Pacific Northwest lumbermen called for a 60 per cent tariff on Canadian softwood lumber entering the United States, but their application to the U.S. Commerce Department was tuned down in 1983—much to the relief of the Canadian forest industry.) At such times, the B.C. industry, speaking through the Council of Forest Industries (COFI), goes to great lengths to refute the arguments that B.C. lumber is subsidized.

The COFI report on this issue, published in 1981, is an intriguing document. For the most part it merely explains differences in the appraisal system used in the two jurisdictions. It chief documented argument rests on the higher labour costs found in the B.C. industry. The main thrust of the COFI position appears to be that the entire situation can be traced back to the unreasonable demands of the B.C. forest unions. The report concludes by stating that "U.S. stumpage rates clearly could not be applied in B.C. as the stumpage alone could exceed the end product value. Obviously the numerous differences between these two areas preclude direct comparison. The effects of these differences unfortunately cannot be quantified."

With so many variables at work, no one with any detailed knowledge of timber pricing would try to put a precise dollar figure on revenues lost to the public. However, if Haley's figures are crudely applied, it appears that somewhere between zero and $4.25 billion a year in economic rent is not being collected by the B.C. government. Where, then, does this money go? What happens to the revenues, generated by sales on the international timber markets, but which in British Columbia do not end up as stumpage payments? If U.S. loggers are paying ten times the stumpage that B.C. loggers are paying, what happens to the differences in British Columbia?

The COFI report argues that if stumpage rates in British Columbia were lower than they should be, the difference would be reflected in excessive profits—which, COFI states, is not the case. However, there are many ways of disposing of money within a large timber corporation besides listing it as profit on the annual financial statement. One way, mentioned earlier, is to siphon it out of the province or the country via a marketing subsidiary. This, in fact, has been alleged in cases such as FABCO exporting wood chips at below market prices to its company in Japan and B.C. Forest Products' MacKenzie mill selling its products at below market value to its Japanese company. In the years before it was taken over by the B.C. government, Columbia Cellulose consistently sold its products to its U.S. parent at below market value.

Perhaps an even more significant area worth investigating is the amount of money companies spend on expansion. Part of this involves investment in logging equipment and processing mills. But over the past decade or two, the largest amount of expansion dollars has probably been spent on the acquisition of additional timber rights. These might cost as little as the $25 to $30 per m³ ($71 to $86 per cunit) for quota in a PSYU, referred to earlier in this chapter. Or, as one analyst calculated, the price might go as high as $140 per m³ ($400 per cunit) in the case of the purchase of the Rayonier Tree Farm Licenses by Western Forest Products, or $310 per m³ ($886 per cunit) for the B.C. Forest Products purchase of timberland from Scott Paper and Crown Zellerbach. When it is recognized that over the past couple of decades something like 85 per cent of the province's cutting rights has been acquired by a handful of large companies, and that most of the money received by the vendors of these cutting rights had been taken out of the industry and, quite likely, out of the province and the country, it is easier to understand where at least a portion of the unpaid economic rent has gone. The major companies have not only escaped paying the full rent on a publicly owned resource, but have used the "unearned increment" to increase their control of the industry.

At the working level of the forest industry, the most common explanation for the low stumpage rates paid in British Columbia involves a process of dissipation. The money is simply wasted and is reflected in the cost allowances of the appraisal process or the actual cost allowances which are deducted from stumpage.

The major forest companies are notorious for their inefficiencies. In theory, the "average efficient operator" concept should weed out inefficient operators. In reality, the establishing of cost allowances is a process of perpetual negotiation, with the companies constantly pressing for higher cost allowances and the Forest Service gradually giving way.

It is commonly understood in the industry that a gyppo or contract logger, or a silvicultural contractor, can produce up to twice as much as a company-managed crew at equivalent cost. Given the same equipment on the same ground, independent loggers or contractors can put twice as many logs on the landing in a day as company crews. Independent silvicultural crews can plant twice as many trees per man day and space twice as many hectares. Defenders of the companies might occasionally argue that their own crews do a better job of planting, for example, but since all planting is monitored by the Forest Service and certain standards must be met before the companies are paid for this work, it is rare to hear company spokesmen making this claim in the presence of Forest Service personnel.

To understand how vast amounts of money simply disappear in a corporate logging operation, it is only necessary to appear at a marshalling point at the start of a day's work and count the number of pickup trucks, each containing one "supervisor." Among loggers, MacMillan Bloedel is the most notorious for this sort of thing; it employs a vast army of supervisory personnel, each equipped with a $12,000 vehicle. During 1981 and 1982, MB laid off about five hundred head-office staff, without any noticeable decline in efficiency; of course, the costs of these redundant positions had been factored into the appraisal process for years.

Corporate spokesmen habitually blame union workers for the low levels of productivity in the industry. Curiously, when stumpage rates are being discussed, they boast about the efficiency of the industry. But a subject that is never discussed, expect among those at the working level, is the enormous inefficiencies created by the bureaucracies that have developed within all the major companies. And although it may be true that unionized workers directly employed by a major company are not particularly productive, this does not explain why members of the same union, working for a contractor or an independent logger, work more efficiently. The explanation most frequently encountered in the bush or at the mill is that the big companies have created work situations in which there is no incentive to be productive: the jobs are specialized and boring, and bureaucratic management decisions undermine productivity.

In certain types of work—primarily construction of access roads and silvicutural work—the companies receive credit against stumpage for the actual costs incurred. In theory, the Forest Service carefully monitors these expenditures before approving them; in reality, the Forest Service has neither the staff nor the knoweldge to do so. The situation which has developed under this system is illustrated when a consultant undertakes a specified task, such as laying out an access road. His costs are $150 per man day worked. He charges the major company $300 a day. The company submits a cost of $450 a day for approval by the Forest Service—and, after some negotiation, gets it. Thereafter, the Forest Service routinely accepts a cost of $450 a day for this kind of work. In addition, the company receives a profit and risk allowance on top of the supervisory costs it was allowed to write off against such work.

In one way or another, all of these escalated costs end up coming out of stumpage, either as a credit against stumpage or through the appraisal process. They are yet another indication of the difficulty of calculating the amount of money lost to the public. Haley's analysis may be as close as we can ever get.

There is no simple answer to the basic economic question of who gets what out of the B.C. forests. Undoubtedly some—the major corporations—get more than others. That vague entity known as "the public," the residents of the province—or to be more exact, some of them—have, over the past few decades, reaped enormous benefits through the forest revenues collected by government. The relatively high standard of living, the large public bureaucracies and costly infrastructures that cover the province have for the most part been funded by the forests.

If corporate profits and government revenues, beyond the costs of harvesting, processing and managing a fat and complacent forest industry, are lumped together, it appears that in one admittedly good year, 1979, something in the order of $2.5 billion was siphoned out of the woods. This examination of the appraisal system used to price publicly owned forest resources and the comparisons with industry operating under similar conditions elsewhere indicate that perhaps an equal amount was hidden or dissipated somehwere between the mountainside and the lumberyard.

EXHIBIT 2

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subtitle D of title VII of the Tariff Act of 1930 (19 U.S.C. 1677 et seq.) is amended—

(1) by adding at the end of section 771(5) the following:

"(C) Any resource input subsidy provided for under section 771B."; and

(2) by adding after section 771A the following new section:

SEC. 771B. RESOURCE INPUT SUBSIDIES.

"(a) GENERAL RULE.—A resource input subsidy exists if—

"(1) a product (hereinafter referred to in this section as an 'input product')—

"(A) is provided or sold by a government or a government-regulated or controlled entity within a country (hereinafter referred to in this section as 'exporting country'), for input use within that country, at a domestic price that—

"(i) is lower than the fair market value of the input product; and

"(ii) is not freely available to United States producers for purchase of the input product for export to the United States; and

"(B) would, if sold at the fair market value, constitute a significant portion of the total cost of the manufacture or production of the merchandise in or for which the input product is used; or

"(2) the right to remove or extract a product (hereinafter in this section referral to as the 'removal right') is provided or sold by a government or a government-regulated or controlled entity within a country and—

"(A) that product is for input use within that country;

"(B) the removal right is provided or sold at a domestic price that is lower than the fair market value of that right, and

"(C) the product to which the removal right applies would, if that right was sold at a fair market value, constitute a significant portion of the total cost of the manufacture or production of the merchandise in or for which the product is used.

"(b) AMOUNT OF RESOURCE INPUT SUBSIDIES.—

"(1) IN GENERAL.—The amount of a resource input subsidy is the difference between the domestic price of an input product, or of a removal right, and the fair market value of that product, or right, respectively.

"(2) EXCLUSIONS.—For purposes of this section, the terms 'domestic price' and 'fair market value' do not include, with respect to an input product, the costs incident to the transportation and handling required to move the product from its point of production to the respective domestic or foreign destination.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) FAIR MARKET VALUE.—The term 'fair market value' means—

"(A) with respect to an input product, the price that, in the absence of government regulation or control, a willing buyer would pay a willing seller for that product from the exporting country in an arms-length transaction; and

"(B) with respect to a removal right, the price that, in the absence of government regulation or control, a willing buyer would pay a willing seller in an arms-length transaction for the removal right in the country providing or selling the right.

"(2) SPECIAL RULES FOR INPUT PRODUCTS.—In determining the fair market value of an input product, the administering authority shall take into account—

"(A) the export price of the product;

"(B) the prices at which the product is generally available in world markets;

"(C) the current market clearing price at which the product can be sold competitively by the exporting country in the markets of other countries (including the United States) that are non-State-controlled-economy-country markets; and

"(D) the availability to the exporting country of markets described in paragraph (C).

"(3) SPECIAL RULES FOR REMOVAL RIGHTS.—In determining the fair market value of a removal right, the administering authority shall take into account—

"(A) the price paid in the exporting country for a comparable removal right not subject to government regulation or control;

"(B) the price paid in the exporting country for a comparable removal right sold or offered for sale through a process of competitive bidding; and

"(C) the price paid for a comparable removal right in a comparable region of a country other than the exporting country.

"(4) INPUT USE.—The term 'input use' refers to the use (directly or indirectly) of an input product in the manufacture or production of any class or kind of merchandise that is the subject of an investigation under this title."

SEC. 2. INJURY TEST REQUIRED IN ALL CASES IN WHICH RESOURCE INPUT SUBSIDIES ARE ALLEGED.

Notwithstanding subsection (b) of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303), sections 703(a) and 705(b) of that Act (relating to injury determinations by the United States International Trade Commission) shall apply to any investigation under that section in which the existence of resource input subsidies under section 771B of that Act is alleged.

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall apply with respect to investigations initiated by petition or the administering authority under subtitle A of title VII of the Tariff Act of 1930 on or after the date of the enactment of this Act.

EXHIBIT 3

EXECUTIVE SUMMARY

United States and Canadian softwood lumber producers, together, comprise what is known as the North American softwood lumber industry and are the principal participants in the North American lumber market. Softwood lumber production in North America increased 31 percent from 40.7 billion board feet in 1982 to 53.4 billion board feet in 1984 in response to the increased housing starts in both countries. Combined, U.S. and Canadian housing starts rose from 1.2 million starts in 1982 to 1.9 million starts in 1984, or by 59 percent. This dramatic increase is a reversal of the 1979-82 levels of such starts; combined U.S. and Canadian softwood lumber production and housing starts fell 20 percent and 39 percent, respectively, during the 1979-82 period.

From 1978 to 1982, annual U.S. housing starts, the major determinant of consumption of softwood lumber in the United States fell by nearly half. Largely in response to this drop in housing starts, U.S. production, imports, and consumption of softwood lumber each dropped by about one-fourth. U.S. exports of softwood lumber increased over 40 percent from 1978 to 1981, as U.S. producers of softwood lumber expanded off-shore markets during this period of low U.S. housing starts. In 1983 and 1984, however, a reversal occurred in the declining trend in U.S. housing starts, largely re-

flecting improved general economic conditions. During these two years, housing starts were nearly two-thirds higher than in 1982, and U.S. production of softwood lumber rose by nearly one third over the 1982 level; consumption increased over one-third. Imports, mostly from Canada, increased by nearly one-half as the U.S. demand rose. Imports as a share of U.S. consumption increased from 28 percent in 1982 to 29 percent in 1984. By 1984, U.S. exports of softwood lumber were 16 percent below the level of 1981, largely reflecting the increased utilization of U.S. produced softwood lumber in the expanding U.S. housing market.

In accordance with the request from the United States Trade Representative, the significant factors affecting the competitive status of the U.S. and Canadian softwood lumber industries and particularily the significant development affecting the competitive status of the U.S. and Canadian softwood lumber industry since the Commission's report to the Senate Committee on Finance, Investigation No. 332-134, under the Trade Act of 1930, Conditons Relating to the Importation of Softwood Lumber into the United States (USITC publication 1241), April, 1982, are reported below.

1. A COMPARISON OF U.S. AND CANADIAN GOVERNMENT POLICIES AND REGULATIONS

For Government-controlled lands in the United States, management functions are retained by the Government, and volumes of timber are put up for auction on a sale-by-sale basis; purchases compete for each sale. In Canada, cutting rights are leased or licensed under a variety of arrangements to private companies that hold these rights over extended periods.

Both countries assist their respective industries exist in order to improve economic conditions in certain regional locations, and to improve employment opportunities, and promote industrial expansion.

Generally, the realized U.S. tax rate for forestry (logging and sawmilling) is lower than the Canadian tax rate. Overall, U.S. firms benefit from the ability to claim stumpage revenues as capital gains, but Canadian firms benefit from a significantly faster depreciation schedule on plant and equipment.

Although a ban on U.S. log exports would affect the price and supply of stumpage, and to some degree the price of lumber, changes in the U.S. economy and the levels in housing construction would have a greater effect on prices and supplies.

2. A COMPARISON OF U.S. AND CANADIAN FOREST RESOURCES

The productive forest land in the United States is divided among 4 groups—farm and other private ownerships (58 percent); national forests (18 percent); forest industries (14 percent); and other public (10 percent). In Canada 80 percent is under Provincial crown authority and the remainder is under federal crown (12 percent) or private (8 percent).

3. A COMPARISON OF U.S. AND CANADIAN STUMPAGE PRICES AND APPRAISAL METHODS

The appraisal systems used for sales of timber from Government lands in the United States and British Columbia are similar. Both are based on a residual system in which costs of converting the standing timber to final products, plus an allowance for proift and risk, are deducted from a price determined for the final products, resulting in an appraised price (calculated worth) for the standing timber. However, the remaining Provinces set their timber dues (similar to stumpage rates) by regulation.

Standing timber on public land in the United States is usually sold at auction to the highest bidder (normally at a price that is higher than the appraised price), whereas in Canada it is offered under license to private companies, which generally pay the appraised price usually set by the Provinces. As long as they comply with Provincial regulations concerning their licenses, these companies are certain of a steady supply of timber over extended periods of time. The current available supply of timber in most regions of Canada is more than sufficient to meet the productive capacity of the license holders. In the United States, the allowable cut (supply) from Government lands and the offerings from private lands have been held at fairly constant levels in recent years, resulting in intense competitive bidding for sales of both Government and private timber.

Since 1982, the aggregate U.S. stumpage rate has risen approximately $10 to $104.16 per 1,000 board feet in 1984, largely reflecting the increased demand for wood products by the U.S. housing industry. However, the Canadian aggregate stumpage rate rose approximately $1 per 1,000 board feet during this period. The aggregate U.S. delivered log prices followed the stumpage rates, rising nearly $20 from $186.00 in 1982 to $204.99 in 1984 while the Canadian delivered log prices remained virtually unchanged.

3. COMPARSION OF THE UNITED STATES SOFTWOOD LUMBER INDUSTRY, AND FIXED AND VARIABLE COSTS OF PRODUCTION

During 1982-84, the U.S. industry had about five times as many sawmills and planing mills as the Canadian industry and over two and one-half times as many employees. U.S. employees worked about 300 hours more per year than their Canadian counterparts during this period. However, the Canadian employees produced about 100 board feet, per hour, more softwood lumber per hour than U.S. employees. Also, from 1982 to 1984, Canadian softwood lumber production increased by 28 percent, whereas the U.S. production increased 16 percent.

The U.S. softwood lumber industry's total aggregate variable cost to produce softwood lumber—total less residual values—was $8 per 1,000 board foot higher than Canadian costs in 1984. Overall, the United States has a higher total aggregate variable cost and has higher residual unit values.

Variable production costs in coastal British Columbia, and Oregon and Washington, such as material costs and wages, were the highest for all Provinces and States. In 1984, the average variable costs for the two areas were US$297 and US$306 per 1,000 board feet of lumber produced, respectively.

The costs for wood delivered to the mill, the largest variable cost for lumber production, are lower in Canada than in the United States. In 1984 the average delivered wood costs for Canada were US$128 per 1,000 board feet of lumber produced and those for the United States were US$156 per 1,000 board feet.

When neighboring Provinces and States are compared, similar differences in average delivered wood costs to the mill are apparent: US$125 per 1,000 board feet of lumber produced for British Columbia compared with US$184 for Oregon and Washington; US$107 for the interior of British Columbia compared with US$147 for Idaho; and US$132 for Quebec compared with US$108 for Maine.

Wages are the second most important variable cost of production after delivered wood costs. In general, wages averaged US$20 higher per 1,000 board feet of production in the United States than in Canada and accounted for 30 and 27 percent of production costs, respectively, in 1984.

Other variable costs of production such as fuel, work contracted to others, incidental materials, and packaging do not significantly differ between the U.S. and Canadian softwood lumber industries.

Fixed costs appear to be higher in the United States than for Canada. This may be partly due to costs associated with ownership (e.g., timber stand improvement, protection) of timberlands for many U.S. firms.

4. THE MARKET

Since 1982, production of softwood lumber in both the United States and Canada has increased. During 1982-84, U.S. production increased 30 percent, from 25.1 billion board feet to 32.8 billion board feet, and Canadian production increased 32 percent, from 15.5 billion board feet to 20.6 billion board feet. Canadian exports to the United States as a share of Canadian production increased from 58 percent in 1982 to 64 percent in 1984.

Although increases of softwood lumber production varied by region, production in all U.S. regions rose during 1982-84. Production in the Western United States accounted for a greater share of total production in 1984 than in 1982 (up from 55 percent in 1982 to 58 percent in 1984) and continued to be the leading softwood lumber producing region in the United States. The South's share fell from 41 percent in 1982 to 38 percent in 1984.

Canadian softwood lumber production rose in all regions during 1982-84, with the exception of coastal British Columbia; however, the interior region of British Columbia increased production by nearly one-third. During 1982-84, the western Provinces slipped from 71 percent of production to 70 percent. Production in all Canadian Provinces rose during 1982-84.

The U.S. supply situation is complicated by the variety of timberland ownership, which differs significantly by region. In the North and South, private ownership dominates. In the West, two segments of the sawmilling industry emerge: Those producers dependent on others, especially the Government, for timber, and those producers with significant holdings of their own. In Canada, with a few exceptions, the sawmilling industry is entirely dependent on public timber.

During 1982-84, the exchange rate of the U.S. dollar appreciated in real terms by 11.5 percent vis-a-vis the Canadian dollar, continuing a strengthening of the U.S. dollar which has occurred since at least 1977. [NOTE: The ITC staff indicates that the 11.5% figure is incorrect and should instead be 1.2%] This has given the Canadian producers a price advantage in selling lumber in the U.S. market.

5. A COMPARISON OF U.S AND CANADIAN MARKETING PRACTICES

The U.S. and Canadian industries follow virtually the same marketing practices. Competition for sales of similar lumber species, sizes, and grades is almost entirely by price. Lumber prices for all major species grades and sizes have increased, by between 10 and 20 percent, in response to increased demand, although the price increases may

have been mitigated because of increases in supply.

In 1984, Douglas fir 2x4's (f.o.b. mill) sold at US $182 per 1,000 board feet (U.S. lumber) and $159 per 1,000 board feet (Canadian). Southern pine 2x4's sold at $230 per 1,000 board feet compared to spruce-pine-fir 2x4's (from the British Columbia interior) that sole at $154 per 1,000 board feet (f.o.b. mill).

Canadian imports are shipped predominantly into the Souther United States and compete strongly with local production and shipments from producers in the South. Eastern Canadian producers ship into the northern U.S. and sell at similar prices to U.S. producers in the same market.

Shipments from British Columbia to the Northeastern and North Central States have declined in recent years. These have been replaced mostly be shipments from Eastern Canada. It is likely that these shipments will continue to compete strongly with Western and local U.S. supplies as well as with shipments from British Columbia, owing to shorter transport distances and lower production costs.

Since 1977, shipments by producers in the Western United States into the Southern, Northeastern, and North Central States have gradually decreased. This is due to several factors, including high transportation costs, competition from Canadian and Southern U.S. shipments to these States, and growing markets in the Southwestern United States.

6. U.S. AND CANADIAN TRANSPORTATION COSTS

All Canadian lumber shippers to markets in the Eastern United States generally have lower costs for rail transport than Western U.S. lumber shippers. Rail shipments are the preferred method of shipment over long distances. Although recent changes in U.S. regulations concerning freight charges have led to more competitive rates in the United States, Canadian shippers still have lower in-country freight charges.

Waterborne shipments of lumber from the U.S. west coast to the U.S. Atlantic coast are nonexistent, except in the rare case of the lumber first being shipped into Canada and then being shipped to the U.S. East coast. The required use of U.S. ships in intracoastal trade under the provisions of the Merchant Marine Act of 1920 have reduced waterborne shipments, and significant shipments of softwood lumber from British Columbia are now virtually the only shipments by water to the U.S. Atlantic coast.

RECOGNITION OF SENATOR LEAHY

The PRESIDING OFFICER. Under the previous order, the Senator from Vermont [Mr. LEAHY] is recognized for not to exceed 15 minutes.

CONGRESSIONAL CALL TO CONSCIENCE

Mr. LEAHY. Mr. President, I want to thank Senator BOSCHWITZ once again for all his work in organizing the Congressional Call to Conscience. Today I rise to support another Soviet Jew trying to live his chosen life.

This case is one in which I have a personal stake. It involves another Vermonter.

Dr. Jan Feldman, a professor of political science at the University of Vermont, recently learned that her husband, Aleksandr Rozman, a Soviet citizen, had been denied permission to emigrate to the United States.

Mr. President, we are all familiar with the hardships that beset Soviet citizens trying to join their spouses in the West. The story that follows is as familiar as it is tragic.

On June 19, 1985, Aleksandr Rozman and Jan Feldman were married in Leningrad in accordance with Soviet laws. Their ceremony was performed by officials of the Soviet Office of Marriages.

After learning that his wife was pregnant, Mr. Rozman applied to emigrate from the Soviet Union and join here in Vermont.

Two weeks ago, his request to leave was denied on grounds that it was "not in the interests of the Soviet State." Thus, a young man and his wife have been denied permission to live together because some unspecified—and, I suspect, nonexistent—state interest is deemed to be at stake.

Immediately after hearing of the Soviets' decision to refuse her husband a visa, Dr. Feldman suffered a miscarriage.

The Soviet Government's insensitivity to the needless pain that it causes creates international tensions. It heightens public skepticism about the sincerity of Soviet aspirations for improved relations.

Cases like this involve American citizens and are the legitimate concern of the U.S. Government. This is not a political issue—it is a human issue: It requires resolution on that basis. Mr. Rozman, and others like him, should not be treated as political pawns.

There are 25 families similarly divided. I ask today that the Soviet Union end this sad situation and show respect for the family: the basis of civilized society. The Soviets will find the interests of their State furthered by acts of simple humanity.

Mr. President, every long journey starts with a small step. If we are to negotiate with the Soviet Union on global issues like nuclear arms control, and cannot negotiate the simple reunion of a handful of families, I fear the worst.

I plead with the Soviets to reunite Aleksandr Rozman and his wife and allow them to live their life together without interference or coercion—in the name of compassion and human decency, which serve the interest of us all.

I cannot think of anything in my own life that could even begin to approach the distress I would feel in being separated from my own family and to know that it was a separation over which I had no control.

Mr. President, I am reminded of another instance. I recall, during my first few months as a Member of the United States Senate, visiting the Soviet Union with our good friend and late colleague Hubert Humphrey.

Prior to leaving, I was visiting with some friends in New York, and I met, for the first time, Avital Shcharansky. I recall her telling me the story of her separation from her husband after their marriage and how Anatoly Shcharansky was being denied permission to leave the Soviet Union.

She had been able to correspond with him and even to telephone him on occasion, but she knew that her letters were censored; they were opened and reviewed. Their telephone calls were being monitored—in fact, in a way to make sure she and Mr. Shcharansky realized it.

I asked her if she had letters she wanted brought to him. I asked her to give them to me. She handed them to me unsealed. I said: "No, please seal the letters, so when your husband receives them, he will know that nobody but the two of you will have seen the letters, and I will deliver them to him personally in Moscow."

I put the letters in my pocket and brought them to Moscow.

As with any delegation of that nature, we were not required to go through customs. I carried the letters to a meeting attended by Senator Ribicoff—a former colleague of the Presiding Officer [Mr. WEICKER]—Senator Humphrey, Senator Javits, and myself. I gave Mr. Shcharansky those letters.

In doing that, I recall thinking how unjust a system is that allows only this kind of private contact between a husband and a wife, only because of the happenstance of somebody going to the Soviet Union to bring an unopened and uncensored letter.

We all know how tragic that case has been since then, with the wholly unjustifiable imprisonment of Mr. Shcharansky and his continued separation from his wife.

I mention this today only because it shows a pattern—a pattern that I hope will be broken for Dr. Feldman and her husband.

I cry out, really, not as a Senator or as a Vermonter but as a human being. I ask the Soviet Union what they can possibly gain by this. What can they possibly gain by causing misery, which accomplishes nothing for them, but is so terrible and so devastating to a family? I ask them to reconsider.

Mr. President, I yield back the remainder of my time.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

THE MOST LIKELY SOURCE OF NUCLEAR WAR

Mr. PROXMIRE. Mr. President, every informed person in this country knows that a nuclear war would be a total, unmitigated disaster. The United States and the Soviet Union both, at this moment, have the power to destroy the other utterly if only a tiny fraction of their massive nuclear arsenal hits the major cities in the adversary country.

Recently, the National Academy of Sciences, our most prestigious scientific body, concluded that the results of nuclear war would be far, far worse than had previously been estimated. This was only in the last week or two. They concluded that if only 1 percent of the Soviet nuclear arsenal should reach American targets, we would lose between 36 million and 56 million Americans immediately killed. Much of the rest of the American population would perish from the ravaging aftereffects of the attack and America would lie in smoldering ruins. In the view of this Senator, such a catastrophe, fortunately is extremely unlikely.

But there is another possibility fraught with immense danger that is far more likely. What nuclear catastrophe is more likely to happen? Sometime in the next 10 or 20 years a devastating nuclear war could begin without any action by either the Soviet Union or the United States. The consequences could easily be as devastating before such a nuclear war ended as a nuclear exchange between the two superpowers. Why is this such a threat? It is a threat because of the growing potential prospect of the wholesale spread of nuclear weapons. On Wednesday of this week, the Foreign Relations Committee held hearings on the new nuclear agreement between the United States and the People's Republic of China. That agreement represents an astonishing weakening in the safeguards our country has always insisted on before in previous agreements respecting the sale of nuclear know-how and technology to other countries.

Consider these four major changes in the latest nuclear sales agreement:

First, nowhere in the agreement with the People's Republic of China does the People's Republic of China make a clear, unambiguous pledge that they will not in turn sell this nuclear capability to other nations. What a precedent. In previous agreements we had that kind of a pledge. Not this time. This change in policy, this dangerous new precedent is certain to advance the spread of nuclear weapons. Just ask yourself how can the United States now tell any other nation that they must promise not to proliferate when we have not required such a commitment from the world's biggest Communist country?

Second, the agreement this country has just signed with the People's Republic of China has no safeguards. In the past agreements we have insisted on a system of thorough accounting and monitoring of our nuclear exports. Where is it in this agreement? Nowhere.

Third, this new agreement with the People's Republic of China lets China escape from any proliferation laws this country may pass in the future. And, mark my words, Mr. President, as nuclear weapons spread to other countries, and we can expect they will in the next 15 or 20 years, we will pass laws to try to stop the spread. But this agreement with the People's Republic of China will exempt the People's Republic of China and because of the precedent make it very difficult for the United States not to exempt other nations.

Fourth, the so-called Non-Proliferation Act requires that an agreement for the sale of our nuclear materials or technology have a clear and unambiguous guarantee that the United States has a right to veto another country's right to reprocess American spent fuel into weapons grade plutonium. Does the People's Republic of China agreement have this absolute guarantee for the United States? No. It does not. I repeat, Mr. President, this agreement does not give the United States this right to stop reprocessing our own spent fuel into vital nuclear weapons material. Oh, sure, the agreement does say that both sides will negotiate on this U.S. veto sometime in the future. But, meanwhile the Chinese are sitting there with warehouses full of weapons grade plutonium from materials furnished by the United States, completely within their control.

Mr. President, there is another even more dangerous and threatening development that will immensely speed up the spread of nuclear weapons. It is the United States stubborn refusal to agree to a mutual, verifiable, comprehensive end to nuclear arms testing. What has that to do with the spread of nuclear weapons? Everything!

Right now, as we meet here, this country is engaged in developing a new, infinitely more destructive weapon, the so-called antimatter bomb. It will take a few years and many tests. But when that weapon is perfected it will be small. It will be cheap. And it will have more than a hundred times more destructive power per pound than any nuclear weapon now in existence.

So far in the 40-year-old nuclear weapons age, there has been very little proliferation. Why? Because nuclear weapons, a genuine nuclear arsenal, costs far too much for all but a few major countries. Will that be true when this country, and when the Soviet Union, have perfected the antimatter bomb? No way. The history of these nuclear weapons breakthroughs is that they remain the property of the scientific pioneer country that first develops the weapon for a matter of a few months, a few years at the most.

Mr. President with the simultaneous erosion of nuclear nonproliferation restraints evident in the agreement with the People's Republic of China and the onrushing surge of a new cheaper technology coming on like gangbusters in our weapons testing laboratories, the likelihood of widespread nuclear proliferation represents the greatest danger to human survival in this nuclear weapons age.

Mr. President, I ask unanimous consent that a statement this Senator delivered to the Senate Foreign Relations Committee on the dangers involved in the agreement reached by the administration and the People's Republic of China be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WILLIAM PROXMIRE BEFORE THE COMMITTEE ON FOREIGN RELATIONS ON THE UNITED STATES-PRC NUCLEAR COOPERATION AGREEMENT

Mr. Chairman, I deeply appreciate having the opportunity to address the Committee on what I feel will probably be the most important nuclear cooperation agreement the United States will sign in this decade.

I would like to commend the Chairman and the other members of the Committee for holding these two very important hearings. I think you will agree with me that this agreement not only has tremendous implications for future economic relations between the United States and the People's Republic of China.

The agreement also has tremendous implications for U.S. nonproliferation policy and U.S. national security.

In the judgment of this Senator, nothing but nothing is nearly as important as stopping nuclear proliferation. The prospect of a planned premeditated nuclear attack by either superpower is fortunately very slight. But if nuclear weapons spread throughout the world, a nuclear war becomes a probability.

Earlier this year, Congress passed and the President signed into law provisions that restored some of Congress' oversight authority over nuclear cooperation agreements, which had been invalidated as a result of the Supreme Court's 1983 Chadha decision.

This renewed congressional oversight comes at a particularly important time, because before us is what I think we all agree a very controversial nuclear cooperation agreement, whose language in many instances is very unorthodox or ambiguous.

In other words, if ever there were a nuclear cooperation agreement that cried out for a close review by the Congress, it is the U.S.-PRC agreement.

Now let me say at the outset, Mr. Chairman, that I favor closer economic ties with the PRC.

I agree with those who say that we should have a healthy trade relationship with the PRC. I think it serves the interest of both nations.

Clearly, the United States stands to benefit from energy technology transfers to the PRC in terms of expanded trade opportunities, improved diplomatic relations, and increased energy supplies on the world market.

But in considering these opportunities, we should not forget the fact that shipping sophisticated nuclear equipment technology, and materials to the PRC—or any country, for that matter—has its risks.

If the PRC misuses our nuclear trade or uses it in a way that undercuts our nonproliferation goals in other parts of the world, the United States might well end up with a national security nightmare on its hands.

Furthermore, in considering the opportunites for friendlier relations with the PRC, we should not forget the fact that the nonproliferation headaches we have had in the past with nuclear trade have been primarily with our friends.

We should not forget the fact that nuclear trade has often ended up being a source of friction and discord in our relations with individual countries. I think India is a perfect example of this fact.

For that reason, in launching nuclear trade with the PRC—or any other nation—we should consider two fundamental questions:

First, what kind of nuclear trading partners will we be dealing with?

And second, does the nuclear cooperation agreement we sign with this new trading partner have the ironclad provisions that are necessary to ensure that what we export will not be misused and to ensure that there will be no misunderstanding or disagreements down the road over how the accord will be implemented?

As for the first question, it appears that we may be taking a leap into the unknown with respect to how responsible a trading partner the PRC will be.

I recently asked the Library of Congress and CRS to prepare two reports for me. One was on the PRC's attitude toward treaties. And the other was on its record of compliance with the agreements it has entered into with the United States.

I would ask that the two reports be placed in the record.

Their findings, Mr. Chairman, leave me worried. The first report by the Library of Congress's Far Eastern Law Division—on the PRC's attitude toward treaties—states that while the PRC has recently concluded that international laws and treaties are vital to its national interest and while the PRC presently attaches great importance to abiding by international laws and treaties, there are still two major reasons why we might doubt the PRC's reliability to live up to its treaty obligations.

The first reason is that "the contemporary Chinese understanding of legality is limited," according to the Library of Congress report.

In other words, even though the PRC may now attach great importance to abiding by treaties, it's still not clear whether the PRC has a full understanding of the binding nature of treaties and will follow them as we would like them to be followed.

The second reason we might doubt the PRC's reliability to live up to treaty obligations is that its political history has been stormy, and with each change in leadership there has been a change in the PRC's attitude toward laws.

Presently, under Deng Xiaoping's leadership, the PRC may consider it in its national interest to live up to its treaty obligations. But whether or not this policy "will survive after Deng is gone remains unknown," according to the report.

The second report by CRS—on the PRC's compliance record—raises even more disturbing questions. That report states that of the 15 agreements the PRC has signed with the U.S., "China apparently has violated the terms of two accords, the grains agreement and the cultural relations agreement." And "its adherence to an aviation agreement is seen as less than complete," according to CRS.

Incidentally, the PRC's violation of the grains agreement with the U.S. probably cost U.S. farmers about $600 million in lost sales.

If the PRC's attitude toward treaties raises a lot of questions, its attitude toward nonproliferation raises even more.

Even though the PRC has changed its nonproliferation policy for the better in recent years, even though it has joined the International Atomic Energy Agency and has recently announced that it would open some of its facilities to IAEA inspection, the PRC's commitment to preventing the spread of nuclear weapons can hardly be classified as enduring.

On the contrary, serious questions remain as to whether the PRC's current commitment to nonproliferation is anything more than a commitment of convenience—a commitment that could just as easily be reversed in the future.

The PRC's past attitude toward nonproliferation has been cavalier, to put it charitably.

In 1963, for example, a PRC government spokesman stated that "it helps peace" if nuclear weapons "are in the hands of socialist countries."

In 1965, the Beijing Review stated that "China hopes that Afro-Asian countries will be able to make atom bombs themselves."

In 1966, then Premier Chou En-lai stated that "nuclear weapons cannot be monopolized."

In 1978, Foreign Minister Hua Huang stated that non-nuclear countries should not be pressured "to abandon their right of possessing nuclear strength for self-defense."

These are shocking statements, Mr. Chairman. And they should not be ignored as we evaluate the PRC's present stand on nonproliferation.

Furthermore, they should not be ignored in light of persistent press report that the PRC has aided Pakistan in nuclear weapons development, and that the PRC has made questionable or unsafeguarded nuclear exports to other nations, such as Argentina and South Africa.

Considering all the dangers associated with nuclear exports and considering all the uncertainties about what kind of nuclear trading partner the PRC will be, it is critically important that the nuclear cooperation agreement we sign with the PRC is airtight.

It is also critically important that the U.S.-PRC agreement strictly conform not only with the letter of the 1978 Nonproliferation Act but also with the spirit of that law.

However, the U.S.-PRC Agreement, as it now stands, has four major flaws:

1. Nowhere in the agreement does the PRC make a clear and unambiguous pledge to nonproliferation. In other agreements we've had such a pledge, but not with the PRC.

This is a troubling omission, Mr. Chairman, considering that country's past nonproliferation record is so suspicious.

In the PRC's case, the nonproliferation pledge should be plainly written in the agreement. It should not be a collection of dinner toasts, speeches, or secret unilateral understandings.

Think of it for a moment, Mr. Chairman. The PRC is the world's second leading communist power, which was once our bitter enemy and which refuses to sign the 1970 Nonproliferation Treaty. And here we have an agreement where there's barely a hint at any commitment to nonproliferation.

Why should other countries that now sign agreements with us make any nonproliferation pledge, when they see what the PRC has gotten away with?

2. The PRC agreement has verification problems. The Nonproliferation Act requires that any cooperation agreement we sign with a nuclear weapons state like the PRC must have safeguards. These safeguards usually involve a thorough accounting and monitoring systems for our nuclear exports.

Does the PRC agreement provide for safeguards? No. It does not, Mr. Chairman.

The agreement only calls for negotiations for some vague visitation rights down the road. If the President negotiated such a vague verification provision in an arms control agreement with the Soviets, Mr. Chairman, it would be laughed right out of the Senate.

Incidentally, it appears that our nuclear trade with Great Britain and France is governed by much tighter verification under the Euratom safeguards than what we will impose on the PRC.

3. The PRC agreement contains a provision that seems to say that the PRC can ignore any future U.S. nonproliferation laws that might restrict our nuclear exports.

In past nuclear agreements, there have been provisions that the agreements must comply with U.S. laws. But the PRC agreement appears to state that if down the road, the U.S. passes another version of the 1978 Nonproliferation Act—say, in response to some new nonproliferation threat like the India nuclear explosion was in 1974—PRC officials could say the new law doesn't apply to their country under this agreement.

I'm not the only one who has raised this concern, Mr. Chairman. The Nuclear Regulatory Commission, in an unclassified response to questions I raised about the agreement, states that it is also concerned that "this new provision could be read as reducing the flexibility of the U.S., including that of Congress, in enacting and implementing future legislation affecting U.S./PRC nuclear relations."

The larger problem, however, will be the effect this escape clause in the U.S.-PRC agreement has on our dealings with other countries. Will they demand this same escape clause in the nuclear cooperation agreements they negotiate or renegotiate with us?

Are we going to eventually end up with a situation where if Congress passes another Nonproliferation Act to tighten export controls, all our nuclear trading partners will feel free to ignore the Act?

I would ask, Mr. Chairman, that the letter I received from the NRC be included in the record. That letter, as the Committee will see, reveals that the NRC has serious concerns whether certain provisions in the agreement will lead to what the Commission

51-059 O-86-5 (Pt. 20)

calls "future misunderstandings" between the U.S. and the PRC.

4. The fourth flaw in the agreement is its most serious flaw, Mr. Chairman. The Nonproliferation Act requires that a cooperation agreement have a clear and unambiguous guarantee that the United States has veto rights over another country reprocessing our spent fuel to extract its bomb-usable plutonium.

Does the PRC agreement have this clear-cut guarantee? No, it does not, Mr. Chairman.

In effect, the State Department has punted on this question. All the agreement says is that both sides will negotiate the veto rights down the road, after the PRC has warehouses full of our spent fuel piled up and ready to reprocess.

When that time comes, the agreement is worded in such a way that it would be very difficult for us to veto any plans by the PRC to extract the bomb-usable plutonium from our spent fuel.

As I've said, Mr. Chairman, there are benefits from expanded trade with the PRC.

But there are serious risks involved with nuclear trade, and this agreement does not appear to lessen those risks.

Its loose langauge sets us up for negotiating headaches and nonproliferation nightmares in the future—particularly with the reprocessing provision.

Its ambiguous verification provision will make it difficult for us to ensure that the PRC complies with the agreement.

And finally, the agreement sets a dangerous precedent for our nuclear policy with our other trading partners. What will happen when our other allies—the ones who've always been our friends—come to us and ask for the same concessions we've granted the PRC?

Are we going to tell them, no. We can only allow the PRC to have these lax provisions? Are we going to say that the PRC will be held to a lower nonproliferation standard than our other nuclear trading partners?

Of course not.

For these reasons, Mr. Chairman, I strongly urge that the Committee call on the President to resubmit this agreement with a waiver.

I also believe that the secret understanding the Administration has reached with the PRC should be made public.

This secret understanding reportedly is the PRC's commitment to nonproliferation. If that commitment is worth anything, it should be made public by the PRC.

And finally, Mr. Chairman, I do not believe this agreement should go into effect unless we have further ironclad assurances that any nuclear exports we might make to the PRC in the future won't create nonproliferation nightmares.

If that means going back to the PRC to renegotiate the agreement, or reaching further amendments or public understanding between both countries, so be it.

This agreement is much too important, its implications for future generations are much too critical, to leave all these loose ends, Mr. Chairman.

Thank you.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, it is clear that this administration has as one of its most basic tenets the philosophy that sales of military equipment abroad are critical to the support and nurturing of U.S. foreign policy goals. That is a myth of delusion. But how else does one explain the fact that the United States has delivered $31 billion worth of arms to the Third World alone during the year period 1981–84? During that time the United States accounted for between 21 and 31 percent of all arms deliveries worldwide to the Third World.

And for what purposes are U.S. weapons put? In some cases they are used for internal supression of the resident populations. It is not an uncommon sight to see United States made tanks patroling the streets of military dictatorships as in Chile or United States equipment used in a coup attempt such as recently occurred in Thailand.

U.S. military sales are also used for local wars. Pakistan and India fought using United States hardware on both sides. That is right—U.S. weapons killed people on both sides. The United States arms Israel, Saudi Arabia, and Jordan in the powder-keg Middle East. In an ultimate irony, United States military aircraft are now being used by Iran against Iraq—after being compromised to the Russians, of course, at great cost to our national security as well as to the taxpayers purse.

Do these U.S. arms sales ever bring peace and stability? Seldom. For every example of U.S. sales bringing stability, there are several examples of U.S. arms bringing war, a terrible threat of war, and always an economic drain.

Arms sales do not promote U.S. interests or respect for America abroad. It is a myth that they do.

THE HOLOCAUST, IN COURT

Mr. PROXMIRE. Mr. President, as astounding as it may seem, there are still people who insist that the Holocaust never happened. A California court, however, has rejected this twisting of history and reaffirmed that the Holocaust did, in fact, occur.

The circumstances surrounding the case are quite interesting. The Institute for Historical Review, a group that denies that the Holocaust happened, offered $50,000 to anyone who could offer proof that Jews were gassed at Auschwitz.

Mel Mermelstein, a 58-year-old survivor of Auschwitz, submitted proof in the form of declarations by other survivors who witnessed friends and relatives being taken away to their deaths by the Nazis. His personal declaration described how he watched his own mother and sister being led away to the chambers. The institute, however, refused to accept his evidence and continued to say that the Holocaust never happened.

When the organization refused to pay Mr. Mermelstein the $50,000 reward it had promised in its offer, Mermelstein sued the institute. This suit was filed in February of 1981 and a settlement was not reached until late July of this year.

Judge Robert Wenko of the California Superior Court approved the settlement that calls for the Institute for Historical Review to pay Mr. Mermelstein a minimum of $90,000. This includes the $50,000 originally pledged in the offer and an additional $100,000 for the pain and suffering caused by the reward offer, which will be reduced to $40,000 if the payment is made immediately. Mr. Mermelstein plans to donate the $90,000 to the Auschwitz Study Foundation.

The institute agreed to the settlement on July 22, 2 weeks before the trial was set to begin. Under the terms of the agreement, the institute, in addition to paying the $90,000, must issue a formal written apology to Mr. Mermelstein and all Auschwitz survivors for the pain it caused them by contending that the Holocaust was a myth. The institute must also acknowledge a pretrial finding that the fact that Jews were gassed at Auschwitz is indisputable.

Mr. Mermelstein's lawyer, Gloria Allred, said:

> Mr. Mermelstein's victory in this case will now send a clear message to all those throughout the world who attempt to distort history and inflict misery and suffering on Jews, that the survivors of the Holocaust will fight back through the legal system to protect themselves and vindicate the truth about their lives.

She added:

> The record we have made in this lawsuit will be sent throughout the world and remain a written memorial to the 6 million Jews murdered by the Nazis.

Despite the settlement, the institute continues to maintain publicly the outrageous belief that the Holocaust never happened. The institute's director, Tom Marcellus said:

> It's the best outcome we could have had. We did not have to compromise any of our positions. All we're doing is apologizing to Auschwitz survivors for the pain which may have been associated with our reward offer.

Mr. President, this refusal to accept the occurrence of the Holocaust is both inane and tragic. The presence of an international tribunal enforcing punishment against perpetrators of genocide, as called for in the Genocide Convention, would eliminate the need to prove the existence of the Holocaust in a civil court.

Mr. President, the world must act in a united effort to carry out justice against those committing genocide. The United States is the only major nation in the world that has not ratified the Genocide Convention, a fact which hampers the effectiveness of the international community in upholding the provisions of this basic human rights treaty.

Mr. President, I ask unanimous consent that the New York Times editori-

al of July 29, "The Holocaust, Proved," commenting on the Mermelstein case, be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE HOLOCAUST PROVED

In America, courts are asked to settle questions about almost everything, even history, and now a Los Angeles case has in effect determined that yes, the Holocaust did take place. For anyone to deny it is a transcendent obscenity of our time, yet that's just the position of an organization called the Institute for Historical Review. It offered a $50,000 reward to anyone who could prove that the Nazis gassed Jews, but then had to be sued by an Auschwitz survivor who did so.

In settling the suit, the institute has finally agreed to pay, but not to accept. Its director, Tom Marcellus, says, "We did not have to compromise any of our positions." He still cannot see "any kind of evidence" that Jews were gassed at Auschwitz.

Coming to grips with the extermination of millions has taken not just years but generations. It has not been enough to expose those who ran the death camps as aberrant monsters. They were monsters, surely, but over time society has found it easier to acknowledge that they were human monsters. What made them so may thus be latent in all of us. To keep the reverberating pledge, Never Again!, mankind needs to understand.

To understand, mankind must confront, unblinking, the fullness of the Holocaust, like the face-draining sadism of Sophie's Choice: Which of her children would she pick to live? Millions were forced into choices like that and to deny that crackles with the horror of the Holocaust itself.

Why are people like Mr. Marcellus and his colleagues so determined to deny? The world does not lack for bones and ashes, files and witnesses. Even after 40 years, the night does not lack for silent screams. Beyond that, the years have also brought other kinds of testimony.

In the "Hers" column in The Times last week, Rabbi Susan Schnur told of once staying at a friend's house. In the middle of the night, the father "came padding down into the room. Oblivious of me, he went into the kitchen, cut himself a slab of rye bread" and then stood with it in the dining room. "Chleb, he said finally, thrusting the bread into the air. 'Broit'—he held the bread against his pajama pocket. 'Pane'—he shook it. 'Lechem'—kissed it. 'Bread'—took a bite.

"This he did over and over, saying the word in more languages than I could imagine existed . . . Then he burped roomily and went back up the stairs to bed . . . He seemed sometimes, on an ordinary morning, almost stunned by the fierceness of his happiness. He was, it seems now, exhausted by his blessings; in a sense, afraid of them. He was a Holocaust survivor," she wrote. "The contrast woke him in the night."

It's not hard to imagine how Mr. Marcellus might respond: "That's not even a horror story, just a sentimental anecdote. Doesn't prove a thing." True, it's not a story of horror. It's something far more moving: a story of gratitude, a gratitude so profound that it wakes a man in the middle of the night to embrace a piece of bread. And in that gratitude, Mr. Marcellus—had you the eyes to see it—you would find your proof. Living proof.

CLOTURE VOTES SCHEDULED FOR 1 P.M.

The PRESIDING OFFICER. The time to lay down the cloture motion has arrived.

Mr. DOLE. Mr. President, I ask unanimous consent—and I would say, at the outset, I have cleared this with the distinguished minority leader—that any action on the two cloture motions at the desk be postponed until 1 p.m.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. DOLE. And also that the live quorum under rule XXII be vitiated.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. DOLE. Mr. President, are there other special orders?

The PRESIDING OFFICER (Mr. WALLOP). There are no other special orders.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond 10:45 a.m., with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. DOLE. Mr. President, I hope at this time the Senator from New Jersey, Senator BRADLEY, will be prepared to take up his first amendment. I think he has two.

I believe the order is Senator BRADLEY, then Senator GLENN, Senator LEAHY, Senator BOREN, Senator BRADLEY, Senator MOYNIHAN, and then Senator ZORINSKY.

I understand that Senator DOMENICI and Senator CHILES have been working since late last night and they have resolved a number of the issues in the proposed Domenici changes. Hopefully, that can also be disposed of today.

I understand that the distinguished Senator from Montana, Senator MELCHER, would like to reserve the right to offer an amendment.

I would indicate that I might want to offer an amendment which would prohibit the Treasury from using the Federal Financing Bank to, in effect, increase the debt ceiling. In my view, they have an alternative way to deal with it. They ask for an increase.

It is also my understanding that when Paul Volcker was an Under Secretary of the Treasury, he testified before the House Ways and Means Committee in 1973 with reference to the FFB borrowing authority and that it would not be used to exceed the debt ceiling. At that time, the Treasury was willing to clarify that understanding in the FFB statute.

The law was not changed. I think this is an opportunity to take it away. The Federal Financing Bank is used by a number of other agencies. We do not believe Treasury needs it. We believe what Treasury needs is a little stiffening, but they cry "Uncle" at the first thought of any hard decisions.

It is my view that we have effectively undermined the efforts we have been working on in the Senate for the past several days.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

A NEW APPROACH TO GLOBAL ECONOMIC RELATIONS

Mr. DOLE. Mr. President, I recently had the opportunity to read a speech delivered by former Trade Ambassador Bob Strauss to the Economic Club of New York on September 18. I regard Bob Strauss as one of the most astute and balanced observers of international economic and trade issues, and his remarks on this occasion encapsulate the complexities and themes in a concise and coherent manner. I ask unanimous consent that the text of Ambassador Strauss' address be reprinted at the end of my remarks.

EMPHASIS ON POSITIVE ACTIONS

In his speech, Ambassador Strauss avoids another weary repetition of all the problems facing U.S. efforts to restore a healthy environment for world economic recovery and growth and liberalized conditions for international trade. Instead, he mentions some of the actions which the United States and its global economic partners can undertake which promise to move things in a positive direction.

Among these constructive steps, he lists administration statements on the need for structured intervention in foreign currency markets, exploration of possible reforms in the international monetary system, the pursuit of an aggressive legislative trade package by the administration, and initiation of a new round of multi-lateral trade negotiations. I would note that, in the very few weeks since the Ambassador's remarks, there has been significant progress in nearly all these areas. And we hope to have a trade initiative shortly in the Senate that, together with the administration and House plans, can be fashioned into a bipartisan trade policy for dealing with our commercial partners and competitors.

THE NEED TO ADAPT TO GLOBAL CHANGE

Ambassador Strauss also points out the fact that, in the 40 years since the Second World War, the United States has failed to adapt its trade and economic policies to rapidly changing conditions in the world at large. As he indicates, the United States has nurtured a self-image of being the arbiter of most of the world's international affairs—a notion that is now obsolete and fails to recognize our changing role in the world economy.

The solution proposed involves sacrifice on the part of the major Western economic partners—the United States, the European Community, Japan, and Canada. The United States must put its domestic economy in order rather than seeking to simply externalize its problems through trade protectionism. Japan must act to broaden out its industrial procurement practices and relax its defensive deployment of nontariff trade barriers. And Europe must recognize the destabilizing impact of its internal agricultural system on global trade in commodities and accept the need for substantive reforms in the GATT.

Mr. President, I commend Ambassador Strauss' insights to my colleagues, and hope they will provide some illumination as we proceed to deal with these difficult and demanding issues in the coming months.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY ROBERT S. STRAUSS BEFORE THE ECONOMIC CLUB OF NEW YORK

I want to depart from the usual perspective of statistics and cliches relating to our trade problem, and begin my remarks tonight by putting the alarming trade posture of this country into a political perspective, because it is in the political arena, and from political pressures that the current economic situation will be addressed by the Administration and Congress.

Within the last 48 hours, the press has reported Senator Bentsen, a Democrat with a long free trade posture, saying: "When the president won't do anything, the Congress has to look at its options and stop the hemorrhaging of the industrial base of this country." And Senator John Danforth, Republican and Chairman of the Senate Trade Subcommittee, saying: "I don't like the idea of Congress managing trade policies, but we have no alternative." John Heinz, Chairman of the Republican Senatorial Committee and an influential lawmaker on the trade issue saying: "I think the Administration is becoming more practical. There is growing realization at the White House that many of the issues the Administration has had on the back burner or even didn't know were cooking in the kitchen, like trade, will not go away." Roger Stone, a Republican political strategist said that the stakes are high in terms of controlling the agenda and also said: "Reagan was an activist president in his first term. He cannot afford in his second term to be a stand-pat political figure. He can't just say, 'I'm a free trader, and that's the end to the trade problem.'" And finally, Fred Bergsten, Democrat and Director of the Institute for International Economics has stated: "There is a mistaken impression in Congress that changes in the trade policy would turn around the deficit." Bergsten estimates that ending other countries' unfair trade practices and protecting some American industries would shave only $10 billion from the $150 billion trade deficit.

This is the political climate Ambassador Yeutter faces as he attempts to guide U.S. trade policy—and I don't envy him. While obviously some of our problems have been beyond our control, the truth is, we are responsible for much of the dreary trade picture. The complex relationships between domestic and international goals have been either misunderstood, ignored or both. The White House primarily, and to a lesser extent, the Congress, have failed to appreciate that domestic economic policy has a direct effect on the United States' external position.

So let me begin my remarks by next listing a few givens so far as trade is concerned.

1. An open trading system is absolutely essential.

2. There is no real open trading system today. What we call an open trading system is just not working—it's broken—so we better try to fix it.

3. The GATT is weak and in many ways ineffective, but it is essential and must be strengthened. But if we rely on the GATT alone, we won't make it.

4. It's hard to find a sector or industry where free trade really exists. It doesn't exist in copper, and it doesn't exist in wheat; it doesn't exist in autos, and it doesn't exist in corn. It doesn't exist in steel or textiles, and it doesn't exist in telecommunications—to name a few.

5. More and more, trade is government managed. Our industries and farmers compete with governments, not people and companies.

6. If we don't come to grips with the present deteriorating situation, the forces of protectionism will substantially close the doors on world trade as we have known it for 40 years.

To those givens, I would add that, in my judgment, there are no simple, easy or quick answers. As a matter of fact, we haven't identified any hard and difficult answers. But there are strategies to be put in place to begin the long and arduous road to a better trade climate for the free world.

Today's trade problems are entirely new and different from those cast against the background of World War II. This is not 1944 in Bretton Woods, New Hampshire. Simply stated, the world has changed; and the United States, through Republican and Democratic administrations alike, has not adapted to that change.

The country's trade problems cannot really be solved until we understand the global impact of our domestic policies, put our economy on solid ground and live within our means. Moderate progress in highly visible areas such as inflation, while significant, is masking a basic erosion of our economic strength. Let me offer an example.

The Administration recently announced that unemployment has been reduced to 7 percent—an encouraging development, but not surprising given the Keynesian economic policies the Reagan Administration has been pursuing. However, with each passing day, one reads stories in the press of Fortune 500 companies deciding to close modern plants in the United States and transfer production abroad. How long can it continue—where will it end? There is not question that the merchandise trade deficit, if not corrected and corrected soon, could have long-term consequences for the U.S. economy. In recent days the Administration has announced that it will work with the Congress to develop a new trade legislative package. I hope this effort is successful, but we must recognize that it is no substitute for a set of economic policies aimed at solving our basic problems. Domestic policy can't be made in a vacuum in the United States, Europe or Japan. What each does at home has dramatic impact abroad.

While closed markets and predatory practices have taken their toll and must be addressed, there are three additional and fundamental causes of the merchandise trade deficit. First is the differential growth rates which have distinguished the United States from its slower growing trading partners, particularly Japan and Europe; second, the huge debt of developing countries which has significantly impaired their ability to purchase our exports; and finally, the massive overvaluation of the dollar.

The single most important thing we can do to restore equilibrium to exchange markets is to reduce our budget deficit. To do so in today's political climate requires budget cuts and increased taxes, and both seem unlikely in the light of Administration policy and Congressional attitudes. Nevertheless, there are certain things the Administration could be doing to begin to talk the dollar in off the ledge, including but not limited to creditable statements to intervene in exchange markets where appropriate, pick up on Secretary Baker's initiative regarding reform of the monetary system and more vigorously encourage the Japanese to adopt policies aimed at gradually reducing the massive capital outflows which should appreciate the yen and lower the dollar. In addition, the Administration should pursue its plans with respect to trade legislation and continue to urge multilateral trade negotiations. This sort of program is doable, is not pie-in-the-sky and gets closer to attacking the fundamental causes of our trade problems and would help quell the protectionist fires now raging in Congress.

Let me now change the thrust of my remarks a bit and look at a few specific situations, beginning with Japan. Frank Gibney, in his superb new book, makes the point well that since World War II, the Japanese have continued to think of themselves as a vulnerable, semi-developed and resource-poor country pushing intensely to keep up. And further, that Japan has nurtured a semi-dependent attitude toward the United States that sacrifices a great deal in the relationship in return for American tolerance of Japanese marketing successes. Japan obviously is willing to pay a high political price for continued U.S. economic indulgence.

Gibney points out America's self-images are no less illusory. That we have appointed ourselves the world's arbiter in all fields and have been so impressed with our position and importance that we have neglected the hard work necessary to stay in that position. We live in the memory of a world that no longer exists and we have totally overlooked the unraveling of our economic position. Now we find ourselves, by virtue of neglect and self-indulgence, debtors instead of creditors. This, combined with Japan's policies, has brought on the Japan-bashing over trade imbalances that could easily destroy a relationship we both need.

Our theory seems to be when in trouble, spend and consume, and theirs just the op-

posite, when in trouble save and produce more for export. Japan must stimulate domestic demand through increased private and public spending.

We are familiar with tariff and non-tariff barriers, unfair trade practices and other actions standing in the way of true free trade. Something must be done about them. We must really toughen up in dealing with our partners. But few in the business or political community seem to understand that while attacking the problem of closed markets and predatory trade practices is absolutely essential, it will only marginally reduce our trade deficit if we don't simultaneously deal with the basic underlying causes.

I'm not trying to make an excuse for the protectionism embedded into the Japanese system. They deserve a great deal of the public criticism they get, but they are not alone. And we surely can't expect them to disrupt their economic structure to appease our political forces. A long-term solution requires that their economy be operated with sensitivity to its impact on the economic and political relationship with this country, just as our policies must be made with recognition of their impact not only at home, but in Japan, Europe and the rest of the world.

My purpose tonight is not to pass judgment on where we have been. There's plenty of blame to go around. The revival of our national spirit accomplished by President Reagan has not and will not solve our critical trade problem caused by neglect. To do that, the President must take the lead in forging a real debate which results in a policy for this country that will lead us forward with a meaningful, effective, hard-hitting, progressive trade posture for this country and indeed the free world. It's absolutely essential that the free world leadership, led by Ronald Reagan with his popularity base, address itself to global situations. Together, the U.S., Japan, the EC and Canada, with sensitivity to the needs of the Third World, as well as to their excesses, must strike a major global bargain and enter into a compact. A compact in which the parties agree to take the kind of steps that are politically impossible for any one of them to make alone. Out of such a trade summit must come a simultaneous, long-term commitment for action with each of the four putting enough on the table to make it politically viable for the others to go along. It isn't going to be easy, and it's only the beginning of a long process. The domestic politics are dramatic and the policy changes take years to implement.

The U.S., among other things, must be prepared to commit itself to take some of the steps we've discussed tonight. The EC must agree, among other things, to deal with the agricultural mess their subsidies are creating around the world. And the Japanese must take the actions mentioned, including dealing aggressively with their industrial procurement policies and other non-tariff barriers. President Reagan has the popular support and he should spend it here.

And now in closing, let me be clear that these criticisms of the world trading system are not partisan, nor are they an argument for protectionism. It's a frank recognition of the problems we face and a call for the beginning of an effort to avoid an almost certain course of protectionism that will have a devastatingly negative impact at home and abroad. There's much more than just dollars involved. A free world mired in protectionism and trade wars is not a healthy world in which to keep peace. The poison spills over into all of our international relationships.

As long ago as 1844, Ralph Waldo Emerson wrote a few lines about trade and America that are pertinent for all of us today. He said: The philosopher and lover of man have much harm to say of trade, but historians will see that trade was the principle of liberty, that trade planted America and destroyed feudalism, that it makes peace and keeps peace, and it will abolish slavery.

THE FARM BILL

Mr. BOSCHWITZ. Mr. President, last month, my colleagues on the Senate Agriculture Committee approved a farm proposal. Soon we will all review it and vote on it.

We worked in the Agriculture Committee for nearly 4 months on the farm problem. We discussed many different proposals, many innovative ideas and concepts. Unfortuantely, the committee approved a program that is basically a continuation of the current programs. What a disappointment! After all of the hours spent talking and debating, the option chosen reflects little real change and no improvement.

I urge my colleagues to study this bill with great care and to consider its broad impacts on our economy. It is a proposal that promises nothing but continued economic disaster in rural America. I am from a farming State. Agriculture is important to the people I represent. But my colleagues should know that agriculture is crucial to the entire economy of our country. According to the U.S. Department of Agriculture, 20 percent of the gross national product is generated in the food and fiber industry. Farmers represent only 3 percent of the GNP, but their efforts and productivity have a ripple effect that stretches through our entire economy.

We must find a farm bill that addresses the total effect of agriculture. We must find a bill that helps protect farm income, because farmers are on-the-ropes now and they are important to our economy. We must find a plan that also helps get all of rural America on its feet, a bill that allows farmers to produce according to the market signals. This plan must allow the many businesses that benefit from agriculture—the truckers, the suppliers, the seed purveyors and implement dealers, the processors and marketers of food and fiber, all of them—to be productive and operate freely in the marketplace. And it must be an open marketplace, not one stifled by set asides and futile production controls. Last, we must reassert our role in the world market. We must price our commodities to be competitive.

We must let the market work—and it will work. I have been in business all of my life and I trust the marketplace. I trust the natural flow of supply and demand more than any group's ability to manipulate it. And I trust it, in the long-run, to allow our agriculture sector to prosper.

Former Secretary of Agriculture Earl Butz wrote very eloquently and persuasively on this topic in the September 12 edition of the Wall Street Journal. I ask that the text of his article be printed in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Sept. 12, 1985]

SELLING A FARM BILL OF GOODS

(By Earl L. Butz)

Any believer in the market system who has been watching the debate over the 1985 farm bill has to be extremely disappointed. Both houses of Congress are turning out versions with loan payments and target prices for subsidized crops that are too high, backed by the same mentality that put American agriculture in its current mess.

The Reagan administration made pious sounds early on about reorienting farm policy to the marketplace. But somewhere between the Agriculture Department's offices and Capitol Hill, the principles they said they were fighting for have all but dissolved. They appear to be acquiescing to a farm-bill framework that can be made truly market-oriented only at an unacceptable budget cost by dropping loan rates, maintaining high target prices and dipping into the Treasury for direct payments to cover the difference.

Current U.S. agricultural policy is costly, controversial and counterproductive. Federal income transfer payments to farmers are at near-record levels. The congressional budget resolution calls for $34.8 billion more in farm subsidies for the fiscal years 1986-88. The bill passed by the House Agriculture Committee yesterday carries a price tag of $42.8 billion over that three-year period—an average of $14.2 billion a year. That compares with the $600 million spent for such subsidies in 1975, and the $3.5 billion spent as recently as 1981.

BUTZ'S LAW OF AGRICULTURE

Despite this outflow of dollars, there are more and more reports of farm failures, foreclosures, pressures on agribusiness firms and general rural distress. Commodity groups are set against one another as grain producers seek higher prices for their crops and livestock producers grapple with feed costs that are artificially hiked by higher crop prices. Our grain and cotton producers are geared to produce for the export market, but they are tied to governmental price and production programs designed primarily for the domestic market. Too often, their first market is not overseas but a U.S. government bin or warehouse.

American agriculture is on the road to economic suicide under existing policies, which have priced farm products out of the world market and have encouraged expanded production abroad. Butz's Law of Agriculture is: The higher the degree of governmental involvement in pricing and marketing, the deeper the economic pit in which agriculture wallows.

The great irony in all of this is that Congress and the administration are both buckling under farm pressures so readily that the farm bill emerging from the legislative sausage-grinder looks a lot like a simple extension of the 1981 Farm Bill. That's the

very thing that has put us in the mess we are in today.

The two major mechanisms of current farm policy are target prices and the loan rate. Let's use wheat to illustrate the bind they have put American agriculture into.

The target price of wheat is $4.38 a bushel. That's set by Congress and bears no relation to the farm price of $2.50 a bushel. Originally designed as a safety net in case of a steep drop in the market, target prices are now much higher than the prices farmers get for their crops. Taxpayers have been making up the difference between the target price and the loan rate in the form of billions of dollars in "deficiency payments."

The loan rate is $3.30 a bushel. This is also set by Congress, although the secretary of agriculture can make modest adjustments in relation to supply. The "loan" is a non-recourse loan, meaning that if the market price of wheat falls below the loan rate, the farmer simply surrenders the wheat to the government and forgets about paying back the loan.

The current approximately $2.50 farm price of wheat is 80 cents below the loan rate, but the farmer has already received $3.30 a bushel when he obtains his loan. So the government acquires title to wheat at a cost of 80 cents a bushel above current market value, plus about 20 cents of interest forgiven on the loan.

However, no administration can stay tied to this kind of open-ended raid on the Treasury. This administration will be forced to either (1) not lower the loan rate so as to minimize the amount of deficiency payments or, (2) idle massive amounts of farm land to bolster the market price and hence minimize losses on defaulted loans. It is most likely to do both.

Whatever action is taken will redound to the benefit of foreign producers, expand production abroad and will lead to a shrinking U.S. export market.

Through the Payment in Kind program, 78 million acres of farm land were idled in 1983. As the U.S. curtails output we are encouraging more uneconomic and high-cost agricultural production in other countries. We are effectively raising the real cost of feeding the world's people because we've drifted away from the sound principle of producing commodities where their competitive advantage is greatest and then trading them back and forth between nations.

In each of the last three quadrennial farm bills (in 1973, 1977 and 1981), Congress enacted mandatory annual escalations of loan rates and target prices. They took the guesswork out of it for the ensuing four years. But now that the present system has failed and the heat is up, it's no time to flee the kitchen. Congress should mandate de-escalation, and not pass the buck to the secretary of agriculture by "providing discretion to lower the loan rate"—an always politically difficult feat.

Solutions to current farm problems that balance the concerns of farmers, taxpayers, agribusiness and consumers can be developed, if only we follow a few simple guidelines.

The agenda is simple and politically responsible, and has been set down recently in a joint statement that I and three other former secretaries of agriculture released. Two of us are Democrats and two are Republicans. (The others are Orville Freeman, 1961-69, Clifford Hardin, 1969-71 and Bob Bergland, 1977-81.)

Among our recommendations:

(1) Non-recourse loans have worked well as a safety net if loan levels are set at or below market-clearing levels. We suggested they be set at the season average of market prices. In that way, loans would protect farmers against short-term price declines but not interfere unduly with the marketplace.

(2) Farmers need income protection to help them adjust to changes in farm programs. A target-price program makes a buildup of surpluses less likely and discourages competing countries from expanding their production. Since small farmers are in the greatest difficulties, a ceiling should be set on total payments per operator.

(3) Expanding demand should be the primary thrust of U.S. farm policy. Acreage-reduction programs for the purposes of raising prices are exercises in futility because competing countries can watch what we do and then expand their own production.

(4) Commodity reserves under loan to farmers should be used only for food security reasons and not to support market prices.

(5) For future generations, a conservation program for fragile land is essential. Farmers should be prohibited from receiving program payments on erosive land.

Many farm-state legislators fear so simple an approach will alienate their farm voters. My visits to farm communities convince me that the vast majority of commercial producers want this kind of farm policy. Their farm and commodity organizations are not reflecting their interests. Rather, they are responding to the loudest squeaks with their one great strength—their ability to resist change.

America's taxpayers are neither able nor willing to provide greater and greater farm subsidies. Turning to the market is the kind of policy that will put U.S. agriculture back on its feet again. But it won't happen unless everyone who hopes for it starts demanding it in face-to-face meetings with his or her elected officials.

There is a discipline in the marketplace that works. Let's give it a try before more of American agriculture goes down the drain.

MENTAL ILLNESS AWARENESS WEEK

Mr. DOLE. Mr. President, what better time than Mental Illness Awareness Week, October 6-12, to bring to the American people a message of hope.

A DECADE OF PROGRESS

The past decade has been a phenomenally productive one for those committed to erradicating the social stigma attached to mental illness. In addition, tremendous progress has been made in identifying some of the causative factors behind mental illness and ways to prevent certain conditions.

Scientists are now on the brink of understanding how the brain functions and why, in some cases, it fails to function properly. This research is unlocking the mysteries of devastating illnesses of the brain such as schizophrenia, manic-depression, childhood autism, and Alzheimer's disease. Effective treatment and, in some cases, preventive interventions are being developed to deal with such diverse problems as anxiety, learning disabilities, alcohol and drug addictions, and other mental disorders.

Amazing technologies are rapidly being perfected which allow scientists to see not only what the inside of our brain looks like, but what it does when we feel pleasure, anxiety, or depression. Scientists will be able to trace the impact of feelings on brain chemistry and understand exactly how that chemistry affects our emotions, our ability to think, our learning, and our behavior.

REMAINING CHALLENGES

The progress is astounding and impressive. However, it is disturbing that myths and misconceptions persist about mental illnesses. Because of such myths as "a person who has been mentally ill can never be normal," that "mentally ill persons are dangerous," and many others, barriers are often created which limit access to obtaining needed mental health, vocational, and support services. Hard-working, well-motivated former patients are often unjustly refused employment, housing, and other opportunities because of these false beliefs and stereotypes.

The "shame" of being mentally troubled, which these myths cause, has meant that many people with a mental illness delay seeking help. The stigma thereby serves to impede the care, treatment, and recovery of many. Moreover, the reluctance of patients, former patients, and their families to identify themselves because of the stigma has made it more difficult to develop a strong and vocal constituency to fight against the discrimination.

Unfortunately this situation is exacerbated because even though effective treatments are known, they are often difficult to finance because most public and private health insurance benefits are more limited for a mental illness than they are for a physical illness.

Fortunately, this situation is changing. Family and client support groups are organizing all over the country with the help of such groups as the 76-year-old National Mental Health Association. Advocacy and patients' rights groups are being activated and are joining in coalitions to develop public awareness programs and provide patients and their families with the information and direction necessary to bring about necessary changes.

A MESSAGE OF HOPE

The National Mental Health Association is the Nation's oldest and largest nongovernmental, citizens' voluntary organization concerned with all aspects of mental disorders and mental health. It was founded in 1909 by Clifford Beers, who suffered from a serious mental illness.

Mr. President, if the message of hope which research brings us is to become reality, everyone's help is

needed. All Americans need to support the continuation of the exciting progress which is made in research on the brain.

We also need to recognize both those currently in treatment and those recovered mental patients as individuals. We need to help former mental patients reenter society by supporting their efforts to obtain housing and jobs. We must avoid letting false statements about mental illness or mentally ill persons go unchallenged. And, we must spread the word—a message of hope.

74TH INTERPARLIAMENTARY UNION CONFERENCE

Mr. STAFFORD. Mr. President, one of the duties of Senators who participate in interparliamentary exchanges is to report back to this body on the proceedings and recommendations issued from their meetings with foreign legislators. But the benefits of these exchanges prove themselves less in the exhortatory statements issued from our assemblies than in the abiding friendships forged among parliamentarians. These friendships help us better appreciate the unique political environments in which our colleagues from other parliaments must operate. In a world that grows smaller and ever more interdependent, interparliamentary exchanges give us a deeper understanding of countries vital to American political, economic and security interests.

The Interparliamentary Union differs from other interparliamentary associations in which the Congress participates in that it includes delegations from Communist bloc and nondemocratic Third World nations. This can prove a source of considerable frustration for the U.S. delegation. The politics of the IPU closely parallel the politics of the United Nations. Voting occurs more or less by regional or ideological blocs. As in U.N. General Assemblies, the 74th Congress of the IPU held in Ottawa, Canada, from August 31 to September 7, reminded the U.S. delegation that deep political fissures continue to threaten a fragile international order.

In sum, the record of the conference was mixed. Of the three resolutions approved during the final plenary session, the first, dealing with the problems of youth and drugs, provided helpful guidance to world legislative bodies and gained the unanimous consent of the conference. The second, dealing with the issue of international debt, received the favorable vote of the U.S. delegation. After steadfast efforts by Representative CLAUDE PEPPER on the drafting committee, provisions calling for debt repudiation were rejected, but the resolution still contained paragraphs requiring U.S. reservations. The third resolution, dealing with the issue of decolonization, was manifestly objectionable and received a negative U.S. vote along with a strongly worded explanation for our vote.

Given the United States track record in other large multilateral institutions, the outcome was about what one would expect. Nonetheless, the 74th IPU conference demonstrated that with attention and effort, the Western group can succeed in getting their interests and concerns addressed. A significant achievement for the West was the election of Hans Stercken of the Federal Republic of Germany as president of the Interparliamentary Council. By staying behind one candidate and strategizing on how different regional blocs should be approached, the Western group's candidate prevailed. Mr. Stercken's election proved that progress in international politics rarely comes from quick, flashy initiatives but more often from steady, sustained work.

All the members of the U.S. delegation represented their country well. I would like to acknowledge first the fine work of Senator ZORINSKY who served on the committee dealing with the youth and drug resolution. Senator ZORINSKY delivered the major address for the U.S. delegation on this issue which received favorable comments from many other delegates. Representative LINDY BOGGS served on the same committee and displayed her special expertise on children's and women's issues in her address to the plenary session.

On the decolonization issue, Representative MERVYN DYMALLY delivered our address to the plenary session. Born in Trinidad, British West Indies, Mr. DYMALLY is the only Member of Congress who is a former colonial. He lent special credibility to the United States position. In a moving statement, Mr. DYMALLY described how the Atlantic Charter, which united the fight against the Axis powers with the fight against colonialism, was the source of his inspiration to move to the United States. Nevertheless, the drafting committee, dominated by Third World and East bloc representatives, produced a document so unbalanced, and frankly, mendacious, that the U.S. delegation felt compelled to issue a strongly worded condemnation of its adoption by the conference. This explanation of our vote was delivered forcefully by Mr. HENRY HYDE and received the full attention of the conference.

In addition, the U.S. delegation was ably served by Mr. JOHN PAUL HAMMERSCHMIDT, Mr. DAVID BONIOR, and Mr. GUS HAWKINS.

Mr. President, on substance, the conference made a genuine contribution on the issue of curbing drug trafficking and abuse. Nearly every delegation recognized that drug abuse is no longer an issue affecting only a handful of countries. It is everyone's problem. The rise in international criminality represented by sophisticated drug trafficking syndicates adds to the centrifrugal forces pulling at the seams of international order. Drug organizations now threaten the sovereignty of entire Nation States. The nearly universal call from IPU delegates for greater international cooperation in the apprehension and prosecution of drug traffickers was most welcome. It was a step forward from the finger pointing which has frequently characterized discussions in the past.

The U.S. delegation to the IPU differs from other U.S. interparliamentary delegations in one other respect. Its composition, staffing, and organization is completely bipartisan and bicameral. So it is not unusual that I take this opportunity to offer special praise for CLAUDE PEPPER, a member from the other party who served with distinction in the Senate and now serves in the other body. CLAUDE PEPPER has regularly attended IPU meetings since 1938. His knowledge is vast and he always brings remarkably prudent judgment to any deliberation. It was because of CLAUDE's indefatigable work that the resolution regarding the international debt situation did not become merely another vehicle for Cuban propaganda. CLAUDE sat and faced the Cubans for nearly 3 days straight, and at the end, the central point the Cubans wanted adopted—a repudiation of debt—was repudiated by the drafting committee.

CLAUDE PEPPER's success serves as a useful lesson for how the United States should conduct itself in multilateral forums. To have any chance of success, one must make a strong commitment of time and energy. To fail to do so permits our adversaries to advance ideas inimical to our interests, give them currency, and eventually gain legitimacy for them. Although many Americans do not take multilateral institutions seriously, our allies do, as do many of the genuinely nonaligned nations.

I urge my colleagues, therefore, to participate in future meetings of the Interparliamentary Union. The experience will not be without frustration. But the world is a dangerous place, and it is made more dangerous when the United States flags in its effort to wage the war of ideas. The United States has never been more exposed to events and forces overseas. For our Nation's interest, it is important that we stay full engaged with other countries. Interparliamentary exchanges are among the best means available to us.

THE UGLY FACE OF TERRORISM

Mr. HATFIELD. Mr. President, today I would like to address several recent events in the Middle East. While my colleagues and I have been primarily focused on domestic issues, the ugly face of terrorism has shown itself abroad and threatened to scuttle U.S. efforts at achieving a negotiated solution to the Arab-Israeli conflict. The hijacking of the Italian cruise ship, the *Achille Lauro*, and the killing of an American citizen aboard the ship is a testament to the lengths those who are against freedom will go to impose their will by force. Just as abhorrent was the Israeli raid in Tunisia. The killing of 61 Palestinians along with 12 Tunisians with American made F-16's should never be condoned by the American people or their elected leaders.

Unfortunately, these actions seem to represent a growing movement in this world that is marked by increasing violence rather than a move toward peaceful means of resolving differences. In this barbaric display of brutality substituted for negotiation, both sides of the Arab-Israeli conflict have been more than adequately represented in the arena of terrorism. While this makes the U.S. role more difficult, it should not deter us from distinguishing right from wrong. We must be consistent in opposing those who promulgate violent acts in the name of peace and justice.

A case in point is the Israeli raid in Tunis. During this session we have authorized and appropriated billions for Israel in security assistance funding. Throughout this time no one has come forward and argued that Israel stands for anything other than U.S. interests in the Middle East. According to the U.S. Senate, Israel is a bastion of freedom and a staunch ally of Western values in the Mideast region. If this is the case, we must analyze what these values are. Do we stand for peace or do we stand for the brutal killing of 61 Palestinians on Tunisian soil, a country that has been a faithful ally of ours?

In a region where pro-United States, moderate Arab countries are awfully hard to come by, is it really in our interest to have Israel, in their quest for revenge, also inadvertently kill 12 Tunisians who were mostly policemen? Mr. President, these innocent Tunisians hardly constitute a military target. I believe we must be consistent in our condemnation of terrorism, and, if that means straining our relations with Israel or any other ally, so be it. In our use of American power and diplomacy, we must stand up for what is right rather than blindly supporting those that purport to represent our interests.

The use of terrorism has many deplorable facets, but, to me, the use of innocent civilians for extortion to further political goals is utterly abhorrent. In the world today, the leading authority when it comes to this tactic is the PLO and its various factions. How can Yassar Arafat and his cronies believe for a second that they are a legitimate body when they repeatedly resort to the use of terrorism. This week's hijacking of the Italian cruise ship with citizens of the United States, West Germany, Britain, and Italy aboard not only is an act of aggression toward those respective Governments, but a slap in the face of the Palestinian cause.

Mr. President, I am not sure who plans terrorist activities such as this one, but, whoever they are, they have a strange way of furthering their cause. How can they possibly pretend to promote the view that the Palestinians have been wronged and deserve better than what they have? Certainly, killing an American and holding over 400 hostages are poor ways to do it. Maybe I should send my press secretary, Rick Rolf, to them. I am sure he could come up with better ways to highlight their cause than the use of violence and extortion. There is only one possible response to this behavior—disgust and animosity. And this is what I have to offer anyone who claims to promote peace through violence.

Both the Israeli raid and the Palestinian ship hijacking bring to mind an interesting question—what do these acts accomplish in the long-term? Mr. President, I have a pretty good idea as to what they do not accomplish, and that is peace in the Middle East. These actions were taken, as most terrorist acts are, to achieve short-term goals. The Israelis sought immediate retribution for the murder of three of its citizens in Greece, and the Palestinians sought the release of 50 of their brethren held prisoner in Israel. What these groups failed to realize was what their acts would do to the long-term goal of peace in the Middle East.

It has been apparent that the conflict can only be resolved through a negotiated solution. By carrying out a military raid on a moderate Arab country, Israel has seriously undermined not only the atmosphere for negotiations, but American credibility as a mediator to the Palestinian question. By seizing the *Achille Lauro* and committing other terrorist acts, the Palestinian Liberation Front has jeopardized any possibility of having the PLO being recognized as legitimate in the eyes of the international community.

Mr. President, it has been said that there will continue to be violence for political ends so long as there are unsatisfied political grievances in the world. I reject this proposition as defeatist and ignorant of the possibilities of peaceful conflict resolution. It is important that the United States attempt to help the cause of peace in the Middle East. But, in doing so, it must maintain vigorous and consistent opposition to acts of terrorism—wherever they spring from. The chance for peace is too important to be undermined by mindless acts of violence.

ABA URGED TO TERMINATE AGREEMENT WITH SOVIETS

Mr. DECONCINI. Mr. President, on June 6, 1985, I brought to the attention of my colleagues my concern about a mutual respect agreement that was signed on May 2 by the American Bar Association [ABA] and the Association of Soviet Lawyers [ASL]. One of the six delegates representing the ASL, Prof. Samuel Zivs, is also a vice chairman of the Anti-Zionist Committee of the Soviet Public and is the author of a book, "The Anatomy of Lies," which not only defends the Soviet legal system, but also exposes the Soviet Government's contempt for justice and human rights. Bill Pearl, a California attorney, wrote a Wall Street Journal article about this issue and some of his examples of Zivs' thinking included such thoughts as:

Psychiatric hospitals are not used to punish political or religious prisoners;

Reports of starvation in the Gulag Archipelago arose because Amnesty International was seeking to distort the true state of affairs; and

Every prisoner of conscience in the Soviet Union is a liar.

Since I entered Mr. Pearl's article in the CONGRESSIONAL RECORD and publicly asked the ABA to terminate its agreement with the ASL, another example of why the ABA should discontinue its relationship with the ASL has come to my attention. The "White Book," a vicious piece of anti-Semitism, was recently jointly released by the Anti-Zionist Committee of the Soviet Public and the ASL. This anti-Semitic propaganda proves another definite link between these two organizations.

I am certain the ABA intended to foster an atmosphere of awareness with their Soviet counterparts by the agreement they signed. Unfortunately, this is not the reality of the situation. Instead, the mutual respect agreement legitimizes the Soviet repressive legal system and makes a mockery of the cause of thousands of political prisoners, religious dissidents, human rights activists, and refuseniks. These hostages have risked their lives precisely to show the world that the Soviet legal system does not deliver justices and deserves no respect.

I believe the ASL's actions do not justify respect in mutual dealings. Again, I ask the ABA to act boldly and terminate their agreement with the Soviets.

I request that the text of "The Facts Unmask," a review of the "White Book" published in Isvestiya several

weeks ago, be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE FACTS UNMASK

Having declared the beginning of a "crusade" against socialism as a social system, Washington is trying to gather under its banners all the forces of international reaction. As one of the striking means in the struggle against the forces of peace and progress, imperialism is putting special dependence on international Zionism. The ideology and political practice of this extremely reactionary movement takes under its wing extreme nationalism, chauvinism and racial intolerance, territorial grabbing and annexations, armed adventurism, the cult of all permissiveness and no punishment, interference in the internal affairs of sovereign states, monstrous deals with the worst enemies of humanity, for example, with Hitlerites of the time of the Third Reich.

The Anti-Zionist Committee of the Soviet Public and The Association of Soviet Lawyers have made public "The White Book" [1], in which the reactionary essence of international Zionism is put under merciless criticism. In the book, there is assembled the richest material—letters, diaries, memoirs, official documents—the reading of which gives an unattractive picture of "Zionism in action"—lies, deceptions, provocations, terrorism, violation of human rights.

Zionism—this is relentless aggression. The state of Israel has existed for less than forty years. And on the bloody ledger of the Israeli rulers there are five aggressions of fateful magnitude against neighboring Arab states. Letters from soldiers and officers, their diaries, excerpts of which are quoted widely by "The White Book," tell of the unbelievable cruelty of Israeli militarism, about its complete moral downfall.

Its undermining activities, most Zionist organizations conduct mainly against the Soviet Union and the other countries of the socialist community. "The White Book" uses rich factual material to expose the dark deeds of the Zionist manipulators. In the book there is evidence of people caught with the goods in the U.S.S.R., spreaders of Zionist literature, who were occupied at the same time with collecting the addresses of people of interest to American and Israeli and other special services, as well as those having agreed for handouts to deliver slanderous materials about like in our country.

One of the chapters of "The White Book" tells about life in the "promised land." It is impossible to stay calm while reading the letters and other evidence of those who by deceit have been dragged into Israel. Jews who have left their Motherhood—the Soviet Union—shed the curtain of blinders of deceit from their eyes. Encounters with the cruel reality of the capitalist lifestyle often end in tragedy. The newspapers are full of reports of immigrant suicides.

"Pariahs of the Western World," "Wanderings, Ordeals," "People's Tragedies,"—such are the titles of the subsequent chapters of the book. How many distorted fates! How many tragedies! How much sorrow and evil did Zionist propaganda bring!

And in what a contrast sounds the conclusion of "The White Book," entitled "My Motherhood, the U.S.S.R." Here also are given letters of authors who, in the main, are Soviet citizens. These letters are chock full of optimism, pride in their country, their readiness to defend its achievements. They are permeated with anger and indignation at the provocations of international Zionism. They are written by students and workers, physicians and teachers, they are written by Jews and Russians.

"The White Book" is a document of great unmasking force. The facts brought out in the book, evidence, photo illustrations and press materials convincingly unmask the real face of international Zionism upon which, in its aggressive policy, American imperialism makes no small dependence.

LIFELINE TELEPHONE SERVICE

Mr. HEINZ. Mr. President, I want to bring to the attention of my colleagues an important issue for American consumers—the precipitous increase in telephone rates caused by the introduction and expansion of competition in the telephone industry and the modification of Federal regulatory policies. Consumers are seeing their telephone bills go up dramatically and there is mounting concern, especially among the poor and disadvantaged, about their ability to keep basic telephone service. The reason I am addressing this issue today is because I want to alert my colleagues that the Federal Communications Commission will be considering lifeline assistance measures at the end of the week.

My concern that the elderly, physically disabled, unemployed, very poor, and other disadvantaged people not be denied access to a critical communication link that could mean the difference between life and death, led me to introduce, with Senator CHAFEE and others, S. 950, the Lifeline Telephone Assistance Act of 1985. The purpose of the bill is to help States, at their option, to provide lifeline telephone service and rates.

As deregulation has come to a head in the past 3 years, local phone companies have been granted over $5 billion in rate increases. Almost one-half of this revenue was recovered from increased local residential telephone charges. Local rate increases of nearly the same magnitude are likely in 1985. On top of local residential rate increases, Federal and State regulators decided to add a new local subscriber line charge—formerly called an access charge. Since June 1985, all residential customers, whether or not they make long-distance calls, must pay a $1 per month subscriber line access charge for equipment costs previously charged to interstate long-distance users. In 1986, this charge will rise to $2 per month.

While the FCC has adopted measures to allow the equivalent of a waiver of the subscriber line charge for low-income households which meet a State established means test, waiving only that charge may not be enough, by itself, to keep basic phone service affordable. The FCC has, thus far, failed to develop a lifeline program. On October 11, a joint board of State public utilities commissioners and FCC Commissioners will meet to make a proposal to the FCC regarding lifeline. I am hopeful that they will now come forward with a reasonable lifeline recommendation.

I am waiting to see what the joint board proposes on October 11, and what the FCC subsequently does to ensure affordable phone service. If the regulatory agency that has been directed through the Communications Act by Congress to preserve reasonably priced phone service fails to adequately deal with the problem, hearings by the special Committee on Aging or other legislative action will be appropriate and necessary.

THE LINK BETWEEN ASPIRIN AND REYE'S SYNDROME

Mr. HATCH. Mr. President, in last Wednesday's edition of the Washington Post "Health" section, an article appeared that is directly relevant to an issue now before the Labor and Human Resources Committee. The title, "Study Affirms Link Between Aspirin, Reye's Syndrome," reflects data recently published in the New England Journal of Medicine. The data are from a preliminary HHS-sponsored study of the possible relationship between Reye's syndrome, a serious but rare disease, and the use of aspirin in children or teenagers with flu or chicken pox. HHS has already begun a larger study of this relationship. I commend HHS for this responsible action. Though the data were still tentative, in the spirit of caution, HHS initiated a voluntary aspirin labeling program in January of this year, and consumers are beginning to see aspirin bottles on shelves now that advise parents to consult a physician before using aspirin in children or teens with flu or chicken pox. The aspirin industry assures us that absolutely all aspirin products now being distributed to retail stores carry this new warning label, so we expect that very shortly all aspirin on store shelves will be labeled. This is definitely a step in the right direction. Whether we should consider further steps should be determined on good scientific evidence. I am very pleased that we will shortly hold a hearing on this issue, in which we will be able to hear from scientists who have evaluated these and previous data on the relationship between aspirin and Reye's Syndrome.

Beyond that, Mr. President, I think the subtitle of the Post article is telling: "Many Parents Heeding Warning to Use Substitute Painkillers for Flu, Chicken Pox." This subtitle is based on data from surveys conducted by both HHS and the aspirin industry, which have shown that parents are

aware of the possible aspirin-Reye's Syndrome link. The awareness has been enhanced because of an education/information effort launched by HHS along with the voluntary labeling program, in which the aspirin industry participated. The result has been store posters, public service announcements, and school and physicians' education programs cautioning aspirin use when flu and chicken pox symptoms exist. These education efforts are perhaps even more important than labeling a product as common as aspirin, and they seem to be working.

Mr. President, the Labor and Human Resources Committee is going to examine this matter closely at our hearing. We are determined that at the hearing, the differing views about the labeling question and about the epidemiologic data will be aired, so that the committee can take full account of all available information in any decisions we make.

Mr. President, I ask unanimous consent that the Washington Post article be inserted in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STUDY AFFIRMS LINK BETWEEN ASPIRIN, REYE'S SYNDROME

(By Don Colburn)

Incidence of Reye's syndrome has fallen so sharply in the past two years that a federal study of the possible link between aspirin and the viral disease is having trouble finding enough cases to examine.

One reason for the decline may be that more and more parents are heeding health officials' warnings about the risk of giving aspirin to children with chicken pox, flu or flu-like illness.

Further evidence of a link between aspirin and Reye's syndrome, a rare but potentially fatal disease in children, is reported in the current New England Journal of Medicine. The study found that 28 of 30 children (93 percent) who developed Reye's syndrome after chicken pox or flu had taken aspirin. Among a comparable group of 145 children who had chicken pox or flu but did not develop Reye's, only 46 percent had taken aspirin during their illness.

A huge federal follow-up study to examine this possible link is now under way at more than 50 pediatric referral centers, including Children's Hospital in the District and the Johns Hopkins Children's Center in Baltimore.

Four previous studies since 1980 had reported that children who took aspirin for chicken pox or respiratory illnesses had an increased risk of Reye's syndrome. Those studies, which drew sharp criticism from the aspirin industry, led the U.S. surgeon general in 1982 to caution against automatically giving aspirin and aspirin-containing medicines to children with flu or chicken pox. The warning covers any painkiller or cough medicine containing salicylates—a group of non-narcotic analgesics, the most common of which is aspirin. The aspirin substitute acetaminophen, sold as Tylenol and other brands, has not been linked to Reye's syndrome.

Since the first reports linking aspirin the Reye's syndrome, the number of reported cases of Reye's has dropped sharply, from 550 in 1980 to 204 last year. Fewer than 100 cases have been reported this year.

"Aspirin use is decreasing, and certainly that could be one explanation," says Dr. Michael Barrett, coauthor of the New England Journal study and medical epidemiologist at the Centers for Disease Control (CDC) in Atlanta. Another contributing factor, he says, could be a change in the viral strain of flu during the past two winters.

The decline in reported cases is not a reason to ignore warnings about aspirin use in children, Barrett says, particularly since the disease has not declined among teenagers, who are more likely to take aspirin without their parents' knowledge.

"If anything," he says, "there's reason to strengthen that message to people."

The report in The New England Journal suggests a statistical significant "association" between Reye's syndrome and use of aspirin during a preceding illness.

But the Aspirin Foundation of America, an industry group, took issue with the latest report, saying there is no proof that aspirin causes Reye's syndrome.

"We don't feel there's any proof that there's any relationship [between aspirin and Reye's]," says Dr. Joseph White, president and chairman of the foundation.

White says the study in The New England Journal was merely a feasibility study, from which "no conclusions can be drawn" about the relationship between aspirin and Reye's syndrome. Since the CDC has not released the underlying medical data, he says, the pharmaceutical industry has not been able to assess the study's methods.

"No causal relationship between this disease and aspirin has been scientifically proven," agrees Lewis Nolan, vice president for communications of Plough Inc., a manufacturer of children's aspirin.

But the industry has agreed voluntarily to put labels on aspirin products urging that a doctor be consulted before aspirin is given to a child with symptoms of flu or chicken pox. That step was taken because "there's public concern and there are many people who believe there is relationship," White says.

Reye's syndrome develops in one of 100,000 American children under 18, usually within a week after chicken pox or flu. Symptoms include vomiting, breathing difficulties and neurological problems such as severe headaches, delirium, combativeness, hallucinations, disorientation and seizures. Without prompt treatment—intensive care, intravenous fluids and medicines to control the pressure around the brain—Reye's can progress to coma and, in about 10 percent of cases, cause death.

The massive federal study is being carried out by a task force of researchers from CDC, the Food and Drug Administration and the National Institutes of Health. It is expected to be completed by mid-1986 and is still on schedule, Barrett says, although finding suitable cases is becoming more and more difficult.

"We're doing everything we can to carry out the main study," he says. "That would be a very nice possibility—not to be able to do the study because there wasn't enough disease."

The extent of the difficulty will depend partly on the severity of the impending flu season and its viral type, which won't be known until the first cases occur, probably in a few weeks.

Some types of influenza are more likely than others to develop into Reye's syndrome. In general, Barrett says, incidence of Reye's is higher in years when the dominant flu strain is type B, rather thasn type A which predominated last year.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

The PRESIDING OFFICER. The clerk will report the pending business.

The assistant legislative clerk read as follows:

A House joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt.

AMENDMENT NO. 752

(Purpose: To provide for reductions in national defense for fiscal year 1987).

Mr. DOLE. Mr. President, the distinguished Senator from New Jersey has the first amendment. Senator PACKWOOD has managed the bill. But this is a defense matter. So I also alert Senator GOLDWATER. But we are prepared, if the Senator from New Jersey wants to proceed, and we have a number of amendments. We would like to complete action as early as we can.

Mr. BRADLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Jersey [Mr. BRADLEY] proposes an amendment numbered 752. At the end of the pending question, add the following:

NATIONAL DEFENSE.—Notwithstanding any other provision of this Act or of law or any provision of the Standing Rules of the Senate or the Rules of the House of Representatives, the total amount appropriated for programs, projects, and activities under the functional category National Defense (050) for fiscal year 1987 may not exceed $298.8 billion.

Mr. BRADLEY. Mr. President, the amendment that I have offered is very simple. It mandates a 5-percent real cut in the defense budget in 1987. This amendment makes two assumptions. The first assumption is that under the provisions of Gramm-Rudman, the Congress will not act in the reconciliation process to produce significant savings. I know some of my colleagues believe that the Congress will not act in the reconciliation process to produce significant savings. I know some of my colleagues believe that the Congress will act, that there will be a big tax increase—that indeed Gramm-Rudman will force a big tax increase—and that the Congress will be able to sustain a

Presidential veto of that tax increase. I am not assuming that this will happen. I am assuming that the Congress will not pass a big tax increase or be able to override a Presidential veto, and that the sequestering process will have to take place as prescribed under Gramm-Rudman. The sequestering process under Gramm-Rudman would require reductions in COLA's for entitlements and across-the-board cuts in the controllable areas of the nondefense budget and the defense budget.

The second assumption underlying this amendment is that the present CBO and Senate Budget Committee numbers are roughly correct, and that by 1987 we will have to, through this process, get to the budget deficit level mandated in Gramm-Rudman and come up with at least $20 billion in additional budget savings through COLA cuts and an across-the-board cut on controllable defense and controllable nondefense. In actuality, if growth rates are down, we may have to come up with $50 billion or even more, but I am using the more modest scenario where we only have to come up with $20 billion in cuts. The cut in the defense budget necessary to meet the $20 billion reduction would be a 5-percent real cut.

Mr. President, I think it is a very important to point out that many people have said what this bill will do: That is, that the Gramm-Rudman bill will force congressional action. It is an action-forcing measure, and they envision that the action will force will be a tax increase. They believe that this strengthens the Congress' hand and forces the President to negotiate with the Congress.

I believe the opposite. I believe that the Gramm-Rudman bill gives the President the opportunity to be intransigent.

I can easily foresee a different scenario. The President, after Gramm-Rudman is adopted in a moment of some national crisis, can send a modification of Gramm-Rudman to the Senate exempting defense. And I call on all of my colleagues simply to remember the atmosphere in this body immediately following the Grenada invasion. It is very conceivable to this Senator that there will be some international event, crisis, sometime in the next year or two in which the President could very well send a request to Congress to exempt defense from the across-the-board cuts required under Gramm-Rudman.

When that occurs, Mr. President, the entire burden of the Gramm-Rudman across-the-board cuts will fall in the nondefense discretionary area of the budget. And it is there that I think the real trap lies because the result in a matter of 2 to 3 years could very well be the virtual elimination of the nondefense discretionary portion of the budget.

But, Mr. President, with that theory aside, I want to come back to this amendment. This amendment is really a test of whether the 75 Senators who supported Gramm-Rudman yesterday will support the consequences of their vote yesterday for defense spending—in other words, a 5-percent real cut in defense in 1987.

Mr. President, I can say quite clearly that I do not believe a majority of the Senate will support this amendment. And I will say quite clearly for the RECORD that I do not support the amendment. I am offering the amendment to demonstrate that there is no will in this body for 5-percent real cuts in defense, nor do I believe there should be. And once this vote is taken and the Senate has unequivocally said no, it will not cut defense 5 percent in real terms, let a Senator stand up and argue that when the bill comes up from the President exempting defense because a 5-percent real cut would be to endanger national security, that he would not vote to exempt defense.

Mr. President, I believe it is quite clear that measure would pass. Defense would be exempt. And the bulk of the cuts required under Gramm-Rudman would fall in the nondefense area of the budget. It is as simple as that.

Mr. President, I reserve the balance of my time.

The PRESIDING OFFICER. The Chair, in his capacity as a Senator from Wyoming, suggests the absence of a quorum.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BRADLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from New Jersey has 15 minutes remaining. The opposition has 10 minutes.

Mr. BRADLEY. Mr. President, I yield myself at least 3 minutes.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

Mr. BRADLEY. Mr. President, the amendment is very clear and I think the Senate will speak very clearly on the issue. Let me simply say that on the general proposition of Gramm-Rudman, I disagree with it strongly for two reasons: first, I think it is a blind pursuant of a dubious economic objective.

But Gramm-Rudman requires a balanced budget by 1991. Why 1991? Why not 1994? Why not 1989? Why a balanced budget? I believe the American people want budget restraint and deficit reduction. Reducing the deficit is essential, balancing the budget is not. I think the budget is really a statement about our Nation's priorities, a statement about what we believe is achievable—that we want our children educated, our environment clean, and because America should play a leadership role, we want a strong national defense.

Mr. President, I can imagine that some of these priorities are important enough to borrow for, recognizing that there is a cost to the borrowing.

The problem is that the present administration refuses to pay that cost. It runs up gigantic budget deficits and the Congress stands by, spinelessly, and takes no action to reduce those deficits.

Mr. President, my second major concern is that the Gramm-Rudman proposal is a procedural answer to a substantive question. The Senate now has the procedures to lower the deficit, what it lacks is the will. So one votes for Gramm-Rudman saying they voted to mandate a balanced budget, recognizing that down the road they will have to vote for tax increases, dramatic cuts in defense and in nondefense as well.

I simply say an alternative to this kind of procedural rule would be simply for the Congress on a bipartisan basis to do what it thinks is necessary to force the President to respond.

Mr. President, in summary, my first problem with Gramm-Rudman is that it mandates a balanced budget in a particular number of years, which I really believe is unwise and unnecessary.

My second problem is really the thrust of this amendment, which is that the defense portion of the budget will never be cut 5 percent in real terms as Gramm-Rudman envisions, and the remaining cuts will have to come out of the nondefense portion of the budget. Those cuts will be severe and deep, and will be already required by law, mandated under Gramm-Rudman, to take place.

So, Mr. President, those are the two major objections I have to the Gramm-Rudman proposal. This amendment is offered to demonstrate that there is no will in Congress to accept the consequences of the Gramm-Rudman proposal on the defense budget.

Mr. President, I am going to vote against this amendment, as I said. I do not think we should have a 5-percent real cut in defense. I do not think we should reduce the flying time of pilots. I do not think we should cut military pay. I do not think we should cut operations and maintenance. Mr. President, I do not think the majority of my colleagues do either.

Although this point is somewhat subtle, I think that it is nonetheless an important one to make. Today, a majority of the Congress will say, "No,

we will not accept the 5-percent cut in real terms in the defense budget." But when Gramm-Rudman is triggered, at least a 5-percent cut must be made. Prior to that happening, it is conceivable, indeed quite probable, that the same Congress that voted 0 to 99 or 10 to 90 against this amendment and knows that a 5-percent real cut in defense is bad policy would exempt defense from the effects of the Gramm-Rudman approach.

When it is exempted, the bulk of the cuts under Gramm-Rudman will fall on the nondefense discretionary area.

Mr. President, that is a simple explanation of this amendment. I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, I did not know this amendment was coming up or I would have been on the floor earlier.

I do not know whether the Senator from New Jersey is aware of the fact that an action in a subcommittee of the House Appropriations Committee just 2 days ago knocked $10 billion more out of the defense budget than the conferees agreed to last summer. The Senate committee has taken $20 billion out of defense.

If every committee in this Senate had acted as the Armed Services Committee acted, we would not have the problems we have been going through for the last week.

In addition to the $10 billion, there is an additional $7 billion that is going to be asked for when the full committee meets. And if it passes the proposal to the floor, it will be an additional $7 billion.

Mr. President, I have said on this floor we can live, the military can live, with what we have come up with, roughly $320 billion. We can live with that 033 for 2 years. I am not overly worried about it. But what is beginning to worry me is these continuing attacks on the Defense Department.

I am not going into a long recitation where we stand vis-a-vis a potential enemy. There are many potential enemies. The Soviets are far ahead of us in conventional weapons. I am not worried about nuclear weapons. I personally would like to see them all done away with. But on conventional weapons we are behind the Soviets and we are growing behind them faster and faster and faster.

There are little things, like it has been almost 15 years since we have bought enough tactical aircraft to meet the normal rate of attrition. I mean accidents, the loss of aircraft through means other than warfare.

We were hoping to build an Air Force of 40 wings. We are never going to reach it, Mr. President, the way we are going.

We would like to see a 600-ship Navy. We have a chance of reaching it.

We would like to see a better retention of trained pilots, of trained personnel.

But if this Congress keeps harping away at less money for defense, whether it is directed at pay or not, or flying time or not, or time for dangerous duty or not, the man in uniform is going to take it very soon that we are opposed to him.

So far, that has not happened. There are no indications right now that it is beginning to happen. But it is going to happen if we keep on throwing threats at the military.

Mr. President, I have to be perfectly honest with my friends in this body. This country cannot afford to spend less on defense. We get away with it this year and we get away with it next year, but if we continue to try to get away with it we are not going to do it.

I might remind my colleagues that the reason we have peace in this world today is because we have had a strong U.S. Armed Forces. Whether they are strong enough to do the job completely in NATO or any other place in the world is somewhat questionable.

I would hope the Senator from New Jersey would not insist on another cut. There are many places we can cut the budget. We can cut the budget all through the welfare program. We can cut the budget in civilian people who work in the Pentagon—87,000 of them. If you want to get down to cutting, there are any number of places we can talk about cutting.

I do not like this amendment. After we have spent almost a year coming up with a figure for defense spending, having had the House agree with us and coming to a figure in agreement, and then having the House want to cut us even more, I just hope that the Senator from New Jersey will not press it.

Mr. President, I am not going to say any more at this time. If I need to say more, I will.

Mr. BRADLEY. Mr. President, how much time remains to the Senator from New Jersey?

The PRESIDING OFFICER. The Senator from New Jersey has 10 minutes.

Mr. BRADLEY. Mr. President, the distinquished Senator from Arizona has just made my case. He just made my point. If the Senator from Arizona does not want to cut defense how can he vote for Gramm-Rudman? Because Gramm-Rudman will mandate that the President make cuts in defense. I know my friends who are the supporters of this overall amendment to the Gramm-Rudman bill say that indeed, that is the intent of the triggering mechanism.

May we have order, Mr. President?

The PRESIDING OFFICER (Mr. NICKLES). The Senate will be in order.

Mr. BRADLEY. But this administration will never, ever take the envisioned cut in defense and, therefore, supporters argue that the administration will have to accept a tax increase. Mr. President, that is where I part company with the Senator from Arizona and others. I do not think the President will accept a tax increase. I do not think Gramm-Rudman pushes him into the corner. I think it is quite conceivable that at a moment of some international tension, the President will simply ask for defense to be exempt from the Gramm-Rudman proposal, thereby producing, instead of across-the-board cuts in defense and nondefense, a very, very deep cut—in fact, potentially near elimination—of the nondefense discretionary section of the budget.

Mr. RUDMAN. Mr. President, would the Senator yield for a question?

Mr. BRADLEY. I would like to make just one further point. I asked the Senate Budget Committee on the minority side to take a look at what would have been the effect of Gramm-Rudman on the defense budget had it been in effect this year, using the assumptions that I have made with this amendment. The effect, I think, would not have pleased the distinguished Senator from Arizona, because it would have resulted in military personnel being cut about $5.7 billion in budget authority, $5.2 billion in outlays; operation and maintenance, $6.7 billion in budget authority, $5.1 billion in outlays; procurement, $8.2 billion in budget authority, $1.1 billion in outlays; research and development, $2.7 billion in budget authority, $1.4 billion in outlays.

So I say to the distinguished chairman of the Committee on Armed Services that the result of Gramm-Rudman, assuming no tax increase and no significant budget reduction through the reconciliation process, would have been a budget authority cut in defense in 1985 of $24.7 billion and a cut in outlays of $13.3 billion.

Mr. President, I do not think that is what the Senator from Arizona wants, that is not what the Senator from New Jersey wants. As I said in offering this amendment, I intend to vote against the amendment, but I want it to be known that those who vote against this amendment have essentially contradicted their vote of yesterday on Gramm-Rudman.

Mr. President I ask unanimous consent that the analysis prepared by the Senate Budget Committee minority staff be printed in the RECORD. I hope that the CBO and the respective committees in the Senate examine this analysis to determine the implications of these cuts.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

EFFECT OF GRAMM-RUDMAN ON DEFENSE

The purpose of this exercise is to demonstrate the effect of Gramm-Rudman had it been law in fiscal year 1985.

1. First, we should establish the deficit overage:

	Billions
Fiscal year 1985 deficit in fiscal year 1985 budget resolution	$181
Fiscal year 1985 deficit in fiscal year 1986 budget resolution	209.8
Deficit overage	28.3

2. Next. The automatic triggering mechanism requires half of reductions to come from defense and nondefense discretionary and half from automatic increases in entitlement excluding social security.

Entitlements	28.3
Maximum entitlement reduction permitted under amendment	−6.0
Total	22.3

This six billion would eliminate all COLAS in those accounts.

3. That leaves $22.3 billion in reductions which must come from the discretionary accounts both defense and non-defense. Defense outlays make up approximately 60 percent of this total. Using those accounts considered "Controllable" by OMB, the following illustrative spread of the defense cuts in both budget authority and outlays are shown by account. Here are some examples of the reductions we would have to make:

[In billions of dollars]

	Budget authority	Outlays
Operations and maintenance:		
Operations and maintenance: Navy	−3.2	−1.9
Operations and maintenance: Army	−24.0	−1.6
Operations and maintenance: Air Force	−2.5	−1.7
Other operations and maintenance	−1.9	−5.2
Total operations and maintenance	−10	−6.8
Procurement:		
Aircraft procurement: Navy	2.1	[1] 190
Shipbuilding and conversion: Navy	2.2	[1] 134
Aircraft procurement: Air Force	5.0	[1] 414
Other procurement	9.4	1.7
Total procurement	18.7	2.4
Research and development:		
R&D: Air Force	2.4	1.1
R&D: Navy	1.6	.8
Other R&D	1.6	.7
Total R&D	5.6	2.6

[1] These outlays are in millions of dollars.

This illustrative example has allowed the President and Congress to protect the military personnel accounts except for those funds with permanent change of station moves:

This example totals $38 billion in budget authority cuts to go with the $13.3 billion in outlay reductions. While this is an illustrative example it shows that even if we go out of our way to protect the military personnel accounts we will have to make Draconian reductions in other investment accounts.

It these reductions are made on a strict account-by-account basis and military personnel is not exempt, the following budget authority and outlay reductions would be made:

[In millions of dollars]

	Budget authority	Outlays
Military personnel	5.7	5.2
Operations and maintenance	6.7	5.1
Procurement	8.2	1.1
Research and development	2.7	1.4
Total	24.7	13.3

Mr. RUDMAN. Will the Senator yield for a question?

Mr. HOLLINGS addressed the Chair.

Mr. GOLDWATER. Mr. President, I am controlling the time and I shall be glad to yield.

I just want to tell my friend from New Jersey that there are things more important to this country and one of them is getting this country's fiscal shape back and the Democrats are absolutely opposed to it.

I yield 2 minutes to my friend from New Hampshire.

Mr. RUDMAN. Mr. President, I thank the distinguished chairman of the Armed Services Committee. I just want to address briefly my good friend—and I mean that in the true sense of the word—from New Jersey.

My friend sets up a strawman which he is about to knock down. He makes a very interesting assumption. He makes an assumption which, in the present climate, I find incomprehensible. The Senator from New Jersey says that because the Gramm-Hollings-Rudman amendment is going to force decisions that are going to be very difficult, the administration is going to come marching up here and make a request and we, 535 strong, are going to go off here marching in lockstep and exempt defense from the operation of Gramm-Hollings-Rudman. The Senator from New Jersey knows that that is absolutely a scenario that nobody believes. In the present atmosphere that we operate in, it is, in my view, legislatively impossible to ever get that through unless, of course, the country was on the doorstep of world war III.

Let me make a promise to my friend from New Jersey. If and when the administration were so ill-advised as to come up here and ask for that exception, I will stand shoulder to shoulder with the Senator from New Jersey to fight that exemption.

On the other hand, I hope the Senator from New Jersey will make an equal offer that if anybody comes up here and tries to exempt all those social programs from the operation, the Senator from New Jersey will stand shoulder to shoulder with me against that, so, finally, we have a chance to make some choices, which is all Gramm-Hollings-Rudman tries to do. I thank the distinguished Senator.

Mr. HOLLINGS. Mr. President, will the Senator from Arizona yield me some time?

Mr. GOLDWATER. I yield 2 minutes to the Senator from South Carolina.

Mr. HOLLINGS. Mr. President, it is significant that my distinguished colleague from New Jersey is the one who is really jumping around with an amendment that he even will not support. What we are really seeing is the end of Bradley-Gephardt, the end of Kemp-Kasten and the end of tax reform, which has really developed into tax ripoff.

The Senator from New Jersey had good intentions. I do not question his sincerity about reform, but in reality what has occurred in reform with the passage of Gramm-Hollings-Rudman is a reform of priorities. What the Senator from New Jersey, the President, and all the others running around in circles are saying about their so-called reform is that they are reforming priorities.

We here in Gramm-Hollings-Rudman are reforming a problem. And we are correcting that particular problem. What is occurring is that the revenues that Bradley-Gephardt counted on are now going to lower that deficit and he is screaming. He knows that he is at the end of the road here this morning because he wanted to build up a $130 billion kitty in order to lower all these brackets and call it reform. We are going to take that $130 billion kitty that even the President has submitted and we are going to start paying our bills in America. That is all I have to say.

Incidentally, I say to the Senator from Arizona, the majority of the Democrats did vote for it. They oppose it but when we finally got to the trough, they did drink yesterday afternoon. That is a bipartisan initiative.

Mr. BRADLEY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Six minutes thirty seconds.

Mr. BRADLEY. Let me say to my friend from South Carolina, whom I respect greatly, if this is the end of the road for tax reform, then the Senator is saying today that Gramm-Rudman guarantees a tax increase.

Mr. HOLLINGS. Right.

Mr. BRADLEY. And it does so in the income tax system.

Mr. HOLLINGS. You are right again, Senator.

Mr. BRADLEY. Mr. President, we are going to see a little bit later, when I offer another amendment, if the Senator from South Carolina is prepared to vote for that tax increase.

Mr. HOLLINGS. Right.

Mr. BRADLEY. We shall see if, indeed, the Senator from South Carolina and 66 other Senators are prepared to vote for a tax increase. Mr. President, that is what will be needed. We will need 66 votes to override the veto of the President of the United

States if Congress passes a tax increase.

Mr. President, if we do not get 66 votes, then we have Gramm-Rudman. And we would have, if it were in effect this year, a $13 billion cut in defense outlays and a $24 billion cut in budget authority.

My friend from New Hampshire said that he would stand shoulder to shoulder with me if anyone ever said, "We are going to exempt defense from the Gramm-Rudman proposal." He would stand up and say, "No, I am with you, we will not exempt defense." Let me say to my friend that I know the mood in the Congress now.

I have seen the polls. The polls show—as the Senator from Arizona has seen time and time again—that defense is an area that the people want to cut back. I believe, like the Senator from Arizona, that it would be shortsighted and foolhardy to yield to that temptation to cut defense. But let me tell you, Mr. President, the polls might say that now—and I know what the polls say on defense—but what happens if we have a little international incident—a few hostages coming down and kissing the ground in America—a few hostages taken somewhere in the Middle East—an international crisis—and then see how many Senators are going to stand up on this floor and say, "Cut defense 5 percent in real terms."

Mr. President, that will not happen. There will not be 51 votes in the Senate of the United States to say "cut defense" while the President is on TV with patriotic citizens kissing the ground of America. It will not happen.

I know the intention of the Senator from New Hampshire and I admire his work. The fact is that if he stood shoulder to shoulder with me, we would still be in the minority. I can assure you that when that day happens, we will all look back and say, "How did we get into this fix?"

We got into this fix because we developed a procedural answer to a substantive problem.

Now the Senator—and I give him the best of motives—wants to force action. Mr. President, I would bet that over half the people who voted for Gramm-Rudman voted for it because they believed the action that was going to be forced was some kind of tax increase and that that tax increase will be forced down the President's throat because the alternative is big cuts in defense.

I am simply saying with this amendment now before the Senate that there is another way out for the President, and the result will be to exempt defense and have extremely deep cuts in the nondefense section of the budget. This vote will demonstrate that, because there are not 50 votes in here—I bet there are not 10 votes in here—for a 5 percent cut in defense in real terms.

Two days ago in the Washington Post, Mr. President, an administration official said that although Reagan has insisted, in supporting Gramm-Rudman, that Congress "keep previous commitments to increase defense spending," it's hard to see how that's possible under the existing plan.

So, Mr. President, the stage is set. We are simply waiting for the international event, and when the exemption for defense comes through you can say goodby to education programs in the Federal budget, you can say goodby to environmental programs in the Federal budget, you can say goodby to feeding programs for infants and children in the Federal budget, and you can say goodby to programs to rebuild bridges and highways.

Mr. BOREN. Will the Senator yield?

Mr. BRADLEY. Now, maybe, just maybe the Senator from New Jersey is a little too suspicious. I take that as a possibility. But let us see what happens. When that exemption comes from the President, let us hope that there is more than the Senator from New Hampshire and the Senator from New Jersey standing side by side to resist that exemption.

Mr. BOREN. Will the Senator yield?

Mr. BRADLEY. Certainly.

Mr. BOREN. Will the Senator agree also that the best way is for us to keep everything in the budget and avoid deep cuts in defense, education programs, and others? And if we agree to offer an amendment after his amendment is voted on on the subject, the best way to assure undue pressure is to have everything in, and therefore we should not exempt the 22 percent in Social Security also from this process so we could really have across-the-board action and would not be tempted to start dismantling this process?

Mr. BRADLEY. I believe, as the President does, that the Social Security trust fund is a separate fund that is now running a surplus. There is no need to balance the budget on the backs of Social Security recipients.

So, no, I will not vote for the Senator's amendment. I hope the Senator will vote for the amendment I will offer later to increase revenues.

Mr. RUDMAN. Will the Senator yield for just another question?

Mr. GOLDWATER. Not on my time.

Mr. RUDMAN. No. I asked the Senator from New Jersey.

Mr. BRADLEY. Certainly.

Mr. RUDMAN. Does the Senator agree——

The PRESIDING OFFICER. The time of the Senator from New Jersey has expired.

Mr. BRADLEY. Mr. President, I ask unanimous consent that the Senator from New Hampshire be allowed a question and the Senator from New Jersey a response.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUDMAN. I was going to ask the Senator from New Jersey, after all of this debate, isn't the only thing that is going to be proved by this vote will be again that the Senate cannot conduct a rollcall vote within 15 minutes?

Mr. BRADLEY. I think that will be the minimum that will be demonstrated. I believe there will be much more demonstrated by this vote: Is there a majority of the Senate that wants to cut defense 5 percent in real terms? I think not. When that vote is taken, it will be a victory for defense. I will support it. But I think it will imply a disaster for the nondefense portion of the budget when the exempton comes up from the President to exempt defense from the Gramm-Rudman proposal.

Mr. GOLDWATER. Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator from Arizona has 1 minute and 5 seconds.

Mr. GOLDWATER. Mr. President, I fully understand what is in the Gramm bill. We know about it. We know it is going to hurt defense. I am willing to take my chances. I think I can argue the point.

Mr. President, this amendment should not pass. I move that it be tabled. I ask for the yeas and nays.

Mr. BRADLEY. Mr. President, how much time remains—I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays have been requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from New Jersey. The clerk will call the roll.

Mr. SIMPSON. I announce that the Senator from Minnesota [Mr. DURENBERGER], the Senator from Washington [Mr. EVANS], and the Senator from Nevada [Mr. LAXALT] are necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

The PRESIDING OFFICER. Are there other Senators in the Chamber desiring to vote or change their votes?

The result was announced—yeas 89, nays 7, as follows:

[Rollcall Vote No. 214 Leg.]

YEAS—89

Abdnor	Bumpers	Denton
Andrews	Byrd	Dixon
Armstrong	Chafee	Dodd
Baucus	Chiles	Dole
Bentsen	Cochran	Domenici
Biden	Cohen	Eagleton
Bingaman	Cranston	East
Boren	D'Amato	Exon
Boschwitz	Danforth	Ford
Bradley	DeConcini	Garn

Glenn	Kennedy	Quayle
Goldwater	Kerry	Riegle
Gore	Lautenberg	Rockefeller
Gorton	Leahy	Roth
Gramm	Levin	Rudman
Grassley	Long	Sarbanes
Harkin	Lugar	Sasser
Hart	Mattingly	Simpson
Hatch	McClure	Specter
Hawkins	McConnell	Stafford
Hecht	Metzenbaum	Stennis
Heflin	Mitchell	Stevens
Heinz	Moynihan	Symms
Helms	Murkowski	Thurmond
Hollings	Nickles	Trible
Humphrey	Nunn	Wallop
Inouye	Packwood	Warner
Johnston	Pressler	Wilson
Kassebaum	Proxmire	Zorinsky
Kasten	Pryor	

NAYS—7

Burdick	Melcher	Weicker
Hatfield	Pell	
Matsunaga	Simon	

NOT VOTING—4

Durenberger	Laxalt
Evans	Mathias

So the motion to lay on the table the amendment (No. 752) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BRADLEY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, let me indicate to my colleagues that we still have at least five amendments, but there is no agreement on sequencing.

My understanding is that the Senator from Oklahoma would like to be next to offer an amendment. It is certainly satisfactory on this side. I understand Senator GLENN, who is listed next, is willing to step aside for that purpose.

Mr. GLENN. Mr. President, I say to the distinguished majority leader that I am happy to slide one notch, if we could. Senator BOREN had one that he wanted to bring up that will not take long, and then I would go after him.

Mr. DOLE. Is there any objection that, following the Boren amendment, the distinguished Senator from Ohio, Senator GLENN, be recognized to offer his amendment?

Mr. BRADLEY. Mr. President, I would ask, in the sequence, to be after Senator GLENN.

Mr. DOLE. I do not have any quarrel with that. They are all amendments on that side.

Mr. President, I ask unanimous consent that following Senator BOREN, Senator GLENN, Senator BRADLEY, Senator LEAHY, and Senator MOYNIHAN be recognized to offer their amendments.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. There may be other amendments following that, but that is the only agreement we have.

Also, let me indicate to my colleagues that there are two cloture motions filed. Any action on those has been postponed unitl 1 o'clock. There could still be cloture votes on the cloture motions which were filed by the distinguished minority leader. We hope to get some agreement for final passage. If not, it seems to me the 74 Senators who voted for Gramm-Rudman would certainly vote for cloture in an effort to move this bill out of this Chamber. We hope we can negotiate some agreement.

I have had requests from several Members that we try to speed up our deliberations so they could have an early departure. We are working on that. We hope to have some announcement prior to 1 o'clock.

AMENDMENT NO. 757

(Purpose: To require the President, when reducing automatic increases in spending, to also reduce the automatic increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act)

Mr. BOREN. Mr. President, on behalf of myself, the Senator from Nebraska, Mr. EXON, and the Senator from Minnesota, Mr. BOSCHWITZ, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Oklahoma [Mr. BOREN] for himself, Mr. EXON, and Mr. BOSCHWITZ, proposes an amendment numbered 757.

Mr. BOREN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

At the appropriate place in the joint resolution, insert a new section as follows:

SEC. .—Notwithstanding any other provision of law, when the President, using the authorities under the Balanced Budget and Emergency Deficit Control Act of 1985, issues an order that modifies or suspends the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a manner as to reduce by a uniform percentage the amount of increase under each such provision, the President shall also issue an order that would reduce, by the same uniform percentage, any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act: *Provided*, That any reduction in the increase of benefits payable under the old-age, survivors, and disability insurance program shall be computed in such a manner as to assure that the increase that would otherwise have been applicable is not reduced by more than 3 percentage points.

The PRESIDING OFFICER. The Senator will withhold for a moment. The Senate is not in order.

The Senator may proceed.

Mr. BOREN. Mr. President, this is a small, technical amendment to the pending proposal. All it does is put Social Security back into the process that would subject it to the across-the-board action that is going to apply to all other areas of spending.

Mr. President, the amendment I am offering will insure the fair and equitable operation of the Balanced Budget and Emergency Deficit Control Act of 1985, which I enthusiastically support. This amendment will put each and every American in the same boat should there be a deficit overage and a reduction in automatic increases is necessary to eliminate the overage. This amendment will require that COLA's under the Social Security Act be reduced if other automatic increases in spending are reduced. However, the amendment would not allow COLA's under the Social Security Act to be reduced by more than 3 percentage points, even if all the other automatic increases are reduced by a greater percentage.

The Balanced Budget and Emergency Deficit Control Act of 1985, which this body adopted earlier by an overwhelming majority, requires the President to reduce automatic increases in every entitlement program except one—the automatic increases under the old-age, survivors, and disability insurance program established under title II of the Social Security Act. By excluding Social Security, we are saying to the American public that there is one sector of the economy, one category of citizens, that is exempt from all attempts to balance the Federal budget. How in the world can we say that we have an across-the-board sacrifice when we are exempting almost 22 percent of all spending?

We are telling the person who receives food stamps or AFDC benefits that he or she must make a sacrifice, but Social Security recipients are not required to make a contribution to deficit reduction. We are telling the food stamp recipient. whose income is probably below the poverty level. That he or she will not get a cost-of-living adjustment; while, on the other hand, a Social Security recipient whose income may be in the highest income level will get an increase in benefits. How can we justify this? According to 1982 census data, only $1 of every $10 expended on Social Security increases went to people below the official poverty line.

And I want to emphasize that again, Mr. President. While we are asking for cuts from those below the poverty level, the 1982 census data indicates that only $1 out of every $10 expended on Social Security increases went to people below the official poverty line.

I also wish to cite some statistics, again from the Bureau of the Census data, in 1983. The average after-tax per-capita income for ages 25 to 29 is $6,561. These are people who are paying the Social Security taxes.

The average per-capita income, for example, of those in the age group from 40 to 44 is $6,991. The average per capita income in those ages from 45 to 49 is $7,533. The average per-capita income of those 65 and over is $8,113.

We should also consider the fact that, in the age group from 50 to 65, 79 percent are homeowners, half of whom have their mortgages fully paid, while the census data reports that in the age group from 65 to 75, 77 percent are homeowners, but 80 percent have their mortgages fully paid.

We must, when we talk about sacrifice by all Americans, make sure that sacrifice is fairly shared.

Mr. President, I believe the senior citizens of this country should be given more credit. Our attitude, which has been reflected in this body all too often that those who are on Social Security want to be treated specially and exempt from any sacrifices required from the American people, is wrong. It is demeaning to the patriotism of our senior citizens.

We are fooling ourselves if we think that our senior citizens do not care about excessive budget deficits, if we think that they do not want to participate in an act that will put this country back on solid ground. I have talked with many of the senior citizens in my home State of Oklahoma and they have expressed to me that they are willing to forgo all or a portion of their cost-of-living adjustment if everyone is in the same boat. The senior citizens are willing to contribute to major deficit reduction. It is quite logical that they are. They know that they will benefit more from a balanced budget than from a short-term cost-of-living adjustment. Senior citizens are willing to make a sacrifice along with everyone else and we should not deny them participation in what is probably the most significant step we can take. I say again, let us not underestimate the patriotism of our senior citizens. There is no more patriotic group than our senior citizens. Of course, it would not be fair to ask them alone to make sacrifices while exempting others. However, if all others are sacrificing, as I said a minute ago, it is demeaning to the spirit, commitment, and love of this country of our Social Security recipients to imply that they are unwilling to do their part.

The amendment I am offering today will allow the senior citizens of our Nation to be a part of this process along with all other Americans. And, I stress to my colleagues that this amendment will not result in any reduction in benefits. Reducing COLA's does not reduce benefits.

Rather, it merely lessens the amount of an increase. In this amendment the amount of increase cannot be reduced more than 3 percentage points. So if we were to have rampant inflation again we are here building in some protection for those on Social Security. We need an across-the-board sacrifice. Earlier in this process I offered an amendment to assure that corporations who are making large profits and are paying no taxes would pay their fair share. As I indicated, it was not fair to ask others to sacrifice while 50 companies pay no taxes on $56 billion in profits. We need a plan that will have all Americans without exception pull together to reduce these deficits to save our economy.

The interesting aspect about excluding Social Security COLA's from any reduction is that we are taking the pressure of Congress and the President to develop alternatives to an across-the-board reduction in COLA's and controllable spending. We are taking out one of the most politically powerful groups from the process, and leaving in those who perhaps have the least power.

Mr. President, putting Social Security COLA's back into the process will bring maximum pressure upon Congress and the President to be responsible. If the deficit overage is great enough to result in a reduction in Social Security COLA's Congress will face substantial pressure to come up with a preferable alternative. Thus, this amendment by far does not mean that Social Security COLA's will necessarily be reduced. In fact, it could mean that not only will Social Security COLA's not be reduced but also other COLA's for the other programs may not be reduced because it will put maximum pressure on this Congress to come up with a responsible way of meeting our budget targets without having to do that. It became quite obvious to me a long time ago that Congress and the administration will not deal with the deficits until absolutely forced to make the tough and painful decisions which will be necessary. The amendment we adopted earlier, the Gramm amendment, which I was proud to cosponsor, is a step in the right direction toward reducing the deficit. The amendment which I offered earlier to instruct the Finance Committee to place a minimum tax on corporations which are not paying their share is also a step in the right direction. This amendment to put Americans in the same boat, to put all Americans into this process, will again strengthen this process by requiring a shared sacrifice by all.

I urge my colleagues to join in supporting this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. BOREN. I am happy to yield time to the Senator from Minnesota, my cosponsor on this amendment.

Mr. BOSCHWITZ. I thank the Senator from Oklahoma. I will be very brief. I was amused by the Senator from Oklahoma's statement that all this amendment does is include the Social Security recipients in the Gramm-Rudman-Hollings formula. I agree that all Americans should participate in the significant and important job of bringing the budget into balance because each and every American is going to benefit from bringing the budget back into balance, and creating a more stable economic climate in this country.

I would support an amendment that would not limit the inclusion of Social Security just 3 percentage points or 3 percentage points on the COLA. All the COLA's, as far as I am concerned, should be denied in the event that COLA's are being denied across the board to other recipients of Federal receipts and dollars.

The idea, however, of excluding Social Security is very damaging. Social Security constitutes 22 percent of the total Federal budget. The interest payments on the Federal debt are 13 or 14 percent. So right away we take 36 percent of the budget away from the Gramm-Rudman-Hollings approach. That means the budget has to be balanced from the remaining 64 percent, and that means deep cuts in those 64 percent. It really should be shared across the board. Interest, of course, is a nonnegotiable item, and we simply have to pay the going rate. I think the interest rates will come down as a percentage of the overall budget as we bring fiscal and budgetary discipline to the Congress. So that will take care of itself. It has to take care of itself. It is not something that we can mandate. Some people feel that we can mandate interest rates and lower them, unfortunately we cannot. I suppose if we could, we would. But that is really truly the only nonnegotiable part of the budget.

But Social Security is the largest single program other than defense. As Gramm-Rudman is now written those Americans do not have to share in the business of balancing our fiscal affairs, yet can benefit in the result. I do not think that is the way to go.

Three years ago I proposed the "fair play budget." The principle behind it was the same as what's behind this amendment. We can balance the budget by slowing the growth of spending if all parts of the budget are included and we treat everyone the same.

Frankly, I don't expect we will win on this vote. Conventional political wisdom dictates that we don't mess around with scheduled benefit increases to 36 million Social Security recipients. Of course conventional political wisdom also dictates that we don't mess around with people who ride Amtrak, local government officials who have become accustomed to general revenue sharing or Medicare recipients. But this great wisdom is

precisely why we're in this mess and, to date, why we've been unable to get ourselves out of it.

I've held numerous hearings on the fair play budget proposal all across Minnesota. And I'm convinced Minnesotans, and all Americans, including Social Security recipients, will support an across-the-board approach to balancing the budget.

I support, encourage, and compliment my colleague and friend from Oklahoma, with whom I often find myself agreeing. I think the amendment is a constructive one. I hope it carries here in the Senate.

Mr. HART. Will the Senator yield for a question?

Mr. BOSCHWITZ. Sure.

Mr. HART. I wonder if the Senator from Oklahoma and the Senator from Minnesota would like to explain to the Senator from Colorado what this amendment does or does not do.

My understanding is that by definition the program proposal adopted by the Senate yesterday did not include multiyear defense or civilian procurement, or interest on the debt, or other entitlements, programs to the tune of $190 or more billion, and did not include Social Security COLA's but this amendment is designed to put Social Security COLA's back on the table in a way that the Gramm amendment did not. My question is what about those other budget items totaling some $500 billion that will not also be subject to these so-called hard choices? In other words, will not this amendment have the result of bringing cost of living—I wonder if I might have the attention of the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Oklahoma controls the time.

Mr. HART. Let me finish the question, if I may. If I understand what will happen if we adopt the amendment is cost of living increases for senior citizens will be put back in the mix of impoundments by the President where procurement of nuclear missiles, B-1 bombers, whatever the broad category of civilian multi-year procurement, and other entitlements will not be.

Mr. BOREN. Mr. President, in response to the question of the Senator from Colorado, I would say I think he is absolutely incorrect in saying that the defense programs are forever excluded. When the term of the contracts——

Mr. HART. I did not say that.

Mr. BOREN. I understand. But when the term of the contracts are up, whether it is on nuclear missiles, nuclear submarines, or any other weapons programs, of course they come in for the across-the-board cuts just like when the term of the contract on student aid is up, or when the term of a contract on CCC loan is up, there is no way that we can abrogate contracts. In fact, the Constitution specifically prohibits the abrogation of contracts. So we would have lawsuits. But the point is we do include defense essentially as a part of this program. We do include all the other COLA's, including food stamps, including AFDC, and all of the other COLA's for poeple, many of which are below the poverty level. Only $1 out of $10 in the Social Security Program goes to people below the poverty level. But we say then, oh, yes, they are going to get their full COLA. I do not know. Maybe the Senator from Colorado can tell me how he would explain it. But when I talk to someone on railroad retirement, or when I talk to someone on veterans pension, or when I talk to civil service retirees, or when I talk to a person on food stamps or AFDC, and all of these other categories and say this automatic process means you do not get a COLA this year, you do not get a COLA but the people on Social Security will get a COLA this year, how do we explain the equity of that? How do we explain to our Social Security recipients that because of the new leaders of pressure groups that purport to speak for them, we really do not believe that the senior citizens down at the grass roots have the patriotism to be part of the process? How do you have an across-the-board sacrifice and totally leave out 22 percent?

The benefits could not be cut. Only the COLA, the rate increase, could be cut. Under this amendment, it could not be reduced more than 3 percentage points. So that if you had COLA's that were going to apply, say, 6 percent, the Social Security COLA could be reduced by a maximum down to a 3 percent COLA instead of a 6 percent.

Mr. HART. Could I restate my question once again? In the first year of the application of the Gramm amendment, which was adopted by the Senate yesterday, my understanding is the use of the words "across the board" is not across the board, that somewhere between $500 and $700 billion in that first year's budget will not be on the table for consideration for impoundment by the President or cut by the Congress.

In that figure are almost $100 billion of civilian multiyear contracts and Defense Department contracts, and almost $200 billion of other entitlement programs and interest on the debt, with the bulk of the benefits in Social Security.

My question is this: In that first year, if the Senator's amendment is adopted, will any of those other categories be on the table for consideration, or are we asking the senior citizens to accept the burden that we are not asking the defense contractors and other contractors to accept?

Mr. BOREN. No, absolutely not. The only thing that is exempt is a broad range of estimates of between $500 and $700 billion. I would say that is a very high figure. I think it is an overestimate. I would say that basically everything is in that we can put in legally. You cannot abrogate a contract in the middle of a contract. But except for that, except for things that are under contract, and we provide for when those contracts expire, then that program comes in on renewal.

So I would say yes, everything is in except 22 percent of the budget, which is Social Security. Government salaries could be cut and conceivably would be, including Members of Congress, I presume. Congressional budgets to operate Congress would be cut 1 or 2 percent. Everything would be cut. And food stamp recipients, people below the poverty level. But we would still be giving the automatic COLA to Social Security.

If I could ask the Senator from Colorado a question, does he believe that the Social Security recipients of this Nation are so unpatriotic that if every other group of Americans were going to be in this process, if all the others who receive COLA's will be in this process, does he really believe that the people on Social Security are so unpatriotic that they would not want to do their share as long as all the other people on salaries in the Government, all the other people on COLA's, were affected? We all know that 40 percent of the benefit paid by Social Security is representative of what was paid in with the rest being Government payment. Every year since 1969, except for 2 years, the general fund of this Government has had to make payments to the Social Security fund to keep it in operation.

I know what some of the special interest people here in Washington say. But does the Senator from Colorado, from talking to the people in his home State, really believe that the people on Social Security are not among the best Americans, who are so partriotic that as long as everybody else is affected they would not want to be among the first to want to step up and say, "We want to do our part"?

Mr. HART. May I respond to the question?

The PRESIDING OFFICER (Mr. DENTON). The Senator from Colorado.

Mr. HART. First of all, this is not an issue of patriotism. And let us forget about the interest groups. I have no ax to grind with interest groups.

The questions I have raised have to do with equity and whether everyone in the society and everyone affected by the Federal budget is in fact under the Gramm proposal and being asked to bear the burden fairly.

The accurate way to pose the question, leaving aside the rhetoric of patriotism and the inaccuracy that everybody is being asked to share fairly,

is, what would be the attitude of the senior citizens of this country when they find out, the Senate now having adopted Gramm amendment and the Senator from Oklahoma now trying to put their cost-of-living increases into the Gramm proposal sideways, that in fact everybody dealing with the Federal Government is not being asked to share fairly for whatever reason?

I do not think that a senor citizen living on Social Security is going to want to hear that General Dynamics was not in this because of the legalities of multiyear procurement, or that the XYZ construction company building a Federal building or a Federal dam is going to get its full share of its contract because we could not abrogate contracts, which is a matter of law and the Constitution.

Further, that there are $184 billion of other entitlements not affected by the Gramm proposal.

I think we should do away with this fraud that everything is on the table. Everything is not on the table. The $500 billion figure which the Senator from Colorado just cited is on the record, put on the record by the Senator from New Hampshire [Mr. RUDMAN] on Saturday morning in this session, and it is the base line, bottom figure that any sponsor of this measure has admitted to that is not on the table. That is 50 percent of the Federal budget.

Others have admitted that the figure is more like $700 billion.

So let us do away with words like "sequester." We are talking about impoundment. Let us do away with across-the-board cuts and sacrifices. We are talking about 50 to 70 percent of the Federal budget that is not on the table.

Let us accurately ask the senior citizens of this country if they want their cost-of-living increases cut, when General Dynamics is not going to be affected, at least in the first year, or $109 billion of multiyear military procurement.

The PRESIDING OFFICER. If the Senator will suspend, his remarks are being completed on the time of the Senator from Oklahoma.

Mr. BOREN. I thought I asked a question.

Mr. GRAMM. Will the Senator yield?

Mr. BOREN. I will not yield any longer if time will be charged against my time.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Will the Senator from Oklahoma yield?

Mr. BOREN. I will be happy to relinquish the floor and let the Senator from Colorado continue on his own time.

Several Senators addressed the Chair.

Mr. HART. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. Who yields time?

Several Senators addressed the Chair.

Mr. RIEGLE. Who controls the time in opposition?

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. RIEGLE. I ask the Senator in charge of the time in opposition if he will yield.

The PRESIDING OFFICER. The Senator from Oklahoma has the time and he is recognized.

Mr. HART. Mr. President, a parliamentary inquiry.

Mr. BOREN. I trust the time is not running against the Senator from Oklahoma. He is unable to get the floor.

The PRESIDING OFFICER. Who yields time.

Mr. HART. A parliamentary inquiry, Mr. President.

Mr. BOREN. Mr. President, I reserve the remainder of my time.

Mr. HART. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. Unless a Senator yields time, no parliamentary inquiry is in order.

Mr. RIEGLE. I ask the Senator from Oregon if he will yield time?

Mr. PACKWOOD. Mr. President, how much time remains?

The PRESIDING OFFICER. Six minutes and twenty-five seconds.

Mr. PACKWOOD. May we have order Mr. President?

The PRESIDING OFFICER. I am trying to get order.

Mr. PACKWOOD. Any time for a parliamentary inquiry has to be yielded from time of one of the parties?

The PRESIDING OFFICER. That is correct.

Mr. PACKWOOD. I yield to the Senator from Colorado for a parliamentary inquiry.

Mr. HART. Mr. President, who controls the time in opposition?

Mr. PACKWOOD. I control 10 minutes. But I have to yield for a parliamentary inquiry. I yield for that purpose. I have a lot of people who want to speak.

Mr. RIEGLE. Will the Senator from Oregon yield to the Senator from Michigan?

Mr. PACKWOOD. Mr. President, I cannot hear whether the Senator from Colorado is making a point of order.

Mr. RIEGLE. I believe he relinquished.

Mr. PACKWOOD. Mr. President, I yield 2 minutes to the Senator from Michigan, 2 minutes to the Senator from New York, and 2 minutes to the Senator from Texas.

Mr. RIEGLE. I thank the Senator for yielding.

I think the contract that we have with the senior citizens of this country on Social Security is every bit as important as any other contract we have with defense contractors or anyone else.

The Social Security System is not part of the deficit problem; the President himself has admitted that. We are in surplus there. The Senator from Oklahoma is wrong when he says his proposal would not cut the income, the practical income, of senior citizens. In fact, it would.

The COLA adjustment comes a year after inflation has eaten into the buying power of their Social Security benefits. What the COLA does is make them whole, replace the buying power they have lost. If the COLA is stripped away, their buying power goes down. As a matter of fact, statistics show that hundreds of thousands would be pushed below the poverty line. That is why the country does not want to do this. By overwhelming numbers in national polls, they have indicated they do not want to do it. The President now says he does not want to do it. The Senate has expressed itself.

The way Gramm-Rudman would work if the Boren amendment is accepted, they would not lose just the first COLA, they would lose them for 5 years straight. That would affect the living standards of senior citizens. Probably 15 to 20 percentage points would be lost simply because of the inflation that is anticipated over that period of time.

We have already cut $100 billion from Social Security and we ought not to cut any more.

The PRESIDING OFFICER. The Senator's time has expired.

I remind the Senator from Oregon that his time is now 7 minutes.

Mr. PACKWOOD. I thought I had 10 minutes.

The PRESIDING OFFICER. The Senator did.

Mr. PACKWOOD. I yielded 2 minutes to the Senator from Michigan.

The PRESIDING OFFICER. The Senator had used 1 minute and we are now down to 6 minutes 9 seconds.

Mr. PACKWOOD. I yield 2 minutes to the Senator from Massachusetts [Mr. KERRY].

Mr. KERRY. Mr. President, I agree with the Senator from Michigan. I would like to answer the question of my friend from Oklahoma: what is there in this that gives equity? Why should we do something we are not doing for other programs?

The answer is simple: the President and Congress made a commitment to the people on Social Security, in the fixing of the Social Security System 2 years ago, that it would be fixed and we would not come back to them.

Second, in the course of last year, it was stated very clearly that that contract would not be interrupted.

There is a further reason why it is equitable. The Social Security System is going off budget in a few years anyway. In the 1960's it was not on budget except as a means of paying for war simultaneous with not raising taxes. It does nothing to reduce the deficit even now. These payments are dedicated only to the payment of Social Security. So it is a shell game to hold it in there.

To put it in there when it is not now something that we can use to reduce the deficit is to make it into something that it is not. It is not something we can consider as outside of the deficit process. If the Committees on Finance or Appropriations want to look at the Social Security System and even give a tax refund because of its surplus, they can do so at any time. But the issue here is one of equity. It is one of fairness: What is on the budget, what can be used to reduce the deficit, and what is appropriate for that part of the pie.

Moreover, we are only talking about what happens if sequestration were to take place and to put a system into the consideration of reductions in the deficit when you cannot even use the money to reduce the deficit in the first place——

Mr. BOREN. Will the Senator yield a few seconds from his time?

Mr. KERRY. I do not think I have even a few seconds.

The PRESIDING OFFICER. The Senator from Massachusetts has 11 seconds left.

Mr. KERRY. I think we ought legitimately to have truth in budgeting, we ought legitimately to have truth in packaging. Since you cannot use it anyway, now to put it in would be a fraud and an injustice to the people of the United States who are on Social Security.

Mr. PACKWOOD. Mr. President, I yield 2 minutes to the Senator from New York.

Mr. MOYNIHAN. Mr. President, at the expiration of the time of the Senator from Oklahoma, I shall move to table the Senator's amendment. I should like to make two remarks and one general proposition.

First, I have heard it stated on this floor that every year since 1950 or something, moneys have gone from the general fund to the Social Security trust fund. That is not true. It is not true.

Second, on the question of how the Social Security surplus in the retirement funds affects the deficit, it reduces the deficit. The deficit is defined as money the Government must borrow in order to continue its activities.

More importantly, Mr. President, a Presidential commission was established to reorganize the Social Security finances in 1982. It did so. In 1983, we passed that legislation. We have a secure and stable system now and nothing would be a greater disservice to it than to continue tinkering with a trust fund in the name of balancing budgets and meeting certain fiscal requirements that have to do with general government. This is money paid into a trust fund for purposes of retirement and other benefits; it should be kept as such. It is in secure condition; it ought not to be changed. Anyone who proposes to change it seems to me to act in a manner that is less than attractive. As I say, when the time comes, I shall move to table.

The PRESIDING OFFICER. The Designation of time to the Senator from Texas by the Senator from Oregon is now in order, after which there will be 1 minute remaining.

Mr. GRAMM. Mr. President, I find myself in a peculiar position, in that, in trying to put together a consensus for the Gramm/Rudman bill, a bill that received 75 votes yesterday, I was forced to recognize two realities: one is the budget reality of the Social Security trust fund being a freestanding trust fund. The second one was the political reality that had we left Social Security on, we would have been debating Social Security and not the budget.

So my logic in dealing with those two realities was to take Social Security off budget so that those who did not want to deal with the deficit problem but did want to hide behind Social Security, could go to a museum somewhere and debate Social Security so we would not be debating in here again on the budget.

On the other hand, I have great respect for my colleague from Oklahoma and I know his initiative here is trying to get that last drop into the pot. So I find myself in a dilemma which I shall have to settle with myself as an individual Member.

Let me go back in the remainder of my time and make it clear that Senator HART's statement is a misstatement of what we did yesterday and is in fact an attempt to redebate what was already settled with 75 votes. Everything is in the pot except Social Security. On any given day, about $500 billion of it can be affected. That varies from day to day because the Government has contracts and, despite the fact that we all want to try to act as if contracts skew the debate, we cannot invalidate contracts because people would take us to court and they would win; we would have to pay and we would have to pay legal fees.

Also, defense is less protected by contracts than the rest of the budget put together. We have very little multiyear contracting. Of all parts of the budget when broken in half, defense and nondefense, defense is the least protected, not the most.

The PRESIDING OFFICER. The Senator's time has expired.

One minute remains on the side of the Senator from Oregon, 6 minutes on the side of the Senator from Oklahoma.

Mr. BOREN. Mr. President, I yield myself 1 minute. I want to take this minute to respond briefly to some of the statements made by the Senators from Massachusetts and New York.

The Senator from Oklahoma was not citing himself as an authority when he said that in all but 2 years since 1969, we have had to have transfers from the general fund to keep the Social Security fund afloat. My source for that is the Congressional Research Service report to the Budget Committee, January 1985. It points out that on the contrary, instead of using Social Security to balance the budget, the fact that Social Security has been in the unified budget has been to the benefit of the Social Security fund. We have transferred funds from the general fund to the Social Security fund.

In the second place, the Senator from Massachusetts said there was some sort of sacred commitment on COLA's given to those now drawing benefits. We did not even have COLA's. We did not have COLA's in place until, for the first time, 1975, and most of the people now drawing Social Security benefits paid in for years long prior to 1975, so they were not paying into Social Security under any promise that they would receive COLA's.

I appreciate what the Senator from Texas has said. We do have sacrifices from all other parts of the budget. My point is simply this: I do not believe that the Social Security recipients of this country are unwilling to do their part as long as everyone else is.

I now yield 2 minutes to the Senator from Minnesota.

Mr. BOSCHWITZ. I thank the Senator very much. I wanted to respond briefly also to the Senator from Colorado, who says that certain defense contracts are not within the realm of Gramm-Rudman. More and more each day as time passes those contracts will come within the realm of the Gramm-Rudman amendment. Some of them indeed are not, but defense, as Senator GRAMM has pointed out, is more subject to the annual appropriation process than perhaps any other elements of the budget, and therefore should not in any way be regarded as being off limits as far as the Gramm amendment is concerned. They are more on limits really than other parts of the budget.

Senator RUDMAN said to the Senator from Colorado that $500 billion is not included in Gramm-Rudman; most of the $500 billion really are the entitlement programs that constitute 44 percent of the budget. The entitlement programs can only be impacted by the

Gramm-Rudman-Hollings amendment with respect to their COLA. So the vast part of all those entitlements cannot be impacted by Gramm-Rudman. That is why such a large amount is not within its scope. But I, too, join my friend and colleague from Oklahoma in recognizing the realities that if we are going to be fair in bringing about the end of the large deficits, if we are going to benefit as a nation, that all must participate because all will benefit when those deficits are reduced.

Mr. LEVIN. Mr. President, I believe that deficit reduction should be across the board and in the spirit of shared sacrifice. I have no disagreement with my good friend from Oklahoma on this matter.

I also believe, however, that we cannot include Social Security COLA's as part of a package like the President's sequester order under Gramm-Rudman if there are no revenues as part of that package. I do not believe that we should reduce Social Security COLA's at the same time that a package does not, for instance, include revenues from a more effective minimum tax on those profitable corporations and wealthly individuals who are right now avoiding paying anything in taxes. That would not meet the test of fundamental fairness and shared sacrifice. For a similar reason, I hope that in the negotiations in the conference committee with the House of Representatives means tested entitlements should also be excluded from the President's sequester order.

Mr. BOREN. Mr. President, how much time is remaining to the Senator from Oklahoma.

The PRESIDING OFFICER. The time remaining to the Senator from Oklahoma is 3 minutes and 6 seconds.

Mr. BOREN. I yield 1 minute to the Senator from Idaho.

Mr. SYMMS. I thank the Senator very much for yielding.

Mr. President, I compliment the Senator from Oklahoma and the Senator from Minnesota for sponsoring this amendent. I believe this amendent is fair. To take our large segments of the budget makes this whole proposition less workable, and I think in the long run, as Senator BOSCHWITZ just stated so very clearly, all Americans will benefit from honest and sound budgetary control and fiscal policy. Therefore, it will be more workable. It was taken out because of politics but that does not mean it is right. It would be more right to include it. My parents, with millions of other people in this country, are Social Security recipients and they are no less patriotic or no less willing to put their shoulder to the wheel to help all people in the country have fiscal honesty and fiscal sanity. I urge passage of the amendment. I support the Senator from Oklahoma.

Mr. BOREN. I thank the Senator from Idaho. I yield 1 minute to the distinguished chairman of the Budget Committee, the Senator from New Mexico.

Mr. DOMENICI. Mr. President, I thank the distinguished Senator. I compliment him.

This bill we are debating starts with the premise that the United States is in a fiscal state of emergency. I submit that if the senior citizens of this country are confronted with an emergency in their country, if they were sitting up here listening and they thought that we were going to exclude them while we are going to put everybody else in, including all their other retired brothers in the country, military, civilian and otherwise, they would tell us we are crazy; they would say, "If we are in an emergency and we are talking about whether we get an increase or not, we will take the share of this emergency like everybody else."

Now, if we can control the budget, we do not have to get any of the senior citizens. That is the issue. We do not have to get Social Security or otherwise.

The PRESIDING OFFICER. The Senator's time, 1 minute, is up. There is 1 minute remaining on each side.

Mr. BOREN. Mr. President, I yield to myself the remainder of the time.

Mr. President, over the past few weeks, there has been a lot of debate about the need to take Social Security off the budget. Regardless of what has been said, Social Security cannot really be removed from the Federal budget. Any surplus revenues received by the trust fund ultimately flow into the general funds of the U.S. Treasury through investments in U.S. Government securities. Further, any shortfall of revenues causes the Government to reduce spending in other activities, raise taxes or borrow elsewhere to repay the earlier loans it received from Social Security. In other words, the investment policies of the trust fund cause it to affect the official budget in one way or another, whether it is considered a part of the budget or not.

I think my colleagues will recall that just a couple of years ago, we had to take money from the general fund and place it in the trust fund to keep the fund solvent. Contrary to popular belief, Social Security has increased Federal borrowing needs in all but 2 years since 1969. I urge my colleagues to recall also that prior to 1975, there were no automatic COLA's. If increases were deemed necessary at that time, the financial condition of the program was reviewed and, when necessary, additional taxes were levied or expectations were lowered. It could be stated that automatic COLA's could be the reason for the two major financing crises the program has had in the last 10 years. The first automatic COLA was an 8-percent increase in 1975.

Over the past 10 years. COLA's have ranged from a low of 3.5 percent in 1984 and 1985 to a high of 14.3 percent in 1980. When we are in the midst of a budget crisis, we simply cannot afford to have automatic increases in a nonmeans-tested program if all other nonmeans-tested programs are not receiving COLA's. When we are reducing COLA's for all means-tested programs, how can we justify unlimited increases in Social Security when only $1 of every $10 expended on Social Security increases goes to people below the official poverty level? How can we ever balance the budget if 22 percent of spending—and it is Government spending—is ruled off limits? We cannot.

Social Security spending in fiscal year 1984 was $178 billion, while, in the same year, only $167 billion was collected from active workers for the Social Security Program. The Congressional Research Service estimates that employee-employer contributions, with compounded interest, covers only 40 percent of the benefits received for the average retiree. For almost two decades, outlay increases arising from Social Security benefit increases have been the largest single component of the program's growth and generally have been substantially greater than combined outlay increases by all other COLA's. It is paradoxical that in recent years AFDC, Food Stamps, Medicaid and other means-tested programs have been cut while Social Security cost-of-living increases continue. It is simply unfair to impose sacrifices on those who rely on means-tested income-transfer programs while Social Security recipients, many with moderate and high incomes, receive large COLA's.

On average, Social Security recipients are financially better off than recipients of means-tested programs; 79 percent of Social Security recipients, between the age of 50 and 65, are homeowners and half of them have their homes paid for. In the 65 to 75 age group, 77 percent are homeowners, and 80 percent in this category have their mortgages paid off.

How can we say that this category is going to be exempt from reductions in COLA's when food stamp recipients and AFDC recipients are going to take a reduction in their COLA? We cannot.

Mr. President, the amendment I am offering today is fair and equitable. If everyone else is going to take a reduction in COLA's, it is only fair that Social Security recipients take a reduction as well. I urge my colleagues to join me in making the Balanced Budget and Emergency Deficit Control Act of 1985 a fair and equitable act.

Mr. President, I know there are some honest differences of opinion. I hope Senators in this Chamber sincerely believe, as I do, that our Social Security recipients are committed to this country, are patriotic; as long as others are doing their part, they want to do their part, too. I hope those who sincerely agree with me vote with me and not fail to vote with me out of fear of what the political repercussions might be. I have had many people come up to me and say, "You are right, but why are you bothering to offer this amendment? There is just too much political opposition to it." I think that is a misstatement. I think it does underestimate the sincere understanding of the senior citizens of this country. It underestimates their patriotism.

I, for one, stood up yesterday and tried to make sure that General Dynamics and others pay their fair share with a minimum corporate tax. All others do it, even those below the poverty level. I think the Social Security recipients would be the first to say, "We want to do our part." I urge my colleagues to vote that way.

The PRESIDING OFFICER. All time of the Senator from Oklahoma has expired. The Senator from Oregon is recognized.

Mr. PACKWOOD. Mr. President, I move to lay on the table the amendment of the Senator from Oklahoma.

Mr. BOREN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Minnesota [Mr. DURENBERGER] is necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 71, nays 27, as follows:

[Rollcall vote No. 215 Leg.]

YEAS—71

Abdnor	Denton	Heinz
Andrews	Dixon	Hollings
Bentsen	Dodd	Humphrey
Biden	Dole	Inouye
Bradley	Evans	Johnston
Bumpers	Ford	Kasten
Burdick	Glenn	Kennedy
Byrd	Gore	Kerry
Chafee	Gorton	Lautenberg
Chiles	Grassley	Laxalt
Cochran	Harkin	Leahy
Cohen	Hart	Levin
Cranston	Hawkins	Lugar
D'Amato	Hecht	Matsunaga
DeConcini	Heflin	Mattingly
McConnell	Proxmire	Specter
Melcher	Pryor	Stafford
Metzenbaum	Quayle	Stevens
Mitchell	Riegle	Thurmond
Moynihan	Rockefeller	Trible
Murkowski	Roth	Warner
Packwood	Sarbanes	Wilson
Pell	Sasser	Zorinsky
Pressler	Simon	

NAYS—27

Armstrong	Exon	McClure

Bingaman	Goldwater	Nunn
Boren	Gramm	Rudman
Boschwitz	Hatch	Simpson
Danforth	Hatfield	Stennis
Domenici	Helms	Symms
Eagleton	Kassebaum	Wallop
East	Long	Weicker

NOT VOTING—2

Durenberger Mathias

So the motion to lay on the table the amendment (No. 757) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. PACKWOOD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 764

(Purpose: To provide that the President may not recommend actions to increase borrowing authority or to increase the public debt limit by more than the applicable amount)

The PRESIDING OFFICER. Under the previous order, the Senator from Ohio is recognized to call up an amendment.

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Ohio [Mr. GLENN] proposes an amendment numbered 764.

Mr. GLENN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

At the end of the joint resolution add the following new subsection:

( ) Section 1105(c) of title 31, United States Code, is amended—

(1) by striking out "The" the first time it appears and inserting in lieu thereof "(1) Notwithstanding any other provision of law, the";

(2) by inserting "(other than action that would require an increase in borrowing authority or an increase in the limit imposed by section 3101(b) of this title by more than the applicable amount for the fiscal year for which the budget is submitted)" after "action" the first place it appears; and

(3) by adding at the end thereof the following new paragraph:

"(2) For purposes of this subsection, the term 'applicable amount' means—

"(A) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000; and

"(D) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and

"(E) with respect to the fiscal year beginning October 1, 1990, and each fiscal year thereafter, zero.".

UNANIMOUS-CONSENT AGREEMENT

Mr. DOLE. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. GLENN. Yes.

Mr. DOLE. Mr. President, earlier this morning, with the consent of the distinguished minority leader, I postponed any action on the cloture motions pending, including the live quorum, until 1 o'clock. I now ask unanimous consent that it be postponed until 3 o'clock.

The PRESIDING OFFICER. Is there objection?

Mr. DECONCINI. Reserving the right to object, Mr. President, I do not intend to cause a problem here. I understand some of what is going on. But I am concerned about the reason for this. I presume it has something to do with the Budget Committee and the Domenici perfecting amendment.

Some of us would like to know what those might be before we continue to proceed. Because I could see a stampede to get out of here tonight and, all of a sudden, being presented with the Domenici proposal and really not having an opportunity to know what happened. If I may ask the majority leader a question: If we impose cloture now, if it were invoked, would that prevent any further amendment? Is that correct?

Mr. DOLE. Yes; that would take care of any amendments, because there are no amendments timely filed at the desk. So there would not be any more.

Mr. DECONCINI. Which would include the so-called Domenici budget amendment?

Mr. DOLE. Which would include the Domenici amendment and the amendment of the distinguished Senator from Ohio, and others.

Mr. DECONCINI. Mr. President, I do not have any great desire to do that, but I also do not want to be hung out here not knowing what we are going to have presented. Maybe the leader or the distinguished chairman of the Budget Committee can give us some kind of an idea of when we can see something.

Mr. DOMENICI. Mr. President, I would think that in the next 20 or 25 minutes we can have something that we could show everyone.

Mr. DOLE. Let me also indicate to the distinguished Senator from Arizona that the motions were filed by the distinguished minority leader. My only purpose in postponing was that we had, sort of in good faith, promised a number of Senators that they could offer amendments today. They were

sequenced and we had time agreements. I am also aware it would take care of the Domenici amendment.

But I said from the start if that could not be explained satisfactorily to the Senators who have objections, it is probably not going to come up anyway. I know the Senator has discussed it, or will, with the distinguished Senator from Colorado, the distinguished Senator from Ohio, and now with the distinguished Senator from Arizona. I know the Senator has been working on it most of last night and this morning with the distinguished Senator from Florida [Mr. CHILES].

So if Members are not satisfied, I assume that is going to be the end of that effort.

Mr. HART. Mr. President, reserving the right to object, I believe the concern, if I understand the Senator from Arizona, is shared by the Senator from Colorado, and that is if we have a situation in which the procedures enable the distinguished Senator from New Mexico to bring the package on the floor, and there is no objection to 95 or 98 percent of it, but one aspect of that modification is of deep concern, we would then be precluded from seeking any adjustment in the normal course of things; that is, the amendment process on the floor of the Senate.

I believe that is our concern, not to block the effort to clean up the basic amendment. But there are some fundamental changes in that, and I think those two or three areas were the ones that concerned people.

Mr. DOLE. Right.

Let me indicate that I apologize to the distinguished Senator from Colorado, because I pushed a little hard yesterday. There was no effort to block the bill. I think he has expressed a legitimate concern. If there are nine parts and you can agree on eight, my view is the ninth one is going to go bye-bye.

Mr. DECONCINI. If the majority leader will yield for a point of clarification, if I understand what he is saying, the so-called Domenici package, the Budget Committee Domenici package, that has to be agreed on by everyone.

Mr. DOLE. Not everyone.

Mr. DECONCINI. I mean, can it not be offered later and brought to a vote, if the Senator wants to?

Mr. DOLE. It can be offered later. But we would like to conclude action today. We would like to make certain it is a pretty unanimous acceptance. I think that is what the Senator from New Mexico is trying to achieve.

Mr. DOMENICI. The distinguished leader is correct.

Mr. DECONCINI. I withdraw my reservation of objection.

Mr. HART. Reserving the right to object for just one moment, what I think is important is, in ironing out the differences, that what the Domenici package does is on the record. I know we are doing a lot of legislating here in Cloakrooms. Later on down the road, no one is going to have access to the record made in those Cloakrooms.

So what the modification means a year from now or 2 years from now, if it is not a matter of public record, is not going to mean much.

So I think it is important not only to work things out as the leader said but to work them out on the record so that record is available to people who have to implement this modification.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? Without objection, it is so ordered.

The Senator from Ohio.

AMENDMENT NO. 764

Mr. GLENN. Mr. President, I offer an amendment to require that when the President submits his annual budget, he also make recommendations to the Congress on how to achieve a balanced budget. The amendment does this by taking a requirement already in the law—that the President recommend each year how to make up for budget deficiencies—and require that any such recommendation not include borrowing or raising the debt limit.

If I could have the attention of my colleagues, I believe there is something we have all overlooked all the way through this budget consideration. With regard to the budget and its submission to the Congress, I would like to cite from current law. This is what is in the United States Code right now. I hope once we go through this we would have the support of everyone on this amendment. At the appropriate time I will ask for the yeas and nays because, Mr. President, the reason I say we have bipartisan support for this is because I see it as a bipartisan effort.

What we are setting in place is long-term policy for this country. Current law says the following. I quote from 31 U.S.C. 1105(c). I would like for everyone to listen to this:

> The President shall recommend in the budget appropriate action to meet an estimated deficiency when the estimated receipts for the fiscal year for which the budget is submitted—

Then some language about what the total budget will be—

> are less than the estimated expenditures for that year.

The operable language, Mr. President, is this, I will read that again:

> The President shall recommend in the budget appropriate action to meet an estimated deficiency when the estimated receipts for the fiscal year for which the budget is submitted are less than the estimated expenditures for that year.

It seems to me, Mr. President, that is very, very straightforward. It cannot be misunderstood. Why is it not being done? Let me go further with this. The appropriate action that the President is to recommend—I would add it is only a recommendation. Congress would still have to work its will. So it is a recommendation. But appropriate action is defined in the explanatory notes in this way:

> In subsection (c) the words "new taxes, loans or other" are omitted as being included in "appropriate action."

So the "appropriate action" that the President is to recommend to us can be new taxes, loans, or other, which gives any President, Democrat, Republican, Independent, whatever, a completely blank check to make his honest heartfelt recommendations as to what the budget for our Nation should be. In other words, it is the clear intent of the Congress as written into current law that the President not only right now is required to submit a budget to the Congress—that is covered in the code and he has to submit a budget—but that when that budget is not balanced, the President will further be required to make recommendations to the Congress as to what appropriate action he deems advisable to make up the monetary shortfall.

The obvious next question is why do not Presidents do this since it is required by law? It is a clear intent of the law. It goes way back through many Presidents. I guess the easy answer is that for many years they have sort of copped out. They have taken the easy way out. They have just asked for new loan authority because that is one of the remedies, and one of the recommendations that can be made as part of that appropriate action. So for years and years, not just this administration, but going way on back, Presidents have used that loan authority—that means debt increase as per the explanatory notes above—to qualify in their recommendation to the Congress.

There is also the claim that just a submission of the budget itself qualifies Presidents under that law. That, according to Presidents past and the present President, and according to OMB, then qualified them as far as the requirements of the law are concerned because they have technically qualified as having made up a budget for the Congress, whose implication was to increase the national debt quite a number of times throughout the years.

But I submit that certainly was not the intent of the law. And after all this time, budget after budget after budget through both Republican and Democratic Presidencies, what should we as the Congress do? Should we basically change the budget

law with new sequester authority, and fine-tune percentages of what reductions will come from where? Can we eventually define in advance clearly what the needs of our Nation will be? Do we in Congress even have all the resources at our end of the avenue to make those decisions?

Mr. President, the system we have in place right now under current law was devised to have the executive branch with all of its resources put together a budget, and submit it to Congress. Where that budget predicted a deficit, the system then requires the President to also advise the Congress as to his view as to how we should make up the short fall. Then Congress works its will.

There is nothing really wrong with that system if we just make it work. That is what my amendment will do. The amendment is very simple. It simply provides that when the budget submitted is not in balance, then the President cannot just recommend another debit increase as a way of making up the short fall. The President must actually give us recommendations that will deal with that imbalance.

I think that is very simple and straightforward. We should have done this a long, long time ago. It is a very simple change to existing United States Code. Further, I realize that this cannot be done overnight. We are in such an indebtedness situation now and the deficit is building up every year with all the bad things that debt brings along with it that we are all familiar with. So I have proposed phasing this in over a period of time, the same as the Gramm-Rudman proposal right now so it gives the President the same goals as provided in Gramm-Rudman now.

I believe this is workable. I believe it puts responsibility for budgeting where the present law clearly intended it to be, and where I fully believe it should be. It puts that responsibility on Democrats, Republicans alike. And as to politics, it would not be 100 percent in effect before the new Presidency because that would happen in 1990, the same as Gramm-Rudman. So as far as I am concerned, it is apolitical. It is something we should have corrected in our system a long, long time ago. It also does not alter the powers between branches of Government. I know that has been a matter of some discussion here on the floor with regard to the Gramm-Rudman proposal. So it is a much simpler and straightforward way of dealing with our most vexing problem today; that is, in dealing with our enormous deficit.

So I urge support for this amendment.

I reserve the remainder of my time.

Mr. President, I do not know what is the intent of those who oppose this on the other side—whether to address the issue directly or move to table it at the appropriate time.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. I am putting out a hotline call right now to find out if anyone wants to speak. If no one wants to on this side, I will move to table. But I will delay that momentarily.

Mr. GLENN. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 21½ minutes remaining.

Mr. GLENN. Mr. President, I see this as I said as an apolitical proposal. I think it improves the Gramm-Rudman proposal measurably. All it does is say in existing law we will require that submissions be made as to how we will get into balance each year. There are some differences with Gramm-Rudman here in that this would take effect and would not end in 1990 as the Gramm-Rudman proposal would do. This would go on and be U.S. law effective for all subsequent U.S. Presidencies, which certainly was the intent of the law to begin with. The President would have to submit a balanced budget each year or tell us explicitly, but without additional borrowing, how to get there. In doing so, it closes a significant—and I believe an unintended—loophole in the Gramm-Holling-Rudman bill which still allows the President to ask for more and more and more borrowing authority every year.

That is the way past Presidents, not just this administration but going back a number of administrations, have technically complied with the law.

Mr. President, I do not need to remind you or my colleagues of the serious economic conditions that have been caused by Federal budget deficits. The situation is grave. It affects every facet of our economy.

Any businessman who has seen cheap imports flood our country knows what effect deficits have on the value of the dollar. Any homebuyer who has applied for a mortgage knows what effect deficits have on interest rates. Any retired person who has worried about whether his or her Social Security check will be cut knows what effect deficits have on the crunch of budget priorities.

How has this state of affairs been allowed to take place?

I believe that the problem starts with the White House under numerous Presidents. Under title 31 of the United States Code, it is the President who starts the budget process by submitting a budget for the U.S. Government. Under section 1105(c) of the same title, he must take the estimated revenues, add it to the Government's cash on hand, and recommend appropriate action to meet any estimated shortfall compared with estimated outlays.

I understand that the requirement for the President to recommend appropriate action was written into law in 1921, and that the first President to cite this provision was President Hoover, when he submitted the fiscal year 1923 budget. Since then, Presidents have apparently believed that they were in compliance with this section just by submitting the budget itself. The reason this requirement has been overlooked is possibly because we have not had to deal with deficits of such magnitude until the present.

Let me observe, Mr. President, that if we think this is only an arcane and out-of-date, it is not. This whole thing was reviewed and brought up to date in 1974 when the Budget Act was put into place.

Now there is an interesting thing about this appropriate action that the President's supposed to recommend. Early versions of this subsection included the words "new taxes, loans"; that is, borrowing, "or other appropriate action." It was felt that the term "appropriate action" included the terms "new taxes" and "loans," and so those other words were struck. That has been included in the term now in the law.

What this has meant is that whenever estimated revenues plus cash on hand were going to fall short of spending, it has simply been the normal course of things to ask for more borrowing. That was the easiest thing to do.

My amendment would change this. By its passage, and by the legislative history being made right now, President Reagan and Presidents in the future would be required to follow section 1105(c) and make specific recommendations for making up the budget shortfall.

Mr. MURKOWSKI. Mr. President, will my friend from Ohio yield for a question?

Mr. GLENN. There is time on the other side.

Mr. MURKOWSKI. Mr. President, I ask the Senator in charge of opposition time if he will yield some time to me?

Mr. PACKWOOD. Yes, I yield from our time.

Mr. MURKOWSKI. As I understand the amendment of the Senator from Ohio, the requirement of the President to submit a balanced budget would dictate that we would have to address a $170 or $180 billion shortfall in the next fiscal year.

Mr. GLENN. No. This Gramm-Rudman proposal sets forth the goals that have to be met. My amendment phases in, in the same way, Gramm does. But after fiscal year 1991 when a

President does not submit a balanced budget, he can submit whatever budget he wants but he has to include with that the recommendation of how to get into a balanced budget. There is a distinction there.

Mr. MURKOWSKI. The Gramm-Rudman proposal, in effect, does the same thing.

Mr. GLENN. No, not in the same way. There are some differences here, too, in that this would also lock in for the future after fiscal year 1991. This would mean that Presidents in the future, whatever happens, would still have to make those recommendations back to us.

Mr. MURKOWSKI. Then there is the requirement that the President has to submit a balanced budget. The implication of that to me is that we have to either bring some significant cuts into play or consider some significant additional revenues.

Mr. GLENN. The point I was making is that the President can submit whatever budget he wants, but then he would also have to submit, as the law now requires, recommendations as to how we achieve a balanced budget, how we take care of the deficit each year. The one exception is that it phases in, like Gramm.

What has been used through the years, and in too many administrations, is just to increase the national debt. We might still have to do that, but at least the President, any President—not just this one—any President in the future would also have to submit recommendations as to how he is going to get us back into line. He makes those recommendations to the Congress and the Congress would then work its will.

Mr. MURKOWSKI. I thank my friend from Ohio.

More important, the amendment would bar the President when he makes his section 1105(c) report from recommending mere additions to borrowing authority or increases in the Federal debt.

The amendment is necessary because section 1105, even as amended by the Gramm bill, still gives the President authority to recommend more and more and more borrowing, and nothing else. This is still the plain meaning of section 1105, subsection (c).

The drafters of the Gramm bill probably think they have closed all the loopholes, and that the President is now locked in to submitting a balanced budget. But then again the drafters of section 1105 probably thought that subsection (c) was airtight, and would force the President to make specific recommendations for coping with shortfalls. We now have 1105(c) saying one thing and the President doing just the opposite. A lot of strange things can happen when you get lawyers to work trying to find loopholes in the law.

By submitting this amendment, therefore, I am developing the legislative history to revive the 1105(c) requirement, and I am closing the loophole in that subsection that still allows the President to recommend that we "just gotta borrow one more time." That is what Presidents through the years have done.

So long as any loophole exists, I am going to try to find it and try to close it.

Again, the intent of my amendment is to complement Gramm-Rudman and not to contradict it. To the extent Gramm-Rudman requires the President to submit a balanced budget, I have been in favor of it.

Last February, the President submitted a budget with the largest deficit in history for a President's budget: $180 billion. By 1990, the year in which the amendment offered by Senator GRAMM would balance the budget, the President's own budget would still leave us hanging with an $82.4 billion deficit. And this $82.4 billion figure is larger than any deficit in history prior to when the current administration took office.

I have taken a careful look at that budget, and nowhere do I see any recommendations for making up this $180 billion shortfall, or even the $82 billion shortfall we shall suffer in fiscal year 1990. The point is: Section 1105(c) is simply being ignored.

My amendment would not alter the President's authority under article 2, section 3, of the Constitution to recommend to Congress for their "consideration such measures as he shall judge necessary and expedient." In other words, the administration of Federal finances would not be impaired. What the amendment does, however, is place the burden of showing how we can achieve a balanced budget back where it belongs—with the President himself, whether Republican or Democrat.

With the projected deficit approaching $165 billion for fiscal year 1987, it is difficult to conceive of the President responsibly recommending a balanced budget for that year and possibly the next 2 years. For this reason, my amendment phases in, in the same way that the Gramm-Hollings-Rudman bill does. The numbers on the second page of my bill are the same as those in the Gramm bill. And with the submission of the fiscal year 1991 budget, the President will be required to make specific budget-balancing recommendations each year.

We phase it in, we require him to go partway each year, up until the 1991 budget, and at that time he would have to submit a budget that would have recommendations for full balancing.

With this step we can restore the goal of a balanced budget—each year and every year.

We shall thus be able to find out—each year and every year—exactly what it will take to achieve budget balance.

And we shall be able to bring the leadership of the President—each year and every year whatever the political party—into the effort to stop the present practice of borrow and spend and ask for more indebtedness.

Mr. PACKWOOD. Mr. President, I am prepared to yield back the remainder of the time on this side if the Senator from Ohio is prepared to yield back his time.

Mr. GLENN. Mr. President, I yield back the remainder of my time. I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PACKWOOD. Mr. President, I move to lay the amendment on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the motion of the Senator from Oregon [Mr. PACKWOOD] to lay on the table the amendment of the Senator from Ohio [Mr. GLENN]. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] is necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 33, nays 65, as follows:

[Rollcall Vote No. 216 Leg.]

YEAS—33

Abdnor	East	McConnell
Andrews	Garn	Nickles
Armstrong	Goldwater	Packwood
Boschwitz	Gorton	Roth

NOT VOTING—2

Laxalt	Mathias

So the motion to lay on the table was rejected.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the motion to lay on the table was rejected.

Mr. LEVIN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question occurs on the amendment on which the yeas and nays have been ordered.

Mr. GLENN. Mr. President, I understand that the other side wishes to keep the yeas and nays in. I am happy to vitiate the yeas and nays after that vote.

Mr. DANFORTH. Mr. President, I appreciate the willingness of the Senator from Ohio, but there are Senators on this side who requested that we do have a rollcall vote on this amendment.

Mr. RUDMAN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. RUDMAN. Who is controlling time right now?

The PRESIDING OFFICER. All time has expired.

Mr. RUDMAN. Mr. President, I ask unanimous consent for permission to proceed for 2 minutes to ask the Senator from Ohio a couple of questions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUDMAN. Mr. President, because there has been confusion about the amendment, the Glenn amendment really has no effect as far as this side is concerned other than to require that the President submit a balanced budget after 1991. The Senator from Ohio believes that it closes a loophole which the Senator from Texas and the Senator from New Hampshire do not believe exists.

But for purpose of clarity, I ask the Senator from Ohio if he could briefly explain the loophole he thinks is closed so we have it in the RECORD.

Mr. GLENN. Mr. President, the loophole is this. Under Gramm-Rudman—let me go back to existing law for just a moment. This is 31 U.S.C. 1105(c). Existing law says the President shall recommend in the budget appropriate action to meet estimated deficiency when the estimated receipts are less than the estimated expenditures for that year.

In the appropriate action definition in the explanatory notes it provides several ways the President can address that, one of which is by continued deficits. It is just by asking for additional borrowing authority.

Now in Gramm-Rudman that is not eliminated.

What I want to bring out here is a requirement for the President if he submits an unbalanced budget to us, which he can do and which he will be required to do during the next 4 years under anything proposed here, then he must also submit means of dealing with that other than asking for a debt increase, and that is the part that is different. That is the loophole that right now if Gramm-Rudman goes in, as I understand Gramm-Rudman, the President could still just say he technically complies with existing law by going ahead with a huge debt increase request.

I would say that that is one of the options he cannot use in the optional things he would give us in recommendations to reach a balanced budget, plus we make this permanent. It would be binding on all Presidents in the future. It would not phaseout in 1990, and I think that is an important difference.

Mr. RUDMAN. Mr. President, will the Senator agree that under Gramm-Hollings-Rudman the deficit is pegged at a particular amount and there obviously will be borrowing in each of those years, that the only difference is borrowing in fact would be capped if we comply with this law? Will the Senator agree with that?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. RUDMAN. Mr. President, I ask unanimous consent that the Senator from Ohio be able to answer that question.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. I thank the Chair.

Mr. President, my amendment is consistent with Gramm-Rudman as I see it. It locks this in. It says the President cannot just use borrowing authority to meet existing law and the United States Code makes it permanent in the future so Presidents always if they submit an unbalanced budget will come back and give recommendations. I strengthen it.

Mr. RUDMAN. The Senator from Ohio agrees it does not keep the President from borrowing money necessary to meet the Gramm-Hollings-Rudman target.

Mr. GLENN. In his budget, that is correct.

Mr. RUDMAN. I just think as long as we have that in the RECORD we can proceed with the vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] is necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

Mr. CRANSTON. I announce that the Senator from Oklahoma [Mr. BOREN] is necessarily absent.

The PRESIDING OFFICER (Mr. GORTON). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 93, nays 4, as follows:

[Rollcall Vote No. 217 Leg.]

YEAS—93

Abdnor	Goldwater	Mitchell
Andrews	Gore	Moynihan
Armstrong	Gorton	Murkowski
Baucus	Gramm	Nickles

NOT VOTING—3

Boren	Laxalt	Mathias

So the amendment (No. 764) was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BRADLEY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, as I understand, the distinguished Senator from New Jersey has the next amend-

ment, a gasoline tax, which can be disposed of rather quickly.

AMENDMENT NO. 753

(Purpose: To raise the excise tax on motor fuels by 18 cents a gallon)

Mr. BRADLEY. Mr. President, I send an amendment to the desk on behalf of Senator WEICKER and myself and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Jersey [Mr. BRADLEY], for himself and Mr. WEICKER, proposes and amendment numbered 753.

Mr. BRADLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution add the following new section:

SEC. . TAX ON MOTOR FUELS INCREASED 18 CENTS A GALLON.

(a) TAXES ON GASOLINE, DIESEL FUEL, AND SPECIAL MOTOR FUELS INCREASED 18 CENTS A GALLON.—

(1) GASOLINE.—Subsection (a) of section 4081 of the Internal Revenue Code of 1954 (relating to tax on gasoline) is amended by striking out "9 cents a gallon" and inserting in lieu thereof "27 cents a gallon".

(2) DIESEL FUEL AND SPECIAL MOTOR FUELS.—Section 4041(a) of such Code (relating to tax on diesel fuel and special motor fuels) is amended—

(A) by striking out "15 cents" in paragraph (1) and inserting in lieu thereof "33 cents", and

(B) by striking out "9 cents" in paragraph (2) and inserting in lieu thereof "27 cents".

(3) NONCOMMERCIAL AVIATION.—Paragraph (1) of section 4041(c) of such Code (relating to noncommercial aviation) is amended by striking out "14 cents" and inserting in lieu thereof "32 cents".

(b) RATES OF TAX FOR GASOHOL.—

(1) AMENDMENTS OF SECTION 4081.—Section 4081(c) of such Code is amended—

(A) by striking out "9 cents" each place it appears and inserting in lieu thereof "27 cents",

(B) by striking out "3 cents" each place it appears and inserting in lieu thereof "21 cents",

(C) by striking out "3⅓ cents" and inserting in lieu thereof "10 cents", and

(D) by striking out "5⅔ cents" and inserting in lieu thereof "17 cents".

(2) AMENDMENTS OF SECTION 4041.—Paragraph (1) of section 4041(k) of such Code (relating to fuels containing alcohol) is amended—

(A) by striking out "9 cents" and "15 cents" in subparagraph (A) and inserting in lieu thereof "27 cents" and "33 cents", respectively, and

(B) by striking out "3 cents" and "9 cents" in subparagraph (B) and inserting in lieu thereof "21 cents" and "27 cents", respectively.

(3) GASOLINE USED TO PRODUCE CERTAIN ALCOHOL FUELS.—Paragraph (1) of section 6427(f) of such Code (relating to gasoline used to produce certain gasoline fuels) is amended

(A) by striking out "9 cents" and inserting in lieu thereof "27 cents", and

(B) by striking out "5⅔ cents" and inserting in lieu thereof "17 cents".

(c) PARTIALLY EXEMPT METHANOL OR ETHANOL FUEL.—Paragraph (1)(A) of section 4041(m) of such Code (relating to certain alcohol fuels) is amended by striking out "4½ cents" and "9 cents" and inserting in lieu thereof "22½ cents" and "27 cents", respectively.

(d) USE IN CERTAIN TAXICABS.—Paragraph (1) of section 6427(e) of such Code is amended by striking out "4 cents" and inserting in lieu thereof "22 cents".

(e) FLOOR STOCK TAX ON GASOLINE.—

(1) IN GENERAL.—On gasoline subject to tax under section 4081 of such Code which, on January 1, 1986, is held by a dealer for sale there is hereby imposed a floor stocks tax at the rate of 18 cents a gallon.

(2) OVERPAYMENTS OF FLOOR STOCKS TAX.—Section 6416 of such Code shall apply in respect to the floor stock tax imposed by this subsection, so as to entitle, subject to all provisions of section 6416 of such Code, any person paying such floor stocks tax to a credit or refund thereof for any of the reasons specified in section 6416 of such Code.

(3) DUE DATE ON TAX.—The tax imposed by this subsection shall be paid at such time after February 15, 1986, as may be prescribed by the Secretary of the Treasury or the delegate of the Secretary.

(4) TRANSFER OF FLOOR STOCKS TAX TO HIGHWAY TRUST FUND.—For purposes of determining the amount transferred to the Highway Trust Fund for any period, the tax imposed by this section shall be treated as if such tax was imposed by section 4081 of such Code.

(5) DEFINITIONS.—For purposes of this subsection—

(A) The term "dealer" includes a wholesaler, jobber, distributor, or retailer.

(B) An article shall be considered as "held by a dealer" if title thereto has passed to such dealer (whether or not delivery to such dealer has been made) and if for purposes of consumption title to such article or possession thereof has not at any time been transferred to any person other than a dealer.

(f) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1986.

Mr. BRADLEY. Mr. President, earlier in this debate I offered an amendment to reduce the deficit by cutting the growth in defense spending by 5 percent. That amendment was properly defeated. Indeed, I voted against it because its passage would imperil our national security and jeopardize the security of our friends and allies around the world. I believe America's military strength cannot be made a pawn to the idle game of a balanced budget.

Mr. President, supporters of Gramm-Rudman, all of whom voted against my amendment, contend that such drastic action, whether in defense or nondefense areas, will not be necessary, because when the crunch comes, they assure us, Congress will screw its courage to the sticking point and vote to raise taxes.

Mr. President, I have an amendment that will put that comfortable hypothesis to a test.

The amendment I am now offering will reduce the deficit by about $70 billion over the next 5 years. It will do so by levying an additional 18 cents a gallon excise tax on gasoline and other motor fuels to go into general revenues.

Mr. President, we will have the opportunity to see who would like to raise taxes in order to reduce the budget deficit.

Mr. President, yesterday in the debate there was an overwhelming vote for Gramm-Rudman, the mandatory balanced budget amendment. Everybody issued their press release proclaiming the end of our deficit problems.

What happened today? We have had a vote to cut defense spending as Gramm-Rudman mandates, and 85 Senators said, "No, I do not want to cut defense spending even to the level mandated in Gramm-Rudman."

The distinguished Senator from Oklahoma then offered an amendment to add Social Security to the list of programs subject to budget cuts. What happened? Ninety Senators said, "No, not me. I am not going to touch Social Security."

Now, Mr. President, I offer an amendment to raise some revenues. I am under no illusions, though. Other than the distinguished Senator from Connecticut and I, who are cosponsors of this amendment, only a handful of Senators will vote for it. But then the point will have been made.

How serious can this body be about deficit reduction if only 1 day after voting for a mandatory balanced budget it then votes not to do anything about defense spending, Social Security, or revenue?

Mr. President, I think that Gramm-Rudman will have been exposed as a mere procedural answer to a serious substantive problem.

This amendment is a gasoline tax, 18 cents a gallon. We have heard a lot in the last few days about minimum taxes and how they will get us out of our revenue bind.

Mr. President, I do not believe that. We already have two minimum taxes in the current law. They are well-named minimum taxes because they raise a minimum of revenue, about $2.5 billion a year from some 250,000 individuals and 8,000 corporations. The reason they do not raise more is that Congress has been reluctant to get tough enough with the loopholes.

We have also properly hesitated to extend the minimum tax to the middle class. That is another way to get a lot of revenue out of the minimum tax. We just slap a surtax on people making $25,000 and call it a minimum tax.

Mr. President, I think we have to stop kidding ourselves that we will tax our way out of the deficit with a mini-

mum tax. If we are serious about raising substantial revenues in a short time, we will vote a gasoline tax and use the revenues to reduce the deficit. Moreover, gasoline tax is not only good fiscal policy, it is also good energy policy. Here is why: The price of crude oil is falling. That is good. But even with falling prices and plentiful supplies, we need to ask ourselves a sobering question: Now that the price of oil is coming down, how do we keep it down? The sober answer, and surely the Senate is all for sobriety as we contemplate this horrendous deficit, is that we keep it down by raising oil product taxes to keep the lid on oil consumption.

Car makers are already finding a market for bigger, more profitable but gas-hungry autos. Airlines are questioning the wisdom of buying new fuel-efficient aircraft.

Gasoline taxes, as a share of the pump price, have dropped way down.

As OPEC prices fall, taxes on domestic consumption should rise. This would keep foreign oil producers on the defensive through the rest of this decade.

Mr. President, my amendment does three things:

First, it tests the resolve of Congress to raise taxes in order to avoid the dangerous and draconian effects of Gramm-Rudman.

Second, if adopted, it will really deal with the deficit, not just postpone the day of reckoning with a lot of posturing.

Third, it will enhance our energy security by promoting conservation and fuel efficiency in a way that works.

Mr. President, if the deficit is urgent enough to pass Gramm-Rudman, it is urgent enough for us to act now.

Mr. President, I reserve the remainder of my time.

Mr. President, how much time remains?

Mr. BRADLEY. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from New Jersey has 14 minutes remaining.

Who yields time?

Mr. BRADLEY. Mr. President, I am pleased to yield 2 minutes to the distinguished Senator from Connecticut [Mr. WEICKER].

Mr. WEICKER. Mr. President, I rise to congratulate the Senator from New Jersey on his fine amendment. As he and the rest of my colleagues know, I introduced a gasoline excise tax bill in the Senate on March 26. My bill, S. 735, calls for an increase in the excise tax on gasoline and diesel fuel by 10 cents a gallon for each of the next 3 years and would reduce the deficit by $51 billion over 3 years.

There are not many times that we have the opportunity to truly, effectively challenge two problems at the same time. This amendment does just that. It instills the conservation ethic into national policy when it comes to energy. And believe me, it is only a matter of time before, once again, we are in the middle of a 1974-75 energy crisis. And, No. 2, it attacks the matter of the deficit.

Senator BRADLEY's amendment would add an additional 18 cents per gallon tax for the next 5 years. The extra $70 billion generated would also go directly toward reducing the deficit.

A gas tax has long been needed, both as a way to reduce deficits and to create once again a strong energy conservation mentality. It was not that long ago, Mr. President, when this country was faced with mile-long gas lines and staggering price hikes as a result of OPEC blackmail, Iranian oil cutoffs, and other uncontrollable events. That painful memory seems so distant. In the past few years, we have all seen oil and gasoline prices fall precipitately in conjunction with the temporary demise of OPEC. This has, I believe, lulled us into a false sense of security.

Everyone in this body knows we are going willy-nilly down the path to energy profligacy. We are going to end up with America in the gas lines and OPEC dictating the price. I can assure my colleagues the only way we are going to get any kind of conservation effort is by prospectively making America understand that energy is going to be expensive.

This Nation is complacent about gasoline supplies, yet we know this glut will not last. We have not seen the last of Mr. Yamani and OPEC. When our current sources of imported oil such as Mexico and the North Sea slow production and eventually dry up, we will once again be relying upon oil from the most politically volatile area of the world, the Middle East. The recent hijackings, whether of planes or ships, whether by Shiites or PLO guerrillas, should remind us of this.

An excise tax on gasoline can return us to conscious energy conservation. Motor fuels account for over 60 percent of all petroleum consumed in the United States. Studies have shown that more efficient cars and more conservation that would ensue from a gas tax could result in a 50-percent reduction in use of motor fuels by the year 2000. While I cannot speak for Senator BRADLEY's amendment, the gas tax I recently introduced would result in a 12-percent decline in the demand for gasoline, according to the Congressional Research Service. These are not figures to be ignored.

So let me emphasize, Mr. President, that besides raising revenue to help reduce the deficit, this amendment represents good energy policy.

Some of you may have seen former Budget Director David Stockman on television a few Sundays ago where he suggested a raise in taxes of $100 billion. While the current political wisdom says this is impossible, let me say right now what I have said repeatedly in the past: Congress does not need gimmicks to cut the deficit. It doesn't need a constitutional amendment to balance the budget or a line-item veto or the Gramm-Rudman-Hollings mechanism the Senate passed yesterday. Congress needs some guts in dealing with the deficit and that means three things: Cuts in defense, entitlement reform, and revenue raisers.

Let us now take advantage of this revenue raiser used by every major industrial power in the West as an integral part of their energy conservation and budgetary policy.

Sooner or later, Mr. President, this body is going to have to do something more than pass on words on the floor of the Senate. I voted with Senator BOREN and others to put Social Security COLA's and means-tested entitlements back into this great budget deficit reducer. I voted for those taxes that are in this legislation before us.

I recommend passage of the amendment of the distinguished Senator from New Jersey. I know what is going to happen. This amendment will only get a few votes. It probably will not make it. But it seems to me the job of this body is to anticipate and not always react to crises. That is what this legislation does.

It is time we had a little vision around here rather than politics. It is time we had a little courage rather than always being followers, a little courage rather than reacting to public opinion polls. We are supposed to lead opinion, not follow it.

Since I introduced my proposal 4 months ago, there have been numerous editorials supporting this approach and I ask unanimous consent that they be printed in the RECORD.

Mr. President, I strongly support this amendment and I urge my colleagues to support it as well.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 28, 1985]

TIME TO RAISE TAXES

One clear and simple test will tell you whether any deficit-reduction plan is a serious proposal. If it contains a tax increase, it's serious and worth pursuing. If there's no tax increase, you can safely dismiss it as posturing and windbagging. Nobody, including President Reagan, is willing to support enough budget cutting to bring spending down anywhere close to present revenues. That's why revenues are going to have to go up.

By this test, the budget plan put forward last week by Sens. Robert J. Dole and Pete Domenici is a serious proposition—and the only serious proposition now under discussion. If President Reagan and the House Democratic leadership do not pledge their support in the coming week to the Senate plan, or some close variant of it, there will

be no progress on the deficit this year. Next week the long congressional recess begins.

The tax in the Senate plan is a tariff on imported oil—$5 a barrel for crude oil, $10 a barrel for refined products such as gasoline. It is, in fact, a bad tax. It's bad for the same reason that gives it a chance of being enacted. For every dollar that it raises for the U.S. Treasury, it will add at least $2 and perhaps much more to the profits on the domestic oil producers and refiners. It promises an enormous bonanza to the domestic oil industry, attracting the interest of the independent producers' and refiners' formidably active and well-heeled lobbies.

Why does the tax generate this bonanza? Because the price of imported oil sets the price for U.S. oil. If a tariff raises the price of imported oil, the price of all domestic oil will rise by the same amount—and this country currently imports slightly less than one-third of its oil. Five dollars a barrel is, incidentally, 12 cents a gallon. The same mechanism works less precisely among refined products, because of the excess refining capacity in this country. But you can confidently assume that a $10-a-barrel tariff on refined products is going to widen the spread between the prices of crude oil and everything that's made from it—gasoline, heating oil, industrial fuel and the rest.

There's a better way to do it. These taxes on foreign oil would raise something in the area of $10 billion a year. A tax of 10 cents a gallon on gasoline would raise the same amount far more efficiently and fairly. It would avoid the further enrichment of an already very rich industry. It would cost consumers less than the oil-import tax. Unlike the tariff, it would involve no trade-law violations, nor would it disrupt the economies of this country's major oil suppliers—Mexico, Canada and Venezuela. A simple tax on gasoline is superior on every count.

But the central and compelling necessity this summer is to begin a sustained attack on a budget deficit that threatens the stability of the whole economy. As long as the choice is between an oil tariff and the gasoline tax, the gasoline tax is greatly preferable. But if the choice is between an oil tariff and no action at all on the deficit, then it will have to be the oil tariff. This is the week when the country will find out whether President Reagan and the House Democrats are serious about getting the deficit under control.

[From the New York Times]

THE DEFICIT. REMEMBER THE DEFICIT?

Reality has begun to intrude on the discussion of Federal budget deficits. This healthy illumination makes the problem even more difficult than it appeared last month. It also forces attention back to raising taxes—with or without tax reform.

The reality is that both the Senate and House overstated the future savings in their projected budgets for fiscal 1986. The errors occurred largely because both blithely accepted the Administration's optimistic forecasts for growth and interest rates.

Both houses recently estimated in budget resolutions that the prospective deficit next year would be reduced by $56 billion. Already, the Administration and the Congressional Budget Office agree that the 1986 reduction will be smaller, possibly by one-third. Moreover, they now predict a 1988 deficit of at least $149 billion—a long way from the advertised target of $100 billion and maybe even close to the present $200 billion.

Among Congressional leaders, the chairman of the House Budget Committee, William Gray, has been the most forthright in drawing the obvious conclusion: that higher taxes will be needed after all. Even he recognizes the political reality that taxes can't be raised unless President Reagan changes policy and leads the effort. But the President remains adamantly opposed and has now distracted the country by devoting himself entirely to a tax reform plan that, by his own estimates, would enlarge future deficits.

The Administration has pretended all year, and Congress pretended to believe, that substantial deficit reduction and tax reform could be accomplished in a single year and kept discretely apart. That might have been possible if Mr. Reagan had contributed to deficit reduction with a tax that is unaffected by reform—a sales tax on gasoline, for example. But neither project looks feasible if he offers no new taxes and insists on reforming taxes in a way that would actually reduce prospective revenues.

Impossibly, the President contends that both projects have "priority." That sounds suspiciously like neither has. A priority takes precedence, and there should be no question that deficit reduction is essential whereas tax reform is desirable. It has been possible all along that the reform debate would in any case run over into next year or even the next Congress, starting in 1987. The new estimates imply that even then only a tax increase can achieve enough deficit reduction to permit a shift of attention to reform.

The burden of decision is not Mr. Reagan's alone. It's bad enough that he turns his back on the deficit crisis to promote tax reduction. Neither the Senate nor the House has addressed the substantial differences between their budget resolutions, let alone confronted the wrong assumptions on which both depend. Everyone's priority seems to be wishing that real problems just go away. They won't. And if neglected, they'll get worse.

[From the New England Newsclip (New London, CT), July 6, 1985]

SENSIBLE—A TAX TO FUEL THE ECONOMY

Seizing the movement, U.S. Sen. Lowell P. Weicker Jr. is pushing for a 10-cent-per-gallon increase in the federal gasoline tax over each of the next three years. That's a whopping 30 cents per gallon by the end of the senator's phase-in plan. Is Weicker's a fruitcake scheme, hatched in the oil fields of the Middle East after an afternoon of exposure to the sun? Hardly.

The Organization of Petroleum Exporting Countries (OPEC), fell into disarray last year, and this year the picture is even bleaker for the major oil-producing cartel. Crude oil prices, now at $28 per barrel, are expected to fall sharply by the end of the year. Some analysts say the price could decline to $20 per barrel.

As the prices fall steadily, consumer prices at the pump basically will follow the pattern of the crude oil declines, although at a slower pace.

"At a time of declining prices, this is an opportunity to be seized," says Weicker.

He sees the advantage of using the falling oil prices to put in place increased oil taxes. The major benefit would be to discourage discretionary or frivolous consumption of gasoline and further reduce demand for oil.

That already is occurring, and there's no reason to believe OPEC would be any more successful holding production down in the future. This is particularly true as independent oil producers such as Great Britain, Mexico and others pump more oil into the marketplace to compete with OPEC supplies.

The decline in oil prices would dramatically help curb inflationary trends in the American and European economies. A greater price stability throughout those economies in turn could lead to more reasonable wage-price relationships. Interest rates would benefit from this stability, too.

There would be an immediate therapeutic boost to the American economy because of the gas-tax increase. The government could use the revenues to help close the deficits that are hurting the nation.

The PRESIDING OFFICER. Who yields time?

Mr. BRADLEY. Mr. President, I inquire of the other side, does anyone wish to speak against this amendment?

Mr. PACKWOOD. To the best of my knowledge, those who are opposed have no intention of speaking. No one has asked me for time.

Mr. BRADLEY. Mr. President, did I understand that no one wants to speak against this amendment?

Mr. PACKWOOD. Mr. President, what I said was to the best of my knowledge, those who are opposed have not talked to me about speaking. Whether they are coming or not, I do not know.

Mr. BRADLEY. How much time remains?

The PRESIDING OFFICER. The opponents have 9 minutes, the proponents have 11 minutes.

Mr. WEICKER. Mr. President, the last poll that was taken in my State of Connecticut on this issue—after I announced my legislation calling for a gas tax—indicated that 79 percent of the people in the State of Connecticut were opposed to LOWELL WEICKER's amendment on this matter of energy conservation. Seventy-nine percent opposed. It does not make any difference to me. I can live with a poll; what I cannot live with is another gasoline crisis. That is what this amendment would so clearly preempt.

Mr. BRADLEY. Mr. President, let us see where we are now. Yesterday, the Senate voted for the Gramm-Rudman proposal. The press releases said the Senate has declared triumphantly that we will have a balanced budget in 1990. Then, Mr. President, today, I offered an amendment earlier to say, well, let us just do in the defense area what Gramm-Rudman mandates absent any congressional action this time next October. The Senate said, "No, we don't want to cut defense spending."

I think that was correct. I do not think we should cut defense spending 5 percent in real terms. But that is not what Gramm-Rudman says. It says a 5-percent real cut in defense next October absent congressional action.

Then the distinguished Senator from Oklahoma said, well, let us put Social Security in. The Senate overwhelmingly said no on Social Security.

Now I am saying, well, let us do something about revenues. My guess is that the Senate will say no on revenues too.

Mr. President, that is where the irony is, because the argument as to why there will not be a 5-percent real cut in defense from the supporters of the Gramm-Rudman amendment is that once we start to cut the President's favorite defense budget he will not veto a tax increase.

Mr. President, I am not so sure about that. I am not so sure there are 66 votes to override a veto if the President did veto a tax increase. So what will happen is what I have predicted will happen. I hope I am wrong. But when the President is given the option of higher taxes or putting the Gramm-Rudman across-the-board cut to his defense budget, he will not accept higher taxes. He will send a little amendment up here to exempt defense. And the brunt of the Gramm-Rudman across-the-board budget cuts will fall in the nondefense area. The brunt of the cuts will fall on education and the environment and infrastructure—roads and bridges. The $100 billion reserved in it by the controllable nondefense segment of the budget after Congress exempts defense will be decimated, Mr. President.

For those who have said, no, we will raise taxes, that would imply that I will have 66 votes for this amendment. I seriously doubt that I shall have 66 votes for this amendment, but I think once again, I will have demonstrated a point, which is that the Gramm-Rudman proposal is a procedural answer to a substantive question.

As the Senator from Connecticut has said, we have the procedures in the Senate to deal with the deficit. What we lack is the will.

I make my point for the third time: Yesterday, Gramm-Rudman passes. Today, do not cut defense, do not touch Social Security, and now the vote, do not raise any revenues. It makes one wonder how we will ever get this deficit down. It makes this Senator wonder. I am ready to put it to the test.

Mr. President, I ask for the yeas and nays on the amendment. I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PACKWOOD. Mr. President, I move to lay on the table the amendment of the Senator from New Jersey. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from New Jersey. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] is necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 89, nays 9, as follows:

[Rollcall Vote No. 218 Leg.]

YEAS—89

Abdnor	Glenn	Metzenbaum
Andrews	Goldwater	Mitchell
Armstrong	Gore	Murkowski
Baucus	Gorton	Nickles

Bradley	Hatfield	Pell
Eagleton	Matsunaga	Weicker

NOT VOTING—2

Laxalt	Mathias

So the motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the motion to lay the table was agreed to.

Mr. EVANS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I believe there is a quorum call and the cloture vote set by unanimous consent at 3 p.m.

I ask unanimous consent that the quorum call and the cloture vote to follow set at 3 p.m. be moved to 4 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, if I could have the attention of the floor manager——

Mr. PACKWOOD. Mr. President, if the Senator will yield, let me restate the unanimous-consent request.

Mr. LEAHY. I yield to the Senator from Oregon for that purpose.

Mr. PACKWOOD. Mr. President, I was unaware that the quorum had previously been waived. So let me rephrase my unanimous-consent request to ask unanimous consent that the cloture vote that was set at 3 p.m. be set at 4 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, if I could just have the attention of the distinguished Senator from Oregon, I am not sure just how we have gone on the record, but I have an amendment which has just gone through redrafting and it is on its way.

I wonder if there would be objection if I could speak to it for a few minutes on the time that has been set aside for this amendment and then actually submit it.

Mr. PACKWOOD. Mr. President, let me ask this question, because there have been lots of complaints justified from Members on all sides about amendments they have not seen. I cannot remember if the unanimous-consent order is related to a specific amendment or not.

Mr. LEAHY. I believe it did, referring to the inflation adjustments. It is an amendment, in fact, if the Senator will give me about 30 seconds I can give him a three-sentence explanation on it.

When you determine budget overages under this amendment, OMB and CBO would be required to adjust estimated outlays to reflect incorrect inflation adjustments in Federal contracts that are more than $20 million and some other selective activities such as leases. It applies only to contracts and activities that could be modified under their terms. In the event that CBO and OMB differ, the difference is split and the inflation rate used is the best estimate rate available to the particular industry involved in the contract.

Mr. PACKWOOD. Mr. President, what I want to check, though, is this: Did the unanimous-consent agreement the Senator had relate to a specific amendment and he now wants to offer a slightly different amendment?

Mr. LEAHY. It is on the same subject. It has been modified to meet the objections of some of the other Members.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 765

(Purpose: To provide for savings from inflation adjustments in contracts)

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows.

The Senator for Vermont [Mr. LEAHY] proposes an amendment numbered 765.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the resolution, add the following:

(—)(1) In preparing any report required under subsection (d)(1) for a fiscal year, the Directors shall comply with this subsection.

(2) The Directors shall—

(A) examine—

(i) each contract with a total amount of budget authority in excess of $20,000,000 under which outlays will be made in such fiscal year to determine whether such contract includes provisions for adjusting outlays in such fiscal year under such contract as a result of inflation; and

(ii) any other Government activity which the Directors consider appropriate under which outlays in such fiscal year will be increased as a result of inflation; and

(B) assume, in determining the total amount of outlays which will be made in such fiscal year, that the adjustments for inflation made in contracts described in clause (i) of subparagraph (A) and activities described in clause (ii) of such subparagraph will be made on the best available estimate of inflation for such fiscal year.

(3) In the event that the Directors are unable to agree under paragraph (2) on an amount of outlays with respect to any particular contract or activity, the Directors shall use the average of the amounts proposed by each of them with respect to such contract or activity.

Mr. LEAHY. Mr. President, shortly before submitting this amendment, I described it very much in a summary fashion in a short colloquy with the distinguished Senator from Oregon, and let me describe it a bit more.

It is a simple amendment. It speaks to the problem of the tremendous waste and inefficiency which has occurred due to incorrect inflation assumptions that have been built into many Federal contracts.

I also call my colleagues' attention to the fact that the amendment has been significantly modified in relation to the amendment I had originally contemplated, and I did that because we had shown it to a number of Senators and I was trying to bring in the best use of their wisdom on it.

My amendment requires the Office of Management and Budget and the Congressional Budget Office to examine all major Government contracts and other selected activities, such as leases, which have inflation adjustments and which by their terms can be modified, prior to issuing their estimates of budget overages.

And in preparing that estimate of outlays, CBO and OMB are required to adjust the inflation assumptions built-in to these contracts or other activities to reflect the best estimate of inflation in that particular activity. This provision recognizes that their are different inflation rates in different industries.

This provision would apply to all appropriate contracts and activities worth $20 million or more. Whenever a difference exists between the inflation estimates of CBO and OMB, the two agencies would split the difference, just as is prescribed in the Gramm-Rudman proposal.

I originally intended to offer my amendment, because many multiyear contracts, including military weapons systems contracts, were excluded from the across-the-board cuts, which may be activated when budget overages occur. It is my understanding, however, that the package we have been debating today would add back military and all other contracts.

I inquire of the sponsors of this measure. I wonder if the distinguished floor manager could tell me whether I am correct in that assumption, that the package we have been debating today would add back military and other contracts.

Mr. PACKWOOD. The principal sponsor of the bill is not here. I cannot answer that question.

Why do we not delay an answer to that question?

Mr. LEAHY. I leave the question, but I withhold it.

(Mrs. KASSEBAUM assume the chair.)

Mr. LEAHY. Whether to add it back or not, Madam President, I should have looked up before and noticed the Chair has changed since I started my statement.

I inquire of the sponsors of this measure, whether my understanding is correct. Are defense contracts and other contracts now included in the base for across-the-board cuts?

Regardless, Madam President, I would ask the Senate to support my amendment. It adds a new mechanism to the congressional budget process that encourages efficiency in Federal contracting, leasing, and other activities.

Thousands of long-term Federal procurement contracts have inflation assumptions built-in. Over the last few years, many of those forecasts have assumed a higher rate of inflation than actually occurred. The result has been that excess moneys have been set aside for inflation—moneys that could be used to reduce budget overages.

Indeed, last year, Secretary of Defense Weinberger found $4 billion in excess outlays, which had been set aside for inflation adjustments, which in my part of the world is a fair amount of change. In fiscal year 1985, for example, $84.8 million was saved by adjusting the inflation assumptions in the Trident submarine contract. $500 million was saved from the F-16 contract alone!

A simple example may help my colleagues understand my proposal. The General Services Administration may enter into a 5-year contract with a telecommunications firm to provide phone service for Government offices at a cost of $110 million in the first year. Built-in to that contract is the assumption that inflation in fiscal year 1987 will increase the cost of phone service by 10 percent or $10 million. However, in 1987 the rate of inflation may be 5 percent, meaning that $5 million in the contract was designated to cover increased costs which never materialized.

My amendment would require OMB and CBO to reduce estimated outlays by $5 million, as a result of the adjustments made in the GSA telephone contract. That savings in estimated outlays would be taken in account when calculating total estimated outlays, for purposes of determining whether excess outlays exist. The Budget Committee reports that over $10 billion has been saved in this way in the last several years.

Defense and domestic procurement contracts ought to be subject to the same economies as all other Federal programs, under the Gramm-Rudman amendment. One of the best ways to achieve that savings is by adjusting inflation assumptions.

Not only is this a means of efficiency, but my amendment may mollify the effects of any across-the-board spending cuts, by reducing excess outlay estimates by adjusting all inflation assumptions in all Federal contracts for the actual rate of inflation.

Money wasted on bad economic assumptions could be used much more wisely to fund programs like child nutrition and military retirement.

Madam President, I ask unanimous consent that a list of some of the savings that have been achieved by correcting inflation assumptions in Federal contracts be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Fiscal year 1984 Defense bill: $54 million from F-18 contracts; $192 million from F-15 contracts; $143 million from KC-135 re-engining contracts; $116 million from Trident contracts; $14 million from Navy CH-53 contracts; $50 million from hospital ship contracts; $217 million from other prior year shipbuilding contracts.

Fiscal year 1985 Defense bill: $500 million from F-16 contracts; $29 million F-100 engine contracts; $7 million Defense Satellite Communications program contracts; $84.8 million Trident contracts; $81.8 million DDC-47 program contracts; $61.2 mil-

lion FFG program contracts; $7.2 million low level guided bomb contracts.

Fiscal year 1986 Defense bill: $40.5 million C-5 simulator contracts; $61.8 million DDG-51 hull contracts; $40 million TAO contracts; $28 million CH-47 modification contracts; $30 million EH-60 A contracts; $12.7 million CG-47 hull contracts.

There are other problems with exempting prior year defense contracts. We have found that the completed contract tax method used by most defense contractors that numerous contracts are extended in costly and artifical ways in order.

Mr. LEAHY. Madam President, I urge my colleagues to support my amendment, which I feel improves our efforts to mandate a balanced budget and makes the process we are creating more efficient.

Madam President, I should note that really one of the leaders, if not the leader in the Senate in trying to bring about the kind of efficiencies I am talking about, is the distinguished Senator from Arkansas who sits directly behind me.

Madam President, I yield to him without losing my right to the floor.

Mr. PRYOR. Madam President, I thank very much the kind words just spoken by the distinguished Senator from Vermont and my friend who has taken the lead in this area.

Madam President, right now to be honest, under the time rules and our situation we find ourselves in this afternoon, I do not think there is the time to fully develop the magnitude of the issue that the Senator from Vermont has raised.

This is an issue not dealing with just hundreds of dollars or even thousands or millions of dollars. This is an issue that deals with billions and billions of taxpayers' dollars allocated and appropriated to the various agencies of Government based upon a 7, 8, 9 percent inflation rate, whatever, when actually the inflation rate has been 3 percent or maybe some years 4 percent.

A very good example, Madam President, of this whole area of concern the Senator from Vermont is raising at this time is found in a Comptroller General's report dated September 3, 1985, a recent report which indicates that this Congress has appropriated and allocated and given to the Department of Defense $36 billion more than the inflation rate calls for.

What happens to these dollars? That is a good question. Many of those dollars are reprogrammed. Many of these dollars, frankly, Madam President, I do not think any of us know what has happened to those dollars. But whatever the case may be, it has become an inflation windfall for many agencies of Government and particularly for the Department of Defense.

Madam President, next week I am very hopeful that the Senator from Vermont, the Senator from Tennessee, Mr. SASSER, the Senator from Iowa, Senator GRASSLEY—and I have talked at length with the distinguished Senator from Colorado, Senator ARMSTRONG—and others, it is very hopeful next week, in a special order or in some form of communication with our colleagues, that those who are interested in this issue, who have worked in this issue, can more fully explain to our colleagues in the Senate the gravity of this problem and some solutions that we think might deal with this particular problem.

Once again, I thank the distinguished Senator from Vermont. I am very proud to be a coauthor of his amendment: I appreciate him—and I know our colleagues do—bringing this matter to our attention on this particular bill in this particular manner.

I thank the Chair and I thank my friend from Vermont.

Mr. LEAHY. Madam President, I will be delighted to hear the statement that the distinguished Senators from Arkansas, Iowa, Tennessee, and others will be making next week or at some future time. And when that time comes, I hope the Senator from Arkansas would let me come and join and say how much I appreciate the leadership he has shown in this area.

Madam President, as sometimes happens, there are a couple of discussions going on off the floor regarding this which may well expedite the matter somewhat.

I suggest, at this moment, the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. LEAHY. How much time do I have remaining.

The PRESIDING OFFICER. The Senator has 20 minutes remaining.

Mr. LEAHY. Madam President, I would ask if the distinguished Senator from Iowa has no objection, that we might go to a quorum charged equally.

The PRESIDING OFFICER. Is there objection?

Mr. GRASSLEY. It is all right with this side so long as it reaches the point where we have not eaten up all the time on this side. Senator PACKWOOD did not ask me to save time.

Mr. LEAHY. I assure my distinguished colleague, when we get to that point and I have time and my colleague does not, I will yield time.

The PRESIDING OFFICER. Hearing no objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Madam President, from my understanding I can no longer speak as I normally do. I am prepared. I yield first, of course, to the Senator from Iowa. But I am prepared to yield back the balance of my time.

Mr. GRASSLEY. We have word from this side that this amendment has been cleared. We will accept it. Before I do that, I would like to say that there has been mentioned by two other speakers this afternoon of my interest in this area. I, too, support the amendment. I appreciate the Senator from Vermont, and the Senator from Arkansas speaking of my interest. I think it is a very worthwhile amendment. I urge it to be adopted. We accept it on this side.

Mr. LEAHY. Madam President, I yield back my time.

Mr. GRASSLEY. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Vermont.

The amendment (No. 765) was agreed to.

Mr. LEAHY. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRASSLEY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. I thank the distinguished Senator from Iowa.

AMENDMENT NO. 766

(Purpose: To require that amounts made available to carry out agricultural price support programs be reduced by the same percentage as relatively controllable expenditures)

Mr. MOYNIHAN. Madam President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New York [Mr. MOYNIHAN] proposes an amendment numbered 766. At the end of the resolution, add the following new subsection:

( ) Notwithstanding any other provision of law, amounts made available for a fiscal year to the Secretary of Agriculture or the Commodity Credit Corporation to carry out a program to provide price support to producers of an agricultural commodity (including any program under which payments are made to producers as target price payments or for participation in a reduced acreage, acreage set-aside, or acreage diversion program) shall be reduced by the same percentage as relatively controllable expenditures are reduced under subsection (d)(2)(A)(i)(II) of this section for such fiscal year.

Mr. MOYNIHAN. I thank the most cooperative and unfailingly accurate clerk.

Madam President, I took the liberty of allowing—or in effect requiring—the clerk to read the whole of this amendment because unlike much that we have to deal with of necessity—and some of contrivance—this is a plain language statement. It simply says that with regard to the new budgeting and, sequestering procedures, such like

that we are putting in place agreed to yesterday, that there be no doubt this will include the Commodity Credit Corporation—the largest element of our farm programs.

This discussion began on Friday of last week when I raised the question that farm price and income support programs were not included—curiously, and incongruously. Some cosponsors said this was not so. Others agreed it was so. Others changed the subject. But it was so. In the original draft the farm programs were not included. The defense program was included, the space program was included, the education programs such as they might be were included—all normal Government outlays were included.

This one area was left out. That seemed to me to be suspicious, and injudicious, and wrong. So I said at the time that I would move to make certain this is not so.

I make the point, Madam President, the particular point, that under the amendment adopted yesterday of the distinguished Senator from Texas, the President's authority to cut programs in the relatively uncontrollable category is limited to reductions in automatic spending increases such as cost-of-living adjustments. But the chief elements of farm price and income support program—as the Presiding Officer knows—which is to say target prices and commodity loan rates—so many dollars and cents per bushel of wheat—do not contain automatic escalators. They are determined and fixed by Congress in the farm bill, and, hence, they would not be affected at all by across-the-board percentage reductions required by sequester order as I suppose we will come to describe this. Veterans' pensions cost of living would be disallowed, and Social Security cost-of-living adjustments would be disallowed.

Only farm price and income support programs—and that is not entirely clear—saving the payment of interest on the Federal debt and the payment of contracts to Boeing and McDonnell—would be untouchable as if different from any other program.

This is so in my view. It is not to be in any way invidious with respect to farm programs. The Commodity Credit Corporation was adopted in 1933 by Franklin D. Roosevelt amid a time of great crisis for farms, one that is greater than the one we face today, but we face a very serious one today and obviously we have to have farm legislation, and will. But in a principal proposal to require a steady reduction of deficits to zero at a point 5 years out, to put the farm program aside is at the very least suspect. I come from a farm State. I live on a farm. We happen to have a big city, several big cities in New York, but our largest industry happens to be agriculture. We get very little aid from Federal farm programs—certainly higher consumer prices—but leave that apart. But the consumers of America are not going to stand this. They should not be asked to.

The proposition will be made that the law, in some way or other, is that these programs are now incorporated. I will not deny that because I do not understand the amendments. They do not read in plain English to me. I am told they include farm programs, and I am sure someone earlier said they did not. I am sure we can resolve these matters plainly by adopting this amendment.

This amendment simply says that the programs of the Commodity Credit Corporation will be treated in the same way as the defense programs, the space programs, the education programs, and the other programs of our Government.

I could discourse at some length on the extraordinary increase in outlays in recent years under these programs. I believe today, and I would be happy to be corrected, that apart from interest on the national debt no program has increased at the rate in the last 4 years in percentage terms as have the farm programs. It is really bizarre for an administration proclaiming the virtues of frugality and all those things to have almost doubled farm programs' cost in 4 years.

If I recall, 4 years ago the Agriculture and Food Act of 1981 was projected to cost $11 billion. It turns out that it is going to exceed $60 billion.

Now, legislation under consideration has been very aptly described by the Washington Post as "a test of firmness waiting to be failed."

However, I do not think that is necessary to this discussion. This proposal might seem to be an attack on the farm programs, but is not. It simply treats them equally with the other programs of the Federal Government.

Madam President, I have nothing else to add to this commonsense amendment.

Madam President, could I ask how much time remains?

The PRESIDING OFFICER. One minute.

Mr. MOYNIHAN. Madam President, I yield to the Senator from Arkansas for a question.

Mr. PRYOR. I would like to ask the Senator from New York if his amendment just relates to the Commodity Credit Corporation, or does it also relate to the issue of loan rates and target prices, that concept?

Mr. MOYNIHAN. It means what it says:

> Amounts made available for a fiscal year to the Secretary of Agriculture or the Commodity Credit Corporation to carry out a program to provide price support to producers of an agricultural commodity (including any program under which payments are made to producers as target price payments or for participation in a reduced acreage, acreage set-aside, or acreage diversion program).

It is farm programs as generally described.

Mr. PRYOR. I think I understand precisely what the Senator from New York is attempting to do. I applaud his efforts because I think that farmers generally feel, and want to be, as patriotic as every person in this country in the reduction of the deficit. However, I think in the area of loan rates and target prices if we particularly addressed ourselves to this issue as in the Senator's amendment we may well be adjusting loan rates and target prices on a day-by-day basis, given a situation of sequestering.

I am not certain of exactly what is in the Gramm-Rudman amendment.

Mr. MOYNIHAN. I applaud my friend for saying that. There are a thousand such questions, such as appeared 7 or 8 days ago in the Senate, where we are supposed to be the body that would "cool the popular passions" of the House of Representatives. We make a careful and reasoned inquiry into what is coming to us from the other body. But we are the ones who have suffered in the past few days with this legislation. Maybe there are only four people in the Senate who can describe it.

May I say I do not think farmers want to have the feeling that they are being set aside as special while everybody else is put into a general positions. That would not, in the end, help farmers.

Mr. President, I reserve the remainder of my time.

Mr. GRAMM. Mr. President, how much time have I remaining?

The PRESIDING OFFICER (Mr. GRASSLEY). Ten minutes.

Mr. GRAMM. Mr. President, I rise in opposition to this amendment. I had tried to work out a compromise proposal with the distinguished Senator from New York that worked basically as follows:

First, it recognized that in this category of CCC we have several broad-ranging programs and that they all ought to be treated the same.

Second, it recognized that you cannot go in and abrogate a contract that you have entered into.

This has been a great source of dispute on the floor. My concern is one of fairness, one of legality, and one of practicality.

First, it is not fair to go into the middle of a contract and change the rules of the game. Second, it is not legal. Third, people take you to court and collect not only the contract but the fines and the penalties.

So the solution I proposed was to take all of the broad categories in CCC, which are payments to the States, and student loans, to say that

we do not let the sequester order violate a contract, but when the contract expires, then the sequester order shall go into effect for the next 12 months.

So you end up getting the savings but you do not invalidate the contract, you do not change the rules of the game on people in the middle of the game, but you do assure that everything is subject to sequester that is controllable. I think that is a reasonable solution. I hope the Senate will get an opportunity to deal with that in a basic effort to tighten and clean up our language.

Mr. President, I have to oppose this amendment. I assume the distinguished chairman of the Finance Committee will move to table this amendment. I will vigorously support that motion to table.

I yield back the remainder of my time.

Mr. MOYNIHAN. Mr. President, may I ask unanimous consent to have printed in the RECORD a letter from the general counsel of the Congressional Budget Office which describes what in his judgment would be the effect of the compromise proposal.

The letter is to the ranking minority member of the Budget Committee, attempting to deal with this specific matter of CCC expenditures. The compromise proposal in fact would bring a range of matters starting on the one hand, we might say, with guaranteed student loans and extending to Treasury borrowings which involve a contract to pay interest and to repay principal as day to day. That would be jeopardized, in the view of the general counsel.

Mr. President, I do not wish to prolong this debate. I make a simple point: If you want to discredit farm programs in the eyes of a very large portion of the American people, just single them out as the one activity of the Federal Government that is not touched by this extraordinary legislation. It might take a week to settle in, it might take a year, but it is not in the interest of the American farmers.

If I were an American farmer, I would be appalled to think that in the interest of attracting my support or whatever, the defense program were declared subject to across-the-board cuts, the Space Program, the Education Program, the Health Program, the Science Program—but not agriculture. I do not think I would want that done on my behalf.

With that, Mr. President, I yield back my time.

The PRESIDING OFFICER. Did the Senator from New York ask unanimous consent to have his material printed in the RECORD?

Mr. MOYNIHAN. I did, Mr. President. I thank the Chair.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE,
Washington, DC, October 9, 1985.

Hon. LAWTON CHILES,
Ranking Minority Member, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR SENATOR: This is in response to your question as to what accounts would be affected and how by a proposed amendment to the pending amendment entitled as "Balanced Budget and Emergency Deficit Control Act of 1985." The language proposed to be inserted is:

"Any contract entered into after the sequester order has been promulgated for the applicable fiscal year by which any federal department or agency shall agree to make payments out of an entitlement account to any person, lender or guarantee entity shall be deemed controllable expenditures and shall be subject to reduction under the Presidential order, and any such contract shall explicitly provide for such reduction for the entire contractual period."

We assume that the word "entitlement" in the proposed amendment has the meaning contained in Section 401(C)(2)(c) of the Congressional Budget Act of 1974, namely, the "authority to make payments (including loans and grants), the budget authority for which is not provided for in advance by appropriations acts, to any person or government if, under the provisions of the law containing such authority, the United States is obligated to make such payments to persons or governments who meet the requirements established by such law."

The Congressional Budget Office over the years has worked with the Senate Budget Committee to develop a list of accounts falling under the definition of Section 401(C)(2)(c). I enclose a copy of that list, which ranges from military retired pay to Medicaid grants to veterans pensions to interest on the public debt.

The proposed amendment is directed to contracts to make entitlement payments. Most entitlements result not from contract, but from an application and approval thereof. At this juncture there is insufficient time to determine exactly which of the accounts on the enclosed list involve the making of contracts, but some clearly do so, for example, the guarantee of student loans, and Treasury borrowings (which involve a contract to pay interest and to repay principal at a stated date).

To the extent that an entitlement payment is made pursuant to a contract, the proposed amendment would bring the payment within the definition of controllable expenditure subject to being sequestered. Literally read, this would mean that if the applicable percentage to be sequestered were 5 percent, then the government's obligation on a guaranteed student loan issued after a sequester order would be 95 percent rather than 100 percent, thus effecting a substantive change in the underlying law. The issues affecting government borrowings are considerably more complex; the amendment would appear to raise the possibility of altering agreed interest rates downward, with consequent adverse effects on the government's borrowing costs in the first instance.

There are other uncertainties posed by the language of the amendment, but time does not permit their exploration.

Sincerely,

ALFRED B. FITT,
General Counsel.

[4] Excludes limitation on administrative expenses.
[5] Part of account annually appropriated by Congress.

Mr. BOREN. Mr. President, I am extremely concerned about the effect the pending amendment will have on agricultural producers. I agree with the intent of the Senator from New York to ensure that agricultural producers do their part in deficit reduction. However, this amendment does not merely include farmers, it penalizes them by giving them more uncertainty than is presently confronting them in agriculture production. There have been many claims that commodity programs will not be affected by any sequestering order. The Senator from New York argues that agriculture will be exempt from participation in deficit reduction unless his amendment is adopted. This is simply not true.

The modified Gramm/Hollings/Rudman/Boren amendment will require reductions in commodity programs, in commodity loans and target prices. Under any general sequestering order. A portion of the savings resulting from the sequestering of commodity programs will occur in the fiscal year in which the order is made and a portion will come during the succeeding fiscal year. Contrary to what many of us may think. Not everything revolves around the fiscal year of the Federal Government. Regardless of how hard we may try to change cropping patterns, the fact remains that farmers plant and harvest at times uncontrollable by the U.S. Congress.

The provision already in the modified amendment applicable to Commodity Credit Corporation programs is stated very clearly. It reads:

> Any contract entered into after the sequester order has been promulgated for the applicable fiscal year by which any Federal department or agency shall agree to make payments out of an entitlement account to any person, lender, or guarantee entity shall be deemed controllable expenditures and shall be subject to reduction under the Presidential order, and any such contract shall explicitly provide for such reduction for the entire contractual period.

This means that once a sequester order has been promulgated. Any contract made between the CCC and a farmer for price support loans will reflect a reduction in the amount of the loan. Because we have failed to enact a farm bill this year, every contract entered into for crop year 1986 will reflect a reduced loan if a sequester order is made November 1 of this year.

It is extremely unfair to penalize farmers in this way. Nine times out of ten. Farmers in my home State of Oklahoma are forced into planting without knowing what the Wheat Program is going to be. Eighty percent of the wheat acreage in Oklahoma is already planted and farmers do not have a program yet. Now, we're going to throw another kink into the system for farmers and only for farmers. We are going to tell farmers to come in and participate in our farm programs. We're going to tell them to sign a contract with the Government and they will be penalized if they do not stick with it, but the Government might decide to change the terms of the contract at any point in time, thereby reducing their income.

How is the farmer going to be able to get financing for the coming crop at a time when farm prices are already lower than the cost of production, Is a bank going to provide financing to a farmer if his income could be reduced in the middle of the crop year?

The bill before us does not abrogate any other contract in midterm. It does not abrogate defense contracts. How can we possibly justify abrogating only farm contracts in the middle of the contract period?

Mr. MOYNIHAN. Mr. President, I am prepared to yield back the remainder of my time.

Mr. PACKWOOD. I am prepared to yield back the remainder of my time.

Mr. President, I move to lay on the table the amendment of the Senator from New York and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon [Mr. PACKWOOD] to lay on the table the amendment of the Senator from New York.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the motion of the Senator from Oregon [Mr. PACKWOOD] to lay on the table the amendment of the Senator from New York [Mr. MOYNIHAN]. The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER] and the Senator from Nevada [Mr. LAXALT] are necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

The PRESIDING OFFICER (Mr. SYMMS). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 81, nays 16—as follows:

[Rollcall Vote No. 219 Leg.]

YEAS—81

Abdnor	Denton	Hatch
Andrews	Dixon	Hawkins
Armstrong	Dodd	Hecht
Baucus	Dole	Heflin
Bentsen	Domenici	Heinz
Biden	Durenberger	Helms
Bingaman	East	Hollings
Boren	Evans	Inouye
Boschwitz	Exon	Johnston
Bumpers	Ford	Kassebaum
Burdick	Garn	Kasten
Chafee	Glenn	Kennedy
Chiles	Gore	Kerry
Cochran	Gorton	Leahy
Cohen	Gramm	Levin
D'Amato	Grassley	Long
Danforth	Harkin	Lugar
DeConcini	Hart	Matsunaga

Mattingly	Proxmire	Stennis
McClure	Pryor	Stevens
McConnell	Quayle	Symms
Melcher	Rudman	Thurmond
Murkowski	Sasser	Trible
Nickles	Simon	Wallop
Nunn	Simpson	Warner
Packwood	Specter	Wilson
Pressler	Stafford	Zorinsky

NAYS—16

Bradley	Lautenberg	Rockefeller
Byrd	Metzenbaum	Roth
Cranston	Mitchell	Sarbanes
Eagleton	Moynihan	Weicker
Hatfield	Pell	
Humphrey	Riegle	

NOT VOTING—3

Goldwater	Laxalt	Mathias

So the motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. ZORINSKY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I am going to make a unanimous-consent request on the cloture vote that was scheduled, and it has been cleared on both sides. I ask unanimous consent that the cloture vote that would have occurred at 4 p.m. be set at 5 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ZORINSKY and MR. BOREN addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

AMENDMENT NO. 767

(Purpose: Providing that no concurrent resolution on the budget for any fiscal year beginning after September 30, 1986, may provide for any increase in total outlays or the deficit)

Mr. ZORINSKY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska [Mr. ZORINSKY] for himself and Mr. MATTINGLY proposes an amendment numbered 767.

Mr. ZORINSKY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nebraska.

Mr. PRYOR. Mr. President, I object to that.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Georgia?

Mr. PRYOR. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will resume stating the amendment.

The assistant legislative clerk resumed and concluded reading the amendment.

The amendment is as follows:

At the appropriate place in the joint resolution, insert the following new section:

SEC. . (a)(1) Notwithstanding any other provision of law, it shall not be in order in the Senate or the House of Representatives to consider any concurrent resolution on the budget for any fiscal year beginning after September 30, 1986, or any amendment thereto or any conference report thereon if—

(A) the adoption of such concurrent resolution as reported;

(B) the adoption of such amendment; or

(C) the adoption of the concurrent resolution in the form recommended in such conference report, would cause—

(i) the appropriate level of total budget outlays set forth in such concurrent resolution of such fiscal year to exceed the appropriate level of total budget outlays set forth for the preceding fiscal year in the most recently agreed to concurrent resolution on the budget for that preceding fiscal year;

(ii) the appropriate amount of the deficit set forth in such concurrent resolution for such fiscal year to exceed the appropriate amount of the deficit set forth for the preceding fiscal year in the most recently agreed to concurrent resolution of the budget for that preceding fiscal year.

(2) Notwithstanding section 904(b) of the Congression Budget Act of 1974, or any other provision of law, paragraph (1) of this subsection may be waived only by a two-thirds vote of the Members of each House of Congress, duly chosen and sworn.

(b) Notwithstanding any other provision of law, the budget transmitted pursuant to section 1105 of title 31, United States Code, for the following fiscal year shall not contain—

(1) an estimate of total budget outlays for such following fiscal year that exceeds the appropriate level of total budget outlays for the current fiscal year set forth in the most recently agreed to concurrent resolution on the budget for the current fiscal year;

(2) an estimate of the deficit for such following fiscal year that exceeds the appropriate amount of the deficit set forth for the current fiscal year in the most recently agreed to concurrent resolution on the budget for the current fiscal year.

(c) For purposes of this section, no cost-of-living adjustment under any provision of Federal law shall be taken into account.

(d) For purposes of this section—

(1) the term "budget outlays" has the same meaning as in section 3(1) of the Congressional Budget and Impoundment Control Act of 1974;

(2) the term "concurrent resolution on the budget" has the same meaning as in section (3)4 of such Act; and

(3) the term "deficit" means, with respect to any concurrent resolution on the budget for a fiscal year, the amount by which the appropriate level of total budget outlays set forth for such fiscal year in such concurrent resolution exceeds the recommended level of Federal revenues set forth for such fiscal year in such concurrent resolution.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, today I am introducing legislation which modifies the budget process so no spending increases can be financed with tax increases. This proposal dovetails nicely with the Gramm-Rudman amendment.

Under this amendment any increase in outlays for a program other than COLA's must be financed by decrease in outlays of equal value in some other area of the budget. You can still raise taxes but they have to go to reduce the deficit in the budget.

Anyone who comes in here and has a brandnew program that exceeds the budget, cost by $50 million, has to go find a place to reduce the spending by $50 million to offset his brilliant idea for the spending of $50 million.

It is very simple. We have been doing this for years, finding a new program, spending more money, except we have not had the responsibility of finding where to decrease the spending to offset that same amount.

Now, it is a pure straight simple forward amendment. The people who want to reduce deficits and budgets by increasing taxes can vote against this. I am sure if you vote for this it will make President Reagan's day, it will make my day, and it will make Howard Phillip's day when he writes in to your States to say you do not support raising taxes as a method to finance your increase in spending on behalf of the taxpayer.

I yield to the Senator from Georgia who is a cosponsor of the amendment with me.

Mr. SARBANES. I object.

The PRESIDING OFFICER. The Senator has the right to yield his remaining time.

Mr. ZORINSKY. I yield my remaining time to the Senator from Georgia.

Mr. MATTINGLY. I thank the Senator from Nebraska.

Mr. President, I ask my colleagues to support the Zorinsky-Mattingly amendment pending before the Senate.

Simply stated the amendment would require any future increase in spending for a program to be matched by a decrease in funding for some other program.

In other words, if a Member of Congress wants to increase spending somewhere, he or she will have to find the money—they will be asked to point out where they want to cut before they can add.

For too long we have spent money this Government did not have. Congress of the United States is the cradle of the deficit. Programs are begun or increased with no thought given to paying the bill. After spending is pumped up, the next step is to push through a tax increase.

The Gramm-Rudman proposal and amendment that passed is fantastic.

Under our amendment, we seek to make certain that spending increases will be funded by other spending cuts rather than raising taxes. The only exception will be for annual cost-of-living adjustments. For all other spending, there will be no easy way out. This amendment can be called the taxpayer's protection amendment—protection against tax increases imposed by a Congress unwilling to face the hard choices of where to cut government.

The taxpayers of this country do not think they are undertaxed—but they know they are overspent by Congress.

It is time Congress learned the lesson that Mother Hubbard learned when she went to the cupboard. I say to you that the Treasury of the United States is so bare, it makes Mother Hubbard's cupboard look well-supplied by comparison.

We are gradually becoming aware that you cannot spend money you do not have and you cannot borrow your way out of debt. All Senator ZORINSKY and I are saying in this amendment is that Congress has to order its priorities—any increase in spending cannot be funded through debt or by putting a bigger burden on the American Taxpayer.

The choice on this amendment is simple—the vote is clear—are you in favor of balancing the budget through tax increases or do you want to cut spending? That is the question here.

This amendment will make Ronald Reagan's day, but it will protect the working, taxpaying Americans' pocketbooks.

The PRESIDING OFFICER. The proponents' time has now expired.

Two-and-a-half minutes remain for the opposition.

Mr. DANFORTH. Mr. President, I yield 1 minute to the Senator from New Hampshire.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized for 1 minute.

Mr. RUDMAN. Mr. President, very regretfully, I have to rise to oppose this amendment of my two friends here for very obvious reasons.

When you say something on the floor, and I have been saying it now for 10 days, you have to stick with it. You do not change in midstream. I am speaking for myself and no one else.

I am not for new taxes, and I want to see spending cuts. But we said that Gramm-Rudman-Hollings was policy neutral. We said it would allow Congress whatever option it would take, and I will vote for the spending reduction option first and foremost. But it seems to me that we are breaking faith with many of our cosponsors and many who supported it, who voted on the basis that: (a) it would be an action-forcing mechanism; (b) it would cause Congress and the administration to face its responsibility squarely; and, (c), what would come out of that would be whatever came out, whether it be spending cuts, elimination of programs, or new taxes.

So I oppose it and I do not think it is the right thing to do today.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Missouri.

Mr. DANFORTH. Mr. President, I yield 1 minute to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 1 minute.

Mr. BOREN. Mr. President, I realize on the surface this might be an attractive amendment. I think it is a very unwise one and damaging one, and it ties our hands in the long run.

Let me raise this question: Suppose some new program vitally needed is put forth. This will mean we could not, as we voted yesterday to do, raise a minimum tax on 50 corporations that had $56 billion worth of profits and now pay no taxes.

We would then cut some program that is badly needed by the people of this country to pay for some other program that might be badly needed, say, for emergency, disasters, or something else.

My goodness, why cut some needed program in order to finance, let us say, an emergency, disaster assistance, and be forbidden by this putting any kind of minimum tax on these 50 corporations that made up $56 billion and paid no tax.

It might look good as a slogan. It is very unwise policy, and I hope my colleagues will defeat this proposal.

Mr. ZORINSKY. Mr. President, today, I am introducing legislation which modifies the budget process so that no spending increases can be financed with tax increases. This proposal dovetails nicely with the Gramm-Rudman amendment. Under this amendment, any increase in outlays for a program—other than COLA's—must be financed by a decrease in outlays of equal value in some other area of the budget. Spending increases for a program are thus perfectly in order, as long as you can find some other program with enough extra funds to finance your increase. Similar measures have been proposed before, often under the rubric of "pay-as-you-go" legislation, but these bills allow tax increases to finance the spending increases. My amendment precludes taxation as a way out of our budgetary decisions. It will help curb the expansion of the Federal deficit and the Federal Government's claim on our Nation's resources.

The amendment is very simple. It renders out of order any budget or any amendment to the budget which increases the deficit or total outlays. That is, it caps total spending and the deficit. Cost-of-living adjustments are exempt from the point of order. This combination of restrictions forces us to deal with the budget in a responsible manner. As mentioned above, the amendment forces any proposed increase in funding for a particular program to be matched by a decrease in funding for some other program. It allows tax increases which may accompany a strengthened minimum corporate tax. However, such tax increases can only be used to close the deficit, not to finance new spending. The amendment also blocks any tax decrease from widening the deficit. Tax increases are allowed, as long as they are matched by spending decreases of equal value.

As of 1984, the Federal Government spent almost 25 percent of this Nation's GNP. The American people have said "Enough!" The Federal Government must make do with what it has. We were elected to make the tough choices of how to allocate funds in the budget. Unfortunately, as this past budget debate showed with excruciating clarity, Congress cannot make these choices and reduce the deficit with the tools it currently has. My amendment simply provides us with some new tools.

I hope each of my colleagues gives his full consideration to this amendment. I believe we have not done our best to check these runaway deficits. My amendment offers a way to remedy this situation. Mr. President, I ask unanimous consent that a copy of the amendment appear at the end of my remarks. Thank you.

The PRESIDING OFFICER. The Senator from Missouri has 30 seconds remaining.

Mr. DANFORTH. Mr. President I yield the balance to the Senator from Colorado.

Mr. HART. Will the Senator from Nebraska tell us whether or not his amendment applies to the President of the United States in submitting his budget?

Mr. ZORINSKY. Yes.

Mr. HART. So the President could not request new spending without identifying programs to be cut?

Mr. ZORINSKY. That is right.

The PRESIDING OFFICER. [Mr. MATTINGLY]. All time has expired. The question is on agreeing to the amendment.

Mr. ZORINSKY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BOREN. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. a motion to table is not in order.

Mr. ZORINSKY. Under the unanimous-consent agreement, I believe it was to be an up-or-down vote.

The PRESIDING OFFICER. That is correct.

The question is on agreeing to the amendment of the Senator from Nebraska [Mr. ZORINSKY]. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] and the Senator from Idaho [Mr. MCCLURE] are necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 22, nays 75, as follows:

[Rollcall Vote No. 220 Leg.]

YEAS—22

Armstrong	Hawkins	Quayle
Dole	Helms	Roth
East	Humphrey	Symms
Exon	Kasten	Thurmond
Garn	Lugar	Wilson
Harkin	Mattingly	Zorinsky
Hatch	Murkowski	
Hatfield	Nickles	

NAYS—75

Abdnor	Eagleton	Melcher
Andrews	Evans	Metzenbaum
Baucus	Ford	Mitchell
Bentsen	Glenn	Moynihan
Biden	Goldwater	Nunn
Bingaman	Gore	Packwood
Boren	Gorton	Pell
Boschwitz	Gramm	Pressler
Bradley	Grassley	Proxmire
Bumpers	Hart	Pryor
Burdick	Hecht	Riegle

DeConcini	Lautenberg	Stennis
Denton	Leahy	Stevens
Dixon	Levin	Trible
Dodd	Long	Wallop
Domenici	Matsunaga	Warner
Durenberger	McConnell	Weicker

NOT VOTING—3

Laxalt	Mathias	McClure

So the amendment (No. 767) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. ZORINSKY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, If I can have the attention of my colleagues, on yesterday afternoon we agreed on the amendments that we have taken up since this morning with certain time agreements and that certain amendments would be in order, that they were relevant to the subject matter. We have now completed that list of amendments. We still have another relevant amendment to be offered by Senators DOMENICI and CHILES. I know in the past 24 hours they have been discussing it with a number of Senators on each side. I know there are some questions still being addressed. I know in some cases staff and Members are reviewing material. I am not certain just how long that may take. However, I would hope, one way or the other, that that might be the last amendment.

Mr. GRAMM. If the distinguished majority leader will yield, Senator BOREN and I have an amendment that deals with CCC, since the amendment of the Senator from New York was rejected. We think it is a clear-cut amendment. It will be very brief. We would like to have an opportunity to offer it as well.

Mr. BRADLEY. If the Senator will yield for a question, does that amendment also include the addition to the controllable category of Medicaid and AFDC?

Mr. GRAMM. No; it includes only two loan programs, CCC and the guaranteed student loan. The amendment is to clarify that there will be no change made in those programs during the middle of the year, but that any sequester order shall apply to the next year.

Mr. BRADLEY. The sheet that was handed out by the distinguished chairman of the Budget Committee yesterday listed a number of programs that would be put into the controllable area of the budget. Among those programs was Medicaid and AFDC.

It is the intention of the chairman of the Budget Committee to drop those from the list of things that are now controllable and, therefore, make them not susceptible to the across-the-board cut?

Mr. DOMENICI. Maybe I can answer that another way.

As to the programs just asked about, there would be no reference to those two items that the Senator asked about in the Domenici-Chiles amendment.

Mr. BRADLEY. and the other amendment will only deal with student loans and the CCC?

Mr. GRAMM. That is correct.

Mr. BRADLEY. I thank the distinguished chairman of the Budget Committee and I thank the ranking member for his efforts.

Mr. CHILES. If the Senator will allow me to respond for a moment, I think in the package we are talking about now, which Senators DOMENICI and CHILES will offer, there will be no new program added which is not now in the program. Basically, most of the changes will be procedural in allowing you to operate with the Budget Act we now have and with what we now have at the desk as Gramm-Rudman. We are reviewing those things now in the cloakrooms with staff and anybody who wants to look at the list. I have looked at all of them. My staff worked on it yesterday evening, last night and this morning. It is my strong feeling and assurance that we are not talking about substance.

Let me mention this: At the request of Senator PACKWOOD and Senator BENTSEN—this has been talked about before, I think, but I want everybody to understand it—the Finance Committee was given leeway under the Budget Act where they would be instructed to raise so much money off taxes and so much money off other programs; they are given the leeway to do 80 percent, with the 20 percent leeway. The House has that now because they go and get a rule on the House side. That has been done by custom over here, so in effect, we are making a change to put into the law what has been a custom before to give the Finance Committee some leeway. That is not adding any new program or any new substance. Most of the other changes, as I say, are basically procedural changes.

If anybody wants more information, I invite them to come to the cloakroom.

Mr. BRADLEY. Mr. President, if I could get final clarification, the situation that existed yesterday when Medicaid and AFDC had been added to the budget, there was an across-the-board cut of 2 or 3 percent. That means Medicaid and AFDC take a 2-percent cut across the board. As I understand the chairman of the Budget Committee, that is no longer the case and the Senator from Florida has confirmed that.

Mr. CHILES. The Senator from Florida cannot tell you he knows everything that is in what we passed in Gramm-Rudman, but nothing in this package will be added to it.

Mr. BRADLEY. Let the distinguished chairman of the Budget Committee confirm that neither AFDC nor Medicaid is contained in the Gramm amendment or in the amendment he is offering.

Mr. DOMENICI. I do not know that. They may already be in it. If you would like the language, none is in there by name.

Mr. BRADLEY. Let me ask the Senator from Texas, is AFDC or Medicaid in the Gramm amendment?

Mr. GRAMM. Mr. President, let me clarify. There will be two amendments. One is a technical amendment, basically cleaning up language on a bipartisan basis with the change in substance being the greater flexibility that the committee in the House has already adopted. There will be a substantive amendment by Senator BOREN and me dealing with loan programs

under CCC and under the Guaranteed Student Loan Program.

It is my opinion that the nonindexed entitlements will be subject to interpretation, depending on the language. It was my intention and my opinion that in the Gramm-Rudman-Hollings amendment, those entitlements as payments to the States are included. But this package that is being offered does not make a change related to that. That is the point.

Mr. BRADLEY. But it is the Senator's intention that Medicaid is included in the across-the-board cuts in the original Gramm amendment?

Mr. GRAMM. In the original Gramm amendment, in the reference to States, payments to States, Medicaid and AFDC are payments to States, and are not Federal entitlements. For example, in Medicaid—well, in both of them—those payments to the States, in my opinion, are included in the Gramm language.

There was a discussion as to whether there should be clarification in this amendment. It was decided to leave the bill as it is and let it stand for interpretation. I believe it is there.

Mr. BRADLEY. So the Senator has confirmed for us that Medicaid and AFDC are subject to the across-the-board cuts under Gramm-Rudman.

Mr. GRAMM. That is correct.

Mr. BRADLEY. Which means that they will be reduced. So the amendment offered by the distinguished Senator from Connecticut, that was accepted by the sponsors of the bill, will say this eliminates the means-tested entitlement programs, in a narrow sense eliminated the means-tested entitlement programs, but the Senator from Texas does not include Medicaid or AFDC.

Mr. DOLE. Mr. President, let me yield to the distinguished Senator from Connecticut to respond.

Mr. DODD. I thank the majority leader for yielding. The amendment offered by myself, the Senator from Massachusetts [Mr. KERRY] and others dealt with the SSI Program as well as veterans' pensions as they related to disabilities. They dealt with a glitch, if you will, or a problem that arose, I think unintentionally, in the original drafting of the legislation regarding the following matter of concern. Both SSI and veterans' pensions—those two programs and those two programs alone—the cost-of-living adjustment in those programs is indexed or relates to the cost-of-living adjustment on Social Security.

Because, when you calculate how a person who is collecting both Social Security and SSI would have their monthly checks affected if you consider as income the cost-of-living increase in Social Security, we modified that so the cost-of-living increase would not be considered as income for the purpose of determining the monthly check of an SSI recipient or a veteran collecting disability. That amendment was focused on that particular problem and that problem alone.

I want to point out, since he is here, the distinguished Senator from Michigan [Mr. RIEGLE] identified the shortcoming as he saw it because we did not cover the SSI recipient or the veteran from having that COLA not be affected by the budget process and reduced. I agree with him, but we did not as a substantive matter go into modifying that particular situation.

Is that clear?

Mr. BRADLEY. I thank the distinguished Senator from Connecticut for his clarification. I simply say that although it is the interpretation of the Senator from Texas that Medicaid and AFDC are included, the language of the bill at least makes that point debatable and the RECORD should reflect it back, that although it was his intention to cut Medicaid and AFDC, in fact, it remains debatable, which seems to me to be subject to clarification. I assume that is what the Senator from New Mexico had in mind when he was going to offer his amendment.

Could I ask the distinguished Senator from New Hampshire, is it his intention that Medicaid and AFDC are included in across-the-board cuts?

Mr. DOLE. Let me yield to the Senator from New Hampshire to respond to that question. Then I think other Members would like to speak.

Mr. BRADLEY. Mr. President, all I want is a yes or no answer and I have "yes" from one and "maybe" from the other.

Mr. RUDMAN. Yes.

Mr. BRADLEY. Yes, it is included. The Senator from Texas says, yes, it is included. Does the Senator from New Mexico agree?

Mr. DOMENICI. I agree that it is their intention, but I do not agree that it is that clear, if that is the Senator's question.

Mr. BRADLEY. So the Senator from New Mexico says it is not clear and it probably is not included.

Mr. DOMENICI. We can just read the definition of controllable and with reference to that kind of program; it is not so clear.

Mr. BRADLEY. I thank the Senators.

Mr. DOMENICI. Mr. President, as far as I was concerned, so everyone will know, yesterday I said I was going to offer a clarification amendment and I included all four. I am not including any of them in it because I do not think that is for us a clarification. I think that is an issue we ought to decide in terms of programs because all programs are not mentioned and we are drawing conclusions about them. I did not choose to include in mine clarification on that one way or another. It is in or it is out. We are here debating it. Perhaps somebody will offer an amendment. On CCC and student loans, we hear Senator BOREN and the sponsor of the bill will do that.

Mr. BRADLEY. So it is the distinguished chairman's opinion that, absent a specific amendment including them, as will be offered for CCC and student loans, it is not included.

Mr. DOMENICI. That is not—what I am telling my colleagues as best I can is, it is open.

Mr. BRADLEY. It is an open question.

Mr. DOMENICI. That is right.

Mr. METZENBAUM. Will the Senator from Texas yield?

Mr. DOLE. Let me yield to the Senator from Colorado.

Mr. HART. Mr. President, how much time does the distinguished majority leader intend to allocate to the Senator from New Mexico for explaining his slight modification?

Mr. DOLE. We were hoping from the discussion going on that it would not take a long time, but there is not any time limit, so anybody who wants to may prevail.

Mr. HART. Mr. President, the reason I am asking that the Senator from Colorado does not like legislation in the Cloakroom. It does not leave a record for the legislators who are going to be here long after we are gone. We are, by everybody's definition, fundamentally changing the way the Federal Government works. That is what everybody said. A year from now, 5 years from now, 10 years from now, nobody is going to know who said what to whom in the Cloakroom. I think it would be extremely important to have the Senator from New Mexico and the Senator from Florida put on the record what the Domenici substitute does.

Mr. DOLE. We are prepared to do that.

Mr. METZENBAUM. Mr. President, may I make an inquiry of the Senator from Texas?

Mr. DOLE. I am happy to yield to the Senator from Ohio for that purpose.

The PRESIDING OFFICER. The time for the cloture motion has expired.

Mr. DOLE. Let us postpone that until 6, Mr. President.

Mr. METZENBAUM. The Senator from Texas stated at the time of the debate, "In those areas of entitlements where the Federal Government sets out the conditions under which an entitlement is paid, where the Federal Government sets out eligibility standards and therefore, where the expenditure is gauged by the number of people who qualify and the amount they qualify for, only"—and I emphasize only—"automatic increases built

into the budget will be subject to sequester."

Now, as I read that statement of the Senator, it would be my understanding that with respect to Medicare, AFDC——

Mr. BYRD. Mr. President, may we have order in the Senate?

Mr. METZENBAUM. Excuse me, with respect to Medicaid——

Mr. BYRD. Mr. President, we do not have order in the Senate yet. May we have order so the Senator can be heard?

The PRESIDING OFFICER. The Senate will please come to order. Senators and staff carrying on discussions will please retire to the Cloakroom so the Senator from Ohio can be heard.

Mr. GRAMM. If I may clarify——

Mr. BYRD. No. No, the Chair is trying to get order. Then we will clarify.

Mr. GRAMM. I thank the Senator——

Mr. BYRD. Let the Chair announce when there is order.

The PRESIDING OFFICER. The Senator from Ohio has the floor.

Mr. METZENBAUM. As I understand it, that would indicate the Senator was saying the only thing subject to being sequestered was the cost-of-living adjustments. Now, as I understand the Senator's answer to the Senator from New Jersey, it was his intent to include the entire amount.

Mr. GRAMM. If the Senator will yield——

Mr. METZENBAUM. I do.

Mr. GRAMM [continuing]. AFDC and Medicaid are not Federal entitlements. The Federal Government does not set the eligibility standards or the benefits. Those are set by the several States. The States set eligibility.

Let me also remind the Senator that in the case of Medicaid, you do have controllability through setting caps, for example, on payments to providers.

Mr. METZENBAUM. So that the Senator is saying he intends with the Gramm-Rudman-Hollings measure to include Medicaid, provide for sequestering of it, and to provide for limiting it in connection with other provisions of the legislation?

Mr. GRAMM. I provide what the bill says, which is no one, as a result of sequestering, will be denied eligibility for any program. But Medicaid and AFDC are not Federal entitlements. They are payments by States to individuals where the Federal Government provides funds and States set eligibility standards and set payments to providers for bulk distribution under Medicaid.

Since we will, under Medicare, have the ability to adjust payment to providers, for example, it seems to me perfectly balanced under Medicaid to provide the States with the encouragement to do the same thing if we are under a sequester order. And I go back and make my point, if we are not under a sequester order, none of this is relevant.

Mr. BRADLEY. Will the Senator yield for one final question?

Mr. DOLE. Let me yield to the Senator from New Jersey, and then I hope we might have the amendment of the Senator from Oklahoma.

Mr. BRADLEY. Let me first observe that this is the kind of question and answer that is more appropriately handled in the subcommittee or committee where you have people before you and you can clearly define things. But we have not had that opportunity with this particular piece of legislation, so we are now trying to define what we are voting on and we have a disagreement, not among the two sponsors but among the sponsors and the chairman of the Budget Committee.

So since the RECORD is at least unclear, let the legislative history reflect that it is the reading of the Senator from New Jersey of this legislation that Medicaid and AFDC are not included. They might be included in definitions, but there is no means provided in the bill to get at them, and therefore they are not included. I would like the RECORD to reflect the opinion of the Senator from New Jersey, having read the bill, and I guess the courts will decide, as they will decide many issues that have been raised by this particular piece of legislation.

Mr. DODD. Will the Senator from New Jersey, or the majority leader, yield?

Mr. DOLE. Let me yield briefly, if I can, to the Senator from Connecticut.

Mr. DODD. Mr. President, just very, very briefly, if the Senator from New Jersey will remain for just a second, as a cosponsor of the Gramm-Rudman-Hollings bill, I think the issue is unclear. And while the distinguished Senator from Texas and the distinguished Senator from New Hampshire—while their intentions were certainly to be included, as a cosponsor of this bill, for purposes of legislative history, I would like to say, Mr. Leader, if I can, I am not clear on that. So that should this matter at one point end up in the courts, the record should be clear that those of us who support this legislation, cosponsored it, are not as clear as the other two authors of this legislation.

I think the Senator has raised a very legitimate point and one that should be resolved.

I thank the majority leader for yielding.

Mr. DOLE. Mr. President, I hope now the Senator from Oklahoma can offer his amendment.

Mr. BOREN. Mr. President, I should say to the majority leader that I am prepared on behalf of myself and the Senator from Texas to offer this corrective amendment that relates to CCC and the Student Loan Program.

I think this is an amendment that will have full agreement. Very probably it would not necessitate a rollcall and can be accepted. But it is an important one that I want to make sure all of our colleagues understand. I say to the Senator from Kansas, I think we could take this up under a very short time limitation and explain it. Once it is explained, I do not think there will be any controversy about it. I do not know if the Senator from Kansas wants to seek a particular agreement on it. I hope it would not require a rollcall, but, of course, you do not know until it is explained. I do not view it as controversial. So I am willing to accept a very short time limitation on the amendment.

Mr. DOLE. Mr. President, is there any objection to 20 minutes on the amendment equally divided?

Mr. METZENBAUM. Reserving the right to object, will the Senator tell us again exactly what the amendment is?

Mr. BOREN. Yes. Earlier the Senator from New York [Mr. MOYNIHAN] had an amendment on the inclusion of farm programs. Many of our colleagues want to make sure the farm programs will be subject to the cuts and to their share of sacrifices along with all the rest. There has also been a question as to how student loans would be affected, would the student face the possibility of the reduction of a loan in the middle of the school year.

This amendment clears that up and says that, yes, agricultural programs are affected, the contracts are not impacted in the middle of the contract, but let us say there is a 2-percent reduction—the contract entered into, let us say, on wheat or cotton, and there is a 2-percent reduction. That next contract will be for 2 percent less than the target price and loan rate. You do not abrogate the contract in the middle, but it provides very clearly that the next contract entered into has the reduction in it for the following crop year. With student loans, it provides the same thing. You would not in the middle of the school year disrupt that student or the universities, colleges involved by changing the amount of the student loan once it has been given to that student. But it does provide that when the next contract is entered into, if there is an across-the-board reduction, the loan for the next year would be reduced by that amount.

I think this reflects the intent which those on both sides of the aisle have expressed. I think it addresses the concerns raised by the Senator from New York and others and I think will also clarify it to the point that it should

stabilize the student loan program as well, make it clear that those loans would not be cut in the middle of the school year. It also responds to the concerns raised by the Senator from Iowa [Mr. HARKIN] relating to the geographical differences as to when you plant a crop.

You plant soybeans earlier in the year in one part of the country than you plant soybeans in another part of the country. You make sure the persons planting the same commodity will be treated the same way whether that person is a Northern producer or Southern producer, irrespective of what time in the calendar year they plant that crop.

Mr. DOLE. Has the amendment been offered?

Mr. BOREN. I think unanimous consent is pending as to a 20-minute time limitation.

Mr. DOLE. The amendment is not pending?

The PRESIDING OFFICER (Mr. BOSCHWITZ). That is correct.

Mr. DOLE. Why not offer the amendment and I will need to clear it.

AMENDMENT NO. 768

(Purpose: To ensure that CCC loans and guaranteed students loans are included in a sequester order)

Mr. BOREN. Mr. President, on behalf of the Senator from Texas (Mr. GRAMM) and myself, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oklahoma [Mr. BOREN], for himself and Mr. GRAMM, proposes an amendment numbered 768.

Mr. BOREN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the joint resolution, insert the following:

Any contract entered into after a sequester order has been issued for the applicable fiscal year, by which the Commodity Credit Corporation and entitles providing Federal guarantees for student loans shall agree to make payments out of an entitlement account to any person, lender, or guarantee entity shall be deemed to be controllable expenditures and shall be subject to reduction under Presidential order, and any such contract shall explicitly provide for such reduction for the entire contractual period; *Provided*, That in regard to commodity loans made by the Commodity Credit Corporation to producers or producer cooperatives for a commodity produced in the same crop year, those loans for the same commodity shall be subject to the same terms and conditions.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. BOREN. I yield.

Mr. DOLE. We are checking with the distinguished minority leader. There is no time limit on any amendments brought up now, and we are trying to make certain that the amendments are relevant. This amendment is relevant to this process. We are not going to be able to deal with any irrelevant amendments.

The Senator has explained the amendment, and it seems to me that it should be accepted. I am not involved in this.

Mr. METZENBAUM. Mr. President, will the majority leader be good enough to withhold asking unanimous consent until we can read the amendment?

Mr. DOLE. Certainly.

Mr. BOREN. Mr. President, perhaps the most profitable course would be for me to read this amendment, and I will explain it as I read it, line by line. I think it is self-explanatory.

It says that CCC programs, agricultural programs, are exempt from the across-the-board cuts, and farmers therefore are exempt from the sacrifice.

It has not been the intent of the authors to do that. As one who has preached on this floor that there should be a common, across-the-board sacrifice, I feel that everyone should be involved.

There has also been concern expressed about how student loans are treated. For example, if there is a reduction of, say, 2 percent, would some student who has been given a loan for a school year face the possibility that in the middle of the year his loan might be cut? That would work a hardship on the student and the school. On the other hand, there is a concern that you not totally exempt that category from the sacrifice.

So it reads:

Any contract entered into after a sequester order has been issued for the applicable fiscal year, by which the Commodity Credit Corporation and entitle providing Federal guarantees for student loans shall agree to make payments out of an entitlement account to any person, lender or guarantee entity shall be deemed to be controllable expenditures.

That means that this category is subject to the across-the-board reduction. It then says:

And shall be subject to reduction under the Presidential order, and any such contract shall explicitly provide for such reduction for the entire contractual period;

Let me explain that part of it first. It would not allow for abrogation of the contract in midterm. If you had a CCC loan, they could not go in after you had that loan and all the financial arrangements had been made and reduce the loan rate under the CCC loan in the middle of the term of the contract.

However, it would provide that when that contract comes to an end and you are getting ready to make your contract for the next crop year, if there is a 2-percent cut, that would be included.

In regard to the guaranteed student loan, the same would apply. If a student had been given a loan in August for a school year starting in September and there were an order for an across-the-board for a 2-percent cut, that student and the university he is attending would not have their year disrupted during the term of that contract.

What it would say is that when the contract for the loan is issued for the following year, for the entire term—because school years and crop years do not match fiscal years—then that 2-percent reduction would be in effect.

That is the explanation and the major thrust of it.

The second part of the amendment says that when you are dealing with the same crop, the producer of that crop is going to be treated the same as any other producer. Let me give an example that will clarify it.

A soybean producer in a certain part of the country might enter into a contract or sign up in September. The sequester order, let us say, comes in in October. His contract is not affected for that year. His contract is not going to be affected until the next September, when he renews it.

What about the soybean producer a little farther south, who does not sign up until October 15 or November 1, instead of in September? In the meantime, the sequester order comes down. Is that soybean producer going to find his contract 2 percent worse than the soybean producer in, let us say, Texas or Oklahoma, who signed up in September? That would not be fair. You would have two prices for the same commodity.

A wheat producer in North Dakota, say, would be treated worse than a wheat producer in Georgia, and that would not be fair. So we say that if it is the same commodity, that producer in North Dakota, even though his contract was signed after the sequester order, is going to be treated on the same basis as the wheat producer farther south. The next year, when the contract is up and his next contract is entered into, he will then have to absorb the 2-percent reduction, as will all the others.

That is simply what it does. It is an honest effort to try to address the concerns of those who wanted to make certain that the student programs and the agricultural programs were not set off to the side and not asked to bear their fair share of the sacrifices.

At the same time, it addresses the concerns of those who do not want to see the contract abrogated in the middle of the year. I view it as a technical correction. We have done our best to draw it. The Senator from Iowa looked at it, to make sure that we did not have a geographical imbalance. I think it corrects the problem and the questions raised earlier by the Senator from New York and others,

who questioned whether or not the agricultural programs were included.

I will be happy to respond to any questions.

Mr. GRAMM. Mr. President, will the Senator yield?

Mr. BOREN. I yield.

Mr. GRAMM. Mr. President, I say to the Senator that I want to thank him, because it was my intention to broaden the scope to cover everything. I think everything in the pot is a concept that is vitally important to this bill.

The distinguished Senator from Oklahoma came up with what I think is a creative way to deal with this problem.

We want to be sure that everybody in the program is treated the same. On the other hand, we want to be sure that no program is exempt. I think it is an ingenious solution. I am happy to have worked with the Senator from Oklahoma on this.

Mr. METZENBAUM. Mr. President, will the Senator yield for a question?

Mr. BOREN. I yield.

Mr. METZENBAUM. As I read this amendment, it would appear to me that you have an order for sequestering in one fiscal year. You then provide by this amendment that it is not applicable to those contracts that relate to that particular fiscal year, but then it becomes applicable to the subsequent fiscal year.

Since you do not really have a triggering mechanism for the subsequent fiscal year, my question is, How do you put that together, and is it really a meaningful amendment?

Mr. BOREN. The difficulty is that we have found our way around a lot of problems in this body, but we have not been able to repeal the laws of nature. Farmers, in terms of planting and signing up—if I may have the attention of the Senator from Ohio and the Senator from New York—must operate on crop years. They cannot operate on fiscal years.

Their signup period for programs is dependent on crop years and the natural cycle, the growing cycle.

So it is very applicable to a contract. Let us say you have entered into a contract with some department, or business, or someplace else, with a plumber for a year and entered into it in July. You cannot abrogate that contract during its term. It is to run from July to July. The sequester order comes into effect on October 1. You cannot touch that contract until July following that October 1 sequester. When July rolls around and you are ready to enter into your contract for next year with the plumber, that contract is reduced. If it is 2 percent, that is the reduction in that department. Your contract next year is reduced.

It would work exactly the same way with agriculture because in terms of the amendment we said the crop-year. Let me explain this. Let us take a concrete example. You have a wheat producer who signs up in August for the wheat program, all right, and enters into a contract. He is going to get a certain target price. He idles a certain amount of acreage. He puts so many bushels of wheat into the CCC storage. A contract is entered into. Credit arrangements are made. Loans are made to local banks, and so on, on the basis of the value of that program. That is in August.

In October, the sequester order hits and says 2-percent reduction.

You cannot alert his contract in the middle of it but when it comes to August the next year, the following August, and this example is in the same fiscal year, his contract then is for the entire next crop-year, so you make sure you get a whole year's worth of sacrifice out of him. His contract for the whole next crop-year—that is the reason it spells out crop-year, that would be 12 months—will be reduced by 2 percent if that was the amount of the sequester order issued on October 1.

So let us take the example of a farmer who signs up in August, August 1, 1986. The sequester order hits October 1, 1986. He will not immediately have his contract abrogated but when August 1, 1987, comes around his contract will be lowered for all the next 12 months of that crop-year by 2 percent. That is the way it would operate.

It would be the same thing with students because the school year is not exactly the same as the fiscal year either. Most student loans are going to be obligated, let us say, in July or August for the September school year. So he gets his loan issued to him in August, and goes to college, and enrolls, and arrangements are made. You would not want to abrogate his loan in the middle of that school year. When he goes into the next loan period it is reduced.

Mr. MOYNIHAN. Mr. President, will the Senator yield for a question?

Mr. BOREN. I am glad to yield to my colleague from New York.

Mr. MOYNIHAN. Let me say I am glad we are finally learning that there is a problem with the exception of the Commodity Credit Corporation farm programs generally. Remember, it was earlier asserted that there was none.

I ask the Senator if a sequester order would affect a contract "for its entire term", as he said.

Mr. BOREN. That is correct. It would be for the entire crop-year.

Mr. MOYNIHAN. This would be true even if payments obligated under the contract are made in the fiscal year following the sequester?

Mr. BOREN. That is correct.

So even though, since the crop-year fiscal year does not coincide or my example, the August 1 contract for the next August 1 rolls around, his contract for the full 12 months will be affected even though 9 months of that year are going to be in the next fiscal year, the following fiscal year.

Mr. MOYNIHAN. Is the total of the distinguished Senator's amendment to include student loans as well?

Mr. BOREN. The student loans, as I understand, are already affected under contracts, and they are in the contract section, but there was a question as to whether or not the way it was written it could result in the reduction of student loans in the middle of a school year, which I think none of us would want to see happen.

We would not want to see the students disrupted in the middle of their school year, or colleges or universities have their budgets disrupted in that fashion.

Mr. MOYNIHAN. Even though student loans are included under the sequestering provision, even though student loans are paid back whereas Commodity Credit Corporation loans characteristically are nonrecourse loans and frequently not paid back?

Mr. BOREN. I would say under the vast majority of CCC loans they are paid back. They are not always paid back at the various provisions about interest and storage costs, and it varies from farm bill to farm bill. But they are paid back.

Mr. MOYNIHAN. But they do not have to be paid back.

Mr. BOREN. They either have to be paid back or the commodity itself has to become the property of the Government. Yes, that is correct. The Senator is correct.

Mr. MOYNIHAN. And they are not paid back when in fact the difference between the commodity price and the loan price is such that the farmer gains an advantage by not paying back, is that correct?

Mr. BOREN. The Senator is correct. That could happen.

In fact, under the farm bill, which has been reported out of the Agriculture Committee this year, there is even an additional complexity added to that by the concept of what we call the marketing loan, which is a device aimed at giving the farmer income protection and letting the price for export grain, let us say, be sold at the world price to be competitive, allowing the farmer to pay back at the world price actually received and allowing the Government to move that grain out itself. So there are even some added complexities to it. It is not easy.

Mr. MOYNIHAN. Is it the case that the actual subsidies involved in the CCC have grown enormously? Since fiscal year 1981, the CCC has incurred a net realized loss of $45.2 billion.

Mr. BOREN. I do not know about the $45 billion figure, but I would say to the Senator from New York that I do not think he wants to debate the

whole farm bill here. But he is correct to say that during the course of the current farm bill, which is one, by the way, which I think the Senator from New York and the Senator from Oklahoma is agreed upon and both voted against, I would say that the past farm bill we had has been unique. It has been the most expensive one we have ever had and it also bankrupted a record number of farmers in this country. So that is a great creative achievement, when you can have something most expensive to the taxpayers you ever had and also break the record number of farmers at the same time. Let us say it has not been a great success.

But the Senator from New York is certainly correct in saying that the costs have been high under this program.

Mr. MOYNIHAN. But we are going to cut student loans even though student loans are repaid and there is no option for the student loans not being repaid. It is not a form of subsidy. It is a loan.

Mr. BOREN. I would say to the Senator from New York the amendment is not really aimed at the question of whether or not student loans should be included. The amendment is aimed at the technical problem as to whether or not there is any potential, as I understand it. It could exist under the current proposals that the loans might be needed to be cut in the middle of the year. And what I wanted to do is prevent the loans from being cut in the middle of a school year and making sure that that could not happen.

So really it is to the narrow, technical question rather than the broader question as to whether or not they should be included.

Mr. MOYNIHAN. I thank the Senator.

Mr. BOREN. I thank the Senator from New York.

Mr. LAUTENBERG. Mr. President, will the Senator yield?

Mr. BOREN. I am happy to yield.

The PRESIDING OFFICER. The Senator from New Jersey.

AMENDMENT NO. 769

(Purpose: To amend the Federal Revenue Code of 1954 to urge prosecution of the terrorists responsible for the Achille Lauro hijacking)

Mr. LAUTENBERG. Mr. President, I support the amendment proposed by the Senator from Oklahoma, and I send to the desk an amendment in the second degree to the Boren amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG] for himself, Mr. BOSCHWITZ, and Mr. DODD proposes an amendment numbered 769 to amendment numbered 768.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SEC. .

(a) The Senate finds that—

(1) the four men identified as the hijackers of the Achille Lauro were responsible for brutally murdering an innocent American citizen, and for terrorizing hundreds of innocent crew members and passengers for two days;

(2) these men were given safe conduct out of Egypt to an undisclosed location;

(3) the United States urges all countries to aid in the swift apprehension, prosecution and punishment of the terrorists; and

(4) the United States not tolerate any country providing safe harbor or safe passage to the hostages.

(b) It is the sense of the Senate that—

(1) the United States demands that no country provide safe harbor or safe passage to these terrorists;

(2) the United States expects full cooperation of all countries in the apprehension, prosecution and punishment of these terrorists; and

(3) the United States cannot condone the release of terrorists or the making of concessions to terrorists.

Mr. LAUTENBERG. Mr. President, for Senator BOSCHWITZ, Senator DODD, and myself, and other Senators I offer an amendment in response to the hijacking of the *Achille Lauro*. It expresses the sense of the Senate that the terrorists responsible for this act must be swiftly apprehended, prosecuted, and punished so that no country should provide them with sanctuary or safe passage.

The four men identified as the hijackers of the *Achille Lauro* brutally murdered an innocent American confined to a wheelchair. They terrorized hundreds of innocent crew and passengers for 2 days. They advertised their disrespect for human life and the rule of law.

Yet I understand from the State Department that these terrorists have already left Eygpt. They have been allowed to go scot-free. To me, it is unbelievable that these people have been allowed to elude justice.

They must be recognized and condemned as the criminals they are and swiftly punished.

These terrorists must be made to pay for their crimes against the citizens of America and the rest of the world, and we need the help and cooperation of all civilized countries to see that they do.

This resolution makes the position of the United States crystal clear. It puts every government on notice that we expect the full cooperation of all countries in bringing these criminals to justice.

This time the world must say to all those who contemplate terrorism that "There is no country, no place on this Earth where you can take refuge from your actions."

Every country that values the lives of its citizens knows that we can bring terror to an end only by bringing terrorists to justice.

I urge my colleagues to pass this resolution, to send a strong signal to the world about what America expects from it.

Mr. President, I ask for the yeas and nays.

Mr. PACKWOOD. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PACKWOOD. Mr. President, I did not hear when this amendment was offered. Did the Senator say it was in the second degree? I believe the amendment is not in order.

The PRESIDING OFFICER. The Senator will state his parliamentary inquiry.

Mr. PACKWOOD. I could not hear when the Senator from New Jersey offered it. Did he say the amendment was in the second degree?

Mr. LAUTENBERG. Yes, I did.

Mr. PACKWOOD. Is the amendment we are considering original text, not the amendment that was offered, the Gramm-Rudman amendment?

The PRESIDING OFFICER. Will the Senator repeat his inquiry, please?

Mr. PACKWOOD. Is the Gramm-Rudman-Hollings amendment to be treated as original text?

The PRESIDING OFFICER. The Senator from New Jersey has drafted a proper second-degree amendment.

Mr. PACKWOOD. I thank the Chair.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will resume the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I have had a discussion with the distinguished Senator from New Jersey [Mr.

LAUTENBERG], and I believe that we can accommodate his concerns and the concerns of others if they would permit us by unanimous consent to temporarily set aside his resolution, complete action on the Boren amendment and perhaps the Eagleton amendment and by that time I think everything may be worked out on the resolution and we could probably do it by unanimous consent if there were no objection.

Mr. BYRD. Mr. President, reserving the right to object, I would like for the distinguished author of the resolution to hear the request that is being made.

Mr. LAUTENBERG. Would the majority leader mind?

Mr. DOLE. Yes. The request was to temporarily set aside the resolution offered by the distinguished Senator from New Jersey and come back to it after disposition of the Boren amendment, if we worked it out by then; if not, after disposition of the Eagleton amendment.

Mr. LAUTENBERG. I am pleased to have the majority leader's assurance that we will get right back to it afterward. We will have worked out the language.

Mr. BYRD. Reserving the right to object, if I may say, I simply want to call to the attention of the distinguished Senator that unless the request so provides his amendment at that time would be open to another amendment.

Mr. LAUTENBERG. In response to the minority leader, it was my understanding in my discussions with others that it would be not amendable, even if it was presented as freestanding; that there would be no objection to it, that this would be agreed to by unanimous consent.

Mr. DOLE. My understanding in visiting with the Senator from New Jersey was that there might be some modifications made but that when offered it would not be subject to amendment.

Mr. LAUTENBERG. I say to the majority leader, my understanding is that the modifications would be those that were suggested by the Senator from Alaska, Senator MURKOWSKI, and only those modifications.

Mr. DOLE. That is correct.

Mr. BYRD. So do I understand, Mr. President, that it would provide against amendments in the second degree, no amendments to the Senator's amendment, and there be no motions to commit in order?

Mr. LAUTENBERG. That is my understanding.

Mr. DOLE. Correct, whatever it takes.

Mr. LAUTENBERG. We could lay it aside now and bring it back right after the Boren amendment.

Mr. METZENBAUM. Could I ask the majority leader, is it assumed—and I gather it is—that no other amendment dealing with the same subject would be in order prior to the consideration of the Lautenberg amendment?

Mr. DOLE. That is correct.

Mr. D'AMATO. Mr. President, I think if we are going to go through all of this—we have the staffs working on this to handle the language. Everybody is in agreement on it. When we begin to say that no one else is going to offer anything, we have an understanding. To go any further now, I have never heard anything propounded quite in this manner. Of course, I have not been here that long but I think the staffs are working on it and that the Senator will present it and hopefully all 100 Members of the Senate will cosponsor it.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, I want to be sure the Senator is fully protected.

Mr. LAUTENBERG. I appreciate the minority leader's concern. I want to be very specific about the fact that this Senator, as the author of this resolution with Senator BOSCHWITZ, will propose any modifications to the amendment. I think I have the majority leader's word on that.

Mr. GRAMM. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM [continuing]. I do not think there is anybody here who is in favor of terrorism. I am sure there is going to be a lot of people who are going to want to get up and say so, and of course we have a lot of work to do. I do not think there will be any arguments on the other side of the issue. At the same time, we are getting these agreements about who is going to be the author of the amendment and what it is going to be. Could we get a short time limit of, say, 10 minutes on it since, again, there will be no arguments against it? We are all for it.

I am strongly for it, and we would like people to go home and get credit for it. Can we have an agreement that there will be no more than 10 minutes?

Mr. DOLE. Mr. President, right now, we are trying to set the amendment aside. The request is pending to set it aside. We will worry about the time limit later.

Mr. BYRD. Mr. President, reserving the right to object, at the present time a call for the regular order will bring down this cloture motion. It is my cloture motion. I do not mind if it is drawn down at this time.

I do not want to do anything that would obstruct the majority leader's efforts to finish action on this measure this evening.

Senators have amendments, and they should be able to offer them.

I ask the majority leader, if this amendment is set aside, that it not be open to amendment, that it not be open to a committal motion, that cloture not come down against it, that there be a vote on it—either by voice or by division or by rollcall—and that the able Senator from New Jersey be given a vote on it before the final passage of House Joint Resolution 372.

Mr. DOLE. I hope to complete the debt limit. If we can get a voice vote, we will do it at any time we can bring it up. If there is going to be a rollcall vote, I am advised by the chairman of the Finance Committee, who is managing the debt limit bill, that he would like to finish this. We have been on it 8 days, and to have somebody walk in and interrupt the discussion of this matter with a totally irrelevant matter—which is important but not relevant to this bill—we have consumed now about 50 minutes.

I do not intend to stay very late tonight, and we will have an order to come in at 10 o'clock in the morning. I am not in a hurry. We have been on this bill long enough.

Mr. LAUTENBERG. Just so there is no doubt: The majority leader has agreed to this being brought up immediately after the Boren amendment, that it would be nonamendable, and there would be no tabling motion.

I have no problem with an amount of time agreeable to the majority leader—say, 10 minutes. By then, we will have put out the hot line request for Senators who wish to be cosponsors, and they will have had time to join us.

Mr. D'AMATO addressed the Chair.

Mr. DOLE. Mr. President, I have the floor.

Let me indicate that I hope we do not have a debate now. I should like to move on to the debt limit bill. I think we have an agreement. I promise to protect the distinguished Senator from New Jersey. I am not going to let someboby else slip in before the Senator from New Jersey. I am not going to bring down cloture. I do not think I have demonstrated that I will do things like that.

Mr. LAUTENBERG. I accept the majority leader's statement.

Mr. DOLE. I want to set it aside and move to the Boren amendment; and if we can do it by unanimous consent, we can do it at any time. If it takes a rollcall vote, I am advised by the chairman of the Finance Committee that he would rather wait and take it up as a free-standing matter after disposing of the debt ceiling.

Mr. LAUTENBERG. I accept the majority leader's statement.

I put forth one query to the leaders: If we have a unanimous-consent agreement, does that preclude anybody from standing up and objecting to a voice vote on this?

Mr. DOLE. If there is not a request for the yeas and nays, we will do it by voice vote. Somebody may want the yeas and nays. If that would happen, I would ask unanimous consent that it be set-aside until completion of the debt ceiling, and then we would have the yeas and nays at that time.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, let me say to the majority leader that it does not make any difference to me whether it has a voice vote or a rollcall vote. The only thing I want to try to do is to protect my colleague to the best of my ability. I think he wants a vote before passage of the extension of the debt ceiling. If it is a voice vote, I personally have no problem with that. If it is by unanimous consent, I have no problem with that. I simply want the Senator to have some action by the Senate on his amendment before the Senate goes to final passage of the extension of the debt ceiling.

I would not want to see a motion to postpone consideration of the amendment. I would not want to see a motion to commit. A tabling motion, so far as I am concerned, is an appropriate gauge of sentiment on the amendment.

I simply seek the majority leader's assurance that the Senator from New Jersey will get a vote on his amendment that reflects the sentiment of the Senate.

Mr. DOLE. Mr. President, I assure the Senator from New Jersey that if we can do it by voice vote, we have no objection to doing it before we pass the debt limit. If it is going to take a rollcall vote, the answer is no.

There are some who would like to kill the debt limit. They have been at it all day. It is now 6:30 at night, and we do not intend to stay all night. We will come back tomorrow. We want to pass the debt limit now, tomorrow, or Saturday and send it to the House. The House is in session now, and they need to appoint conferees. I am trying to finish it tonight, and if others do not want to finish it, we will not.

Mr. BYRD.. Mr. President, if the Senator will yield, the majority leader has said that if the amendment's sponsor desires a rollcall vote, he would not want to do it. Suppose another Senator in the Chamber asks for the yeas and nays. That could occur, and I would hope that it would not prejudice the distinguished majority leader against action on the amendment by the Senator from New Jersey.

Mr. LAUTENBERG. I have a question, and perhaps it will clear this up now.

If I could get a unanimous consent agreement—we have discussed this with Senator MURKOWSKI and others—to modify my amendment, to adopt it on a voice vote, and leave it at the desk for those who want to cosponsor to join in, we are ready to do that right now.

Mr. BYRD. When would the voice vote occur?

Mr. DOLE. Right now.

Mr. LAUTENBERG. Right now.

Mr. DOLE. I think the Senator has a modification.

Mr. LAUTENBERG. Mr. President, I have a modification which I send to the desk.

The PRESIDING OFFICER. The clerk will report the amendment as modified.

The bill clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG] proposes a modification to Amendment No. 769.

The modified amendment is as follows:

At the end of the joint resolution add the following new section:

SEC. —.

(a) The Senate finds that—

(1) the four men identified as the hijackers of the Achille Lauro were responsible for brutally murdering an innocent American citizen, Leon Klinghoffer, and for terrorizing hundreds of innocent crew members and passengers for two days;

(2) the United States urges all countries to aid in the swift apprehension, prosecution and punishment of the terrorists; and

(3) the United States should not tolerate any country providing safe harbor or safe passage to the terrorists.

(b) It is the sense of the Senate that—

(1) the United States demands that no country provide safe harbor or safe passage to these terrorists;

(2) the United States expects full cooperation of all countries in the apprehension, prosecution and punishment of these terrorists; and

(3) the United States cannot condone the release of terrorists or the making of concessions to terrorists.

(4) the United States identify those individuals responsible for the seizure of the *Achille Lauro* and the cold-blooded murder of Leon Klinghoffer, as well as those countries and groups that aid and abet such terrorist activities, and take the strongest measures to ensure that those responsible for this brutal act against an American citizen are brought to justice.

Mr. LAUTENBERG. I want to inform the Senate that Senator D'AMATO has joined as another cosponsor of the amendment, and we will have a list of the other cosponsors. So far, it includes Senators MOYNIHAN, HEFLIN, METZENBAUM, and DIXON.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. MURKOWSKI. May I make an inquiry of the Senator from New Jersey on the amendment?

Is the text of the language in the last paragraph of my resolution now included in the pending amendment, and am I included as a cosponsor of the resolution?

Mr. LAUTENBERG. I say to the Senator from Alaska that the modified amendment sent to the desk includes the language in which he is interested. And, Mr. President, Senator MURKOWSKI is to be placed after Senator D'AMATO, to be followed by Senator BOSCHWITZ.

Mr. MURKOWSKI. I also ask if the American citizen, Leon Klinghoffer, has been included in your amendment, which is a recommendation in our resolution.

Mr. LAUTENBERG. He has been included.

Mr. MURKOWSKI. I thank the Senator from New Jersey.

THE TERRORIST THREAT TO AMERICANS ABROAD

Mr. President, I rise today in support of the Senate resolution condemning the brutal murder of an American citizen, Leon Klinghoffer, by Palestinian terrorists aboard the Italian cruise ship *Achille Lauro.*

The resolution calls upon the United States to identify those responsible for this cold-blooded act of terror, as well as those who aid and abet such activities, and take the strongest measures in response to this killing of an American citizen to ensure that those responsible are brought to justice.

Mr. President, the Senate should speak on this issue of terrorism, and we should speak now. There should be no question of our deeply felt sense of outrage at the growing threat against Americans who travel abroad and against all civilized peoples.

This is not the first act of aggression against American citizens. We are witnessing, in effect, an undeclared act of warfare against the United States. Under such conditions, the patience of the American people has reached its limit. No longer will we acquiesce in the face of armed assaults by terrorist groups and their state sponsors.

The President of the United States must know that he has the strongest backing of the Senate in taking the necessary measures to bring the terrorists to justice. I would hope that passage of this resolution will send a signal to the terrorists and to the President that there is strong, bipartisan support for resolute action to combat international terrorism. We must and do have the will to respond—if we fail to do so we will face a future of increasing risk to all Americans and civilized peoples everywhere.

The cosponsors of the amendment are: Senators LAUTENBERG, D'AMATO, MURKOWSKI, BOSCHWITZ, DODD, MOYNIHAN, DIXON, METZENBAUM, HEFLIN, EAGLETON, BENTSEN, BYRD, EXON, KERRY, KENNEDY, SASSER, BAUCUS, BRADLEY, MCCONNELL, and COHEN.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment (No. 769) as modified, was agreed to.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LAUTENBERG. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. I thank my distinguished colleagues.

AMENDMENT NO. 768—AS MODIFIED

Mr. BOREN. Mr. President, I send a modification to the desk to my first-degree amendment and ask for it to be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

At the end of Boren amendment No. 768, insert:

Provided further that the reduction in the level of commodity price support programs, supported through the Commodity Credit Corporation, shall not exceed a uniform percentage of reduction specified for those programs in the sequester order.

Mr. BOREN. Mr. President, after the original presentation of this amendment, the question was raised by the Senator from Vermont, among others, out of concern that some of the agricultural programs like the dairy program——

The PRESIDING OFFICER. The Senator will suspend.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the pending order for the cloture vote be postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oklahoma.

Mr. BOREN. Mr. President, as I was saying after the first-degree amendment was sent to the desk a question was raised by the Senator from Vermont, Senator LEAHY, among others, with regard to its effect on the dairy-program.

There are programs under the Commodity Credit Corporation which are contract programs, and there are other programs under the Commodity Credit Corporation which are noncontract programs for which there is simply an announced guaranteed price for a certain period of time, an agreement to purchase.

Now, it is my understanding, and I will ask the Senator from Texas if I may yield to him for just a moment, because a question has been raised by the Senator from Ohio, that those noncontract programs, those that do not involve contracts of the CCC are already covered under the bill; is that correct?

Mr. METZENBAUM. If so, where.

Mr. GRAMM. Mr. President, noncontract programs under the CCC are covered under the bill, that is correct. Contract programs as well are covered, but we cannot violate a contract. So the question is when the contract expires, then the sequester order will take effect at that point.

Mr. BOREN. That is correct. So there is no provision that would exempt noncontract CCC programs from the uniform reductions; is that correct?

Mr. GRAMM. The distinguished Senator from Oklahoma is correct. We are within the constraint of law which prohibits the violation of contracts.

Mr. BOREN. That is correct.

Where would that be found, I ask the Senator from Texas? That dairy program, which is not a contractual program but is paid for through the Commodity Credit Corporation, at what portion of the existing bill would that be covered?

Mr. GRAMM. The portion of the existing bill dealing with that would be the portion under the sequester section, the portion which defines a sequester order—

. . . by sequestering from each affected program, project, or activity (as defined in the most recently enacted relevant appropriations Acts and accompanying committee reports) or from each affected account if not so defined, for funds provided in annual appropriations Acts or, otherwise from each budget account, such amounts of budget authority, obligation limitation, other budgetary resources, and loan limitation, and by adjusting payments provided by the Federal Government . . .

So it is in that general area that it is provided.

Mr. LEAHY. Mr. President, will the Senator yield for me to ask the question of the Senator from Texas?

Mr. BOREN. I am happy to yield.

Mr. LEAHY. Mr. President, the Senator from Texas and I have put together a colloquy also on this issue, and I wonder if the Senator from Texas is prepared to enter into that colloquy.

Mr. GRAMM. I would be happy to have the colloquy. In the proposal the Senator sent to me there were some changes that were made. But I would be happy to enter into a colloquy.

Mr. LEAHY. Fine.

Mr. President, I would like to ask the distinguished Senator from Texas [Mr. GRAMM] a question concerning the operation of a sequester order as it affects the commodity programs carried out through the Commodity Credit Corporation.

If a sequester order calls for a 2-percent reduction in Federal expenditures, it is my understanding that the 2-percent reduction would apply in the case of the Commodity Credit Corporation Program.

It is my understanding that, under a sequester order, which reduces the loan rates by 2 percent, the support price for other commodities, such as milk, would be reduced by no more than 2 percent.

I would like to ask the distinguished Senator if my understanding is correct.

Mr. GRAMM. The Senator from Vermont is correct. Of course, reductions would apply to other expenditures under CCC as well.

Mr. PACKWOOD. Vote.

Mr. LEAHY. Does the Senator want anything more?

SEVERAL SENATORS. Vote.

The PRESIDING OFFICER. If the Chair would bear with us, the Senator from Ohio has another question he wishes to ask.

Mr. METZENBAUM. Mr. President, the Senator from Ohio has no question if we can add the additional language that the Senator from Oklahoma and I have just been talking about concerning the noncontract aspects of the Commodity Credit Corporation. I think the language that was just read to me, and if it would be acceptable and we are prepared to send that to the desk, I am prepared to keep my mouth quiet.

Mr. BOREN. Before I send it to the desk as a modification, if I could have the attention of the Senator from Vermont and the Senator from Texas in particular, who are interested in this matter, let me read this language, and let me say I understand the concern of the Senator from Ohio. He wishes to make sure that the dairy program is included under the sequester order just as the Senator from Vermont wants to make sure that the dairy program is not reduced more than the uniform percentage.

Mr. LEAHY. Mr. President, if the Senator will yield, the point and issue that I raised was not to protect the dairy farmer or anyone else. If there are going to be cuts in the prime contract, then I understand every commodity is going to face, I want to make sure that the cuts did not all go to one to the exclusion of all others, or vice versa, that we be even across the board with all, so there is no one group of farmers and no one commodity that would end up having to take the full brunt of the issue.

I mention that also to the Senator from Ohio. That was the purpose of my colloquy and the amendment.

Mr. BOREN. Mr. President, I understand what the Senator from Vermont is saying.

Let me suggest I think this language will satisfy the Senator from Ohio. Let me read this for the benefit of the Senator from Ohio and make sure I am reading this in the correct fashion.

The modification that I just sent to the desk would be withdrawn and a new modification which has some additional language would be sent forward, and here is what it would provide:

Provided further, That noncontract programs supported through the Commodity Credit Corporation shall be deemed to be controllable expenditures and be subject to reduction in the same fashion as other programs under the Presidential orders, and

that the reduction in the level of commodity price support programs supported through the Commodity Credit Corporation shall not exceed the uniform percentage of reduction specified for those programs in the sequester order.

I think that would finally clear it up.

Mr. President, I ask unanimous consent to withdraw the modification I just sent to the desk and send this more complete modification to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The modification is as follows:

At the appropriate place in the joint resolution, insert the following:

Any contract entered into after a sequester order has been issued for the applicable fiscal year, by which the Commodity Credit Corporation and entities providing Federal guarantees for student loans shall agree to make payments out of an entitlement account to any person, lender or guarantee entity shall be deemed to be controllable expenditures and shall be subject to reduction under the Presidential order, and any such contract shall explicitly provide for such reduction for the entire contractual period: *Provided*, That in regard to commodity loans made by the Commodity Credit Corporation to producers or producer cooperatives for a commodity produced in the same crop year, those loans for the same commodity shall be subject to the same terms and conditions.

Provided, That non contract programs supported through the Commodity Credit Corporation shall be deemed to be controllable expenditures and shall be subject to reduction in the same fashion as other programs under The Presidential Order.

Provided further, That the reduction in the level of commodity price support programs, supported through the Commodity Credit Corporation, shall not exceed a uniform percentage of reduction specified for these programs in the sequester order.

Mr. BOREN. Mr. President, I think that answers all questions. I thank my colleague.

This is a highly technical matter. I think we finally have now addressed the concerns of all those involved.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment (No. 768), as modified, was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. METZENBAUM. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 771

Mr. DOMENICI. Mr. President, I send an amendment on behalf of myself and Senator CHILES to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI], for himself and Mr. CHILES, proposes an amendment numbered 771.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Mexico?

Mr. BYRD. Mr. President, reserving the right to object, I would like for us to hear at least a portion of what this amendment is doing, and I am not saying that I would object to its being called off entirely, but I would hope for the moment at least we could continue to read. As always is the case it can be called off later at any point.

Mr. DOMENICI. Mr. President, before the distinguished Senator objects to my unanimous-consent request, might I discuss an alternative approach? I have no objection to discussing the amendment as we did last night. If the Senator would prefer, I will not send it to the desk but discuss its content.

Mr. BYRD. I prefer that.

Mr. DOMENICI. The Senator from Ohio has looked at the amendment as well as a lot of other Senators. That is what I sent Mr. METZENBAUM with the exception that we have just now added the Boren amendment.

Mr. METZENBAUM. Mr. President, on page 25 we had discussed, the Senator and his staff, an amendment having to do with earned income credit.

Is that amendment included as the Senator sent the amendment to the desk?

Mr. DOMENICI. Mr. President, I withdraw my amendment at this time.

Now, I say to the Senator, let me answer his question.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. DOMENICI. Mr. President, I withdraw my amendment.

Mr. METZENBAUM. Mr. President, when the Senator offers his amendment, will it include the modification of the language on page 25 as heretofore submitted to him by my staff? It has to do with the earned income credit.

Mr. DOMENICI. I am going to ask. I saw them working on it. I understand it was being cleared.

As to the amendment I sent to the desk, before I reoffer it, we will have the Senator's question answered.

Mr. METZENBAUM. Could the distinguished Senator from New Mexico give me some assurance before he offers it again that it will be included, or are we at odds on the issue?

Mr. DOMENICI. I do not believe we are at odds on the issue. I am just trying to make certain we include all the amendments that have already been adopted.

I do not believe we are at odds. I say to the Senator that before I call the amendment up, we will confer and I will make sure there is a clear understanding on that point.

Mr. METZENBAUM. That is satisfactory to the Senator from Ohio.

Mr. DOMENICI. Mr. President, let me proceed.

Mr. President, let me say to my friend from Missouri, Senator EAGLETON, did he have something that he wanted to do before I proceeded?

Mr. EAGLETON. I have another amendment. I thought the Senator was taking his amendment down. I was just going to keep things moving by going ahead with my amendment. I will just take a few minutes.

Mr. DOMENICI. Let me say that I think I am keeping the debate moving by doing this and I have every intention of doing this as quickly as I can.

Let me say to all Senators that anyone who wants this document, we have them here. We have tried to circulate them to everyone that asked for them. The staff has another 15 or 20 copies. They are here.

Now, let me proceed to try to describe what Senator CHILES and I have done, in consultation with a number of Senators.

First, Mr. President, might we have order, please?

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. First, let me say to those who worked diligently to draft the Gramm-Rudman-Hollings amendment that received 75 votes yesterday, considering the difficulty of the task, they have done a marvelous job. Those who have offered amendments, including Senator LEVIN, on program, project and activity language; Senator KERRY, on tax law compliance; Senator BOREN, on the minimum tax; Senator DODD, on SSI, Senator HAWKINS on clarification of reconciliation and Social Security; Senator PRESSLER on rural programs; Senator GLENN, on the President's budget submission; and Senator BOREN on the last amendment that he did on CCC, all of those amendments are incorporated in this substitute. So, for starters, everyone should understand that in redoing the entire amendment, those amendments are in here. And if they or their staffs would like the reference we will be glad to give them the references.

What I would like to do is go quickly through those things that Senators have been most concerned about. And if any Senator has a question I will give you further details.

First, all direct amendments to the Senate or House rules have been deleted because it is not necessary to change such rules to accomplish the purpose of the amendment. There were people concerned about that. Therefore, that is deleted. There remain references to the Budget Act, but not Senate rules.

Second, we have modified language so as to clarify the provisions relating to so-called zero-sum amendments. It is the amendment that basically says for a budget resolution or reconciliation bill, no amendment can increase the deficit; you cannot increase outlays without reducing other outlays or increasing revenues or a combination of the two, and you cannot cut revenues without increasing other revenues or reducing outlays or a combination of the two.

It's also been made clear that as to reconciliation bills, motions to strike are always in order. That is a compromise with the drafters of the amendment, Senator GRAMM and Senator RUDMAN, and it was done because to do otherwise would greatly tie the hands of those who might want to make amendments on the floor that were heretofore in order.

I want to make it clear, though, that none of the language on the motion to strike either changes nor is it intended to change the germaneness rule that has existed on reconciliation and budget resolutions for all the years of the act.

Next, the amendment has been modified to include a point of order against the consideration of a committee's legislation unless and until that committee files its 302(b) suballocations. What we have done here is to make sure committees make their suballocations public.

There is a modification to include estimates of economic growth by calendar quarter and to change the reporting date for fiscal years 1987 through 1991 from October 1 to September 25.

Mr. BYRD. Will the distinguished Senator allow me to interrupt him for a question? I would be glad to wait.

Mr. DOMENICI. I am pleased to yield at this time.

Mr. BYRD. Mr. President, is the amendment which is now being explained by the distinguished Senator from New Mexico a complete substitute for the Gramm amendment which the Senate voted on yesterday?

Mr. DOMENICI. The Senator is correct, it is.

Mr. BYRD. So it is a complete substitute for the Gramm amendment of yesterday as modified and as amended?

Mr. DOMENICI. The Senator is correct.

Mr. BYRD. Mr. President, I just want Senators on both sides of the aisle to know that what the Senate is going to be voting on is a complete substitute for the Gramm amendment as modified and as amended—which the Senate voted on yesterday. I hope Senators will listen very carefully to the explanation by the distinguished Senator and ask any questions that they feel should be asked, because the Senate is going to be voting on a new Gramm amendment in the form of a substitute.

I thank the distinguished Senator.

Mr. DOMENICI. I thank the distinguished minority leader for his questions and observation.

Mr. PACKWOOD. But, would my good friend respond, you have adopted the same language? We are not adding anything new to the Gramm-Rudman amendment, other than he has included the different amendments that were out on the floor.

Mr. DOMENICI. Yes, except as to the changes I am now explaining. This has been done with the full knowledge and cooperation of the sponsors. I am now explaining only the differences. Wherever I am not explaining a difference, it is the exact text heretofore adopted by the Senate by 75 votes. So that is what it is. It was the only way to do it, because of the complexity. We would be adding inserts in various portions and there would have been hundreds of lines. So we just redrafted it, as I have just described.

I just completed my explanation of that portion which we have heretofore called "economic growth estimates." This is to comply with those who wanted that done on a quarterly basis. And I have just told you that is in here. Therefore, the trigger which calls into play the recession provisions will come into effect if there are two consecutive quarters of negative growth.

The next provision is a provision that makes it absolutely clear—as clear as drafters can make it—when sequestering is triggered, the President must eliminate the full amount of the excess deficit. We did not want to leave any way that he could say I only have to sequester less. So used the word "shall" and repeated it, so that, if we are going to be over and he has to bite the bullet as well as us, he has to bite the bullet for the whole thing.

With reference to other committees, we have modified the Gramm-Rudman-Hollings amendment so that at the end of this process, if sequestering is triggered, a Presidential message explaining a sequestering order, and a Presidential alternative, if there be one, goes to all affected committees of the Congress, instead of just the Budget Committees. That was done at the request of many committee chairmen, I say to the chairman of the Finance Committee.

We have added language to clarify that amounts reduced under the President's order are canceled and may not be recouped in the future.

There were some who thought we should have clarifying language, that even though the cuts by the President in a sequestration must be by uniform percentages, there could be some way the President might reorganize the priorities as he sequesters. I never could see how that could happen. But we now have a section making clear that the President's order shall not have the effect of altering or amending Federal budget priorities or changing eligibility requirements for any Federal program.

We have a further clarification with reference to the term "negative real growth"—if exists when such negative growth occurs for two consecutive calendar quarters or the entire fiscal year.

We have a clarification on what happens to budget authority after a sequestering order, since Congress can get to alter such an order. Some wondered how Congress could alter a sequestering order after budget authority is canceled. This now says that the President's order shall take effect 30 days after a sequestering order and that during the 30-day period, amount reduced by the order shall be withheld from obligation. At the end of the 30-day period, the amounts withheld are permanently canceled unless an alternative plan has been enacted during that time.

We have another section that clarifies the involvement of all the committees in the possible sequestering episode. It just says that all accompanying proposals and the alternate message must go to all the committees of the Congress—not just the Budget Committee.

We have a section that most committee chairmen were concerned about; that is, the section of the bill that related to a congressional response to a sequestering order. The original language gave the Budget Committees jurisdiction to originate an alternative, as the distinguished Senator from Texas remembers. What we have basically done, let me say, is to provide for an expedited reconciliation process following a sequestering order with the Budget Committees proceeding pretty much as they do now under reconciliation with two exceptions: One, if a committee, in responding to that reconciliation, does nothing, just does not respond, then in that event the Budget Committee may respond for them. But in no other event does the Budget Committee have any different authority than they now have in reconciliation. They instruct, and committees comply. If they do not comply totally, we come to the floor, and have the remedies we have now. If they comply not at all, then there is that one additional provision.

The second difference we have provided principally at the request of the Finance Committee. We call it flexibility or fungibility. It is very simple. It says that if a committee is instructed to reduce the Federal budget by cutting programs and raising taxes, in all events they must get the sum total of deficit reduction but they have 20-per-

cent latitude as between taxes and program cuts.

Proceeding further, we have a more specific definition of automatic spending increases which includes only those programs that are indexed directly.

We have attempted to the best of our ability to clarify the definition of controllable expenditures—everything is included except automatic spending increases, benefits payable under OASDI, outlays due to increases in program participation rates, outlays for prior year obligations, except as noted in another provision on existing contracts, and outlays for interest on the public debt and other interest payments. Outlays for existing contracts are included in controllable expenditures unless penalty provisions in such contracts would produce a net loss to the Government or unless reduction of such contracts would violate legal obligations of the Government.

With reference to sequestering, we have a definition of the term as a permanent cancellation of budget authority, obligation limitations, other budget resources, or loan limitations to the extent necessary to reduce each controllable expenditure by a uniform percentage.

If anyone is interested in that, I will explain it in more detail.

A number of Senators, including the minority leader, raised an issue with reference to how points of order are waived. In the Gramm amendment, which we voted in, there was a provision requiring a joint resolution. That meant both Houses of Congress would have to send a bill to the President in order to waive a point of order. Clearly, that was very controversial and of questionable constitutional validity. Therefore, we have substituted a provision here that require a three-fifths vote of the Chamber for waiver.

I want to repeat that on Social Security, this amendment that I will send to the desk momentarily includes the language that reconciliation bills cannot touch Social Security and that any effort would be subject to a point of order.

I know the distinguished minority leader wanted a further explanation before we offer this, but I have had no one ask me anything. I am more than willing to answer questions in any area. The distinguished Senator from Florida is also here.

I wonder if the distinguished minority leader has any objection now to my calling up the amendment.

Mr. BINGAMAN. Will the Senator yield for a question?

Mr. DOMENICI. Yes.

Mr. BINGAMAN. I will ask my distinguished colleague from New Mexico to identify if there are any modifications to the provisions with regard to suspension of the act in case of no real growth. I would be interested in knowing what the modifications provide with regard to the effect of this amendment.

Mr. DOMENICI. As the Senator will recall, the amendment which was passed by the Senate with 75 votes yesterday provided that special provisions for a recession would come in if there was a predicted negative growth per year. This now says two consecutive quarters does the same thing, two consecutive quarters of negative growth, at which time, as the Senator understands, the President may react differently than the prescription that is in this.

Mr. BINGAMAN. I thank the Senator.

AMENDMENT NO. 771

Mr. DOMENICI. Mr. President, I again offer my amendment at this time and ask that it be called up.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI], for himself and Mr. CHILES, proposes an amendment numbered 771.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WARNER). Is there objection? Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask unanimous consent to dispense with reading the amendment.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, I do not want to delay the operation on this amendment if Senators want to ask questions about it, but I would like to have the request made such that it would not waive my right to have the amendment read.

Mr. DOMENICI. I have no objection.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will dispense with reading, subject to the reservation of the minority leader.

Mr. CHILES. Will the Senator yield?

Mr. DOMENICI. I yield.

Mr. CHILES. Mr. President, I would like to state that I am a cosponsor with the Senator from New Mexico of the modifications which are included in this amendment. These are modifications that we started working on late yesterday afternoon, with the staff working on it last night and working further on it this morning. I have been here this morning since 9:30 or 10 o'clock trying to finish up the modifications.

I wanted to state that originally yesterday when we were looking at and talking about this package, it appeared that there were certain items that were more procedural, items that were necessary to conform the Gramm-Rudman package with amendments which had been adopted on this floor, and to also conform them and mesh them into the Budget Act in order that the Budget Act would operate properly. There is also a number of amendments that would allow the committees to function in that process in a better way.

We sort of classified those as sort of procedural amendments.

Then there were some other items that were substantive. My feeling was that they should be considered separately, the ones that were considered substantive from the ones that were considered procedural.

One of the substantive amendments was one to specifically allow Medicaid, aid to dependent children, and unemployment compensation to be sequestered. That was one that moved out of the procedural package. We said it had to stand on its own.

Sometime late this afternoon it was decided that amendment would not be offered.

Mr. METZENBAUM. Will the Senator yield for a question?

Mr. CHILES. I yield.

Mr. METZENBAUM. Is it then the understanding that Medicaid is not included in this package and, therefore, not subject to being sequestered?

Mr. CHILES. I would say to the Senator from Ohio, and now I am speaking specifically of the modifying provisions package because the Senator from Florida cannot be responsible for what was originally in the Gramm-Rudman bill, as far as we can tell, there is no mechanism that would allow the President to cut Medicaid or AFDC in his sequester order.

Mr. METZENBAUM. So that this amendment, which, as I understand it now, is a total substitute for Rudman-Gramm-Hollings—excuse me, Gramm-Rudman-Hollings—you see nothing in this that makes the AFDC or Medicaid subject to being sequestered.

Mr. CHILES. No, Mr. President, I see no mechanism in here that would allow the President to cut these programs.

Mr. METZENBAUM. And without a mechanism, it cannot be done.

Mr. CHILES. I think that is correct and I think because we had a debate earlier—if the Senator will recall, questions were asked by the Senator from New Jersey [Mr. BRADLEY] and they were answered differently by the Senator from Connecticut, the Senator from Texas, and the Senator from New Hampshire. They each answered those questions on a little different basis than what was in the amendment at the desk. I think this could be settled in conference in a better way.

My answer to the Senator from Ohio is just the answer that I gave to start with: I see no mechanism that would allow the President to cut Medicaid or AFDC.

Mr. METZENBAUM. It is my understanding that at this point, the Senator from New Mexico might want to jump up and indicate his agreement or conceivably, his disagreement. I do not wish to ask him to speak if he is not inclined to do so, but if he is going to speak and indicate his agreement, I would like to hear him.

Mr. DOMENICI. Mr. President, let me say to my friend from Ohio that I really would have spoken on this in any event because I spoke before. I want to make sure that those who asked me questions then understand, in light of what the Senator from Florida just said, what I think.

I think it was unclear as to whether these two programs were subject to sequestration in the amendment which we adopted by 75 votes.

I think the definitions as to what is included in the amendment that I have at the desk, I think it is much clearer that they may be sequestered. However, when you look at the provisions of a bill as to how you go about sequestering, it is not so clear that it can be done. So I say to the Senator, if he really wants to make sure they are not in, he ought to make an amendment to specifically exclude them.

It is equally unclear in both, in my opinion, but in the one we sent up for a different reason.

Mr. METZENBAUM. I feel I get a somewhat different answer from the two cosponsors.

Mr. DOMENICI. No; I am agreeing with him.

Mr. METZENBAUM. The Senator is agreeing with Senator CHILES?

Mr. DOMENICI. I am agreeing.

Mr. METZENBAUM. I thank the Senator from New Mexico. I think his answer is quite clear.

Mr. CHILES. Mr. President, I want to make clear that one of the provisions in here does specifically exclude—or protect—veterans' compensation payments. That was a matter that was called to our attention by Senator CRANSTON and members of the staff of the Veterans' Committee, that there was a situation in which there was an unclear provision in the original Gramm-Rudman. But when we went to what we thought was a better definition by not using an OMB document but going to a congressional definition, it looked like veterans compensation payments could be covered.

That was picked up by the Senator from California [Mr. CRANSTON], who always watches carefully after veterans' matters, and brought to our attention.

I think we have taken care of that and there is specific language in the modifying thing that says we exempt veterans compensation payments.

The protection provided for veterans' compensation appears in the proviso on page 25 of the bill referring to not reducing periodic support payments to individuals or families.

I thank the Senator from California for bringing that to our attention. I think we have covered his concern and I wanted to tell him that.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. CHILES. I yield.

Mr. CRANSTON. I thank the Senator very much for his hard and, as usual, intelligent and very capable work, particularly on this very complicated measure. What we are talking about is disability compensation for service-connected disabled veterans and for their survivors—widows and orphans. I am very grateful to the Senator for the way it was accomplished here.

The strange thing is, it was once our impression that these compensation payments were not covered in the proposal. Then we found that they apparently were covered. This is an example of how nobody knew exactly what was in that very document. Now we have established the situation very clearly beyond any doubt that they are not covered, and I am very grateful to the Senator from Florida, who is always so constructive on these matters respecting veterans and many others.

Mr. CHILES. Mr. President, that should also apply to the Senator from New Mexico, who helped in covering that point.

Mr. CRANSTON. I thank the Senator from New Mexico also for his very helpful assistance in this matter.

Mr. BENTSEN. Mr. President, let me see if I can complicate the problem a little further.

Mr. CRANSTON. I thank the Senator from Texas, too.

Mr. BENTSEN. I look at page 37 and I note, under (G),

(G) The term "controllable expenditures" means total budget outlays for any account, or any program, project, or activity enumerated by annual appropriation Acts and by applicable committee reports, except those described in subparagraph (A)

And those are programs with cost-of-living increases—

and except outlays for benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act, outlays due to increases in program participation rates, outlays for prior-year contracts and obligations, outlays for interest on the public debt and other interest payments . . .

None of those are outlays for aid to dependent children or Medicaid. How do we take care of that?

Mr. CHILES. Mr. President, I say to my friend from Texas that this is an area I think should be cleared up better in a conference with the House. But here is where we are.

We are attempting to go from an OMB circular document that defines programs. It could be floating. It could be changed any time, again completely out of the control of the Congress, from the OMB definitions, to congressionally defined definitions which would be much better, something we understand better. In doing that, we get into the problem the Senator from Texas has raised.

Under this provision, the way it appears to me and the way it appears to our staffs, if you try to sequester the budget authority, the States are still entitled under an entitlement to the moneys under this program and they can draw that money under a deficiency appropriation that would have to be made.

What we are saying is there is no mechanism for sequestering and there is nothing provided in here that gives a mechanism.

This is an item that we should clear up when we go to conference. We need to clear it up when we go to conference. That is the best answer I can give.

Mr. BENTSEN. I understand that, Mr. President.

Mr. DOMENICI. Mr. President, had the distinguished Senator from Florida yielded the floor?

Mr. CHILES. I am prepared to yield, Mr. President.

Mr. DOMENICI. With reference to the veterans' compensation, let me also indicate to the Senate that I am most appreciative of what Senator MURKOWSKI, the chairman of the Veterans Committee, and his staff, did on this. Let me, in my language, explain what I think we have done.

The amendment that we had adopted was unclear as to whether veterans' compensation was subject to sequestration or not. What we have done now is this: Only if there is an increase much like the cost-of-living increase, only if that has happened would they be subject then to any sequestering.

The reason it was kind of confusing is that it is a very unique entitlement program. They do not get an automatic CPI unless Congress votes it in each year. So we did not want any misunderstanding that in the sequestration, it could be cut.

What we are now saying is if everything that got a CPI is frozen, then it can be sequestered if it got an increase by act of Congress. That is what is clear now and I thank the staff for calling it to our attention. I think we have corrected it specifically.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the cloture vote set for 7:30 p.m. be moved to 8:30 p.m.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, unless there are futher questions, I have no further explanation. I understand the distinguished minority leader has a reservation.

Mr. KERRY. Mr. President, will the Senator yield for a question?

Mr. DOMENICI. Yes; I say to the junior Senator from Massachusetts, I will be pleased to respond.

Mr. KERRY. I thank the Senator very much. I appreciate that.

I would like to ask the distinguished chairman for further clarification with respect to this issue which I believe the Senator from Texas addressed earlier.

In the document now at the desk, the Gramm-Rudman amendment as it is, on page 33 the term "relatively controllable expenditures" is defined as being "budget outlays that are classified as relatively controllable outlays in Office of Management and Budget's 'white book,' Controllability of Budget Outlays." That is what is currently the operative Gramm-Rudman amendment. Is that correct?

Mr. DOMENICI. On the bottom of page 37 is the language with reference to controllable expenditures in substitute.

Mr. KERRY. Mr. President, this Senator is referring to the document that is currently the operative Gramm-Rudman amendment, not the modification document.

Mr. DOMENICI. What is the question about it?

Mr. KERRY. The question is that in the currently operative Gramm-Rudman amendment, as it is at the desk, that document that we have been voting on and debating for the past days, on page 33 the term "relative controllable expenditures"—and I quote from it—"means budget outlays that are classified as relatively controllable outlays in Office of Management and Budget's document, Controllability of Budget Outlays," and the report is cited. That is on page 33. That is the current operative definition?

Mr. DOMENICI. That is correct.

Mr. KERRY. And that current operative definition then, this Senator would certainly be correct in interpreting as the intent of the legislation since it is the legislation that is at the desk. Is that correct?

Mr. DOMENICI. The Senator is correct, unless and until the Senate adopts the modification that I sent to the desk.

Mr. KERRY. I understand. Now, therefore, up until this moment, we have been operating under that definition. And the intent of using that definition is not necessarily to give OMB the authority over definition of controllability and uncontrollability, yet that the intent is to make clear that programs including AFDC, SSI, and Medicaid are deemed "uncontrollable" and therefore are not to be effected by reductions in sequestering. Now, I would like for the RECORD to have included that OMB controllability definition as it presently stands. I ask unanimous consent that I can submit as part of the RECORD table 17 from the OMB document which has been referenced in the course of this debate as the White document.

Mr. DOMENICI. Reserving the right to object, the Senator wants to put in the OMB document, the circular that was referred to?

Mr. KERRY. No. Mr. President, I would simply like, for the purposes of this portion of our colloquy, to submit that document. It is already a part of the RECORD and it has been referenced.

Mr. DOMENICI. Fine. I have no objection.

Mr. KERRY. I simply would like it highlighted at this point.

Mr. DOMENICI. I have no objection.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 17—CONTROLLABILITY OF BUDGET OUTLAYS

[In millions of dollars]

	PY actual	CY estimate	By estimate	Change by—CY
Relatively uncontrollable under present law:				
Open-ended programs and fixed costs:				
Payments for individuals:				
Social Security and Railroad Retirement (code 103)	179,311	190,199	202,170	11,971
Military Retired pay (code 111)	16,471	15,809	18,224	2,415
Other (code 113)	32,554	34,093	35,714	1,620
Federal employees retirement and insurance	49,024	49,902	53,938	4,036
Unemployment assistance (code 116)	16,866	16,193	15,018	−1,085
Medical care (code 120)	79,943	91,336	96,284	4,948
Assistance to students (code 121)	4,809	4,834	4,628	−206
Food and nutrition assistance (code 123)	3,552	3,852	4,074	222
Public assistance and related programs (code 124)	21,046	22,404	22,519	115
All other relatively uncontrollable payments for individuals (code 126)	2,883	2,920	3,000	80
Subtotal, payments for individuals	357,434	381,640	401,721	20,081
Net interest (code 128)	111,058	129,579	137,277	7,698
General revenue sharing (code 145)	4,567	4,610	4,576	−34
Farm price supports (code 149)	7,315	16,797	14,998	−1,799
Other open-ended programs and fixed costs:				
Legislative and judiciary (code 163)	2,447	2,818	3,025	207
All other open-ended programs (code 170)	−4,066	−6,682	−7,019	−337
Subtotal, other open-ended programs and fixed costs	−1,619	−3,864	−3,994	−130
Total, open-ended programs and fixed costs	478,756	528,763	554,578	25,816
Outlays from prior-year contracts and obligations:				
National defense (code 177)	79,496	89,604	92,247	2,643
Civilian programs (code 184)	65,827	72,012	76,421	4,409
Total, outlays from prior-year contracts and obligations	145,323	161,616	168,668	7,052
Total, relatively uncontrollable outlays	624,079	690,379	723,247	32,868

Mr. KERRY. I call the Senate's attention to the fact that in that document as currently the Gramm-Rudman amendment those items which have been the subject of discussion such as FDC, SSI disability, the old age assistance are referenced as relatively uncontrollable expenses.

I think the Senator has answered my question then, which is that that is the original intention.

Now, it is my understanding—I know it has been discussed a couple times, but I was not on the floor and I apologize for that—that in the current modification that is not being changed. Is that correct?

Mr. DOMENICI. It is being changed.

Mr. KERRY. In what way is that being changed?

Mr. DOMENICI. On page 37, as we indicated in the dialog with the distin-

guished Senator from Ohio [Mr. METZENBAUM], starting at the bottom of the page, (G) there is an entire new definition ending at (H) on the following page, line 15, for "controllable expenditures."

What we are doing is we are no longer referencing the OMB documents. There was a lot of concern about why would we use them. We are not using them.

Mr. KERRY. I understand. And I understand in the process the definition in fact of "controllability" is changed; is it not?

Mr. DOMENICI. The definition of "controllable expenditures" is changed and it is now prescribed in the lines of the amendment that I sent to the desk, that I just referred to.

Mr. KERRY. Would it be fair or not for this Senator to characterize it as a substantive change?

Mr. DOMENICI. Indeed, I think it is.

Let me say that the general purpose, so the Senator will know, was to broaden the definition of controllable expenditures as much as possible. That was a general concern, and we have attempted to broaden it as much as possible subject to the dialog that we had with reference to the two programs the Senator from Ohio asked about.

Mr. KERRY. I understand. And clearly subject to the comments of the Senator from Florida.

I thank the Senator.

Mr. DOMENICI. I thank the Senator.

Mr. HART. Will the Senator yield for a question?

Mr. DOMENICI. I am pleased to yield.

Mr. HART. I would appreciate it if the Senator from New Mexico and the Senator from Florida would address themselves to one issue that was raised when the original modification proposal was put forward and listed among the 25 proposed modifications. That one had to do with clarifying the definition of multiyear contracts, both civilian and military. The question I would like to address to the two Senators is what, if anything, was done in the current modification proposal on that question to clarify the issue?

Mr. DOMENICI. Does the distinguished Senator from Florida desire that I proceed first? I am pleased to proceed.

Mr. CHILES. Fine. Go ahead.

Mr. DOMENICI. What we have done is include all contracts unless they are as follows. And I will just read the language from page 38. It is not very long—38 of the amendment which I have pending now at the desk for myself and Senator CHILES.

Mr. HART. I would rather the Senator paraphrased it. I see the language. I would like him to characterize what it means.

Mr. DOMENICI. It is only two lines. It is very clear to me.

"Such term shall also include funds for existing contracts unless (i) penalty provisions in such contract would produce a net loss to the Government; or (ii) a reduction of the contract violates legal obligations of the Government."

Mr. HART. I thank the Senator. The problem I am having is I have a document here that says "Final" on top of it but page 38 does not have that language.

Mr. DOMENICI. We had three amendments adopted here afterward that we had to put in, so there is a page difference. We will bring the Senator one right now.

Mr. HART. Does the Senator from New Mexico have any idea of the overall impact of this provision on a long-term military procurement, any estimates of what are and are not included in this?

Mr. DOMENICI. Let me first say to my friend from Colorado I know of his genuine interest, and I am trying my very best to be as clear as I can. Frankly, this provision that I read to the Senator came after a lot of discussion with people around here because there was a very broad exclusion. Our intention is to make the exclusion as narrow as possible, but we did not know how to do it with specificity other than to include all contracts and then specify exclusions. You certainly do not want to spend more money due to penalty provisions, and clearly you do not want to get involved in serious contract violations for which you get sued. But I cannot quantify those exceptions right now.

Mr. HART. I appreciate that. May I just suggest the reason I raise the issue tonight but will not pursue it—I have been trying to raise and clarify the question over the past number of days—is this simple reason. It is not to place a greater burden on defense as opposed to human services or vice versa. It is, rather, to prevent that portion of the cuts that will occur as a result of congressional action or Presidential impoundment from coming out of readiness accounts as opposed to hardware accounts.

There are those of us who take a somewhat different view from that which I think is understood by the sponsors of this amendment. It is not somehow to make defense take the bigger cut. It is to prevent the cut that defense takes from coming out of the nonhardware areas.

Mr. CHILES. Mr. President, if I may join in this, I should like to say that at the time the Senator from Colorado was making his remarks yesterday and the day before, as were others of us, we were looking at exempting about 80 percent of defense procurement.

Now, with this modification—and it may not go as far as the Senator from Colorado would like—but I think the question is that compared to what we had when we adopted Gramm-Rudman and what is now sort of enacted, unless it is changed, where you had about 80 percent exempt, now we are talking about only exempting those where to change it, you violate a legal obligation or terminate a program.

As the Senator from Colorado well knows, many of those contracts have a provision for the convenience of the Government, and that is why the Government can cancel a DIVAD and such things. We would get to all those contracts. Unless they could show that it violated a clear legal obligation—in other words, that there was no convenience clause in it or it terminated the contract, we would be able to get to it.

I cannot tell what percentage is now available, but it is a lot greater than the 80 percent that was not available before. So I think that from the viewpoint of the Senator from Colorado, in trying to say we want to subject it to a broader base of defense, so that it would not fall as heavily on readiness and items such as manpower and training and spare parts, this certainly goes in that direction, and I think it helps accomplish that.

Mr. HART. So that, a year or two from now, when a situation arises that a future Congress may not reach the demanded budget deficit reduction numbers and the issue falls to the President to impound funds—and I persist in refusing to use the euphemism "sequester," because it is Presidential impounding—when the President is called upon to impound funds and the Office of Management and Budget tells him that x percent of the impoundment must come from defense, it is the view of the sponsors of the modification that the officials in the Office of Management and Budget will have a greater chance of spreading those defense cuts out than in the original Gramm proposal.

Mr. CHILES. Absolutely.

Mr. HART. I think it is very important for the record to reflect that.

Mr. DOMENICI. I believe that is true.

Mr. HART. To the degree that the Office of Management and Budget cares about congressional intent.

Mr. DOMENICI. I say to the Senator from Colorado that when he was asking the questions before, the Senator from New Mexico did not assume that the Senator was concerned about the balance between domestic and defense. The concern of the Senator from Colorado has been readiness throughout all the efforts I have been associated with him, and he was very concerned that if too much came out by way of contract exclusion, the readiness in those accounts might have to take the brunt.

Mr. HART. There is a reason for that. It is because earlier, after the Gramm amendment was proposed, the current Secretary of Defense publicly stated that under the budget we enacted this year, to meet what Congress had as reduction numbers, he would in fact cut back on readiness and on personnel, because the administration did not intend to strike 1 cent from procurement or strategic weapons.

It is that kind of mentality that I hope this modification addresses.

Mr. DOMENICI. If the distinguished Senator from Colorado is through with his inquiries, I understand that the reservation that the distinguished minority leader had on further reading of the amendment can be withdrawn.

Mr. HART. I have no further questions.

Mr. DOMENICI. Before we do that, let us ask the minority leader.

Will the minority leader let us know now? Since Senator HART has asked his questions, may we proceed without reading the entire amendment?

Mr. BYRD. Mr. President, I have not withdrawn my reservation. I intend to do so within the next 2, 3, or 4 minutes, if no other Senator has questions.

There was a provision in the first Gramm proposal which, with respect to waivers, would have required a joint resolution, which means it would require the action of both Houses; it would go to the President's desk, and be subject to his veto, before the Senate could execute waiver. That, in my judgment, would be not only unconstitutional but also a rather unwise way to proceed with reference to a rules change.

Such a provision would constitute an erosion of the power of the Senate to determine its own rules. I am not about to support something like that, now or in the future.

If the distinguished Senator from New Mexico would state the language in his own words, or if he wishes to elaborate on it, I would like to understand the change that has been made in that regard.

Mr. DOMENICI. I shall be pleased to do so. On page 42 of the pending amendment, it states as follows:

(g) OTHER WAIVERS AND SUSPENSIONS.—The provisions of the Balanced Budget and Emergency Deficit Control Act of 1985 may be waived or suspended in the Senate and the House only by the affirmative vote of three-fifths of the members of that House duly chosen and sworn.

The pending amendment has within its pages none of the joint resolution waiver language to which the Senator referred. It has been deleted.

Mr. BYRD. Mr. President, the distinguished Senator from New Mexico has fully satisfied my feelings on the matter—namely, that any references to a joint resolution, joint action by both Houses, or providing any instrument whatsoever for the President, for his approval or veto, over a rules change in either the Senator or House have been eliminated.

Mr. DOMENICI. The Senator is absolutely correct.

Mr. BYRD. So that as the language reads it is still as it should be and as provided by the Constitution. It is still the function of each House to determine the rules of its own proceedings, and the only change that I can detect from listening is a change from a bare majority to a supermajority of 60 votes as the required number for a waiver.

Mr. DOMENICI. The Senator is absolutely correct.

Mr. BYRD. I congratulate the distinguished Senator and I am fully satisfied with that explanation.

I, therefore, Mr. President, waive my reserved right to demand the reading of the amendment, and I thank the able Senator from New Mexico.

Mr. DOMENICI. I thank the distinguished Senator.

I yield the floor.

Mr. NUNN. Mr. President, we have been debating two very interesting and far-reaching plans for deficit control in the Senate for the past week. One package was offered by Senators GRAMM, HOLLINGS, RUDMAN, and others. The other was sponsored by Senator CHILES, Senator BYRD, Senator JOHNSTON, and others. I supported both amendments because I feel that the Federal deficit is the No. 1 economic problem affecting our Nation.

Both of these proposals have the same worthy objective: producing a balanced Federal budget. The Gramm proposal achieves this goal by fiscal year 1991. The Chiles proposal achieves this goal by fiscal year 1990. Both proposals set up two separate and mandatory mechanisms to achieve this goal.

The first mechanism in the two amendments is to establish mandatory, phased reductions in deficits over the next 5 years, culminating in a balanced Federal budget by fiscal year 1990 or fiscal year 1991. The President would be required to submit a budget that met those declining deficit targets and Congress would be required to report a budget resolution that conformed to those declining targets. This is a very important goal which I support entirely.

The Gramm-Hollings-Rudman and Chiles amendments have a second, fallback mechanism if later projections of the budget deficit in any fiscal year actually exceed the level originally adopted by Congress. This mechanism creates automatic procedures for bringing outlays down to meet the deficit targets if they go over the declining glide path of spending. The Gramm proposal would authorize the President to cut spending sufficient to reduce outlays to meet the annual target. Half of those outlays would have to come from automatic increases in Federal entitlement programs and half from discretionary spending, including defense spending. The Chiles proposal would require emergency reductions in equal proportions from national defense and domestic spending.

These mandatory enforcement procedures entail extraordinary provisions that we would not likely approve of in circumstances less critical than the ones we face. Normally Congress would not agree to emergency provisions that tie our hands or give extraordinary powers to the President. Indeed, the origin of the current budget process was the abuse of the impoundment process, and in these proposals we might be reversing ourselves and giving more power to the President than we otherwise would permit.

But these are not ordinary times. We are in the midst of an extraordinary fiscal crisis, and we must take some action. I believe that I voice the sentiment of most of my colleagues. We have to do something and these amendments could well be the framework for legislative action.

However, Mr. President, in the midst of the enthusiasm for these provisions I want to voice caution, because I think both of these provisions could well create serious unintended results. We need to be aware of these unintented consequences.

One of the things I have observed in the negotiations on these two amendments in the past week is efforts to make them more acceptable to various factions by holding aside certain programs from consideration in the emergency outlay reduction provisions of the bill. The Gramm proposal exempts cost of living adjustments for Social Security. All other entitlements are limited so only COLA adjustments can be cut. Further, there are a number of so-called entitlements that have no automatic COLA adjustments—farm price supports, for example. These are effectively exempted from reductions under the Gramm proposal. This proposal also explicitly favors spending cuts over revenue increases.

The Chiles amendment also excludes automatic cost-of-living increases for means-tested entitlements and for Social Security from the emergency outlay reduction procedures. Like the Gramm proposal, it explicitly favors spending reductions over revenue increases.

In an effort to appease critics, both sets of sponsors have excluded certain programs and approaches which substantially narrow the flexibility to make spending adjustments. This narrowing only heightens the likely pressure on those areas that remain in the budget. This is why I supported the

Boren amendment adding back in Social Security.

I want to focus on the likely effects these two amendments will have on the defense budget if they are enacted.

The declining deficit goals in these amendments are something we all support. But, in the absence of any relief on the revenue side of the ledger, the real growth in defense spending in the current Five-Year Defense Program will be significantly scaled back over the next 5 years.

If either the Gramm or the Chiles amendments are adopted as drafted, there is a strong probability that there will be no real growth in defense spending over the next 5 years. Indeed, there could well be decreases in the defense budget where annual increases would not even cover inflation. The best case is a static defense budget level but the more likely case is negative real growth in defense spending.

Earlier this week press reports indicated that President Reagan endorsed the Gramm proposal so long as he still got 3 percent real growth in the defense budget. This statement indicates that the President isn't living in the real world in budgetary matters. You can't meet the Gramm targets and provide 3 percent real growth in defense without a tax increase. It just can't be done. This is not a matter of liberal or conservative—dove or hawk. It's a matter of simple arithmetic. To meet the Gramm deficit targets and still provide 3 percent to DOD will require at least $80 billion in added revenues over the next 4 years, according to analysis provided by the Congressional Budget Office.

All of this presumes that there will not have to be additional reductions in defense outlays through the emergency automatic triggering mechanisms.

These automatic triggering mechanisms for deficit control by the President in the amendments could also have a serious impact on defense programs. I want to illustrate this problem by showing the potential impact on the defense budget if either the Gramm amendment or the Chiles amendment were in force in fiscal year 1985.

The baseline target for deficits is to be the budget resolution level which cannot exceed a specified number. Last year Congress adopted a budget resolution that specified a deficit for fiscal year 1985 of $181.5 billion. We are now projecting that the deficit will be $209.8 billion. If either of the two amendments had been in place in fiscal year 1985, we would have had to cut spending in fiscal year 1985 by $28.3 billion after the fiscal year had begun. This is critical because these reductions would be in ongoing activities, not in future spending plans.

Under the Gramm amendment, half of the required spending cut—or $14.1 billion—would come in COLA freezes and half would come in discretionary spending. A COLA freeze that does not affect Social Security would have produced savings of only $6 billion or less in fiscal year 1985, and under the terms of the Gramm amendment the remainder of the $8.1 billiion reduction in COLA freezes would have been transferred to discretionary spending. This means that up to $22.2 billion would have to come from discretionary spending.

Defense spending makes up 60 percent of discretionary spending, and nondefense spending makes the remaining 40 percent. With this case, the proportionate across-the-board reduction required by the Gramm proposal would mean that $13.3 billion would have to come from defense spending and $8.9 billion from nondefense discretionary spending in fiscal year 1985.

How would this $13.3 billion outlay reduction in defense spending for fiscal year 1985 have been allocated if these amendments had been in place?

Mr. President, I ask unanimous consent that an analysis answering this question be printed in the RECORD at this point.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

EXAMPLES OF ILLUSTRATIVE DEFENSE OUTLAY REDUCTIONS IN FISCAL YEAR 1985

Example 1: $13.3 billion reduction under Gramm-Hollings-Rudman amendment.

[Dollars in billions]

Outlay reduction required	−$13.3
Financing adjustments	−$2.0
Remaining reductions required	−$11.3

This analysis assumes that $2.0 billion of the $13.3 billion could be achieved by the types of simple financing savings that we have taken advantage of in the past—lower inflation, contract savings, etc. That still leaves $11.3 billion in outlay cuts.

There are two important points about the automatic deficit reduction mechanism under the Gramm-Hollings-Rudman proposal. The first is that the Gramm-Hollings-Rudman proposal prohibits elimination of any program, project or activity in implementing the automatic deficit reduction mechanism, so the Secretary of Defense would be precluded from terminating marginal programs to meet these outlays reductions.

The second point is that the proposal requires an across-the-board allocation of the outlay reductions to the relatively controllable outlays for all programs, projects, and activities in the Defense budget. Only 60 percent of Defense outlays in a given year meet the traditional definition of relatively controllable outlays. The remaining 40 percent—principally outlays from prior year procurement programs—would be exempt from the sequestering order under the automatic triggering mechanism.

This means that the proportionate, across-the-board reductions in projects, programs, and activities required to meet a $11.3 billion outlay reduction would be allocated as follows:

[Dollars in billions]

	Percent of relatively controllable outlays	Outlay reduction	Budget authority reduction
Military personnel	40	$4.5	$4.6
Operation and maintenance	36	4.1	5.1
Procurement	8	.9	6.7
R&D	11	1.3	2.6
Military construction	1	.1	.3
All other	3	.3	.7
Total	100	11.3	20.0

As the allocation above shows, limiting the across-the-board, proportionate outlay reductions to relatively controllable outlays in the defense budget requires the largest reductions to come from military personnel and operations and maintenance—the areas of the Defense budget that have the most immediate impact on day-to-day combat readiness.

How could the $8.9 billion reduction in military personnel and operation and maintenance outlays in this example be achieved?

We could eliminate the January 1, 1984 military and civilian pay raises—outlay savings of $2.7 billion. We still need $6.2 billion.

We could reduce the DoD civilian workforce by 5 percent, or 50,000 personnel (assuming we can't get that many civilians off the Pentagon's rolls)—outlay savings of $1.0 billion. We still need $5.2 billion.

We could reduce by 30 percent the funds spent by DoD on real property maintenance—$1.0 billion in outlay savings. We still need $4.2 billion.

We could refuse flying hours in the military services by 20 percent, meaning an outlay savings of $1 billion. We still need $3.2 billion.

We could tie up at the dock every other Navy ship for an entire year. We would only get $1.4 billion in outlays. We still need $1.8 billion.

We could reduce active duty end-strength by 100,000 and save $1.2 billion. We still need $600 million.

The point is clear: if the Gramm-Hollings-Rudman amendment had been in effect for fiscal year 1985 and if we had had to make substantial cuts in the fiscal year 1985 Defense budget in October or November of last year, the impact on immediate Defense operations and readiness would have been very, very severe.

Example 2: $14.1 billion reduction under (revised) Chiles amendment.

[Dollars in billions]

Outlay reduction required	−$14.1
Financing adjustments	−$2.0
Remaining reductions required	−$12.1

Under the Chiles proposal, the outlay reductions would be applied to all defense outlays except those where reductions would result in a net loss to the Government or would violate legal obligations of the government.

The outlay reductions within the defense budget would apparently be allocated on a basis proportionate to the budget authority allocation within the total budget, rather than proportionate to controllable outlays under the Gramm proposal.

Finally, as in the Gramm proposal, the Secretary of Defense would be precluded from terminating programs to meet these outlay reductions.

[Dollars in billions]

	Percent of total budget authority	Outlay reductions	Budget authority reductions
Military personnel	23	$2.7	$2.8
Operations and maintenance	26	3.1	3.9
Procurement	33	4.0	29.9
R&D	12	1.5	3.6
Militltary construction	3	.4	1.1
All other	3	.4	.7
Total	100	12.1	42.0

Under this example, the fiscal year 1985 Defense budget would have to be reduced by $42.0 billion in budget authority to achieve the $12.1 billion in outlay savings even after the $2.0 outlay savings were achieved in financing adjustments.

The potential impact of the reductions under the example would not be as severe in military personnel and operation and maintenance as in Example 1, principally because the relative percentage of the total budget authority in these two areas of the Defense budget is lower than the relative percentage of outlays in Example 1.

At the same time, however, this amendment would result in very large reductions in procurement because procurement represents the largest percentage of Defense budget authority. The $29.9 billion reduction in procurement budget authority required in this example represents a 30 percent reduction in the fiscal year 1985 appropriated level for defense procurement, and could not be accomplished without significant and immediate disruption to our national defense program.

The PRESIDING OFFICER (Mr. GOLDWATER). The Senator from Georgia.

Mr. NUNN. Mr. President, I want to take a few minutes to explain this analysis to my colleagues.

I have already indicated that Defense would have had to contribute up to $13.3 billion in outlay reductions had the Gramm proposal been in effect last year for fiscal year 1985.

Now let's assume we could save $2 billion in financing adjustments, even though we have already cut $7.5 billion in the congressional authorization and appropriation process in that area in fiscal year 1985.

Now we need $11.3 billion more in defense outlay savings.

There are two important points about the automatic deficit reduction mechanism under the Gramm proposal. The first is that the Gramm proposal prohibits elimination of any program, project or activity in implementing the automatic deficit reduction mechanism, so the Secretary of Defense would be precluded from terminating marginal programs to meet these outlay reductions.

The second point is that the proposal requires an across-the-board allocation of the outlay reduction to the relatively controllable outlays for all activities in the Defense budget. The Gramm proposal specifically delegates the authority to determine what constitues relatively controllable outlays to the Directors of CBO and OBM. If these two directors interpret this term as they have in the past, only 60 percent of Defense outlays in a given year meet the traditional definition of relatively controllable outlays. The remaining 40 percent—principally outlays from prior year procurement programs—would be exempt from the sequestering order under the automatic triggering mechanism.

This means that the proportionate, across-the-board reductions in projects, programs, and activities required to meet a $11.3 billion outlay reduction in this example would be allocated as follows: We would have to cut $4.5 billion in military personnel outlays, $4.1 billion in operation and maintenance outlays, $0.9 billion in procurement outlays, and $1.3 billion in R&D outlays.

As this allocation shows, limiting the across-the-board, proportionate outlay reductions to relatively controllable outlays in the defense budget requires the largest reductions to come from military personnel and operations and maintenance—the areas of the Defense budget that have the most immediate impact on day-to-day combat readiness.

How could the $8.9 billion reduction in military personnel and operation and maintenance outlays in this example be achieved? The short answer is: not very easily.

We could eliminate the January 1, 1984, military and civilian pay raises—outlay savings of $2.7 billion. We still need $6.2 billion.

We could reduce the DOD civilian work force by 5 percent, or 50,000 personnel—assuming we can get that many civilians off the Pentagon's rolls—outlay savings of $1.0 billion. We still need $5.2 billion.

We could reduce by 30 percent the funds spent by DOD on real property maintenance—$1.0 billion in outlay savings. We still need $4.2 billion.

We could reduce flying hours in the military services by 20 percent, meaning an outlay savings of $1 billion. We still need $3.2 billion.

We could tie up at the dock every other Navy ship for an entire year. We would only get $1.4 billion in outlays. We still need $1.8 billion.

We could reduce active duty end-strength by 100,000 and save $1.2 billion. We still need $600 million.

The point is clear: if the Gramm amendment had been in effect for fiscal year 1985, and if we had had to make substantial cuts in the fiscal year 1985 Defense budget in October or November of last year, the impact on immediate operations and readiness would have been very, very severe.

Now it may be that the Directors of OMB and CBO will change the traditional definition of relatively controllable outlays to include all outlays in the Defense budget, including those from prior years. If that has happened in this example, the emphasis of the reductions would have shifted dramatically. Procurement outlays could have been cut by $3.3 billion, and procurement budget authority by $24.5 billion. The result, however, would have been the same: severe disruption to our national defense program.

If the reduction allocated to the Defense Department were $14.1 billion as would be required if the Chiles amendment had been in effect last year instead of the $13.3 in my example, the result would have been even more severe.

I want to go through this to illustrate a key point. The purpose of these two amendments is to put us on a glide path toward a balanced budget. I applaud that. But the enforcement provisions—the mandatory reductions in outlays once the year begins with large accounts of the budget put off limits—could hold devastating consequences, especially in the area of defense spending. I am sorry that it takes this amendment to force reality on the White House, but that reality is here and the President will have to face up to it.

In the area of nondefense discretionary spending, cuts of the magnitude likely under these amendments would also have serious consequences. These programs have already been cut dramatically. They are already one-third less than the levels contained 5 years ago in real terms. We would have to cut back on Coast Guard patrols against drug smuggling. We would have to cut back on the judicial system, on safety inspections, on the FAA, and so on.

The Chiles amendment would also be painful. Were the Chiles plan in effect today, we would have had to cut $14.1 billion in defense spending from activities that are already underway. That can't be done without serious cuts in our defense programs as I have already shown.

The main point I want to get across to my colleagues is that I applaud the effort to get serious with deficit reduction. I applaud the commitment to declining deficits, though I realize it will be a very painful process. I also believe that extraordinary measures may be necessary to accomplish these goals. But we cannot rule out massive areas of Government spending—or rule out revenue increases—and have this thing work.

Both proposals have taken social security off of the table and exempted it from any reductions. Others want to take all means-tested entitlements off the table. Others insist that revenues must be off the table.

If we take all these things off the table, Mr. President, the only thing left sitting there will be the Defense budget. And as we on the armed services have been saying for several years, the Defense budget is one area of the

Federal budget where it is very difficult and disruptive to get immediate near-term outlay reductions.

Mr. President, my lengthy statement here related to the effects of the Gramm amendment, as I see it, on defense spending in all likelihood.

I have taken fiscal year 1985 and used that as a hypothetical example of what I think are reasonable assumptions.

I refer this to my colleagues because they may want to take a look at it.

The long and short of it is that in 1985 fiscal year had this been in effect we would have had to cut some 13-odd billion dollars out of defense outlays after the fiscal year started. That is assuming a proportionate reduction between defense and other discretionary spending.

The long and short of that is if we had to cut that $13 billion-odd out of defense outlays after the fiscal year started we would have in all likelihood had to make very serious cuts in the number of personnel, the pay of personnel, the steaming hours of ships, and the flying hours and training of aircraft.

So it would have had a very serious effect.

I say that as one who voted for the Gramm amendment. I believe it is going to require us to make very tough choices, but those tough choices are long overdue.

We are going to have to choose between large cuts in domestic spending far beyond what President Reagan has been willing to recommend or what Congress has been willing to support.

The second choice will be very harmful cuts in defense spending and this makes that very clear.

The third choice is tax increases.

In my opinion, these choices are overdue but they are not going to be easy. They are going to be painful.

I say in all candor, I think President Reagan has not exercised responsible fiscal leadership. I think Congress has not exercised its own responsibility in filling the vaccum which has existed in responsible fiscal leadership in the country.

The result has been obvious—large budget deficits, high real interest rates, high American dollar, deteriorating trade, and deterioration of our competitive position in the world.

The final result is that we are a debtor nation and we can no longer avoid the hard choices. Our defense budget will suffer from this new discipline if it is implemented. If we treat it seriously and not as a gimmick, the defense budget in my opinion will suffer.

We must find new ways to increase defense output within constrained resources. In the final analysis, however, I say as one who voted for this amendment that America's defense depends on a strong economy. We cannot build a strong defense on our eroding economic foundation.

So the hard choices must be made, and I am hopeful that the Gramm-Rudman-Hollings amendment will force the White House and the Congress to make these choices.

I congratulate all of those on both sides of the aisle who have played a constructive role in this overall venture.

Mr. WARNER. Mr. President, will the Senator yield for a question?

Mr. NUNN. I am glad to yield.

Mr. WARNER. Mr. President, I join in the observation that we are putting at risk our defense budget. I have joined in this amendment thus far, that is Gramm-Rudman-Hollings amendment.

I am wondering if the Senator in his calculations for the fiscal year 1985 used as a base the Gramm-Rudman-Hollings original or the pending amendment as proposed by the distinguished Senator from New Mexico.

Mr. NUNN. I used the amendment as it evolved, and this analysis was through yesterday, as the amendment evolved. It does not include the Domenici amendment as is now being presented. I do not know all the ramifications of that to the extent that the Domenici amendment restricts those areas covered. If it does further restrict the areas covered, and I do not know the answer to that, it would make the effect on defense worse.

If the Domenici amendment has expanded the areas covered, then it would make the effect on defense less.

I have to leave that up to the Senator from New Mexico. I do not know exactly what his amendment does. I voted to broaden the base on which all of these areas apply, voted for the Boren amendment and others, because I do believe that unless we use the whole deck of cards part of the card deck left is going to suffer immensely.

Mr. WARNER. Mr. President, my question of the distinguished Senator, I think, should be clarified for the RECORD. The effect of the pending amendment is to strengthen the base and therefore focus a greater proportion of the projected cut on the defense budget. Does the Senator concur in that observation?

Mr. NUNN. I did not hear the first part. Would the Senator from Virginia mind repeating that?

Mr. WARNER. The effect of the amendment of the Senator from New Mexico and the Senator from Florida would be to strengthen the base of which any future cuts would be made, and there are accounts other than defense which would put a larger proportion of the projected cut on defense.

Mr. NUNN. If that is the effect of the amendment of the Senator from Florida and the Senator from New Mexico, I do not know if it constricts or expands the base. I leave that to them to answer.

Mr. WARNER. Mr. President, I see both Senators on their feet. Perhaps they could respond.

Mr. CHILES. Mr. President, I say to my friend from Virginia what would be available in defense, I think it greatly broadens the base, because we are through the definition to what we are putting in. We are allowing contracts, unless there is a binding legal obligation or the contract would terminate the proposal of the contract itself, the project. We are allowing those contracts to be a part of the process that could be used for impounding or sequestering the funds.

My staff tells me in the first cut probably about 90 to 95 percent of the contracts would be available because most of them are drafted with the provision in there that says they can be changed at the convenience of the Government. That is put in most of the contracts.

So from the perspective of the Senator from Georgia of what this would do to steaming hours, what this would do to manpower, what this would do to readiness, all of those items could be less because we are talking about broadening into the procurement area and where prior to the modification, which I hope will be adopted, about 85 percent of the contracts would not have been available. Now I think about 90 percent of the contracts would be available.

Mr. NUNN. Mr. President, I say to the Senator, based on that explanation I think it would probably ease some of the problems that I have identified here, although we did assume here that the Office of Management and Budget and CBO would make a reasonable kind of determination of what was a discretionary defense expenditure as opposed to a prior locked-in obligation.

So I think our hypothetical example, here holds up. But I do believe that that step by the Chiles-Domenici or Domenici-Chiles amendment is a step in the right direction because I think it would be very unfortuante if we wrote off all prior contracts and simply took the cuts in defense out of the immediate spendouts which are always inclined to be personnel, pay, steaming hours, and so forth.

So I would say that the amendment would be helpful in that respect within the defense budget.

Mr. WARNER. Mr. President, if I may direct a question to the Senator from Florida, in the record of those defense contractors, was there any calculation made of cancellation costs?

Mr. CHILES. Mr. President, there is a specific protection put in that says that in the event the penalty provisions of such a contract would produce

a net loss to the Government, then it would be exempt.

Mr. WARNER. I thank the Senator from Florida and I yield the floor.

Mr. HART. Mr. President, this has been one of the sorriest weeks for the Chamber in recent memory. This measure is offered in the name of courage. But no specific act of courage is demanded for its support. This greatest deliberative body has rejected the wisdom of careful deliberation. Worst of all, the Chamber has aligned itself with political fraud.

The fraud began 5 years ago. Let me quote from "A Program for Economic Recovery," February 1981: "By fiscal year 1984—under the policy recommendations presented in this document—the Federal budget should be in balance. And that will not be a one-time occurrence."

That was the promise of Reaganomics. What was the performance? Presidential budgets requesting $686 billion in additional deficits. A growing debt that has required this Chamber to raise the debt ceiling 11 times. And budget deficits three times larger than before Mr. Reagan became this Republic's 40th President.

Now the authors of the Reagonomics have produced its sequel. To address the massive deficits that were an inevitable consequence of their efforts in 1981, they propose we attack again those most harmed by their earlier efforts.

They defend their action by saying that the budget process has failed. The budget process has not failed. Their own policies have failed.

Now they seek to cover their tracks in the name of budget-balancing. But their new proposal would better be dubbed the Unbalanced Budget Act of 1985.

It guarantees budgets unbalanced against military readiness and national security, because it ensures deep cuts in training, flight time, military pay, spare parts, bullets, and funding for our efforts to combat terrorism.

It guarantees budgets unbalanced against low- and middle-income Americans. By excluding much of defense and entitlements from the budget process, it ensures cuts in farm price supports, black lung benefits, mass transit, student loans, training, health care for the elderly poor, and basic nutrition for children.

The greatest shame of all is that this proposal fails to make any of the difficult choices that will be necessary to solve America's ruinous deficits. Instead, it buys political cover for Senators worried that their reelection is imperiled by their earlier fiscal irresponsibility.

This proposal is a confession of incompetence. It insists that the mightiest elective body on Earth—the U.S. Congress—lacks the ability to reduce the deficit, and strips it of its constitutional power to set the Nation's budget priorities. It puts our budget process on autopilot.

All this is sadly reminiscent of the Wizard of Oz. Like the Scarecrow, supplyside therory had no brain. Like the Tin Man, the Reagan budget cuts had no heart. And like the Cowardly Lion, the Senate's action this week has absolutely no courage.

Mistakes, haste, and ideological blinders combined to put this Nation in the budget crisis in which we find ourselves. It is a charade to believe that a repetition of those failures are going to make this deficit go away. It is going to take leadership, hard choices, and hard work. This is no way to begin.

SEVERAL SENATORS. Vote.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. CRANSTON. Mr. President, I do not intend to create any significant delay, but it is not still clear to this Senator exactly what the bill or the amendment does on one matter relating to veterans. I am not going to propose an amendment when I find out what it does. But I do want to understand what it does to make that record clear before we proceed, and I think I will know in just a few moments.

I ask that there not be a vote until I have had that opportunity.

Mr. DOLE. Mr. President, let me just indicate I am certain the Senator from California is within his rights, but we do not intend to stay here much longer tonight. If we cannot complete action on this bill by 8:30 p.m., we will be back here at 10 a.m. in the morning.

Mr. EAGLETON. If the majority leader will yield, would it be possible, while Senator CRANSTON is contemplating the bill insofar as the veterans section, that we could lay the amendment aside and move on to my little 3-minute amendment? I have been here since 5 o'clock and the majority leader has been here since dawn. Perhaps we could use the time to the maximum advantage.

Mr. DOLE. As I understand it, the Senator needs a rollcall on his amendment.

Mr. EAGLETON. Yes.

Mr. DOLE. I think we are quite close to wrapping up the Domenici-Chiles amendment. Maybe if we could give it a few more minutes. If that does not happen, I will be more than happy to do that.

Mr. EAGLETON. I thank the majority leader.

Mr. DOMENICI. As I understand it, we are waiting for the distinguished Senator from California, who still has an inquiry. Until he is ready, I would just want to make one observation.

Mr. CRANSTON. If the Senator will yield for one point, Senator GLENN is on his way over here also wishing clarification, I have just been advised. He is on his way to the floor.

Mr. DOMENICI. Mr. President, I wish to make a couple of observations and thank a few people.

Clearly, in attempting to build on the Gramm-Rudman-Hollings amendment, a number of Senators have been extremely helpful, and I thank them all, and in particular the chairman and ranking minority member of the Finance Committee. The Senator from Oklahoma, Senator BOREN, and the distinguished Senator from Texas from the Finance Committee have been extremely helpful.

But I wish to say, in my final remarks, that no one should think that because we had to do some drafting and some perfecting, changed some definitions and made them clear, no one should permit that to detract from the fact that the distinguished Senator from Texas and the distinguished Senator from New Hampshire and the distinguished Senator from South Carolina, Senator HOLLINGS, put a bill before the Senate whose day had come. They are the ones that receive my praise for the idea and the basic concept that we are going to adopt here later tonight.

It has been my privilege for 2 or 3 weeks, as chairman of the Budget Committee, to work with them, and in the last 3 or 4 days to work with them and many others to perfect this bill which we are going to adopt tonight.

I think they are the ones that are entitled to the congratulations. They are the ones that did the work.

The Senate has its way of making a good thing better, and we have done that. But its basic concepts are protected and perfected. I hope they work.

The first thing they did right was making a finding that there is a state of emergency with reference to fiscal policy. No one has been willing to say that. But they have made that as a starter and with that everybody would conclude that we had to do some extraordinary things.

So I am hopeful that this process will come out of a conference with its provisions intact to make sure we get the job done. Certainly there has been a great deal of cooperation, coordination, and patience. I am most appreciative for it.

I yield the floor.

Mr. PACKWOOD. Mr. President, there is going to be a great, great deal of interest in this bill when it is passed.

I ask unanimous consent, therefore, that the resolution, House Joint Resolution 372, be printed as approved by the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on the amendment.

Mr. CRANSTON. Mr. President, I am not quite ready. We are discussing what is in the bill and it is still not precisely clear what is in the bill on the point I am concerned about.

Mr. RUDMAN. Mr. President, we are waiting just for a couple of minutes. Therefore, I am not causing any delay, I do not believe. I wish to just address a comment to Senator DOMENICI, the chairman of the Budget Committee, and Senator CHILES, the ranking member of that committee.

I believe that I can speak on behalf of Senator HOLLINGS, Senator GRAMM, and myself and say that we are very indebted to them, particularly in the last few days, for helping make what we think is a sound idea better, and also for the help that we were given by the staffs, majority and minority, on the Budget Committee who, after all, are the resident experts of this complex matter.

We do have disagreements, but the fact is that no one could have been more helpful than the chairman and the ranking member of the Budget Committee, and I want to express our appreciation.

Mr. GRAMM. Mr. President, on the same basis that we are not delaying proceedings, because I think of almost anyone here, except perhaps the other two cosponsors of this measure, I am ready to get on with the job of voting.

It has been a long and tedious process. Numerous hours have been worked where people were not on the floor, and we have been on the floor until 3:30 in the morning.

I wish to thank the distinguished majority leader for his support. Without that support, we would not be here, this bill would not have passed in the Senate, and we would not have brought to the floor of the Senate and taken to the House the No. 1 issue in the country.

I wish to thank Senator DOMENICI, Senator CHILES, Senator LEVIN, and all those who have worked to make this bill better. People ask: "Have there been changes?" In terms of the basic approach, in terms of what we are trying to achieve, in terms of the thrust of the bill, the answer is clearly no. But in terms of the procedure, in terms of enriching the process, in terms of broadening the number of committees participating in any kind of post-sequester reconciliation, in terms of working out the details to make the bill work—something that never shows up in the papers but shows up when you try to put a law to work on behalf of the people—we made great progress.

I am hopeful, Mr. President, that when we send this bill to conference and to the House that they will give it the consideration it deserves, and, if they cannot offer anything better, that they will adopt it and give us an opportunity to put the Federal Government on a budget like everybody else.

I yield the floor.

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

Mr. METZENBAUM. Will the Senator withhold on that request?

Mr. CRANSTON. Yes.

Mr. METZENBAUM. Mr. President, I say to the Senator from New Mexico, there was a mistake on page 25. Something was crossed out and it was intended to be in. Would the Senator from New Mexico be good enough to send this to the desk indicating that modification?

Mr. DOMENICI. Mr. President, that is correct. The language that will be on this modification is the language that I thought was there. It had been stricken in the drafting between the staff. So this would put it back where it was.

I send the modification to the desk.

The PRESIDING OFFICER. The amendment will be so modified.

The amendment (No. 771), as modified, reads as follows:

Strike all after the language added by Amendment No. 739 and insert in lieu thereof:

SEC. . DEFICIT REDUCTION PROCEDURES.

(a) SHORT TITLE.—This section may be cited as the "Balanced Budget and Emergency Deficit Control Act of 1985".

(b) CONGRESSIONAL BUDGET.—

(1) ONE CONCURRENT RESOLUTION ON THE BUDGET REQUIRED ANNUALLY.—

(A) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(i) by striking out all beginning with "SEC. 310. (a)" through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary,—"; and

(ii) by striking out subsection (b) and redesignating subsection (c) as subsection (b).

(B) CONFORMING CHANGES.—

(i) The table of contents in subsection (b) of section 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(I) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(II) by striking out "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

(III) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(ii) Paragraph (4) of section 3 of such Act is amended—

(I) by adding "and" after the semicolon at the end of subparagraph (A);

(II) by striking out subparagraph (B); and

(III) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(iii) Section 300 of the Congressional Budget Act of 1974 is amended—

(I) by striking out "first" in the item relating to April 15 and in the second item relating to May 15; and

(II) by striking out the items relating to September 15 and September 25.

(iv)(I) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION".

(II) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(III) Section 301(b) of such Act is amended—

(aa) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(bb) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(IV) Section 301(d) of such Act is amended by striking out "first" each place it appears.

(V) Section 301(e) of such Act is amended—

(aa) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth"; and

(bb) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(v) Section 302(c) of such Act is amended by striking out "or 310".

(vi)(I) The heading of section 303 of such Act is amended by striking out "FIRST".

(II) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(vii) Section 304 of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(II) by striking out "pursuant to section 301".

(viii)(I) Section 305(a)(3) is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(II) Section 305(b) of such Act is amended—

(aa) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(bb) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ix) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(x) Paragraph (1) of section 309 of such Act is amended by striking out ", and other than the reconciliation bill for such year, if required to be reported under section 310(c)".

(xi) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "301(a)".

(xii) Section 311(a) of such Act is amended—

(I) by striking out "310(a)" the first place it appears and inserting in lieu thereof "301(a)"; and

(II) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(2) MAXIMUM DEFICIT AMOUNTS.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) POINT OF ORDER.—Section 301 of the Congressional Budget Act of 1974 is amended by redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively, and inserting after subsection (b) the following new subsection:

"(c) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) CONFORMING CHANGES.—

(I) Section 301(a)(6) of such Act is amended by striking out "subsection (e)" and inserting in lieu thereof "subsection (f)".

(II) Section 301(e) of such Act, as redesignated by clause (i) of this subparagraph, is amended by inserting "; and when so reported such concurrent resolution shall comply with the requirement described in paragraph (1) of subsection (c), unless such paragraph does not apply to such fiscal year by reason of paragraph (2) of such subsection" after "October 1 of such year" in the second sentence thereof.

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—Section 304 of such Act is amended—

(i) by inserting "(a) IN GENERAL.—" after "SEC. 304."; and

(ii) by adding at the end thereof the following new subsection:

"(b) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(C) DEFINITIONS.—Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year. For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985, the receipts of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund for a fiscal year, and the taxes payable under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954 during such fiscal year, shall be included in total revenues for such fiscal year, and the disbursements of either such Trust Fund for such fiscal year shall be included in total budget outlays for such fiscal year.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985, $180,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and

"(F) with respect to the fiscal year beginning October 1, 1990, zero.".

(3) RECONCILIATION.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 (as amended by paragraph (1)(B)(iv)(III) of this subsection) is further amended—

(I) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(II) by inserting "require" after the paragraph designation in paragraph (1);

(III) by inserting "require" after the paragraph designation in paragraph (2); and

(IV) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(ii) CONFORMING CHANGES.—

(I) Section 310(a) of such Act is amended—

(aa) by inserting "or" at the end of paragraph (2);

(bb) by striking out "; or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(cc) by striking out paragraph (4).

(II) Section 310(d) of such Act is amended by striking out "subsection (c)" and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than June 15 of each year".

(III) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(IV) Section 300 of such Act is amended by inserting immediately after the second item relating to May 15 the following new item:

"June 15	Congress completes action on reconciliation bill or resolution, or both, implementing annual required concurrent resolution.".

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) IN GENERAL.—Section 304(a) of such Act (as redesignated by paragraph (2)(B)(i) of this subsection) is amended by adding after the period the following new sentence: "Any concurrent resolution adopted under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(ii) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by subparagraph (A)(ii)(II) of this paragraph) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(4) LIMITATION ON AMENDMENTS.—

(A) CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) HOUSE OF REPRESENTATIVES.—Section 305(a)(6) of such Act is amended—

(I) by inserting "(A)" after the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) SENATE.—Section 305(b)(2) of such Act is amended—

(I) by inserting "(A)" before the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) RECONCILIATION BILLS AND RESOLUTIONS.—Section 310 of such Act is amended by inserting after subsection (b) (as redesig-

nated by paragraph (1)(A)(ii) of this subsection) the following new subsection:

"(c) LIMITATION ON AMENDMENTS TO RECONCILIATION BILLS AND RESOLUTIONS.—

"(1) It shall not be in order in either the House of Representatives or the Senate to consider any amendment to a reconciliation bill or reconciliation resolution if such amendment would have the effect of increasing any specific budget outlays above the level of such outlays provided in the bill or resolution, or would have the effect of reducing any specific Federal revenues below the level of such revenues provided in the bill or resolution, unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the most recently agreed to concurrent resolution on the budget is not exceeded, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof, except that a motion to strike a provision shall always be in order.

"(2) Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(5) ENFORCEMENT.—

(A) ALLOCATIONS OF BUDGET AUTHORITY AND OUTLAYS.—

(i) REPORTING DATE FOR ALLOCATIONS.—Section 302(b) of such Act is amended by striking out "Each such committee shall promptly report" in the last sentence and inserting in lieu thereof "Each such committee, within ten days of session after the concurrent resolution is agreed to, shall report".

(ii) POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider any bill or resolution, or amendment thereto, providing—

(I) new budget authority for any fiscal year;

(II) new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act first effective in any fiscal year; or

(III) direct loan authority, primary loan guarantee authority, or secondary loan guarantee authority for any fiscal year;

within the jurisdiction of any committee which has received an allocation of budget authority or new spending authority described in section 401(c)(2)(C) pursuant to section 302(a) of the Congressional Budget Act for a fiscal year, unless and until such committee makes the allocation or subdivisions required by section 302(b) of the Congressional Budget Act, in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year.

(iii) ALLOCATIONS MADE BINDING.—Section 311 of such Act is amended by redesignating subsections (a) and (b) as subsections (b) and (c), respectively, and inserting immediately after "SEC. 311" the following new subsection:

"(a) LEGISLATION SUBJECT TO POINT OF ORDER AFTER ADOPTION OF ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

"(1) IN GENERAL.—At any time after the Congress has completed action on the concurrent resolution on the budget required to be reported under section 301(a) for a fiscal year, it shall not be in order in either the House of Representatives or the Senate—

"(A) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides for budget outlays or new budget authority in excess of the appropriate allocation of such outlays or authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year; or

"(B) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides new spending authority described in section 401(c)(2)(C) to become effective during such fiscal year, if the amount of budget outlays or new budget authority that would be required for such year if such bill or resolution were enacted without change or such amendment were adopted would exceed the appropriate allocation of budget outlays or new budget authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year, unless such bill, resolution, or amendment was favorably reported by the Committee on Appropriations of the House involved under section 401(b)(2) along with a certification that if such bill, resolution, or amendment is enacted or adopted, the committee will reduce appropriations or take any other actions necessary to assure that the enactment or adoption of such bill, resolution, or amendment will not result in a deficit for such fiscal year in excess of the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) ALTERATION OF 302(b) ALLOCATIONS.—At any time after a committee reports the allocations required to be made under section 302(b), such committee may report to its House an alteration of such allocations, provided that any alteration of such allocations must be consistent with any actions already taken by its House on legislation within the committee's jurisdiction.

"(3) EXCEPTION.—Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 311(b) of such Act, as redesignated by subparagraph (A)(ii) of this subsection, is amended by inserting before the period at the end thereof the following: "or would cause the levels of deficits set forth in such concurrent resolution to be exceeded, or would otherwise result in a deficit for such fiscal year that exceeds the maximum deficit amount specified for such fiscal year in section 3(7) (except to the extent that paragraph (1) of subsection (b) of section 310 does not apply by reason of paragraph (2) of such subsection)".

(C) REPORTING REQUIREMENT EXTENDED TO CONFERENCE REPORTS.—Section 308(a) of such Act is amended by striking out "the report accompanying that bill or resolution" in the matter preceding paragraph (1) and inserting in lieu thereof the following: "or whenever a conference report is filed in either House, the report accompanying that bill or resolution or the statement of managers accompanying that conference report".

(c) BUDGET SUBMITTED BY THE PRESIDENT.—

(1) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) The budget transmitted pursuant to subsection (a) for a fiscal year shall be prepared on the basis of the best estimates then available, in such a manner as to ensure that the deficit for such fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974; and the President shall take such action under subsection (d)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985 as is necessary to ensure that the deficit for such fiscal year does not exceed such maximum deficit amount.

"(2) Subject to paragraph (3) of this subsection, the deficit set forth in the budget so transmitted for any fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974, with budget outlays and Federal revenues at such levels as the President may consider most desirable and feasible.

"(3) Paragraph (2) shall not apply with respect to any fiscal year for which a declaration of war has been enacted.".

(2) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

(d) EMERGENCY POWERS TO ELIMINATE DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.—

(1) REPORTING OF DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.—

(A) IN GENERAL.—The Director of the Office of Management and Budget and the Director of the Congressional Budget Office (hereafter in this section referred to as "the Directors") shall, with respect to any fiscal year (I) estimate the levels of total revenues and budget outlays that may be anticipated for such fiscal year, (II) determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess is statistically significant, and (III) estimate the rate of real economic growth that will occur during such fiscal year and the rate of economic growth that will occur during each quarter of such fiscal year. The Directors jointly shall report to the President and to the Congress on November 1 of such fiscal year (in the case of the fiscal year beginning October 1, 1985) and on the September 25 preceding each such fiscal year (in the case of any succeeding fiscal year), identifying the amount of any excess, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year and for each quarter of such fiscal year, and specifying the percentages by which automatic spending increases and controllable expenditures shall be reduced during such fiscal year in order to eliminate any such excess. In the event that the Directors are unable to agree on an amount to be set forth with respect to any item in any such report, the amount set forth for such item in such report shall be the average of the amounts proposed by each of them with respect to such item.

(B) EXCEPTION.—Subparagraph (A) shall not apply to any fiscal year for which a declaration of war has been enacted.

(2) PRESIDENTIAL ORDER.—

(A) CONTENTS.—

(i) IN GENERAL.—Upon receipt of any report from the Directors under paragraph (1) of this subsection which identifies a statistically significant amount by which the deficit for a fiscal year will exceed the maximum deficit amount for such fiscal year, the President shall eliminate the full amount of the deficit excess by issuing an order that—

(I) subject to clauses (ii), (iii), and (iv) of this subparagraph, and notwithstanding the

Impoundment Control Act of 1974, eliminates one-half of such excess by modifying or suspending the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a manner as to reduce by a uniform percentage (but not below zero) the amount of outlay increase under each such provision, and

(II) subject to clauses (ii), (iii), and (iv) of this subparagraph, eliminates one-half of such excess by sequestering from each affected program, project, or activity (as defined in the most recently enacted relevant appropriations Acts and accompanying committee reports) or from each affected account if not so defined, for funds provided in annual appropriations Acts or, otherwise from each budget account, such amounts of budget authority, obligation limitation, other budgetary resources, and loan limitation, and by adjusting payments provided by the Federal Government, to the extent necessary to reduce the outlays for each controllable expenditure by a uniform percentage: *Provided*, That any periodic payments to individuals or families which are in the nature of income support, supplementation, or assistance (including payments made pursuant to section 32 of the Internal Revenue Code of 1954 as amended), and which are paid to such individuals or families directly by the United States (or by a person or entity acting as an agent of the United States) shall not be reduced pursuant to this subclause to a level which is lower than the level that would be payable in the absence of this subclause.

and shall transmit to both Houses of the Congress a message—

(III) identifying—

(aa) the total amount and the percentage by which automatic spending increases are to be reduced under subclause (I) of this clause;

(bb) the total amount of budget authority, obligation limitations, loan limitations, and other budgetary resources which is to be sequestered under subclause (II) of this clause with respect to controllable expenditures;

(cc) the amount of budget authority, obligation limitations, loan limitations, and other budgetary resources which is to be sequestered with respect to each such controllable expenditure in order to reduce it by the required percentage; and

(dd) the account, department, or establishment of the Government to which each amount of budget authority, obligation limitations, loan limitations, and other budgetary resources described in subclause (II) of this clause would be available for obligation; and

(IV) providing full supporting details with respect to each action to be taken under subclause (I) or (II) of this clause.

Upon receipt in the Senate and the House of Representatives, the message shall be referred to all committees with jurisdiction over programs, projects, or activities affected by it.

(ii) EXCEPTION.—If, in order to reduce by one-half the amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year, actions under clause (i)(I) would require the reduction of automatic spending increases below zero, then, in order not to require such reductions below zero, the remaining amount shall be achieved through further uniform reductions under clause (i)(II).

(iii) LIMITATION.—No action taken by the President under subclause (I) or (II) of clause (i) shall have the effect of eliminating any program, project, or activity of the Federal Government.

(iv) LIMITATION.—Any automatic spending increases modified or suspended, or any amounts of budget authority, obligation limitation, other budgetary resources, or loan limitations sequestered by an order of the President under this Act are permanently cancelled, and the legal rights, if any, of persons to receive such automatic spending increases shall be deemed to be extinguished to the extent that the operation of laws providing for such increases are modified or suspended by such an order.

(v) Nothing in subclause (I) or (II) of clause (i) shall be construed to give the President new authority to alter the relative priorities in the Federal budget that are established by law, and no person who is, or becomes, eligible for benefits under any provision of law shall be denied eligibility by reason of this section.

(B) DATE ISSUED.—

(i) POSITIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is zero or greater, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 14 days after transmittal of such report.

(ii) NEGATIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is less than zero with respect to such fiscal year or with respect to each of any two consecutive quarters of such fiscal year, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 30 days after transmittal of such report.

(C) EFFECTIVE DATE.—

(i) IN GENERAL.—Except to the extent that it is superseded by a reconciliation bill or reconciliation resolution enacted or adopted under paragraph (3) of this subsection, an order issued pursuant to this paragraph shall become effective 30 days after its issuance. Any modification or suspension by such order of the operation of a provision of law that would (but for such order) require an automatic spending increase to take effect during a fiscal year shall apply for the one-year period beginning with the date on which such automatic increase would have taken effect during such fiscal year (but for such order).

(ii) WITHHOLDING OF BUDGET AUTHORITY FOR THIRTY-DAY PERIOD.—During the 30-day period referred to in clause (i), the President shall withhold from obligation the amounts that would have been suspended or sequestered under such order with respect to such 30-day period if the order issued pursuant to this paragraph had become effective on the date of its issuance. If a reconciliation bill or reconciliation resolution enacted or adopted under paragraph (3) of this subsection becomes law on or before the last day of such 30-day period, amounts withheld from obligation pursuant to the preceding sentence shall be made available for obligation to the extent permitted by such reconciliation bill or reconciliation resolution. If such a reconciliation bill or reconciliation resolution does not become law during such period, the budget authority withheld from obligation under the first sentence of this clause shall be permanently cancelled as described in paragraph (2)(A)(iv) of this subsection.

(D) PROPOSAL OF ALTERNATIVES.—A message transmitted pursuant to this paragraph with respect to a fiscal year may be accompanied by a proposal setting forth in full detail alternative ways to reduce the deficit for such fiscal year to an amount not greater than the maximum deficit amount for such fiscal year. Upon receipt in the Senate and the House of Representatives, the message and any accompanying proposal shall be referred to all committees with jurisdiction over programs, projects, or activities affected by it.

(3) CONGRESSIONAL ACTION.—

(A) REPORTING OF CONCURRENT RESOLUTIONS AND RECONCILIATION BILLS AND RESOLUTIONS.—

(i) IN GENERAL.—Not later than 10 days after issuance of an order by the President under paragraph (2) with respect to a fiscal year, the Committee on the Budget of the House of Representatives and the Senate may report to its House a concurrent resolution. The concurrent resolution may affirm the impact of the order issued under paragraph (2), in whole or in part. To the extent that any part of the order is not affirmed, the concurrent resolution shall state which parts are not affirmed and shall contain instructions to committees of the House and the Senate of the type referred to in section 310(a) of the Congressional Budget Act of 1974, sufficient to achieve at least the total level of deficit reduction contained in those sections which are not affirmed.

(ii) RESPONSE OF COMMITTEES.—Committees instructed pursuant to clause (i) of this subparagraph, or affected thereby, shall submit their responses to their respective Budget Committees no later than 10 days after the conference report on the concurrent resolution referred to in clause (i) is agreed to in both Houses, except that if in either House only one such Committee is so instructed such Committee shall, by the same date, report to its House a reconciliation bill or reconciliation resolution containing its recommendations in response to such instructions. A committee shall be considered to have complied with all instructions to it pursuant to a concurrent resolution adopted under clause (i) if it has made recommendations with respect to matters within its jurisdiction which would result in a reduction in the deficit at least equal to the total reduction directed by such instructions.

(iii) BUDGET COMMITTEE ACTION.—Upon receipt of the recommendations received in response to a concurrent resolution referred to in clause (i) of this subparagraph, the Budget Committee of each House shall report to its respective House a reconciliation bill or reconciliation resolution, or both, carrying out all such recommendations without any substantive revisions. In the event that a committee instructed in a concurrent resolution referred to in clause (i) fails to submit any recommendation (or, when only one committee is instructed, fails to report a reconciliation bill or resolution) in response to such instructions, the Budget Committee of the relevant House shall include in the reconciliation bill or reconciliation resolution reported pursuant to this clause legislative language within the jurisdiction of the non-complying committee to achieve the amount of deficit reduction directed in such instructions.

(iv) POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider or agree to any bill or resolution reported under clause (iii) with respect to a fiscal year, any amendment thereto, or any conference report thereon if—

(I) the enactment of such bill or resolution as reported;

(II) the adoption and enactment of such amendment; or

(III) the enactment of such bill or resolution in the form recommended in such conference report;

would cause the amount of the deficit for such fiscal year to exceed the amount of the deficit set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year or the maximum deficit amount for such fiscal year, unless the report submitted under paragraph (1)(A) projects negative real economic growth for such fiscal year, or for each of any two consecutive quarters during such fiscal year.

(v) TREATMENT OF CERTAIN AMENDMENTS.—An amendment which adds to a concurrent resolution reported under clause (i) an instruction of the type referred to in such clause shall be in order during the consideration of such resolution if such amendment would be in order but for the fact that it would be held to be non-germane on the basis that the instruction constitutes new matter.

(vi) DEFINITION.—For purposes of clauses (i) and (ii), the term "day" shall mean any calendar day on which either House of the Congress is in session.

(B) PROCEDURES.—

(i) IN GENERAL.—Except as provided in subclause (ii), the provisions of sections 305 and 310 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget and conference reports thereon shall also apply to consideration of concurrent resolutions, and reconciliation bills and reconciliation resolutions reported under this paragraph and conference reports thereon.

(ii) LIMIT ON DEBATE.—Debate in the Senate on any concurrent resolution reported pursuant to subclause (i) of subparagraph (A), and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to 10 hours.

(iii) LIMITATION ON AMENDMENTS.—Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to reconciliation bills and reconciliation resolutions reported under this paragraph.

(iv) COMPLIANCE WITH INSTRUCTIONS.—Section 310 of the Congressional Budget Act of 1974 is amended by adding at the end thereof the following new subsection:

"(g) COMPLIANCE WITH RECONCILIATION DIRECTIONS.—Any committee of a House of the Congress that is directed, pursuant to a concurrent resolution on the budget to recommend changes of the type described in paragraphs (1) and (2) of subsection (a) with respect to laws within its jurisdiction, shall be deemed to have complied with such directions—

"(1) if—

"(A) the amount of the changes of the type described in paragraph (1) of such subsection recommended by such committee, and

"(B) the amount of the changes of the type described in paragraph (2) of such subsection recommended by such committee,

do not exceed or fall below the amount of the changes such committee was directed by such concurrent resolution to recommend under such paragraph by more than 20 percent of the total of the amounts of the changes such committee was directed to make under both such paragraphs; and

"(2) if the total amount of the changes recommended by such committee is not less than the total of the amounts of the changes such committee was directed to make under both such paragraphs.".

(4) DEFINITIONS.—For purposes of this subsection:

(A) The term "automatic spending increase" shall include all Federal programs indexed directly, whether appropriated or contained in current law. This shall not include increases in Government expenditures due to changes in program participation rates. Such term shall not include any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

(B) The term "budget outlays" has the meaning given to such term in section 3(1) of the Congressional Budget and Impoundment Control Act of 1974.

(C) The term "concurrent resolution on the budget" has the meaning given to such term in section 3(4) of the Congressional Budget and Impoundment Control Act of 1974.

(D) The term "deficit" has the meaning given to such term in section 3(6) of the Congressional Budget and Impoundment Control Act of 1974.

(E) The term "maximum deficit amount" has the meaning given to such term in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

(F) The term "real economic growth" means, with respect to a fiscal year, the nominal growth in the production of goods and services during such fiscal year, adjusted for inflation.

(G) The term "controllable expenditures" means total budget outlays for any account, or any program, project, or activity enumerated by annual appropriation Acts and by applicable committee reports, except those described in subparagraph (A) and except outlays for benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act, outlays due to increases in program participation rates, outlays for prior-year obligations, and outlays for interest on the public debt. Such term shall also include funds for existing contracts unless—

(i) penalty provisions in such contract would produce a net loss to the Government; or

(ii) reduction of the contract violates legal obligations of the Government.

(H) The term "sequester" means the permanent cancellation of budget authority, obligation limitations, other budgetary resources, or loan limitations, to the extent necessary to reduce each controllable expenditure by a uniform percentage.

(I) The term "other budgetary resources" means unobligated balances, reimbursements, receipts credited to an account, and recoveries of prior-year obligations.

(J) The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount. For purposes of the fiscal year beginning October 1, 1985, the preceding sentence shall be applied by substituting "7" for "5".

(e) BUDGETARY TREATMENT OF SOCIAL SECURITY TRUST FUNDS.—

(1) FISCAL YEARS 1986 THROUGH 1992.—

(A) IN GENERAL.—Section 710 of the Social Security Act (as added by paragraph (1) of subsection (a) of section 346 of the Social Security Amendments of 1983) is amended—

(i) by striking out all beginning with "the" the first place it appears down through "Disability Insurance Trust Fund, the" and inserting in lieu thereof "The";

(ii) by striking out "sections 1401, 3101, and 3111" and inserting in lieu thereof "1401(b), 3101(b), and 3111(b)";

(iii) by redesignating all after the section designation as subsection (b);

(iv) by inserting after the section designation the following:

"(a) The receipts and disbursements of the Federal Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund, and the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, shall not be included in the totals of the budget of the United States Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending (budget outlays) of the United States Government."; and

(v) by adding at the end thereof the following new subsection:

"(c) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, or for payments from any such Trust Fund to the general fund of the Treasury.".

(B) APPLICATION.—The amendments made by subparagraph (A) shall apply with respect to fiscal years beginning after September 30, 1985, and ending before October 1, 1992.

(2) FISCAL YEAR 1993 AND THEREAFTER.—Section 710(a) of the Social Security Act (42 U.S.C. 911 note), as amended by section 346(b) of the Social Security Amendments of 1983 (to be effective with respect to fiscal years beginning after September 30, 1992) is amended by—

(A) inserting "(1)" after the subsection designation; and

(B) adding at the end thereof the following new paragraph:

"(2) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to any Trust Fund specified in paragraph (1) or for payments from any such Trust Fund to the general fund of the Treasury.".

(f) BUDGET ACT WAIVERS.—Section 904 of the Congressional Budget Act is amended—

(1) by striking out subsection (b) and inserting in lieu thereof the following new subsection:

"(b) Except as provided in subsection (c), any provision of title III or IV may be waived or suspended in the Senate by a majority vote of the Members voting, a quorum being present, or by the unanimous consent of the Senate."; and

(2) by redesignating subsection (c) as subsection (d), and inserting after subsection (b) the following new subsection:

"(c) The provisions of section 305(b)(2) and section 306 of this Act may be waived or suspended in the Senate and the House of Representatives only by the affirmative vote of three-fifths of the members of that House duly chosen and sworn.".

(g) OTHER WAIVERS AND SUSPENSIONS.—The provisions of the Balanced Budget and Emergency Deficit Control Act of 1985 may be waived or suspended in the Senate and the House only by the affirmative vote of three-fifths of the members of that House duly chosen and sworn.

(h) SUPPLEMENTAL BUDGET ESTIMATES.—Section 1106 of title 31, United States Code, is amended by striking out "July 16" each place it appears and inserting in lieu thereof "September 16".

(i) POINT OF ORDER.—Notwithstanding any other provision of law, it shall not be in order in the Senate or House of Representatives to consider any reconciliation bill or reconciliation resolution reported pursuant to a concurrent resolution on the budget agreed to under section 301 or 304 of the Congressional Budget Act of 1974, or any amendment thereto, or conference report thereon that contains recommendations with respect to the Federal Old-Age Survivors Trust Fund or the Federal Disability Insurance Trust Fund, with respect to revenues attributable to the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, or with respect to the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

(j) APPLICATION.—

(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), this section and the amendments made by this section shall become effective on the date of the enactment of this section and shall apply with respect to fiscal years beginning after September 30, 1985, and before October 1, 1991.

(2) EXCEPTION.—The amendments made by subsections (b)(1), (b)(2)(A), (b)(3)(A), (b)(5)(A)(i), and (c) of this section shall apply with respect to fiscal years beginning after September 30, 1986, and before October 1, 1991.

(3) OASDI TRUST FUNDS.—The amendments made by subsection (e) shall apply as provided in such subsection.

(k) The provisions of this Act, other than those relating to the activities of the executive branch, are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

(l) SENSE OF THE SENATE.—It is the sense of the Senate that any funding reductions or sequestering of controllable expenditures implemented by the various Federal agencies as a result of this Act shall be made uniformly and shall not disproportionately be made in the funding of programs targeted for rural and lesser populated areas.

(m) REPORT REQUIRED.—The Directors of the Office of Management and Budget and the Congressional Budget Office, and the Secretary of the Treasury, shall jointly report to the President and to the Committee on Finance and the Committee on Ways and Means on the projected level of revenues which would be raised by increased and improved tax enforcement and collection through audits, examinations, and other methods designed to eliminate tax cheating and increase revenue collections from individuals and corporations evading Federal taxation. The report shall include an analysis of measures which can be implemented to increase voluntary compliance with tax laws, including increased staff for taxpayer assistance, speedier processing of returns, improved information processing and collection, and public education designed to increase public trust and understanding of the Internal Revenue Service enforcement efforts. The report shall also include an estimate of the level of increased expenditures for Internal Revenue Service enforcement and compliance efforts at which additional expenditures would not yield additional revenues of at least $2 of revenue for every $1 in expenditures. The report shall be issued on an annual basis no later than the date on which the President submits a proposed budget for each fiscal year to the Congress.

(n) TREATMENT OF CERTAIN COST-OF-LIVING ADJUSTMENTS.—During the time in which a sequester order is in effect, any cost of living adjustment for Social Security shall not count as income for purposes of determining Supplemental Security Income payments or payments from any other programs which are offset as a consequence of cost-of-living adjustments for Social Security.

(o) Section 1105(c) of title 31, United States Code, is amended—

(1) by striking out "The" the first place it appears and inserting in lieu thereof "(1) Notwithstanding any other provision of law, the";

(2) by inserting "(other than action that would require an increase in borrowing authority or an increase in the limit imposed by section 3101(b) of this title by more than the applicable amount for the fiscal year for which the budget is submitted)" after "action" the first place it appears; and

(3) by adding at the end thereof the following new paragraph:

"(2) For purposes of this subsection, the term 'applicable amount' means—

"(A) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and

"(E) with respect to the fiscal year beginning October 1, 1990, and each fiscal year thereafter, zero.".

(p)(1) In preparing any report required under subsection (d)(1) for a fiscal year, the Directors shall comply with this subsection.

(2) The Directors shall—

(A) examine—

(i) each contract with a total amount of budget authority in excess of $20,000,000 under which outlays will be made in such fiscal year to determine whether such contract includes provisions for adjusting outlays in such fiscal year under such contract as a result of inflation; and

(ii) any other Government activity which the Directors consider appropriate under which outlays in such fiscal year will be increased as a result of inflation; and

(B) assume, in determining the total amount of outlays which will be made in such fiscal year, that the adjustments for inflation made in contracts described in clause (i) of subparagraph (A) and activities described in clause (ii) of such subparagraph will be made on the best available estimate of inflation for such fiscal year.

(3) In the event that the Directors are unable to agree under paragraph (2) on an amount of outlays with respect to any particular contract or activity, the Directors shall use the average of the amounts proposed by each of them with respect to such contract or activity.

SEC. . Any contract entered into after a sequester order has been issued for the applicable fiscal year, by which the commodity credit corporation and entities providing Federal guarantees for student loans shall agree to make payments out of an entitlement account to any person, lender or guarantee entity shall be deemed to be controllable expenditures and shall be subject to reduction under the Presidential order, and any such contract shall explicitly provide for such reduction for the entire contractual period: *Provided*, That in regard to commodity loans made by the Commodity Credit Corporation to producers or producer cooperatives for a commodity produced in the same crop year, those loans for the same commodity shall be subject to the same terms and conditions.

Provided, That noncontract programs supported through the Commodity Credit Corporation shall be deemed to be controllable be expenditures and shall be subject to reduction in the same fashion as other programs under the Presidential Order.

Provided further, That the reduction in the level of commodity price support programs, supported through the Commodity Credit Corporation, shall not exceed a uniform percentage of reduction specified for those programs in the requester order.

At the end of the joint resolution add the following new section:

SEC. .

(a) The Senate finds that—

(1) the four men identified as the hijackers of the Achille Lauro were responsible for brutally murdering an innocent American citizen, Leon Klinghoffer and for terrorizing hundreds of innocent crew members and passengers for two days;

(2) the United States urges all countries to aid in the swift apprehension, prosecution and punishment of the terrorists; and

(3) the United States should not tolerate any country providing safe harbor or safe passage to the terrorists.

(b) It is the sense of the Senate that—

(1) the United States demands that no country provide safe harbor or safe passage to these terrorists;

(2) the United States expects full cooperation of all countries in the apprehension, prosecution and punishment of these terrorists; and

(3) the United States cannot condone the release of terrorists or the making of concessions to terrorists.

The United States identify those individuals responsible for the seizure of the Achille Lauro and the cold-blooded murder of Leon Klinghoffer, as well as those countries and groups that aid and abet such terrorist activities, and take the strongest measures to ensure that those responsible for this brutal act against an American citizen are brought to justice.

Mr. METZENBAUM. I thank the Senator.

Mr. EAGLETON. Will the Senator from New Mexico yield?

Mr. DOMENICI. I yield the floor.

Mr. EAGLETON. I have an amendment and I explained to the Senator from New Mexico what the amendment was. It was drafted in an earlier version. I ask unanimous consent, when the Domenici substitute is adopted, that my amendment be in order to his substitute.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. Reserving the right to object, I did not quite understand.

Mr. EAGLETON. My amendment that I just discussed briefly over here—we have all been waiting around here since 5 o'clock—was drafted to the Gramm-Rudman amendment. I am asking unanimous consent that my amendment just be in order to be offered to this Domenici substitute that we are about to adopt. I am not asking for the adoption of the amendment. I am asking that it be in order to offer it to the Domenici substitute, instead of redrafting it.

Mr. DOMENICI. I have no objecton. I understand this is difficult and the Senator does not want to have to redraft it. It will be in order, but it will apply to provisions as we adopt them, not the prior amendment. I have no objection.

Mr. EAGLETON. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, at about a quarter to 8, we were advised that it would be a few minutes and there would be no other amendments. It is now 25 after 8. I thought 8:30 would be a good time to go home. If there is not any further progress, I am going to ask unanimous consent that we have a period for routine morning business not to extend beyond the hour of 8:35.

Mr. CRANSTON. If the majority leader will yield, it will be a matter of a few minutes.

Mr. DOLE. I do not know what is happening over there.

Mr. CRANSTON. We know of no others.

Mr. DOLE. I was told there would be no others.

Mr. PACKWOOD. There will be another one.

Mr. BYRD. Does the Senator know there will be another one?

Mr. PACKWOOD. No, but we know there will be another one.

Mr. BYRD. The majority leader has to protect his side and I have to protect my side. I know of no other one.

Mr. PACKWOOD. But there will be another one.

Mr. BYRD. Mr. President, I know of no other one. The leader may go out until the morning if he wishes, but I did tell him that I know of no amendment.

We have contacted Senator MELCHER and he has no amendment.

Mr. DOMENICI. Why not get consent for no other amendments?

Mr. BYRD. The majority leader may go ahead and get consent that there be no more amendments after this one.

Mr. DOMENICI. It is a modification that I shall send to the desk. It is not Senator CRANSTON. If Senator EAGLETON has an amendment, let him go.

Mr. DOLE. Mr. President, I ask unanimous consent that following the disposition of the Domenici modification and an amendment by the distinguished Senator from Missouri [Mr. EAGLETON] there be no further amendments in order to the public debt limit extension.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the Domenici-Chiles amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 773

(Purpose: To adjust the provisions that would trigger automatic deficit reductions for the fiscal year 1986)

Mr. EAGLETON. Mr. President, I have an amendment at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Missouri [Mr. EAGLETON] proposes an amendment numbered 773.

Mr. EAGLETON. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end, add the following new subsection:

( )(1) Notwithstanding the second sentence of subsection (d)(1) of this section, the Directors shall jointly report to the President and the Congress the matters described in such subsection on October 1, February 15, and May 1 of each fiscal year, except that with respect to fiscal year 1986, the Directors shall jointly report to the President and the Congress the matters described in such subsection on November 1, February 15, and May 1 of such fiscal year.

(2) Notwithstanding any other provision of this section or of the amendments made by this section, the term "maximum deficit amount" shall mean, with respect to the fiscal year beginning October 1, 1985, $175,000,000,000.

(3) Notwithstanding the second sentence of subsection (d)(1)(H) of this section, the amount by which the deficit for the fiscal year beginning October 1, 1985, exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount.

Mr. EAGLETON. Mr. President, I ask unanimous consent that Senators EXON and KERRY be added as cosponsors of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Let me describe this amendment, Mr. President. I shall be very brief.

Mr. President, this amendment is what a football coach might call a gut check. It is in the same spirit as the Kerry-Exon amendment offered yesterday and, frankly, I expect the vote on this amendment will go much along the same lines. The purpose of this amendment, however, is important and I believe it is worth the time of this body to reemphasize. This amendment simply says that rather than waiting until after next year's elections to do something about this administration's disastrous budget deficits, we are going to summon up the courage to do something right now.

If the Gramm-Rudman amendment is the all-purpose answer to the deficit problem that it is advertised to be, then what are we waiting for? Our Nation's deficit for this year is estimated to be at least $192 billion. The fiscal year is a mere 10 days old. Surely it isn't too late to do something about 1986 if we are truly serious about this problem. It is time to stand up and be counted, to use that old cliche. Let's let the American people judge for themselves whether this is a genuine effort to deal with the problem or simply an election ploy designed to fool them and carry us past the 1986 elections.

Mr. President, this amendment does two things. First, it adds to the reporting period in the bill the additional reporting dates of February 15 and May 1.

Second, it returns to the essence of the original Gramm-Rudman amendment by adopting an allowable deficit figure for fiscal year 1986 of $175 billion plus a margin for statistical significance of 5 percent. The $175 billion figure is the CBO reestimate of the cost of all the items included in fiscal year 1986 budget resolution.

Only a few weeks ago, Congress adopted a budget resolution which set a maximum allowable deficit of $172 billion. What possible justification can there be for now increasing that allowable deficit figure to $130 billion with a 7 percent safety margin, meaning

that it could go as high as $192 billion? That's what Gramm-Rudman does. Gramm-Rudman-Hollings is an amendment touted by its sponsors as a tough new approach to our deficit problems. But in fact Gramm-Rudman means we will have more, not less, deficit spending this year to get us past the 1986 elections.

Only after those elections will the American people discover that Gramm-Rudman-Hollings really means more of the tired old supply-side policies we have seen for 5 years—tax cuts for the rich and budget cuts for the poor.

Mr. PACKWOOD addressed the Chair.

Mr. EAGLETON. Mr. President, I offer no illusions——

The PRESIDING OFFICER. The Senator from Missouri will suspend for just a few moments.

Mr. PACKWOOD. Mr. President, I ask to vitiate the cloture vote on both motions.

The PRESIDING OFFICER. Is the Senator asking unanimous consent?

Mr. PACKWOOD. Unanimous consent to vitiate the cloture vote on both motions.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Missouri.

Mr. EAGLETON. Mr. President, I offer no illusions that an amendment which would have the effect of forcing the Congress to live up to the brave words of Gramm-Rudman has much hope of passing in an election year. But I think it is worth letting the American people know by our votes just exactly what kind of game is being played here.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HOLLINGS. Mr. President, I will be brief and get right to the point

The game is one of realism, and we have had a difficult time being realistic. I have to say we have had some very interesting votes with respect to Social Security. Everyone knows that I have advocated an across-the-board freeze, a shared sacrifice for all. I did not offer it today because I am trying to keep TIP O'NEILL in the game. I want to try to keep Ronald Reagan in the game, and therefore I voted against the Bradley amendment which called for a 5-percent cut in defense.

If you cut defense, then the President does not sign it. If you put Social Security back on the table, then TIP O'NEILL opposes it.

I say to the Senator from Missouri, we did not establish these particular levels, which 75 percent of the Senate approved, just to get through fiscal year 1986. Senator EAGLETON is correct, nothing traumatic will happen during the months of October, November, and December, but in January 1986, when we begin to prepare the budget for fiscal year 1987, one heck of a lot is going to happen. Specifically, the President of the United States will have Mr. Miller, Director of OMB, prepare the fiscal year 1987 budget as early as October of this year.

They are very fearful. They have approached us, and this Senator would not change his mind with respect to the 3-percent real growth guaranteed in the defense budget for the next fiscal year. Thus you start out with a $25 billion increase in defense for fiscal year 1987. You have another $15 billion to $20 billion in COLA increases. You have another $30 billion which cannot be avoided because of interest costs. You have an additional $15 billion in there for rising health costs. That is a total of $90 billion of increases for fiscal year 1987.

So if you were the President, I say to the Senator from Missouri, you would be sitting there this fall trying to draw up a budget knowing that you have some $85 billion to $90 billion in increases. You look at what we are passing here this evening, and you find you have got to drop that deficit from $195 billion down to $144 billion for the next fiscal year. You have got to submit that in January. Some very difficult choices will have to be made.

The distinguished Senator from New Mexico is telling me to wind it up. I just wanted to say that we are not playing games. We will have some very difficult decisions to make in 1986. I hope we do not pass this amendment. Let us stay realistic in this game.

Mr. PACKARD. Mr. President, this really is a killer amendment. Here we have a bill before us drawn by the fiscal wastrels Gramm-Rudman-Hollings who say the deficit we can expect next year is $180 billion and 7-percent fluctuation because we drafted a budget based upon funny money this year. We have the Senator from Georgia worrying if we had an amendment in existence we would have had to cut $13 billion out of the military this year, starting at the first of the fiscal year. Now we have an amendment coming in and saying $180 billion is too much, let us go for $175 billion and 5 percent, when every one of us know we will have a very difficult time meeting $180 billion at 7-percent fluctuation. This amendment will kill this process aborning. I move to lay it on the table, and I ask for the yeas and nays.

Mr. NUNN. Will the Senator yield for a 10-second observation? My example was to fiscal year 1985.

Mr. PACKWOOD. It will even be worse next year.

Mr. NUNN. Probably.

Mr. PACKWOOD. I move to lay on the table and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon.

The Clerk will call the roll.

Mr. SIMPSON. I announce that the Senator from Mississippi [Mr. COCHRAN], the Senator from Minnesota [Mr. DURENBERGER], the Senator from North Carolina [Mr. EAST], the Senator from Oregon [Mr. HATFIELD], the Senator from Idaho [Mr. MCCLURE] and the Senator from Kentucky [Mr. MCCONNELL] are necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS], is absent on official business.

I further announce that, if present and voting, the Senator from Minnesota [Mr. DURENBERGER] would vote "yea."

Mr. CRANSTON. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from Ohio [Mr. METZENBAUM], the Senator from Rhode Island [Mr. PELL] and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island [Mr. PELL] would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 46, nays 43, as follows:

[Rollcall Vote No. 221 Leg.]

YEAS—46

Abdnor	Gramm	Pressler
Andrews	Grassley	Quayle
Armstrong	Hatch	Roth
Boschwitz	Hawkins	Rudman
Bradley	Hecht	Simpson
Chafee	Heinz	Specter
Cohen	Helms	Stafford
D'Amato	Hollings	Stevens
Danforth	Humphrey	Symms
Denton	Kassebaum	Thurmond
Dole	Laxalt	Trible
Domenici	Long	Wallop
Evans	Lugar	Warner
Garn	Mattingly	Wilson
Goldwater	Murkowski	
Gorton	Packwood	

NAYS—43

Baucus	Glenn	Mitchell
Biden	Gore	Moynihan
Bingaman	Harkin	Nickles
Boren	Hart	Nunn
Bumpers	Heflin	Proxmire
Burdick	Inouye	Pryor
Byrd	Johnston	Riegle
Chiles	Kasten	Rockefeller
Cranston	Kennedy	Sarbanes
DeConcini	Kerry	Sasser
Dixon	Lautenberg	Simon
Dodd	Leahy	Weicker
Eagleton	Levin	Zorinsky
Exon	Matsunaga	
Ford	Melcher	

NOT VOTING—11

Bentsen	Hatfield	Metzenbaum
Cochran	Mathias	Pell
Durenberger	McClure	Stennis
East	McConnell	

So the motion to table was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LONG. Mr. President, there are some tables that appear in the committee report which in my judgment should be a part of the RECORD. They show how the Nation came to have such a large debt and how it relates to other relevant economic factors.

I ask unanimous consent that these tables, tables III-A through III-F, be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE III-A—ESTIMATED NET GOVERNMENT AND PRIVATE DEBT BY MAJOR CATEGORIES

Year	Private [1]			State and local	Federal [2]	Total net debt	Percent Federal of total
	Corporate	Other	Total				
1929	88.9	72.9	161.8	13.6	16.5	191.9	8.6
1930	89.3	71.8	161.1	14.7	16.5	192.3	8.6
1931	83.5	64.9	148.4	16.0	18.5	182.9	10.1
1932	80.0	57.1	137.1	16.6	21.3	175.0	12.2
1933	76.9	51.0	127.9	16.3	24.3	168.5	14.4
1934	75.5	49.8	125.3	15.9	30.4	171.6	17.7
1935	74.8	49.7	124.5	16.1	34.4	175.0	19.7
1936	76.1	50.6	126.7	16.2	37.7	180.6	20.9
1937	75.8	51.1	126.9	16.1	39.2	182.2	21.5
1938	73.3	50.0	123.3	16.1	40.5	179.9	22.5
1939	73.5	50.8	124.3	16.4	42.6	183.3	23.2
1940	75.6	53.0	128.6	16.4	44.8	189.8	23.6

Footnotes to tables III-A—F:

[1] Data for years 1929–1945 from the Bureau of Economic Analysis, Commerce Department. Data for years 1946 to the present from the Federal Reserve Board Flow of Funds.

[2] Net Federal debt equals gross Federal debt less Federal debt held in U.S. Government accounts.

[3] Per capita debt is calculated by dividing the debt figures by the population of the conterminous U.S. as of December 31 of each year. Beginning 1949, population includes armed forces overseas, Hawaii and Alaska.

[4] Derived by adjusting per capita debt figures for changes in the level of prices, as measured by the Consumer Price Index for all items.

[5] Gross Federal debt is equal to public debt issued by the Treasury plus debt issued by other Federal agencies.

[6] Federal debt held by the public less Federal Reserve holdings of Federal debt.

[7] Measured by the Consumer Price Index for all items, year to year basis.

Note: Detail may not add to totals because of rounding.

Sources: Federal debt, Treasury Department; other data, Bureau of Economic Analysis, Commerce Department, and Federal Reserve Board (Flow of Funds).

Mr. DOMENICI. Mr. President, pursuant to the agreement we have reached, I send a modification to my amendment to the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The modification will be stated.

Mr. DOMENICI. I send the modification to the desk.

The modification is as follows:

Each controllable expenditure by a uniform percentage. *Provided:* That any periodic payments to individuals or families which are in the nature of income support, supplementation, or assistance including payments made pursuant to section 32 of the Internal Revenue Code of 1954 as amended or pursuant to chapter 11 or 13 of title 38, United States Code and which are paid to such individuals or families directly by the United States (or by a person or entity acting as an agent of the United States) shall not be reduced pursuant to this subclause to a level which is lower than the level that would be payable in the absence of this subclause, but in the case of compensation, pursuant to chapter 11 or 13 of title 38, United States Code, a cost-of-living adjustment enacted into law to become effective in the fiscal year that is the first fiscal year to which the order described in this clause applies shall be treated as an automatically indexed program for purposes of subclause (i) of this clause; and shall transmit to both Houses of the Congress a message—

(III) identifying—

(aa) the total amount and the percentage by which automatic spending increases are to be reduced under subclause (I) of this clause;

(bb) the total amount of budget

The PRESIDING OFFICER. The amendment is so modified.

Mr. DOMENICI. I thank the Chair.

VA SERVICE-CONNECTED DISABILITY COMPENSATION COLA'S

Mr. CRANSTON. Mr. President, the fact that it took a great deal of work, at this last moment, to clarify what is in this measure affecting our Nation's veterans is final proof of something I and others have been stressing throughout the consideration of the debt ceiling and the so-called Gramm amendment: We are rushing a measure of vast significance and complexity through the Senate without full knowledge of what we are doing. That lack of full understanding seems to apply not just to a few Senators but to all Senators—including those offering the Gramm proposal and those managing his legislation.

The dialog earlier today between sponsors of the Gramm proposal, on the one hand, and the Senator from New Jersey [Mr. BRADLEY] with regard to Medicaid and AFDC and the Senator from New York [Mr. MOYNIHAN] with regard to the Commodity Credit Corporation, on the other hand, has already supplied abundant proof of that point.

A while ago, we had a colloquy on the subject of veterans' disability compensation, and at that time it was my understanding and that of the distinguished Senator from Florida [Mr. CHILES], that veterans' disability COLA's were protected precisely as Social Security COLA's are protected. The distinguished Senator from New Mexico [Mr. DOMENICI] thought otherwise. That confusion has now been cleared up—unfortunately—by the modification just now offered by the Senator from New Mexico. I use the term "unfortunately" because the consequence of that modification, as prepared under the direction of the Senator from Texas [Mr. GRAMM], denies protection to veterans' COLA's.

As many, if not all, of my colleagues are aware, I had planned to propose an amendment to provide that Veterans' Administration compensation paid to service-connected disabled veterans and to the survivors of those who die from service-connected causes would be exempt from any Presidential order making cuts in COLA's and otherwise reducing Federal programs. I strongly believe that it is grossly inequitable and totally unjustifiable to permit VA compensation COLA's to be reduced or eliminated when full Social Security retirement and disability COLA's are granted.

I wish to emphasize that I strongly supported the initiative, now reflected in the Gramm-Rudman proposal as adopted yesterday, to exempt cost-of-living adjustments in Social Security benefits from any Presidential cost-cutting order. This exemption covers both old age and disability benefits. However, I am extremely disappointed that the benefits paid to this Nation's highest priority category of veterans—those who suffer from service-connected disabilities—and the survivors of those who have died from service-connected causes would not be similarly protected, as those benefits would have been, as well as would VA pension payments, under the Chiles-Byrd plan, which I cosponsored and which the Republican majority of this Senate rejected yesterday, from the scope of any Presidential spending reduction or sequestering order.

Mr. President, the basic amount of such a service-connected disabled veteran's monthly compensation payment is based on the average impairment of earnings resulting from that veteran's disability. Since in almost every year that average earnings impairment will increase by inflation over the prior year, denial of a compensation COLA would be inconsistent with the philosophical underpinnings of that program.

I'd like to quote President Reagan on this subject of cost-of-living increases for the VA Service-Connected Disability Compensation Program. In August 1980, in a campaign speech at the Veterans of Foreign Wars' convention in Chicago, he stated his view that it would be a "breach of faith" for compensation for those with "service-connected disabilities * * *."

As Members may know, President Reagan and I don't see eye-to-eye on a great many issues. In this case, however, he and I were in total agreement—at least when he was a candidate for the Presidency. Since that time he has backed off from that commitment by twice supporting budget proposals—rejected by the Congress—that would not provide full COLA's to service-connected disabled veterans.

To me it is outrageous to subject the more than 2.2 million veterans who have service-connected disabilities—injuries and illnesses sustained in service to our country—to the extraordinary Gramm-Rudman authority that could result in the denial or reduction of totally justifiable and totally necessary cost-of-living increases in VA compensation rates.

These individuals—as well as the more than 330,000 survivors of veterans who died while on active duty or as the result of service-connected causes—have already made sacrifices for this country and, in many cases, have made extreme sacrifices. They should not—in any scenario—be asked to make additional ones that entail such inequity.

Mr. President, to appreciate the potential inequity for VA compensation recipients under the Gramm-Rudman proposal as now proposed to be clarified, we need to examine what its effect would be when compared to other Federal payments recipients in a directly parallel, high priority—but certainly no higher priority—program.

Let's examine the case of a totally disabled, spinal-cord-injured individual, a nonveteran, who is covered by Social Security and is receiving Social Security disability insurance—SSDI. In a Gramm-Rudman covered year when inflation runs at 5 percent, this individual's benefits would be increased by 5 percent by a December cost-of-living adjustment. The Congress has assured this individual of a full COLA, and Gramm-Rudman has confirmed that assurance. That's as it should be.

Now, compare that disabled person's situation with that of his equally disabled neighbor, a paralyzed Vietnam veteran struck down on the battlefield and whose spinal cord was equally severed and who accordingly receives VA disability compensation for his total and permanent disability. This veteran's COLA—which traditionally has been provided by the Congress in the same percentage amount as increases in Social Security—would be subject to reduction and, possibly, even complete elimination.

Mr. President, both of these individuals, now condemned to life in a wheelchair, have paid for their benefits, one with monetary contributions—that is, Social Security payroll taxes—the other with the loss of the use of his legs and other bodily functions in service to his country. They are both truly entitled to these benefits.

But is one more deserving than the other? If so, is it the SSDI recipient? I think not.

Yet, the Gramm-Rudman proposal, which is deficient in many ways but especially in this respect, would place us in jeopardy of a President having to say to the veteran—even after the Congress has approved a full COLA in his compensation: "Sorry. Even though your neighbor is receiving a full COLA this year, Congress has required me to cut yours and to reduce your benefits."

How can that result possibly be explained?

I don't believe it can be.

Nevertheless, Mr. President, when I expressed my intention to offer an amendment to exempt VA compensation from these extraordinary Presidential orders, I was confronted with enormous dissatisfaction on the part of Senators on the other side of the aisle, including the leaders of the majority. It was clear that if I persisted in my plan to offer my amendment, efforts underway to keep the Government in business and to meet its obligations might well collapse. I therefore agreed not to offer the amendment on the condition that the distinguished Senator from Colorado [Mr. ARMSTRONG], who was also considering offering amendments, did not offer his. His, in my view and the view of many on our side of the aisle, would have established very poor public policy. One of the Senator from Colorado's amendments would have given the President greatly enhanced powers to rescind appropriations made by the Congress. In this regard, thinking back on the incumbent President's record with respect to the VA health care system, I was very reluctant to do anything to risk giving this President great new discretionary power to cut appropriations for VA health care programs. The other amendment the Senator from Colorado was considering, also very unwise in my view, related to Davis-Bacon. As it turned out, the Senator from Colorado did not offer an amendment and so, pursuant to our agreement, I did not offer mine.

In March 1981, President Reagan proposed cutting President Carter's fiscal year 1982 VA medical care appropriations request by $330 million, thus proposing to reduce the VA health-care staffing level by 5,181 full-time-employee equivalents—FTEE's—to close 1,800 VA hospital beds, to fund 2 million fewer outpatient visits, and to terminate the Vietnam-era veterans readjustment counseling program, often referred to as the Vet Center Program. Congress totally rejected the President's recommendations to cut VA health care.

Again, in May 1982, President Reagan supported severe cuts in VA health care when he entered into a budget agreement with the Senate Budget Committee majority and included a proposal to "freeze" fiscal year 1983 appropriations for VA health care system accounts—including medical facility construction—that would have produced total reductions of $568 million from the original appropriations requests for these accounts. Congress rejected the vast bulk of those cuts and actually increased the original request for the medical care account.

Clearly, it would be very risky—from the standpoint of the maintenance of a nationwide system of high-quality VA medical facilities—to entrust to this President substantial, discretionary powers to take from the VA health care system funds that Congress has appropriated to it.

A further reason for my withholding the amendment to exempt VA compensation was my great confidence that the House of Representatives would adamantly reject any proposal to subject compensation to a Presidential order making cuts in Federal programs. I have communicated on this issue with my very good friend, the chairman of the Veterans' Affairs Committee in the House, Mr. MONTGOMERY. He has announced his strong opposition to the inclusion of compensation within any COLA reduction order. He is a great and persuasive champion of veterans' programs in general and the compensation program in particular, and I am confident that his views on this issue and those of many others of a similar mind in the House will finally prevail.

Mr. DOMENICI. Mr. President, in response to the comments from the Senator from California [Mr. CRANSTON], I must remind the Senate that the modification I inserted in my amendments was agreed to by the Senator from California.

I modified my amendment to clarify the treatment of veterans' compensation under this new procedure of suspension of COLA's and sequestering of controllable spending. This modification is consistent, I understand, with an understanding between the Senator from California and the Senator from Texas, [Mr. GRAMM] made on the floor of the Senate.

Mr. HATFIELD. Mr. President, I would like to engage the chairman of the Budget Committee in a colloquy in order to clarify certain provisions of his modification. On page 26, lines 8 to 10 of the proposed modification, the proposal reads that the message of the President in regard to the sequestering of funds "shall be referred to all committees with jurisdiction over programs, projects, or activities affected by it." Then again, on page 31, lines 8-

11, the proposal reads that any alternative to the sequestering that may be proposed by the President "shall be referred to all committees with jurisdiction over programs, projects, or activities affected by it." On the face of it, it would appear that both of these messages, to the extent that they would involve the sequestering, impoundment, rescission, deferral, withholding, or whatever, of appropriated funds, would be referred to the Appropriations Committee.

Mr. DOMENICI. The Senator is correct.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment (No. 771), as modified, was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PACKWOOD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the joint resolution.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution (H.J. Res. 372) was read the third time.

Mr. LONG. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

INCREASING THE NATIONAL DEBT—AN AMERICAN TRAGEDY

Mr. DECONCINI. Mr. President, when I first came to the Senate 8½ years ago, the ceiling on the national debt was $682 billion. When Jimmy Carter left office 4 years later the ceiling had been increased by $197 billion to $879 billion. A little over 2 years into the Reagan administration Congress was forced to raise the ceiling above the $1 trillion mark. By last October the debt ceiling had jumped to over $1.8 trillion, more than double the debt incurred by all of our earlier Presidents combined. And today Mr. President, Ronald Reagan is asking us to increase the debt ceiling to in excess of $2 trillion.

Two trillion dollars. That is an incredible figure. While Congress is notorious for bandying about large figures, this is one that even causes us to take pause. Consider the fact that the entire budget for the United States for fiscal year 1985 is $953.9 billion, a figure that begins to look small when compared with a $2 trillion debt. And of this year's $950 billion plus budget, $214 billion is deficit—in other words almost one-quarter of this country's spending was borrowed. An even scarier figure is the $130,426,000,000 it cost the Federal Government to service the debt in 1985. That means that one-seventh of the Federal budget is going to pay interest on the debt. Meanwhile we continue to incur debt at the rate of $407,154 every minute of every day of the year. Anyone who has ever kept a household budget will tell you that we are digging ourselves a hole that would be difficult to climb out of in the best of circumstances. But these are not the best of circumstances—next year the deficit is projected to be $214 billion—and the hole keeps getting deeper. If we, as a nation, decided to all pitch in and pay off the debt, it would cost $7,599 dollars for every man, woman, and child in this country. Alarming does not adequately sum up the impact of these numbers.

We must face up to these problems. Congress and the President must take actions now to see that this will not continue. There are a number of steps that can and must be taken. First, I believe we must pass a constitutional amendment requiring a balanced budget. I have long been an advocate of this measure. While this approach has been accused of being simplistic in some quarters, it would force us to grapple with the budget deficit problems. Until we are successful in passing a constitutional amendment, there are other alternatives which can drastically reduce the deficit.

First, the President can and should submit a balanced budget to the Congress. There is a great misperception in this land that the problem of rising deficits is the fault of the Congress or some faceless bureaucrats in Washington. The House of Representatives passed H.R. 6300 last year requiring the President to send a balanced budget to Congress, yet the President has never done so. If he sent us a balanced budget that would put a great deal of pressure on Congress. But when the President sends us a budget with $200 billion plus deficits, it is difficult for Congress to exert the self-restraint that has deserted the President.

Second, once the President sends us a balanced budget we must have the courage to pass such a budget. And for that we need the support of the American people. While every American wants deficit reduction, very few have been willing to take the cuts in their own backyard.

Finally, Mr. President, once we have a balanced budget we need to start making payments on the national debt. I, for one, do not wish to leave this debt to my children.

I will vote against today's proposed increase in the national debt, not because I want our country to go bankrupt, but because it is the only way I know to express my frustration with a budget out of control. Congress and the President need to work together. Otherwise, I fear that we will soon be faced with not just a $2-trillion deficit but with a $1-quadrillion deficit.

Mr. President, I think it is a huge mistake for us to go on record here increasing this debt to over $2 trillion. Make no mistake about it, the American people are going to pay for it, and pay for it dearly.

Mrs. KASSEBAUM. Mr. President, I was among the 24 Senators who opposed the Gramm-Rudman-Hollings amendment approved yesterday. I want to explain briefly my reasons for opposing the amendment, as I have strongly held views about it.

At the outset, I want to compliment the authors of the amendment both for their efforts and for the ingenious conceptual framework they developed to move forward with deficit reduction. They started out with a good, solid proposal which I initially supported.

As originally drafted, it provided a framework for reducing deficits in a systematic fashion that seemed both effective and equitable. The amendment mandated reductions in an across-the-board fashion. While I had serious doubts that Congress, as an institution, would truly enforce the austerity required by this initiative, I felt it was worth a try; $200 billion deficits demanded action.

Unfortunately, the proposal quickly began accumulating amendments, modifications, and related political paraphernalia. As soon as the amendment was unveiled, the unraveling process began.

And, in the unraveling, familiar patterns began to emerge—the same patterns, in fact, which have rendered ineffective our past efforts to deal with deficits.

First, all spending for Social Security was exempted completely from any fiscal discipline mandated by the amendment. Over $200 billion in Federal spending—one-fifth of the budget—was deemed off limits.

Next, Mr. President, we began to focus on spending for national defense. We discovered that, due to anomalies of law, most of the money going to defense contractors was exempt. Multiyear procurement contracts are held harmless from the pain of deficit reduction. Between $90 billion and $110 billion of the defense budget is now off limits.

The problems with defense don't stop there. The President, who supports this amendment, has made clear that he still will request 3-percent annual real growth in defense spending. Defense, according to the President, must be held harmless against this amendment.

When you add in current spending for entitlement programs and interest on the national debt, you have about $746 billion of this year's $975 billion budget exempt from the amendment.

All of these exemptions raise serious questions about the fairness of this approach. Rather than cutting across the board, touching all parts of the budget, this plan now focuses budget cuts in a relatively small part of the budget. For example, while the plan would allow cost-of-living adjustments for Social Security, it would virtually eliminate such increases in other programs for veterans, the elderly, the poor, disabled and blind. While the plan would protect spending for major weapons in the defense budget, it could prevent pay raises or force actual pay cuts for military personnel. The plan also could require a prolonged freeze on Medicare payments with potentially severe results on the quality of health care for the elderly.

Mr. President, I believe these kind of selective budget cuts would be palpably unfair. They would be viewed by the American people as unfair. Therefore, if history is any guide, these cuts simply will not be made. It is clear to me that we are not going to enforce the provisions of the plan the Senate has just adopted. We most certainly will not do so in 1986, which is an election year.

In short, I believe the Gramm-Rudman-Hollings amendment will not—and cannot—do what it is advertised as doing. It cannot do so because we have demonstrated in the way we have crafted it that we are not willing to face the tough decisions involved in any serious attempt to control Federal deficits.

Over the past few days, we have made it very clear that we are not going to deal with entitlement programs—particularly Social Security. We are not going to deal with defense spending and we are unwilling to look seriously at tax increases. If we do none of these things, we cannot genuinely address our huge deficits.

That leaves us with a deficit reduction plan that poses a severe dilemma. It will either be ineffective, because we will refuse to enforce it, or it will be unfair because we choose to let it stand. I hope I am wrong about this. I would like to believe that this plan could produce real progress toward a responsible budget, as I believe its authors intended at the start.

Unfortunately, good intentions do not always produce real and good results. They also cannot produce a responsible Federal budget, unless a majority of us are willing to turn intentions into action. Mr. President, I will certainly direct my best efforts to assisting with the intent of this legislation in order and achieve a balanced budget.

Mr. BUMPERS. Mr. President, the greatest virtue of the Gramm-Rudman-Hollings amendment is that it may have forced the Senate to face up to the mammoth Federal debt and the need to take drastic action to control it.

After our extended and wrenching debate on the budget resolution this spring, I was fearful that the Senate would not have the political stomach to return to the issue of the deficits for some time. Every day we delay in dealing with these deficits, the problem is getting further out-of-control, as we accumulate additional debt, borrow to pay interest costs to finance the debt, and suffer compounding of these interest costs.

The damage these deficits are doing to the U.S. economy and to the international financial system will be with us for many years, even decades to come.

I only fear we already have waited much too long to take decisive action to control the deficits. If we suffer another recession before these deficits are substantially reduced, we will see them double in size and we will have no flexibility in fiscal policy to deal with the recession. We may yet face a downward spiral on the debt and deficits that will rival the crisis posed by the Depression.

I am less sure about the specific approach taken by this amendment to deal with the deficit crisis.

Setting ambitious deficit-reduction targets may be the only way we can force Congress and the President to face up to the issue. However, the public does not fully understand how much pain will be involved in implementing this amendment. The public has been told that we can grow our way out of these deficits; that we can control the deficit by cutting waste and fraud in Government programs; or that we can cut taxes and increase defense spending at the same time. These statements are myths that will be exploded when this amendment is implemented. I am hopeful our political institutions—the Congress and the President—can handle the extreme pressures which we will feel when the real crunch on reducing these deficits hits us. If anyone here thinks that lobbying and public pressure on this legislation is strong, wait till we feel the pressure when we actually implement it.

The Congress and the President have not adequately considered what such huge cuts in spending will mean to our national defense, to farm programs, to the social safety net, and to long-term investments in research and development. When we focus on cutting spending, I hope we will not lose our sense of priorities and will continue to make the investments in our future.

And I'm not sure we adequately understand what the macroeconomic effect will be of these drastic changes in Government fiscal policy, particularly if the current economic cycle turns down and we enter a recession. There may well be a point in this deficit-reduction process where we will face the impossible choice of continuing the deficit-reduction effort or bailing out the economy from a disastrous downward spiral. Indeed, a drastic reduction in Government fiscal stimulus may well retard economic growth.

I am concerned about Congress abdicating its legislative authority to the President. Under this amendment, Congress may well have an incentive to avoid making the tough choices itself and bucking the problem to the President to make all the tough decisions. The President might even have an incentive to cooperate less with the Congress in making drastic cuts, prefering instead to enlarge the amount of spending that is subject to his deficit-reduction order.

Finally, it is unfortunate that the sponsors of this plan want to postpone any sacrifices until after the 1986 election. We failed to take action in 1983 because of the 1984 election and now we're doing the same thing in 1985.

But, I will vote for this Gramm-Rudman-Hollings amendment. I preferred the Chiles-Byrd alternative. It is better drafted and avoids many of the ambiguities in the Gramm-Rudman-Hollings approach. It is quite clear, however, that the Chiles-Byrd proposal will not prevail here. The issue then is whether we support the basic concepts of the Gramm-Rudman-Hollings proposal and I do.

I will vote for the Gramm-Rudman-Hollings amendment because the consequences of running these continued record deficits clearly are worse than not acting here to deal with them.

This amendment does impose drastic medicine. But maybe, when the amendment is implemented, the public will better understand the mistakes we have made in fiscal policy during the past 4½ years.

It was a drastic mistake to cut taxes and increase defense spending so greatly at the same time.

It was a drastic mistake to fail to correct this mistake in 1983 when we had adequate economic growth to do so.

It was a drastic mistake to tell the American people that the deficits posed no threat.

It was a drastic mistake to say that these deficits have nothing to do with our mammoth trade deficits.

In my opinion, we face both spending cuts and revenue increases, and I believe the people will accept both as long as any new taxes are used exclusively to reduce the deficits.

Perhaps the public will now begin to understand what the budget deficit means for our trade deficit and the value of the dollar.

Perhaps the President will begin to provide more evenhanded leadership on economic policy.

Perhaps the President will finally submit a balanced budget instead of talking only about constitutional amendments and line-item vetoes. The most important part of this amendment is that it requires the President to submit a budget that meets target reductions of the deficit.

Perhaps some of the interest groups in our society will see the need to come together to make sacrifices for the common good. Perhaps both business and labor groups will argue that the deficits pose a common threat.

Finally, perhaps Congress will see that the only way to avoid giving the President the authority to order across-the-board cuts is for the Congress to have the courage to set its own priorities in the deficit-reduction effort.

The action of the Senate is not the last step in the legislative process. The debate we have had in the Senate has helped to focus the issues. We have made progress in cleaning up the drafting and ambiguities in this proposal. I am hopeful that the other body can continue this refining process and that the final bill will be much improved.

THE IMPLICATIONS OF SENATE ACTION ON THE GRAMM-RUDMAN AMENDMENT

Mr. MOYNIHAN. Mr. President, October 9 was an eventful day in the history of American politics.

A majority of Democrats agreed to dismantle the domestic policies of Franklin D. Roosevelt, in return for a majority of Republicans agreeing to dismantle the defense policies of Ronald Reagan.

We have seen the triumph of reaction at home and isolation abroad.

At some level I suppose it would be comforting to feel that we have not known what we have been doing. But that would not say much for us, would it? The fact is that we have known perfectly well.

Let me cite some conversations with other Senators on the floor yesterday.

Democratic sponsor to MOYNIHAN:

Well, this wrecks the President for good and all. Next January he will have to send us a budget that provides an additional $25 billion for defense if he is to maintain the 3 percent growth rate, $30 billion more in interest, $20 billion more for cost-of-living adjustments, and $15 billion more in health. That's an extra $90 billion on top of a near $200 billion deficit. He can't do it.

MOYNIHAN to Republican budget expert:

When this is all over, do you think we might get a flow chart or something to show us what we have decided?

No.

No?

Well, not from me. I don't understand the * * * thing.

MOYNIHAN to a Republican leader:

Well, we have just voted to abolish the Defense Department.

Right; Cap Weinberger is trying to get into the White House but they won't let him in.

Democratic defense expert to MOYNIHAN:

This means 5 years of zero growth in the Defense budget—that is, if we are lucky and don't have a recession. Wait til the military retirees find they have to go 5 years without a COLA. On the other hand this puts the President's defense policy on a direct collision course with his tax policy.

Following this latter exchange, I spoke with Senator HART. I said, "My Lord, on both left and right they have decided to create a crisis. This is just what the right did in 1981: slashing revenues to create a budget crisis that was meant to shrink the size of Government. The problem was the radical inconsistency at the heart of Mr. Reagan's program: to shrink one half of Government, the domestic policy half, whilst expanding the other half, that of defense which is an aspect of foreign policy. Don't they know how dangerous it is to create crises? Don't they see that they are creating this crisis? Don't they know that life brings all the crises you will ever need, and more?"

Senator HART replied, in effect, "No; they don't know. But more importantly, they don't care. The one group does not care about domestic stability; the other does not care about international stability. We will have to govern somehow, but it will henceforth be massively more difficult."

What is so painful is the realization that huge damage is inevitable.

Within years—months, almost—the United States will be the world's largest debtor with a flat or declining defense budget. The effect of this will be to abort the buildup in our forces which began in 1975 and acquired a sustained momentum under President Carter.

The Little League has won.

Little government at home, little influence abroad.

Mr. DECONCINI. Mr. President, the Senate has spoken firmly and clearly on both the Gramm-Rudman-Hollings and the Chiles-Byrd-Johnston balanced budget amendments. I voted for both proposals and would like to take this opportunity to give my perspectives on the good news and the bad news of what the Senate has done today.

Mr. President, the objective of both balanced budget proposals is identical to that of the junior Senator from Arizona. I have been one of the earliest and strongest sponsors of a constitutional amendment mandating a balanced budget and I will continue to pursue that goal regardless of the final disposition of the Gramm-Rudman amendment in conference with the House of Representatives. Frankly, I preferred the approach of the Chiles-Byrd balanced budget plan. But the good news of both the Chiles and Gramm plans is that both would put us in a fixed glide path toward a balanced budget by 1991 without jeopardizing our Social Security programs.

The good news about the successful Gramm-Rudman amendment is that it forces new, statutory discipline on the Congress to keep Federal spending within legislated deficit ceiling targets and provides the unprecedented threat of Presidential impoundment by executive order as a deterrent to overspending or missing the mark on deficit reduction. It accelerates and locks in the reconciliation process to achieve savings through changes in substantive law early in the budget process, rather than at the tail end of the budget cycle when most committees in the Congress have completed their work. And the good news of the Gramm-Rudman amendment is that it finally, and unequivocally forces the President of the United States to submit budgets to the Congress that conform to the balanced budget timetable mandated by the act. In short, Gramm-Rudman tightens up the budget process; establishes a rigorous regimen for the President and the Congress to follow to achieve a balanced budget; and forces a new order of discipline upon the legislative and executive branches to deal with the deficit.

Mr. President, I would be less than candid with my colleagues, however, if I failed to express some serious reservations about what the Senate has done today, by adopting the Gramm-Rudman-Hollings plan. First, I have the most serious and deep reservations about the new unprecedented authority the Senate has given the President of the United States to impound by Executive order both appropriated funds and cost-of-living adjustments for certain non-Social Security beneficiaries. In view of the devastating effect of the present President's policies on the deficit, I admit I find it troubling that the sponsors of the Gramm-Rudman plan would willingly relinquish control of a key element of the Budget and Impoundment Control Act of 1974 to a President who has given a whole new meaning to the term "debtor nation."

Mr. President, the Budget and Impoundment Control Act of 1974 was born over 10 years ago to essentially attack two significant problems in the Federal budget process: First, the growing budget deficit and how to better control the budget process; and second, the need to reign in a President who was impounding Federal funds left and right. The act was crafted in such a way as to impose a new discipline on the Congress of the United States so that it could carry out its constitutional responsibilities to set spending priorities; keep spending down; look at the whole economic picture, including revenues, expenditures, and economic projections; and restructure the budget process so that the executive branch and the Congress

could better do their respective jobs of handling the Government's business. It was designed to force the Congress to bring order to the budget process—not give the President of the United States more authority to do the Congress' job, as envisioned in the Constitution. There is no question that elements of the budget process have failed and need to be corrected. That is one of the reasons I voted for the Gramm-Rudman amendment. However, the impoundment authority granted in the Gramm-Rudman plan must surely have both the Founding Fathers of our Constitution and the late, great Senator from North Carolina and author of the Budget Act, Senator Sam Ervin, rolling over in their graves. I will be watching with great interest and some trepidation how this President and the next President of the United States execute their newfounded "sequestering" authority over the next 5 years, should this provision of Gramm-Rudman ultimately take effect.

Second, the "bad news" of the Gramm-Rudman plan is that it fails to exempt means tested programs from the sequestering provisions under the emergency powers section of the amendment. This could result in means tested beneficiaries suffering significant hardship, should the President's impoundment authority be triggered under the act. Again, traditionally Congress has made the determination as to whether such beneficiaries should be included in any reconciliation or other deficit reduction measure, or whether we should take more out of discretionary spending programs to make up budget shortfalls. This new authority under Gramm-Rudman could force across-the-board cuts in COLA's for these beneficiaries even in a recession. Again, I believe that the Congress should set these priorities, rather than leave those beneficiaries subject to an across-the-board impoundment by the President.

Finally, under Gramm-Rudman, our national defense conventional warfare buildup could be jeopardized if the emergency impoundment provisions of the amendment were triggered. How could this happen? The amendment that we approved today does not make any provision to cover prior year or existing defense contracts for large weapons systems that have a significant outlay impact in the fiscal year under review. It is estimated that the inability to include existing defense contracts under the sequester provisions of Gramm-Rudman could exempt as much as $92 billion from the total subject to across-the-board cuts that could be necessary to comply with the maximum deficit targets. In other words, a proportionately deeper cut would have to be taken from operation and maintenance; military pay; and other accounts that have a direct impact on our ability to improve our conventional warfare capabilities. I firmly believe that we need to accelerate—not diminish—our conventional warfare improvement program and Gramm-Rudman could, if fully implemented, thwart that critical defense effort.

Mr. President, I do not mean to drape the Gramm-Rudman amendment in black crepe paper and mourning cloth. I voted for the amendment and I believe that it will establish a solid statutory framework for both the Congress and the White House to achieve a balanced budget by 1991. I support the "maximum deficit levels" established in Gramm-Rudman. We should set targets and stick to them. I support the changes in the budget timetable and the rigid restraints placed on reporting and disposing of spending and tax legislation. We need the discipline and should be forced to make tough choices in a timely fashion. Gramm-Rudman imposes these disciplines on both the Congress and the executive branch and I support these new adjustments to the budget process.

But, Mr. President, we should not kid ourselves that the Gramm-Rudman plan has guaranteed this country a balanced budget by 1991. Nor should we kid ourselves that there will not be some bloody battles ahead, under this administration or the next one, as we move down that glide path toward a zero budget deficit. Nor should we ignore the fact that should Gramm-Rudman become the law of the land, there may be some damage to our national defense buildup; our domestic programs for the poor and elderly; our war on drugs; and the standard of living for our means tested beneficiaries. The glide path toward a balanced budget will be painful and filled with pitfalls. My vote for the Gramm-Rudman plan was a vote for a balanced budget. We need it. I only hope that the mechanism for achieving that goal that the Senate has adopted today will get us there without overriding the Congress' constitutional obligation to set national priorities and without jeopardizing those programs that are so important to our national security and well-being.

Mr. KERRY. Mr. President, I rise to speak on the amendment to increase the debt ceiling limit to more than $2 trillion. This is a critical time that we are in and it demands a long overdue response by the Congress.

I believe there is now a consensus here in the Senate that something has to be done to deal with the path of economic ruination this administration has charted before we give this President more spending authority. We have voted on two proposals which attempt to deal with the national crisis which this administration has created and which this administration has ignored.

It is unfortunate that we are forced to take the drastic steps proposed by our distinguished colleagues, Senators PHIL GRAMM, WARREN RUDMAN, and FRITZ HOLLINGS. As imperfect as it may be in addressing the deficit problem, this measure will force the administration and the Congress to make the hard choices that must be made to bring sanity back into our spending habits.

If Gramm-Rudman-Hollings is enacted into law, we will be putting into place for the first time a procedure which will force upon this President something he has never wanted—accountability. It will force the Congress, in a bipartisan fashion, to hold this President accountable.

Let's be clear about one thing. This unsustainable deficit is Ronald Reagan's deficit. While he has tried to convince the American people that the deficit is the Democrat's fault, this President has added $1 trillion to the national debt over the first 5 years of his term in office.

For the past 5 years, the President has gotten virtually everything that he originally sought: massively higher military spending, significantly lower corporate taxes, and much lower domestic spending. Yet while he has placed in jeopardy the health and well-being of countless thousands of our fellow Americans through drastic reductions in essential programs, he has also placed in jeopardy the future health and well-being of all Americans by running up the highest deficits in our Nation's history.

Under this measure, the President will be forced to submit to the Congress each year a budget that reflects his priorities for the Nation within the real constraints of real ceilings on the deficit. In turn, a zero-sum budgeting process will be used by the Congress to force us to make the hard choices. It will then be up to the American people, through their elected representatives in the Congress, to judge whether or not the President's priorities are the priorities of the people. I believe this administration will find, in very short order, that many of its priorities are not those of the American people.

I am confident the American people will be heard. When balancing military expenditures against social programs already cut to the marrow of the bone, I am confident that the American people will demand that the Congress move instead against the inefficiency, waste, and abuse in the Defense Department, and against the senseless duplication of nuclear weaponry that has been the policy of this administration's Secretary of Defense.

Lest my colleagues have any doubts as to my motivations in supporting

this amendment, I want to be very up front as to what are my purposes in sponsoring Gramm-Rudman-Hollings. I am doing so, because this measure will place us on the frontlines to force the choices that to date have not been made by this administration. One of my top priorities will be that of asking the American people whether or not they would prefer to engage in a $1 trillion Star Wars Program that would be the most foolhardy and arrogant waste of the taxpayer's dollars ever foisted upon the American people, or whether our people would prefer to see us invest in education, meals for the elderly, nutrition for our infants, protecting our environment, economic growth, and improving the competitiveness of our private sector in world markets.

Mr. President, confronted with these choices, I have every confidence that the American people will vote for an economically strong America; an America whose people are healthy and at work; an America that will have a stronger military capability because we demand a dollar's return on our investment for every dollar we put up for defense. I think we will find that the American people, when faced with these choices, will make decisions which are both smart and compassionate.

Those of us here who retain an unfaltering commitment to protect human needs programs know that we will have the opportunity under Gramm-Rudman-Hollings to have the value of these programs debated on the Senate floor in the full view of the American people. And I am committed to making sure that those debates take place so that this Senate can decide whether or not funding child nutrition is or is not more important than funding chemical weapons—whether funding cancer research is or is not more important than expending Federal dollars on propping up the tobacco industry—whether funding education is or is not more important than military aid to oppressive regimes.

This administration has launched the largest peacetime military buildup in the history of the world. It has exacerbated the arms race in the process and at the same time launched the most monstrous budget deficit race in the history of the Nation, with an absolute disregard for the consequences of its actions. This administration has done so with a callous contempt for the security of our own people and the security of our Nation. It is time to hold this President accountable. It is time to tell this administration that we cannot afford the luxury of pouring billions of hard-earned tax dollars that we don't have into harebrained schemes that won't work.

This proposal alone will not solve the problem. The Federal Government will need to go to every available revenue source to begin eliminating the horrendous deficits created by this administration's fiscal and budget policies. Consequently, tax compliance, because of its immediate and broad applications, should be of highest priority for all of us. Tax compliance is where we should look first to generate additional revenues. We should not be increasing taxes until we have done everything possible to collect the estimated $20 billion we could collect annually by cracking down on tax cheaters. For these reasons, I am pleased that the debt ceiling extension will include my amendment that will direct OMB and CBO to report to Congress on potential revenues that could be raised through improved tax enforcement.

Mr. President, I hope the Gramm-Rudman-Hollings amendment will serve as a means of restoring the public trust that we as elected officials are sworn to uphold. This administration, it has charted, has violated the public trust as has no other administration in the 200-plus-year history of our Republic. It is time to hold accountable a President who has blamed everyone but himself for creating what I believe to be the most serious national security threat this Nation has faced since the Great Depression—a rampaging budget deficit that if left unchallenged will bring virtual economic collapse to this Nation.

As the principal sponsors of this amendment—Senators GRAMM, RUDMAN, and HOLLINGS—well know, my willingness to support their proposal was conditioned on the need to protect the sanctity of the most important contract we have with the American people—Social Security. Just as when we debated the budget resolution earlier this year, I was unable to vote for any budget that would have cut our commitment to Social Security recipients, I would have been unable to support this proposal in the absence of removing Social Security from the unified budget and exempting it from the sequestering process. Also, the inclusion of a amendment offered by the distinguished junior Senator from Connecticut and myself that will protect our most needy senior citizens from carrying a disproportionate share of the deficit reduction by having their supplemental security income payments reduced because of the indexing that is linked to regular Social Security payments.

Therefore, I want to thank the principal sponsors for acceding to what are not only my concerns but the needs of millions of Americans reliant upon this most sacred of social contracts Government has made with our people.

Mr. President, the periodic debates over the extension of the Federal debt ceiling have, over the years, offered excellent opportunities for political posturing. However, they also have given us the rare opportunity to examine the Federal budget in a comprehensive and historically sensitive manner.

In past years, during times of greater economic stability, passage of the debt extension was often nothing more than a pro forma exercise. Today, after a 5-year period of unprecedented deficit spending we have an opportunity to change course and chart one which will return us to economic stability.

As we prepare to vote on a course which is an alternative to that charted to date by the President, I believe it would be useful to review the causes of our current deficit problem. Many of my colleagues from both sides of the aisle who have already spoken, have expressed in very eloquent terms, the gravity of the deficits—the ways in which it has been sapping the economic strength of our Nation, and the potential threat it poses to our long-term stability.

For the fiscal year which has just ended, the Federal Government will spend nearly $200 billion more than it received from the taxpayers of this Nation. This means that every citizen of this country has in effect incurred a debt of $1,000 during the past 12 months. For the first 5 years of his Presidency, the Reagan policies have meant that every citizen of our country has incurred a debt of $5,000. To place this crisis in its proper perspective, our total indebtedness from the time of George Washington through Jimmy Carter will have more than doubled under the first 5 years of the Reagan administration.

What have been the effects of this unprecedented growth in Federal indebtedness? The Government is obliged to borrow money in order to finance the current deficit. And, while the U.S. Government traditionally has borrowed a large share of the total private savings in this country to finance the deficit, the magnitude of the current deficit has placed the Government in the position of sucking up some two-thirds of all private savings in America. That is the reason for the continued historically high real interest rates. That is the reason why so many Americans and businesses are frozen out of the credit market.

In addition, historically high real interest rates have made investement in this country so attractive that the dollar has become inflated when compared to other currencies of industrialized nations. As a consequence, it is as if American businesses have been taxed an additional 35 percent on products they export—placing us in such a competitive disadvantage that we are now experiencing historic trade deficits as well.

I am sure that I do not need to point out to my colleagues the economic dislocation caused by, and resentment against, foreign competition, that stems from this trade deficit. We can debate ad nauseum the various trade proposals which have been offered, but it won't solve the problem. I will be the first to admit that we ought to undertake a more comprehensive approach aimed at promoting our own industries in the world market and eliminating unfair trade practices of other nations. These developments would be helpful in assisting American businesses to compete on a more equal basis with our foreign trading partners. However, the real solution is a significant reduction in our own budget deficit. If we can accomplish this, I am confident that the calls for the kind of strict protectionist measures of which we are all wary will be softened.

However, unless we change our spending policies and our spending priorities, the deficit crisis will only lead to stringent protectionist measures to protect our own economic base.

Perhaps cutting taxes or raising military spending are worthwhile goals. But doing both at the same time just won't work and it hasn't worked. Yet, the President, while recognizing this, will not admit it. None of the budgets proposed by the administration over the last 4 years have come close to being balanced.

In the mid-1960's Lyndon Johnson tried to tell the American people that it was possible to have both guns and butter without having to pay for both. What Ronald Reagan has been telling the American people is that it is possible to have massive amounts of guns and much less butter without having to pay for either. But it hasn't worked and the only way out of this Reagan deficit is to reject that approach. I believe this proposal will force us to make the choices that have been avoided for far too long.

We have finite resources which we can no longer squander on programs that do not contribute to an economically strong America; an America whose people are healthy and at work; and an America whose investment in defense is cost-effective. It is time we give the American people a voice in setting these priorities.

SOCIAL SECURITY AND THE BORROWING NEEDS OF THE TREASURY

Mr. MOYNIHAN. Mr. President, earlier today, the distinguished Senator from Oklahoma made a statement to the effect that in all but two of the years since 1969 the Social Security Program has increased Federal borrowing needs.

This statement greatly surprised me since the Social Security Program is intended to operate as a self-sustaining entity funded from earmarked payroll taxes. As a matter of convenience to the Social Security Program and to the Treasury, any Social Security surpluses are temporarily invested in Treasury bonds, to be cashed in when needed. But this does not affect the borrowing needs of the Treasury, since the Treasury would have to borrow the same amounts to cover general fund deficits whether or not there were Social Security surpluses to borrow from.

I have looked into this matter a little further, and I believe I know the source of the confusion on this issue. The statement made this morning was based on an analysis by the Congressional Research Service which compared the income and outgo of the Social Security cash benefits trust fund, but did not count as income the interest paid by the Treasury on bonds held by the trust funds. I believe this type of analysis is simply wrong. The borrowing needs of the Treasury are not increased because it has to pay interest to the trust funds. If the Treasury had not borrowed from the trust funds, it would have necessarily borrowed the same amounts from the public—and it would have had to pay at least the same amount of interest on that public borrowing as it pays to the trust fund. That interest is therefore properly considered as income to the trust fund just as much as the direct receipts of the payroll tax are considered income to the trust fund. It should not be excluded in determining whether the trust fund is self-supporting.

DEFICIT REDUCTION NOW

Mr. CRANSTON. Mr. President, I do not think that the Senate should wait until next year to begin its deficit reduction plan.

The plan I voted for—the Chiles-Byrd plan—begins reducing the deficit this year, now. Not some time next year.

I don't think it is credible for those who claim they want to start reducing the deficit to say: "But let's not start until after 1986."

What are we afraid of?

Why doesn't the Gramm-Rudman-Hollings amendment start now?

The American people want us to start now. They don't want us to wait until next year.

I voted twice to start reducing the deficit this year.

I voted for the amendment offered by Senator EXON to move forward the starting day for the Gramm-Rudman-Hollings deficit reduction plan to November 1 this year, instead of November 1 next year.

I cosponsored and voted for the alternative plan offered by Senators CHILES and BYRD which made immediate cuts in spending, effective November 10 this year—1 month from today—instead of November 1, next year, as allowed in the Gramm-Rudman proposal.

There were 52 Senators who voted against the November 1, 1985, starting date proposed by Senator EXON. They said, in effect, that they don't want to face the tough decisions and the tough consequences of cutting spending until sometime after the elections next year. I think waiting until fiscal year 1987 is too late.

Congress has in the past enacted ambitious plans to reduce the deficit and balance the budget. Those ambitious plans failed. They failed because each one contained the same fatal flaw as Gramm-Rudman: "Let's wait until next year."

"Wait until next year"—that's the procrastinator's sad refrain.

I supported the Chiles-Byrd plan because it would reduce the Federal deficit more quickly and more equitable than any of the other proposals offered so far.

Our plan would have balanced the budget by 1990 instead of 1991.

What difference does 1 year make?

When annual deficits exceed $200 billion, 1 year makes plenty of difference. We've piled up a new trillion-dollar debt during the 5 years of the Reagan administration to add to the other trillion in debt that took us over 200 years to accumulate. One year makes a big difference these days.

Immediate action is required to reduce the dangerously high deficits in 1986. That action must also be shared fairly across most areas of Government spending, including military weapons systems.

Our amendment would have required Congress to meet specific deficit reduction numbers in each of the next 5 years. If Congress failed to meet those targets after a special process to meet them had been exhausted, then automatic spending reductions would have been in effect, with the cuts in defense and domestic spending in proportion to their share of the budget.

However, our amendment would have exempted Social Security and programs for poor and disabled Americans—including VA service-connected disability compensation recipients—from the domestic spending cuts required by its deficit reduction plan.

The defense cuts would have come from wasteful Pentagon procurement instead of targeting programs vital to our defense readiness, as would the plan offered by Senator GRAMM.

I oppose the Gramm proposal because it would delay the tough decisions on deficit reduction, it would permit unfair cuts in programs for poor and disabled persons, and it would give the President new power to change spending cuts passed by the Congress.

Under Gramm, the President could subvert a specific congressional deficit reduction plan by vetoing it and sub-

stituting budget cuts by Executive order for those cuts passed by both Houses of Congress.

This enormous change in the balance of powers between the executive and legislative branches of Government overlooks the constitutional responsibility of the Congress to determine how the people's money is spent.

I believe we need a deficit reduction plan now, not in 1987, that will require the Congress to make the difficult decisions—and start making them now—about where the budget cuts would come.

Mr. GRASSLEY. Mr. President, it took two centuries for this country to pile up its first trillion dollars of debt. It took only 5 years for the second trillion. At this rate, it'll take only 3 years for the third trillion.

If that doesn't say we're on a crisis course, I don't know what it says,

We have a situation similar to a pressure-cooker. Since 1979, the annual increase in the debt is rising faster than the size of the deficit. We create debt this year to pay off last year's debt. This is the textbook illustration of bankruptcy.

Meanwhile, the runaway debt is compounding itself exponentially, relative to our ability to pay for it. This year's deficit adds to the pressure. The rapid expansion and compounding of debt locks us into a permanent debt spiral which is feeding on itself.

This is not a situation where we can merely continue to borrow, or, because of the mind-boggling size, repudiate it. I can assure you, Mr. President, "We Will Pay for It."

There are three ways we can pay this debt off. One is to run a budget surplus for a seemingly infinite number of years. However, our inability to get deficits down even below $200 billion lends powerful credibility to even the cynics among us. Feeding the doubt is the fact that, because of the compounding nature of the debt dynamic, we need a $45 billion surplus this year just to break even on the rapidly piling debt.

This is the fallacy of diminishing deficits. When two and two are added together, the very sobering result compels us to quickly shove this option aside.

Option No. 2 is to raise taxes, which I and many of my colleagues cannot condone. At any rate, a $2 trillion debt translates into a $10,000 tax burden for each man, woman and child in this country, at a compounding rate of 5 percent per year and climbing. Such a massive burden is unthinkable because it would set the economy into an economic tailspin and erase any hopes of perpetuating the current recovery.

The third option is equally undesirable, but is probably the inevitable choice, if history is any gauge. That is the choice of inflating the currency to pay back the debt with cheaper dollars.

The consequences of this choice are literally incredible. If we thought we had an inflation problem before this administration took over, it would surely be dwarfed by what would come about from reflating the current debt. The United States would become the world's largest Third World nation in a very short time.

This is a management crisis, Mr. President. It can be overcome only by the severest of discipline, preceded by stark recognition of the seriousness of the debt problem. Neither appears to have taken hold of this Congress. To support an extension of the Government's borrowing ability under these rapidly deteriorating conditions is not the responsible thing to do. I cannot, in good conscience, either countenance it or support it.

Thank you, Mr. President.

Mr. BIDEN. Mr. President, I voted in favor of the so-called Gramm-Hollings-Rudman proposal first and foremost because I believe that we must have some type of action forcing mechanism to create discipline necessary to reduce these deficits.

Since shortly after arriving in the Senate, I have advocated measures which would have forced both the legislative and executive branches to exercise greater fiscal responsibility. Over a decade ago I introduced one of the first so-called comprehensive sunset bills which would have required most Federal spending programs to be reviewed on an annual basis.

My proposal was every bit as controversial as the so-called Gramm-Hollings-Rudman amendment, although probably not as well known. Some argued that annual review of social programs would jeopardize their renewal and others warned that it would jeopardize our national defense. Unfortunately after years of deliberation the proposal died a quiet death.

Sunset was not the first or the last effort to try and create some type of action forcing measure. Indeed the Budget Act of 1974 was designed for that purpose. But as we all know the budget process has been less than satisfactory and the current deficit situation has reached truly crisis proportions.

Within the context of the Budget Act I have pursued without success a number of initiatives to cut deficits. For example, last year I along with the Senator from Kansas, the Senator from Iowa, and the Senator from Montana offered an across-the-board budget freeze that if adopted would have meant deficits considerably smaller than we have today. However, I was unable to prevail.

In the end the current impasse on the budget is a political problem. In effect it has become in everyone's political interest not to act. When this administration took office deficits were less than a third of what they are today and in 5 years a President who promised a balanced budget has created more deficit than all Presidents before him.

Now the politics are changing both with the request for $2 trillion in debt authority and with people outside Washington begining to appreciate the relationship between deficits and jobs in the trade sensitive sectors of our society. Their patience is ending and the time for action has arrived.

My overriding concern about this proposal is twofold: First, that the legislation might result in inequitable cuts, especially in social programs, and second, that it did not guarantee sufficiently prompt action on the deficit. As to both concerns, I am voting for this proposal because I have become convinced that, just as political forces have conspired to withhold action, that they will answer my two concerns.

As to my first concern—inequity in the sequester process—I have become convinced that both Congress and the President are going to be sufficiently concerned about political consequences to avoid draconian cuts in social programs. I believe that Congress will take the threat of the sequester process seriously and will, rather than face the risk of inequitable sequester, seek an across the board cut to meet the deficit goals.

In the event that this does not happen and the sequester process triggers, the President will, nothwithstanding his desire to emasculate the discretionary sectors of the budget, be faced with a Republican Party that will not be willing to face extinction by going along with him on the one hand and the reality that there are not sufficient savings in the social programs in the discretionary sector to meet the ceiling.

Faced with this, the President for the first time in his Presidency will be forced to face reality and choose among duplicative weapons programs to cut and raising revenues from those who are presently escaping their fair share of the burden.

One thing is as clear to me as it was when I offered the freeze—to do nothing guarantees that those expenditures that are the measure of our humanity as a nation will be slowly but steadily eroded due to the lack of gumption on the part of Congress and the lack of wisdom on the part of the President to meet the test of facing an efficient military and a fair tax system.

As to the second concern—the fact that the procedure does not guarantee prompt action—it is my hope that this debate has focused on the urgency of dealing with the deficit will bring some renewed pressure on the Con-

gress to act and the President to retreat from his fantasy world which says no revenue increases and no defense cuts.

In the event that this is a misplaced hope I believe at a minimum it will make more attractive an across-the-board freeze.

Furthermore, if the President again submits an outrageous budget, Congress should give serious consideration to an immediate across-the-board freeze for the next 2 years in Federal spending and a 2-year suspension of tax indexing.

Finally, I became convinced as I listened to hours of debate that almost all of the provisions of this proposal that were questioned were also present in the Chiles alternative and would be present in almost any effective mechanism which would have been imposed.

Mr. BYRD. Mr. President, the increase in the debt ceiling to over $2 trillion stands as an embarrassing testament to the failures of this administration to live up to its promises to reduce the Federal budget deficit. In 1981, President Reagan said:

> The $1 trillion debt figure can stand as a monument to the policies of the past that brought it about—policies which, as of today, are reversed.

It is an unfortunate fact that not only did the administration not reverse the increase in the debt; it actually accelerated it! It took 39 previous administrations the entire history of the United States, from 1789 to 1981 to accumulate the first $1 trillion of debt. But this administration has added another $1 trillion to the debt in just 5 short years—1981 through 1985.

Just to pay the net interest on that debt will require $137 billion in fiscal year 1986, nearly 40 cents out of every $1 paid in individual income taxes next year. Only 20 years ago, $137 billion could have funded the entire Federal budget for 1 year!

We cannot escape the fact that it is the economic and budget policies of this administration which have driven the deficit—and the debt—to record levels. The 1981 tax cut was estimated at that time to reduce revenues by $749 billion over 5 years. That was money we did not have.

I voted for that tax cut because of what I believed was the overwhelming sentiment of the people that the new President's program be given a chance to work. I have since regretted that vote many times. The 1981 tax cut is a major reason why the debt has increased by $1 trillion since then. The policies that bred this debt in 1981 are now coming home to roost. And they are roosting on the debt limit bill that is about to be voted on.

The rapidly mounting debt, and the burden that it imposes on our economy, on jobs, and on our children and grandchildren, makes it imperative that we take decisive action to reduce the deficit. As responsible legislators we cannot continue to allow huge deficits to keep sapping the strength from our economy. These deficits keep interest rates high, attracting foreign capital and driving up the value of the dollar. A high dollar drives a stake into the heart of American exports, and that costs jobs.

This is no academic argument. The effects of continued large deficits hurt our people, hurt our industries, and hurt our country. That is why I offered in May a proposal to reduce budget deficits significantly. Under that proposal, the deficit would have been reduced from $200 billion in fiscal year 1985, to $100 billion by 1988, and to a balanced budget shortly thereafter.

Further, my proposal would have achieved that reduction in a fair, responsible way that would have promoted economic growth, education, research, and exports; protected those receiving Social Security benefits; and prescribed that profitable corporations and the rich pay their fair share of the cost of running our Government and providing its services.

Now, the frustration many of my colleagues feel at the inability of this administration to deal with the deficit has led to a proposal that would, in some ways, wreak even more havoc than the deficits it is designed to eliminate. The Gramm proposal, which the Senate has adopted, is so fundamentally flawed that I voted against it and continue to oppose it—even though I agree with its stated goal of eliminating the deficit.

If it becomes law as passed by the Senate—and it will be passed by the Senate, the proposal has, I believe, sown the seeds for potentially even greater economic and social distress, and may inadvertently, impact adversely upon the national security needs of our country. The Gramm amendment puts a straight-jacket on fiscal policy—the most important tool that the Federal Government has with which to respond to changes in the economy, domestic, and international events, and national security requirements.

It is a well accepted practice for governments to respond to economic slowdowns—recessions and depressions—by cushioning the adverse effects such as rising unemployment.

If, however, under the Gramm proposal, the President kept insisting on a rosy economic future—that the present troubles were just temporary—Congress would need to muster a two-thirds vote in each House to suspend the requirements of the proposal and respond to the Nation's needs—including those of unemployed workers, businesses and industries, threatened by the economic slowdown, banks faced with mounting bad loans, and all the other individuals and institutions that would be affected. This would enable the combination of a President and a minority of one House to hold any recession assistance hostage. Further, even if such aid were ultimately agreed to, it might well come too late to alleviate the hardships that occur early in a recession. A recession could become a depression, and the deficits could become even larger.

The amendment could also tie the hands of a President in responding to threats to our national security. By requiring adherence to rigid deficit limits, except in times of a declared war, the proposal could prevent the President from spending funds in a broad range of areas—from Embassy security to military readiness—unless offsetting cuts could be found elsewhere.

I firmly believe that our national security requirements should be dictated by the threats we face from our enemies, not by domestic budgetary concerns. Any procedure that might prevent the Nation from defending its vital interests overseas should be unacceptable.

Because of the protection it provides even to existing defense contracts that can be legally modified, the Gramm amendment could severely affect the readiness of our troops. To the degree that contracts are off limits for cuts, the cuts that need to be made would come mainly from operation and maintenance accounts—the very heart of military preparedness. We could end up with fleets of modern equipment—fighters, bombers, tanks, submarines, and so forth, but without sufficient fuel, ammunition, spare parts, or trained personnel to enable them to perform their missions.

I should also point out that the amendment is suspended automatically during—but only during—a declared war. But only once in the past 40 years have we been in a declared war—and that was World War II. Our most costly engagements since then, both in human and dollar terms—Korea and Vietnam—were not conducted under any such declaration. If the procedures spelled out in the Gramm amendment had been in effect in either of those cases, we might well have found ourselves unable to support our troops in combat.

The Gramm amendment, also, would actually delay the day of reckoning on deficit reduction. Instead of forcing the hard choices to be made now—beginning this year—the amendment puts off any action until next year, possibly after the elections. I believe that we must be serious about deficit reduction today, not tomorrow.

The amendment also transfers too much power to the President. While some of the more egregious examples have been changed during the amend-

ment process, others remain. For instance, the administration can still manipulate when the automatic cuts will go into effect if the Office of Management and Budget cooks the numbers. If the executive wants automatic cuts to go into effect, the required OMB report can show a larger projected excess deficit. Conversely, if the administration wants to avoid such action, the OMB report could show no excess deficit. Either way, the President has the power to trigger automatic budget cuts.

The amendment offered by Senators CHILES, JOHNSTON, myself, and others, would have provided for a faster and more responsible way to achieve a balanced budget. Our amendment would have balanced the budget by 1990, 1 year earlier than the timetable set forth in the Gramm amendment.

It also would have added a provision that required the automatic suspension of the requirements not only during a declared war, but also, during any time when U.S. troops are engaged in combat, or during any recession. This critical provision would allow the President to deal immediately with any threats to our national security and to respond quickly to the adverse effects of a recession. The Government cannot function efficiently or effectively if it does not have the flexibility to respond to unforeseen developments. Our amendment provided that flexibility in two key areas.

The flexibility to respond to recession takes on added importance when viewed in the light of an analysis performed by the House Budget Committee. Using a model of the economy developed by Data Resources, Inc., a highly respected economic forecasting firm, the analysis found that if the economy enters a recession in 1987 and the provisions of the Gramm amendment were in effect, the recession could be lengthened 2 years beyond what it would otherwise last. More importantly, unemployment would rise to nearly 15 percent by 1989 and stay at that level for 2 years. Without some flexibility, we could find ourselves in a longer and far more severe recession than we experienced from 1981 to 1983, and from which some of our States have yet to fully recover.

The Government has no more important responsibility than the protection of national security. Our amendment also provided that the President can request supplemental funds for national defense, thereby cancelling any automatic budget cut that would have compromised our ability to defend our strategic interests.

Mr. President, a $2 trillion debt limit is a national misfortune. Furthermore, this administration is likely to have to ask for another increase next year. That is reason enough to oppose the debt limit increase.

But there is another reason. The bill has been amended with a deficit reduction procedure contained in the Gramm amendment. It would create more serious problems than it would cure. While it would reduce the deficit—a proposition with which I am in agreement—it would do so in a potentially dangerous and unbalanced way.

Frankly, I believe the best method of reducing the budget deficit and achieving a balanced budget was contained in the budget amendment I offered in May of this year. Even the amendment offered yesterday by Senators CHILES, JOHNSTON, and myself and others would have been a much more responsible way to reduce the deficit than the Gramm approach.

Inasmuch as the Gramm amendment, which I opposed, was adopted, and because the debt limit we are considering will increase our public debt to over $2 trillion—more than double what it was when Mr. Reagan took the oath of office—I am compelled to vote against House Joint Resolution 372.

The PRESIDING OFFICER. The Joint Resolution having been read the third time, the question is, Shall it pass? The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Mississippi [Mr. COCHRAN], the Senator from Minnesota [Mr. DURENBERGER], the Senator from North Carolina [Mr. EAST], the Senator from Orgeon [Mr. HATFIELD], the Senator from Idaho [Mr. MCCLURE], and the Senator from Kentucky [Mr. MCCONNELL] are necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

I further announce that, if present and voting, the Senator from Minnesota [Mr. DURENBERGER] would vote "aye."

Mr. CRANSTON. I announce that the Senator from Montana [Mr. BAUCUS], the Senator from Illinois [Mr. DIXON], the Senator from Ohio [Mr. METZENBAUM], the Senator from Rhode Island [Mr. PELL] and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island [Mr. PELL] and the Senator from Montana [Mr. BAUCUS] would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 51, nays 37, as follows:

[Rollcall Vote No. 222 Leg.]

YEAS—51

Abdnor	Chafee	Dole
Andrews	Chiles	Domenici
Armstrong	Cohen	Eagleton
Biden	D'Amato	Evans
Boren	Danforth	Ford
Boschwitz	Denton	Garn
Glenn	Kennedy	Roth
Goldwater	Kerry	Rudman
Gore	Laxalt	Simon
Gorton	Levin	Simpson
Gramm	Lugar	Specter
Hatch	Mattingly	Stafford
Hawkins	Murkowski	Stevens
Hecht	Packwood	Thurmond
Heinz	Pressler	Trible
Helms	Quayle	Wallop
Hollings	Rockefeller	Wilson

NAYS—37

Bentsen	Heflin	Nickles
Bingaman	Humphrey	Nunn
Bradley	Inouye	Proxmire
Bumpers	Johnston	Pryor
Burdick	Kassebaum	Riegle
Byrd	Kasten	Sarbanes
Cranston	Lautenberg	Sasser
DeConcini	Leahy	Symms
Dodd	Long	Warner
Exon	Matsunaga	Weicker
Grassley	Melcher	Zorinsky
Harkin	Mitchell	
Hart	Moynihan	

NOT VOTING—12

Baucus	East	McConnell
Cochran	Hatfield	Metzenbaum
Dixon	Mathias	Pell
Durenberger	McClure	Stennis

So the bill (H.J. Res. 372), as amended, was passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. PACKWOOD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, there will be no further votes today, Monday, or Tuesday.

Mr. THURMOND. Mr. President, I ask unanimous consent that 500 copies of Amendment No. 724 be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, I am not tonight requesting that the House go to conference. However, if a conference is requested by the House and if conference is held, it would be my intention to ask the Senate to appoint the following conferees: Mr. PACKWOOD, Mr. ROTH, Mr. DOMENICI, Mr. DANFORTH, Mr. ARMSTRONG, Mr. LONG, Mr. BENTSEN, Mr. CHILES, and Mr. LEVIN. I just announce my intention.

Mr. DOLE. Mr. President, let me first thank the managers of the bill and all others who have been involved in this rather lengthy process. We have been on this measure for 8 days. We have consumed 48 hours and 49 minutes. We have had 20 rollcall votes. We have had 30 amendments and motions considered. We have agreed to 14, rejected 4, tabled 6, not acted on 2, and laid 4 temporarily aside.

I want to particularly thank the distinguished chairman of the Finance Committee, Senator PACKWOOD; the distinguished ranking member, Senator LONG, and even more particularly the authors of the so-called Gramm-Rudman-Hollings-Boren amendment for their amendment, Senator GRAMM, Senator RUDMAN, Senator HOLLINGS,

and Senator BOREN, and to indicate that we believe, notwithstanding the fairly close vote on final passage of the debt limit measure, House Joint Resolution 372, that there is strong support for deficit reduction as demonstrated earlier this week when the vote was 75 to 24.

Again I commend my colleagues. I thank the distinguished minority leader for his assistance. I thank my colleagues on both sides for their patience and understanding.

I hope that there will be a conference and we can resolve the outstanding differences in a short time.

ORDER OF BUSINESS

Mr. DIXON. Mr. President, will the majority leader yield?

Mr. DOLE. Yes, I yield, Mr. President.

Mr. DIXON. May I say to the majority leader, Mr. President, that I am here with my distinguished friend, the Senator from Montana [Mr. BAUCUS]. We were not recorded on this rollcall. We were at dinner three blocks from here. We both had our beepers on. Our beepers did not invite us here to cast our votes. I am told by my colleagues that others leaving here have said they were not informed of the vote.

Mr. President, may I ask that the record clearly show that by virtue of whatever occurred in the Cloakroom, whether failure of those in the Cloakroom or failure of the electronic system to notify us, Senator BAUCUS and myself—I am very happy that there were two of us here, both of whom had their beepers on and both working—were not informed of this rollcall.

As a consequence of that, notwithstanding the fact that we were only three blocks from this place, we were not here to register our votes. Since this could happen to others of our colleagues from time to time—I appreciate that under the rules of the Senate, I suspect there is nothing that can be done to record our vote. But I certainly want the record to show that we were both here in the city, close at hand, as close as the Hart Building is, and we were not notified of this vote.

I yield to my colleague from Montana to confirm that for the record.

Mr. DOLE. Mr. President, let me just indicate that under the circumstances, I would have no objection to permitting the Senators to be recorded if it would not change the outcome.

Mr. BYRD. Mr. President, the rule prohibits any Senator from voting after the Chair has announced the decision. It also provides that the Chair cannot even entertain a unanimous-consent request to suspend this rule.

I regret that the two Senators missed the vote. I have discussed this with the secretary for the minority. He has said the word went out.

Mr. DIXON. The word did not go out.

Mr. BAUCUS. Mr. President, I will say the secretary is wrong.

Mr. BYRD. Mr. President, the secretary cannot respond. Let me say that the Secretary told me the word went out, the beeper signal went out. Some Senators got word on their beepers.

Mr. DIXON. May I say to the minority leader, with all respect, I know what the rules are, because I remember in about my first year here, my distinguished colleague from Ohio missed a rollcall and there was a long discussion about whether he could vote and it was clear he could not.

I want to make this clear to the Senate, because it could happen to any Senator. As we were eating dinner—I was with my wife and my distinguished colleague from Montana was with his—I heard a little beep and it said, "Senator DIXON, you are not recorded." I jumped up and said to my friend from Montana, "MAX, there is a rollcall." He said, "You're kidding."

We both had ours on like this, we both did this, to assure that they were on. We both came here and rushed in. We were only three blocks away and the vote had been completed.

I just want to say this to my colleagues about the rules: This can happen to any Member. It has happened to us tonight. I am thankful there were two of us together. Both had our beepers on. I heard, and the cloakroom will probably acknowledge that they said, "Senator DIXON, you are not recorded."

You know, Mr. President, I have missed a rollcall before, so I am not in the position of my distinguished colleague from Wisconsin, who might be upset. I can live with this, and I do want my colleagues to know that it happened once, so it can happen again.

Mr. BAUCUS. Will the Senator yield?

Mr. DOLE. Mr. President, I yield to the Senator from Montana.

Mr. BAUCUS. Mr. President, I do not know what happened. Either there was a failure of the cloakroom to send the message to us or it was a failure of the electronic system. I do not know which one it was. I only know both our beepers were on. We were not given general notification. Both of our beepers must have been on because 5 minutes or so ago, we got individual messages telling us we were not recorded. We dashed over here, but it was just too late. Either there was a failure of the system generally or we were not given notification.

Whatever the reason, Mr. President, I would like to record my opposition to the measure that was just passed even though I was not here, due to a breakdown of the system to record my vote. Had I been present, I would have voted against it.

Mr. LONG. Mr. President, this type of thing has happened many times during the 36 years I have been a Member of the Senate. The minority leader knows this also. He has been a Member almost as many years. I believe it would take an act of Congress, to change this rule but whether it does or not, I think we ought to do what is necessary to change it. Because to have a situation where we cannot correct that type of thing is ridiculous.

When I first came here, there would simply be a long buzz in the Senators' offices, one long ring meant the vote was going on. Many times, the buzzer in your office would fail and a Senator would fail to make the vote and he would come over and explain that to us.

I hope that we would undertake to correct this situation so that Senators who miss votes for reasons like this can be recorded. And while we are at it, I hope we would also consider changing the law or the rule, whichever it takes, so that the leadership on both sides of the aisle could work out an arrangement where any Senator who is not going to be able to be here for a vote could be recorded if he shows up within a given period of time after the vote was over, provided that it would not change the outcome.

It is pretty ridiculous in this day of electronics, where you can see the President carrying out his duties while he is halfway around the world in Europe or Japan, but a Senator who wants to be recorded on a vote cannot be recorded unless he is right here in the Chamber.

It should be changed and I hope very much that we will change it. It seems somewhat ridiculous to me that a Senator can announce days in advance that he wants to be recorded for or against a measure, he can make his voice heard over television, over radio, any electronic medium available to us; yet we are still foreclosing his vote unless he is in the Chamber prior to the time the vote is announced. It would expedite sessions where the leader wants to have a vote if he did not have to arrange the schedule on the basis of whether Senators who want to be recorded on that vote are going to be in or out of town.

Mr. DIXON. Mr. President, I do not want to delay this matter. I thank my distinguished friend from Louisiana who has contributed so much over such a long period of time. I see so many people on this floor—incidentally, the only ones left except for my friend from Montana and myself—who are men with fabulous seniority—I ask my friend from Idaho to excuse me.

I see my friend from South Carolina, my friend from Louisiana, my friend from West Virginia, my friend from

Kansas, and in the Chair, my friend from Arizona. The five of them together cover so many years of distinguished service here that it boggles the mind. So I do not want to belabor this as a new Member in his fifth year.

I just want to say that in the body I came from, the Illinois Legislature, you could vote if you did not change the result, notwithstanding the fact that you did not meet the obligatory rollcall. I appreciate the fact that you can see times when you would not want to be able to change the result by somebody's coming late. I can see that. But in the situation that I saw a few years ago with my friend from Ohio, who apparently just could not make it in time because of some problem and in the case of my friend from Montana and myself tonight, I really think if you cannot change the result, you ought to be able to get on the rollcall.

I urge my senior colleagues here, all of whom are so respected by every Member, to consider the question of whether we ought to address some method of changing the rules. Or if it requires changing the law, I say to my friend from Louisiana—my leader says it would not.

Mr. BYRD. Mr. President, we all understand the chagrin that our two colleagues have just expressed. I deeply regret that they did not make the rollcall. I do not know of any Senators in this body on either side of the aisle who are more fastidious and conscientious about making rollcalls than both Mr. DIXON and Mr. BAUCUS, and both have excellent attendance records.

They missed the vote this evening not because of any fault of theirs but because of a fault apparently in the electronic system. We are going to investigate this to find out whether or not there is in reality a flaw in this system. There very well could be. I know that, from time to time, I try calling on my automobile telephone, and there are certain zones in this city in which it will not work. It could be, or it may not have been something of this nature. I do want to say again for the RECORD—and our two colleagues know this to be very true—the distinguished majority leader bends over backward to accommodate Senators on both sides if they are unable to make the rollcall vote right on time.

Mr. DIXON. Yes.

Often I go to him and say, "So-and-so is not here; he is being detained over in House building or somewhere in between." The majority leader has never yet refused me that request. I know I tried to do the same when I was majority leader. Mr. Baker did the same when he was majority leader.

I profoundly regret the fact that the two Senators have missed the vote. I hope the RECORD will show precisely by the words that have been spoken not only by them but by their colleagues that they did their best; that they did not intentionally miss this rollcall vote, and that the RECORD will at least show how they would have voted had they been present.

I think there are good reasons for the rule. I think we ought to look into it. If it requires a change in that rule, that is up to the Senate. I think there are good reasons for the rule, but that does not gainsay the fact that I really regret, and am profoundly sorry, that our colleagues missed this vote through no fault of their own.

Mr. DOLE. Mr. President, I join the distinguished minority leader in indicating that we do our best. I assume on this vote of course, they would not have had notice. We held it for a while, but not quite as long because it was the last vote, people wanted to go, and it was close, fairly close. And again I apologize. I recall the rule now or I would not have made the request. I did not mean to embarrass any Senator because I would have no objection if they voted right now. But the distinguished minority leader is correct, that is the rule and a unanimous-consent request cannot be entertained.

Mr. DIXON. I thank both the majority and minority leaders.

ORDERS FOR FRIDAY, OCTOBER 11, 1985

RECESS UNTIL 9:30 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate completes its business today, it stand in recess until 9:30 a.m. on Friday, October 11, 1985, for a pro forma session only. No business will be transacted during Friday's session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT UNTIL 10 A.M., TUESDAY, OCTOBER 15, 1985

Mr. DOLE. Mr. President, I ask unanimous consent that after convening on Friday, the Senate stand in adjournment until 10 a.m. on Tuesday, October 15, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate convenes on Tuesday, October 15, the reading of the Journal be dispensed with, no resolution come over under the rule, the call of the calendar be dispensed with, and following the recognition of the two leaders under the standing order there be a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes, to be followed by a period for the transaction of routine morning business not to extend beyond 11 a.m., with statements limited therein to 5 minutes each; provided further that the morning hour be deemed to have expired.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION FOR BUDGET COMMITTEE REPORT

Mr. DOLE. Mr. President, I ask unanimous consent that the October 15, 1985 deadline by which the Senate Budget Committee must report recommendations relating to Social Security as agreed to by the Senate on September 19, 1985, be extended to November 1, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEASURE HELD AT THE DESK

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate receives from the House, H.R. 1903, a bill to provide for the use and distribution of funds appropriated in satisfaction of judgments awarded to members of the Lake Superior band of Chippewa Indians who are members of the Minnesota Chippewa tribe in dockets 18-S and 18-U before the Indian Claims Commission, and for other purposes, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR H.R. 2174 TO BE HELD AT THE DESK

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate receives from the House H.R. 2174, a bill to provide for the transfer to the Colville Business Council of any undistributed portion of amounts appropriated in satisfaction of certain judgments awarded the Confederated Tribes of the Colville Reservation before the Indian Claims Commission, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR HOUSE JOINT RESOLUTION 386 TO BE HELD AT THE DESK

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate receives from the House House Joint Resolution 386, to designate November 24 as "National Day of Fastings," it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL TRADE COMMISSION AUTHORIZATION ACT

Mr. DOLE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1078.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1078) entitled "An Act to amend the Federal Trade Commission Act to provide authorization of appropriations, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause, and insert:

SECTION 1. SHORT TITLE AND REFERENCE TO ACT.

(a) SHORT TITLE.—This Act may be cited as the "Federal Trade Commission Authorization Act of 1985".

(b) REFERENCE.—Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be a reference to a section or other provision of the Federal Trade Commission Act.

SEC. 2. UNFAIR ACTS OR PRACTICES.

Section 5(a)(1) (15 U.S.C. 45(a)(1)) is amended (1) by inserting "(A)" after "(1)", and (2) by adding at the end thereof the following:

"(B) An act or practice in or affecting commerce shall be considered to be an unfair act or practice under subparagraph (A) if—

"(i) such act or practice causes or is likely to cause substantial injury to consumers; and

"(ii) such substantial injury (I) is not reasonably avoidable by consumers; and (II) is not outweighted by countervailing benefits to consumers or to competition which result from such act or practice.

Any determination under the preceding sentence regarding whether an act or practice is an unfair act or practice shall take into account, in addition to other relevant factors, whether such act or practice violates any public policy as established by Federal or State statutes, common law, practices in business or industry, otherwise. This subparagraph shall not have any force or effect, and shall not be taken into account, in connection with the enforcement of any State law which prevents persons, partnerships, or corporations subject to the jurisdiction of the State from engaging in unfair acts or practices.".

SEC. 3. REVIEW OF CERTAIN CEASE AND DESIST ORDERS.

Section 5(m)(2) (15 U.S.C. 45(m)(2)) is amended by adding at the end thereof the following new sentence: "The court in such action against such defendant also shall review, if requested by any party to the action, the determination of law made by the Commission in the proceeding under subsection (b) that the act or practice of the respondent which was the subject of such proceeding constituted a violation of subsection (a).".

SEC. 4. PREVALENCE OF UNFAIR OR DECEPTIVE ACTS OR PRACTICES OR FALSE ADVERTISEMENTS.

Section 18(a) (15 U.S.C. 57a(a)) is amended by adding at the end thereof the following new paragraph:

"(3) The Commission may issue a notice of proposed rulemaking with respect to any unfair or deceptive act or practice or any false advertisement (as defined in section 15(a)(1)) only if—

"(A) the Commission has issued two or more cease and desist orders regarding such unfair or deceptive act or practice or such false advertisement; or

"(B) any other information available to the Commission provides the Commission with reason to believe that a patten of such unfair or deceptive acts or practices or such false advertisements exists.".

SEC. 5. CIVIL INVESTIGATIVE DEMANDS.

Section 20 (15 U.S.C. 57b-1) is amended—

(1) in subsection (a)(2), by striking out "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "act or practice or method of competition declared unlawful by this Act or any other Federal law administered by the Commission";

(2) in subsection (a)(3), by striking out "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "any act or practice or method of competition declared unlawful by this Act or any other Federal law administered by the Commission";

(3) in subsection (a)(7), by striking out "unfair or deceptive act or practice in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "act or practice or method of competition declared unlawful by this Act or any other Federal law administered by the Commission";

(4) in subsection (b), by striking out "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "any act or practice or method of competition declared unlawful by this Act or any other Federal law administered by the Commission"; and

(5) in subsection (c)(1), by striking out "unfair or deceptive acts or practices in or affecting commerce (within the meaning of section 5(a)(1))" and inserting in lieu thereof "any act or practice or method of competition declared "any act or practice or method of competition declared unlawful by this Act or any other Federal law administered by the Commission".

SEC. 6. RESTRICTION OF COMMISSION AUTHORITY RELATING TO AGRICULTURAL COOPERATIVES.

The Federal Trade Commission Act is amended by redesignating sections 24 and 25 as sections 26 and 27, respectively, and by inserting after section 23 the following new section:

"SEC. 24. (a) The Commission shall not have any authority to conduct any study, investigation, or prosecution of any agricultural cooperative for any conduct which, because of the provisions of the Act entitled 'An Act to authorize association of producers of agricultural products', opposed February 18, 1922 (7 U.S.C. 291 et seq., commonly known as the Capper-Volstead Act), is not a violation of any of the antitrust Acts or this Act.

"(b) The Commission shall not have any authority to conduct any study or investigation of any agricultural marketing orders.".

SEC. 7. AUTHORIZATION OF APPROPRIATIONS.

Section 26, as so redesignatged in section 6, is amended to read as follows:

"SEC. 26. To carry out the functions, powers, and duties of the Commission there are authorized to be appropriated $63,900,000 for fiscal year 1986, $64,200,000 for fiscal year 1987, and $64,300,000 for fiscal year 1988.".

SEC. 8. DISAPPROVAL OF FTC RULES.

(a) AMENDMENT.—The Federal Trade Commission Act is amended by inserting after section 24, added by section 6, the following:

"SEC. 25. (a) The Commission, after promulgating a final rule, shall submit such final rule to the Congress for review in accordance with this section. Such final rule shall be delivered to each House of the Congress on the same day and to each House of Congress while it is in session.

"(b) Any final rule of the Commission shall become effective in accordance with its terms unless before the end of the period of 90 days of continuous session of Congress after the date such final rule is submitted to the Congress a joint resolution disapproving such final rule is enacted into law.

"(c)(1) If a final rule of the Commission is disapproved in accordance with this section, the Commission may promulgate another final rule which relates to the same acts or practices as the rule which was disapproved. Such other final rule—

"(A) shall be based upon—

"(i) the rulemaking record of the disapproved final rule; or

"(ii) such rulemaking record and any record established in supplemental rulemaking proceedings conducted by the Commission; and

"(B) may contain such changes as the Commission considers necessary or appropriate.

Supplemental rulemaking proceedings referred to in subparagraph (A)(ii) may be conducted in accordance with section 553 of title 5, United States Code, if the Commission determines that it is necessary to supplement the existing rulemaking record.

"(2) The Commission, after promulgating a final rule under this subsection, shall submit the final rule to Congress in accordance with subsection (a).

"(d) Congressional inaction on a joint resolution disapproving a final rule of the Commission shall not be construed—

"(1) as an expression of approval of such rule, or

"(2) as creating any presumption of validity with respect to such rule.

"(e)(1)(A) For purposes of subsection (b), continuity of session is broken only by an adjournment sine die at the end of the second regular session of a Congress.

"(B) The days on which either House of Congress is not in session because of an adjournment of more than five days to a day certain are excluded in the computation of the period specified in subsection (b).

"(2)(A) In any case in which a final rule of the Commission is prevented from becoming effective by an adjournment sine die at the end of the second regular session of the Congress before the expiration of the period specified in subsection (b), the Commission shall resubmit such rule at the beginning of the first regular session of the next Congress.

"(B) The period specified in subsection (b) shall begin on the date of a resubmission under subparagraph (A).

"(f) For purposes of this section:

"(1) The term 'joint resolution' means a joint resolution the matter after the resolving clause of which is as follows: 'That the final rule promulgated by the Federal Trade Commission dealing with the matter of , which final rule was submitted to Congress on is disapproved.', the first blank being filled with the subject of the rule and such further description as may be necessary to identify it, and the second blank being filled with the date of submittal of the rule to the Congress.

"(2) The term 'rule' means any rule promulgated by the Commission pursuant to

this Act other than a rule promulgated under section 18(a)(1)(A)."

(b) CONFORMING AMENDMENT.—Section 21 of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a-1) is repealed.

SEC. 9. INTERVENTION BY COMMISSION IN CERTAIN PROCEEDINGS.

(a) GENERAL RULE.—The First Trade Commission shall not have any authority to use any funds which are authorized to be appropriated to carry out the Federal Trade Commission Act (15 U.S.C. 41 et seq.) for fiscal year 1986, 1987, or 1988, for the purpose of submitting statements to, appearing before, or intervening in the proceedings of, any Federal or State agency unless the Commission advises the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives, at least sixty days before any such proposed action, or, if such advance notice is not practicable, as far in advance of such proposed action as is practicable.

(b) NOTICE.—The notice required in subsection (a) shall include the name of the agency involved, the date upon which the Federal Trade Commission will first appear, intervene, or submit comments, a concise statement regarding the nature and purpose of the proposed action of the Commission, and, in any case in which advance notice of sixty days is not practicable, a concise statement of the reasons such notice is not practicable.

SEC. 10. NATIVE AMERICAN ARTS AND CRAFTS.

The Federal Trade Commission shall investigate the marketing of imitation Native American arts, crafts, and jewelry. The Commission shall, upon the expiration of eighteen months after the date of the enactment of this Act, report to the Congress on the investigation made under the preceding sentence. The Commission shall develop and distribute a consumer information brochure designed to assist consumers in identifying imitation Native American arts, crafts, and jewelry. The brochure shall be completed and distribution begun not later than six months after the date of the enactment of this Act.

SEC. 11. LIFE CARE HOME STUDY.

(a) STUDY.—The Federal Trade Commission shall conduct a study of unfair and deceptive practices in the life care home industry, including practices engaged in by life care homes. Within 2 years of the date of the enactment of this section, the Commission shall report the findings and conclusions of the study to Congress. If the Commission finds a rulemaking is warranted under section 18 of the Federal Trade Commission Act, the Commission shall, promptly after completion of the study, initiate a trade regulation rule proceeding under such section 18 respecting unfair and deceptive acts or practices in the life care home industry. If the Commission determines a rulemaking is not warranted, the Commission shall include in the report to Congress the reasons for such determination.

(b) DEFINITIONS.—For purposes of subsection (a):

(1) The term "life care home" includes the facility or facilities occupied, or planned to be occupied, by residents or prospective residents where a provider undertakes to provide living accommodations and services pursuant to a life care contract.

(2) The term "life care contract" includes a contract between a resident and a provider to provide the resident, for the duration of such resident's life, living accommodations and related services in a life care home, including nursing care services, medical services, and other health-related services, which is conditioned upon the transfer of an entrance fee to the provider and which may be further conditioned upon the payment of periodic service fees.

SEC. 12. NURSING HOME STUDY.

(a) GENERAL RULE.—The Federal Trade Commission shall continue studying unfair and deceptive acts and practices in the nursing home industry, including practices engaged in by nursing homes. Within one year of the date of the enactment of this section, the Commission shall report to the Congress the findings and conclusions of the study. If the Commission finds a rulemaking is warranted under section 18 of the Federal Trade Commission Act, the Commission shall, promptly after the completion of the study, initiate a trade regulation rule proceeding under such section 18 respecting unfair and deceptive acts or practices in the nursing home industry. If the Commission determined a rulemaking is not warranted, the Commission shall include in the report to Congress the reasons for such determination.

(b) DEFINITION.—For purposes of subsection (a), the term "nursing home" includes a residential facility that provides convalescent or chronic nursing care, or both, for persons unable to care for themselves.

SEC. 13. PREDATORY PRICING.

(a) The Federal Trade Commission shall submit to the Committee on Energy and Commerce of the House of Representatives and to the Committee on Commerce, Science, and Transportation of the Senate the information specified in subsection (b) of this section every 6 months during each of the fiscal years 1986 and 1987. A report containing such information shall be submitted when the Commission submits its annual report to the Congress during each of such fiscal years and such report may be included in the annual report. A separate report containing such information shall be submitted 6 months after the date of submission of any such annual report. Each such report shall contain such information for the period since the last submission under this section.

(b) Each report shall list and describe, with respect to instances in which predatory pricing practices have been suspected or alleged—

(1) each complaint made, orally or in writing, to the offices of the Commission;

(2) each preliminary investigation opened or closed at the Commission;

(3) each formal investigation opened or closed at the Commission;

(4) each recommendation for the issuance of a complaint forwarded by the staff to the Commission;

(5) each complaint issued by the Commission;

(6) each opinion and order entered by the Commission;

(7) each consent agreement accepted provisionally or finally by the Commission;

(8) each request for modification of an outstanding Commission order filed with the Commission;

(9) each recommendation by staff pertaining to a request for modification of an outstanding Commission order; and

(10) each disposition by the Commission of a request for modification of an outstanding Commission order.

Such report shall include copies of all consent agreements and complaints executed by the Commission referred to in the report. Where a matter has been closed or terminated, the report shall include a statement of the reasons for that disposition. The descriptions required under this subsection shall be as complete as possible. The report shall include any evaluation given to the potential impacts of predatory pricing upon businesses (including small businesses). The report shall not reveal the identity of persons or companies complained about or those subject to investigation that have not otherwise been made public.

SEC. 14. EFFECTIVE DATES, APPLICABILITY OF AMENDMENTS.

(a) GENERAL RULE.—Except as otherwise provided in this section, the provisions of this Act, and the amendments made by this Act, shall take effect on October 1, 1985.

(b) SECTION 2.—

(1) The amendments made in section 2 shall apply only to—

(A) cease and desist orders issued by the Federal Trade Commission under section 5 of the Federal Trade Commission Act (15 U.S.C. 45) on or after October 1, 1985; and

(B) rules for which advance notices of proposed rulemaking are published in the Federal Register by the Commission under section 18(b)(2)(A) of such Act (15 U.S.C. 57a(b)(2)(A)) on or after October 1, 1985.

(2) The amendments referred to in paragraph (1) shall not be construed to affect in any manner any cease and desist order issued on or after October 1, 1985, if such order is issued in accordance with a remand, from a court of appeals of the United States or the Supreme Court of the United States, of any cease and desist order issued by the Commission before such date.

(c) SECTION 4.—

(1) The amendments made in section 4 shall apply only to rules of the Federal Trade Commission for which advance notices of proposed rulemaking are published in the Federal Register by the Commission under section 18(b)(2)(A) of the Federal Trade Commission Act (15 U.S.C. 57a(b)(2)(A)) on or after October 1, 1985.

(2) In the case of any rule of the Commission which has not become final before October 1, 1985, but for which such advance notice has been published before such date, the Commission shall include with its submission of such rule to the Congress under section 25 of the Federal Trade Commission Act a statement describing the extent of the prevalence of occurrences of the unfair or deceptive act or practice, or the false advertisement, which is the subject of such rule.

(d) SECTION 8.—Section 25 of the Federal Trade Commission Act, as added by section (8), shall apply with respect to final rules of the Commission promulgated after October 1, 1985.

Amend the title so as to read: "An Act to amend the Federal Trade Commission Act to extend the authorization of appropriations contained in such Act, and for other purposes.".

Mr. DOLE. Mr. President, I move that the Senate disagree to the House amendments and request a conference with the House on the disagreeing votes thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Mr. DANFORTH, Mr. KASTEN, Mr. GORTON, Mr. HOLLINGS, and Mr. FORD conferees on the part of the Senate.

Mr. DOLE. Mr. President, on behalf of Senator GRASSLEY, I move that the Senate conferees be instructed to insist on the Senate's position regarding the maintenance of the sections of the bill relating to legislative veto, in particular sections 16 and 17, of S. 1078.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. DOLE. Mr. President, this motion to instruct the conferees, which the Senate has just agreed to, is not a common Senate procedure. Therefore, Senator DANFORTH, chairman of the Commerce Committee which has jurisdiction over S. 1078, asked the Senate Parliamentarian to document the exact legal effect of such a motion. I have a letter from the Parliamentarian to Senator DANFORTH, and I ask unanimous consent that it be printed in full in the RECORD immediately following these remarks. This letter clearly states that no instructions to Senate conferees, either through unanimous consent or by motion, has any binding authority on such conferees. Likewise, such a motion does not subject any subsequent conference report to a point of order should these instructions not be followed.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OCTOBER 8, 1985.

Hon. JOHN DANFORTH,
U.S. Senate, Washington, DC.

DEAR SENATOR DANFORTH: This is in response to your request concerning instructions to Senate conferees. Instructions, whether by motion or by unanimous consent, are not binding on Senate conferees. Recent Senate precedents confirm that a conference report may be received by the Senate although it may be in violation of instructions given to the conferees. As stated in Dr. Riddick's book on Senate procedure:

Conferees are not bound by instructions; "the conferees could even ignore the instructions," and the report would not be subject to a point of order.

I hope this will be of use to you. Please let me know if I can be of any further assistance.

Sincerely,

ROBERT B. DOVE,
Parliamentarian.

AUTHORITY TO FILE CONFERENCE REPORT ON H.R. 2409

Mr. DOLE. Mr. President, I ask unanimous consent that the conference committee for H.R. 2409, Health Research Extension Act, be permitted to file a conference report to accompany H.R. 2409, until 5 p.m., on Friday, October 11.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that when the conference report has been filed, it be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

FUNDING FOR THE SPECIAL DEFENSE ACQUISITION FUND

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 331, S. 1726.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1726) to repeal section 121(b) of the International Security and Development Cooperation Act of 1985 (Public Law 99-83), relating to funding for the Special Defense Acquisition Fund.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 774

(Purpose: To clarify the purpose of the bill which is to reinstate certain provisions of law that were in effect on September 30, 1985, with respect to the Special Defense Acquisition Fund)

Mr. DOLE. Mr. President, I send to the desk an amendment in the nature of a substitute, on behalf of Senator LUGAR.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE], for Mr. LUGAR, proposes an amendment numbered 774.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. FUNDING FOR THE SPECIAL DEFENSE ACQUISITION FUND.

(a) AMENDMENT TO SECTION 51(b) OF THE ARMS EXPORT CONTROL ACT.—Subsection (b) of section 51 of the Arms Export Control Act (22 U.S.C. 2795(b)) is amended to read as follows:

"(b) The Fund shall consist of—

"(1) collections from sales made under letters of offer issued pursuant to section 21(a)(1)(A) of this Act representing the actual value of defense articles not intended to be replaced in stock,

"(2) collections from sales representing the value of asset use charges (including contractor rental payments for United States Government-owned plant and production equipment) and charges for the proportionate recoupment of nonrecurring research, development, and production costs, and

"(3) collections from sales made under letters of offer (or transfers made under the Foreign Assistance Act of 1961) of defense articles and defense services acquired under this chapter, representing the value of such items calculated in accordance with subparagraph (B) or (C) of section 21(a)(1) or section 22 of this Act or section 644(m) of the Foreign Assistance Act of 1961, as appropriate,

together with such funds as may be authorized and appropriated or otherwise made available for the purposes of the Fund.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect as of October 1, 1985.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 774) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 1726) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1726

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FUNDING FOR THE SPECIAL DEFENSE ACQUISITION FUND.

(a) AMENDMENT TO SECTION 51(b) OF THE ARMS EXPORT CONTROL ACT.—Subsection (b) of section 51 of the Arms Export Control Act (22 U.S.C. 2795(b)) is amended to read as follows:

"(b) The Fund shall consist of—

"(1) collections from sales made under letters of offer issued pursuant to section 21(a)(1)(A) of this Act representing the actual value of defense articles not intended to be replaced in stock,

"(2) collections from sales representing the value of asset use charges (including contractor rental payments for United States Government-owned plant and production equipment) and charges for the proportionate recoupment of nonrecurring research, development, and production costs, and

"(3) collections from sales made under letters of offer (or transfers made under the Foreign Assistance Act of 1961) of defense articles and defense services acquired under this chapter, representing the value of such items calculated in accordance with subparagraph (B) or (C) of section 21(a)(1) or section 22 of this Act or section 644(m) of the Foreign Assistance Act of 1961, as appropriate,

together with such funds as may be authorized and appropriated or otherwise made available for the purpose of the Fund.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect as of October 1, 1985.

The title was amended so as to read: "A Bill to amend section 51(b) of the Arms Export Control Act, relating to the funding of the Special Defense Acquisition Fund.".

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORITY TO COMPUTE HOURLY RATES OF BASIC PAY OF EMPLOYEES OF THE FEDERAL GOVERNMENT EXTENSION

Mr. DOLE. Mr. President, I send a bill to the desk on behalf of Senator STEVENS and ask for its immediate consideration.

The PRESIDING OFFICER. The bill will be stated.

The legislative clerk read as follows:

A bill (S. 1760) to extend the authority to compute hourly rates of basic pay of employees of the Federal Government in the manner provided in the Omnibus Reconciliation Act of 1982.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. STEVENS. Mr. President, the Consolidated Omnibus Budget Reconciliation Act of 1985 (S. 1730) permanently shifts the computation of hourly pay rates for Federal employees from 2,080 to 2,087 hours.

The Omnibus Reconciliation Act of 1982 made the same computation change for fiscal years 1984 and 1985; that authority expired on September 30, 1985.

To comply with the 1985 Budget Act we must pass this proposed legislation. When it becomes law, the computation of hourly pay rates between October 1, 1985, and the passage of the Budget Reconciliation Act of 1985 will be based once again on 2,080 hours.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1760

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 310(b)(1) of the Omnibus Budget Reconciliation Act of 1982 (96 Stat. 799; 5 U.S.C. 5504 note) is amended by striking out "1984 and 1985" and inserting in lieu thereof "1984, 1985, and 1986".

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

WATER RESOURCES DEVELOPMENT ACT OF 1985—REFERRAL

Mr. DOLE. Mr. President, I ask unanimous consent that a unanimous-consent agreement signed by Senators PACKWOOD, STAFFORD, BENTSEN, and LONG be made a part of the RECORD at this point and be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The unanimous-consent agreement is as follows:

UNANIMOUS-CONSENT AGREEMENT

Mr. President, I ask unanimous consent that S. 1567, the "Water Resources Development Act of 1985," as reported by the Committee on Environment and Public Works, be referred to the Committee on Finance and the Committee on Finance be limited to the consideration of such provisions as are within the jurisdiction of Committee on Finance with respect to title 8 and section 606; that any conferees appointed on behalf of the Senate regarding said provisions of title 8 and section 606, or such similar provisions of the House companion measure to S. 1567, shall be Members of the Committee on Finance only; that they be limited in their participation to those provisions: *Provided,* That, any conferees appointed who are Members of both Committees shall participate with respect to all titles: *And Provided, further,* That, it shall not be in order to consider a conference report on S. 1567, or its House companion measure, unless a majority of conferees who are members of the Committee on Finance have signed such conference report with respect to section 606 and title 8, and a majority of conferees who are members of the Committee on Environment and Public Works have signed such conference report.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 11:08 a.m., a message from the House of Representatives, delivered by Ms. Gotez, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

H.R. 2410. An act to amend the Public Health Service Act to revise and extend the programs under title VII of that Act.

The enrolled bill was subsequently signed by the President pro tempore [Mr. THURMOND].

At 2:52 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill and joint resolutions, without amendment:

S. 1349. An act to provide for the use and distribution of funds awarded in docket 363 to the Mdewakanton and Wahpekute Eastern or Mississippi Sioux before the United States Court of Claims and Claims Court;

S.J. Res. 72. Joint resolution to designate October 16, 1985, as "World Food Day";

S.J. Res. 155. Joint resolution to designate the month of November 1985 as "National Hispanic Month";

S.J. Res. 158. Joint resolution designating February 1986 as "National Community College Month";

S.J. Res. 175. Joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "National CPR Awareness Week";

S.J. Res. 183. Joint resolution to provide for the designation of the week of October 6 through October 12, 1985, as "Myasthenia Gravis Awareness Week";

S.J. Res. 194. Joint resolution to designate the week beginning October 1, 1985, as "National Buy American Week; and

S.J. Res. 197. Joint resolution to designate the week of October 6, 1985 through October 13, 1985, as "National Housing Week".

The message also announced that the House has passed the following bills and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 3008. An act to promote equitable pay practices and to eliminate discrimination within the Federal civil service;

H.R. 3443. An act to designate the Closed Basin Conveyance Channel of the Closed Basin Division, San Luis Valley Project, Colorado as the "Franklin Eddy Canal";

H.J. Res. 79. Joint resolution to designate the week beginning October 6, 1985, as "National Children's Week";

H.J. Res. 259. Joint resolution to designate November 30, 1985, as "National Mark Twain Day";

H.J. Res. 313. Joint resolution to authorize the President to issue a proclamation designating the week beginning October 20, 1985, as "The Lessons of Grenada Week";

H.J. Res. 322. Joint resolution to provide for the designation of October 1985, as "National Sudden Infant Death Syndrome Awareness Month";

H.J. Res. 386. Joint resolution to designate November 24, 1985, as "National Day of Fasting to Raise Funds to Combat Hunger"; and

H.J. Res. 407. Joint resolution designating the twelve-month period ending on October 28, 1986, as the "Centennial Year of Liberty in the United States".

ENROLLED JOINT RESOLUTIONS SIGNED

At 4:46 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res. 155. Joint resolution to designate the month of November 1985 as "National Hospice Month";

S.J. Res. 183. Joint resolution to provide for the designation of the week of October 6 through October 12, 1985, as "Myasthenia Gravis Awareness Week";

S.J. Res. 194. Joint resolution to designate the week beginning October 1, 1985, as "National Buy American Week"; and

S.J. Res. 197. Joint resolution to designate the week of October 6, 1985 through October 13, 1985, as "National Housing Week".

The enrolled joint resolutions were subsequently signed by the President pro tempore [Mr. THURMOND].

MEASURES REFERRED

The following bills and joint resolutions were read the first and second times by unanimous consent, and referred as indicated:

H.R. 2698. An act to designate the United States Courthouse in Tucson, Arizona, as the "James A. Walsh United States Courthouse"; to the Committee on Environment and Public Works.

H.R. 3008. An act to promote equitable pay practices and to eliminate discrimination within the Federal Civil Service; to the Committee on Governmental Affairs.

H.R. 3443. An act to designate the Closed Basin Conveyance Channel of the Closed Basin Division, San Luis Valley Project, Colorado as the "Franklin Eddy Canal"; to the Committee on Energy and Natural Resources.

H.J. Res. 79. Joint resolution to designate the week beginning October 6, 1985, as "National Children's Week"; to the Committee on the Judiciary.

H.J. Res. 259. Joint resolution to designate November 30, 1985, as "National Mark Twain Day"; to the Committee on the Judiciary.

H.J. Res. 313. Joint resolution to authorize the President to issue a proclamation designating the week beginning October 20, 1985, as "The Lessons of Grenada Week"; to the Committee on the Judiciary.

H.J. Res. 322. Joint resolution to provide for the designation of October 1985, as "National Sudden Infant Death Syndrome Awareness Month"; to the Committee on the Judiciary.

H.J. Res. 407. Joint resolution designating the twelve-month period ending on October 28, 1986, as the "Centennial Year of Liberty in the United States"; to the Committee on the Judiciary.

MEASURES HELD AT THE DESK

The following bills and joint resolution were ordered held at the desk by unanimous consent pending further disposition:

H.R. 1903. An act to provide for the use and distribution of funds appropriated in satisfaction of judgements awarded to the Chippewas of Lake Superior in Dockets Numbered 18S, 18U, 18C, and 18T before the Indian Claims Commission; and

H.R. 2174. An act to provide for the transfer to the Colville Business Council of any undistributed portion of amounts appropriated in satisfaction of certain judgements awarded in the Confederated Tribes of the Colville Reservation before the Indian Claims Commission.

H.J. Res. 386. Joint resolution to designate November 24, 1985, as "National Day of Fasting to Raise Funds to Combat Hunger";

S.J. Res. 155. Joint resolution to designate the month of November 1985 as "National Hospice Month";

S.J. Res. 183. Joint resolution to provide for the designation of the week of October 6 through October 12, 1985, as "Myasthenia Gravis Awareness Week";

S.J. Res. 194. Joint resolution to designate the week beginning October 1, 1985, as "National Buy American Week"; and

S.J. Res. 197. Joint resolution to designate the week of October 6, 1985 through October 13, 1985, as "National Housing Week."

ENROLLED JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that on today, October 10, 1985, she had presented to the President of the United States the following enrolled joint resolutions:

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1871. A communication from the Secretary of Housing and Urban Development transmitting, pursuant to law, the quarterly report on HUD-owned multifamily project negotiated sales; to the Committee on Banking, Housing, and Urban Affairs.

EC-1872. A communication from the Secretary of the Interior transmitting, pursuant to law, the 1984 annual report of the Office of Surface Mining; to the Committee on Energy and Natural Resources.

EC-1873. A communication from the Acting Comptroller General of the United States transmitting, pursuant to law, a list of GAO reports released during the month of August 1985; to the Committee on Governmental Affairs.

EC-1874. A communication from the Assistant Secretary of the Treasury transmitting, pursuant to law, a report on a change in a Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1875. A communication from the D.C. Auditor transmitting, pursuant to law, a report entitled "Revenue Report for July 1985"; to the Committee on Governmental Affairs.

EC-1876. A communication from the Commissioner of the Immigration and Nationality Service transmitting, pursuant to law, a report on 62 waivers granted under section 207(c)(3) of the Immigration and Nationality Act during the third quarter of fiscal year 1985; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LUGAR, from the Committee on Foreign Relations, with an amendment in the nature of a substitute:

S. 947. A bill to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation (Rept. No. 99-156).

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 235. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1714.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Paul Freedenberg, of Maryland, to be an Assistant Secretary of Commerce.

(The above nomination was reported from the Committee on Banking, Housing, and Urban Affairs with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. Stafford, from the Committee on Environment and Public Works:

Orson G. Swindle, III, of Georgia, to be an Assistant Secretary of Commerce.

(The above nomination was reported from the Committee on Environment and Public Works with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. GOLDWATER, from the Committee on Armed Services:

Mr. GOLDWATER. Mr. President, from the Committee on Armed Services, I report favorably the attached listing of nominations.

Those identified with a single asterisk (*) are to be placed on the Executive Calendar. Those identified with a double asterisk (**) are to lie on the Secretary's desk for the information of any Senator since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of September 16, September 17, September 20, and October 2, 1985, at the end of the Senate proceedings.)

**1. In the Army there are 222 permanent promotions to the grade of lieutenant colonel (list begins with Marc A. Abramowitz). (Ref. No. 576)

**2. In the Army Reserve there are 588 promotions to the grade of colonel and below (list begins with William F. Reade). (Ref. No. 591)

*3. In the Army National Guard there are 4 appointments in the Reserve of the Army to the grade of major general (list begins with Edward D. Baca). (Ref. No. 597)

**4. In the Air National Guard there are 2 promotions to the grade of lieutenant colonel (list begins with John M. Lounge). (Ref. No. 598)

**5. In the Army Reserve there are 51 promotions to the grade of colonel and below (list begins with Jon W. Day). (Ref. No. 599)

**6. In the Army National Guard there are 64 promotions in the Reserve of the Army to the grade of colonel and below (list begins with Henry W. Adams). (Ref. No. 600)

**7. In the Army there are 115 appointments to the grade of colonel and below (list begins with Giorgio S. Tureila). (Ref. No. 601)

**8. In the Navy there are 44 appointments to the grade of commander and below

(list begins with Robert A. Fabrini). (Ref. No. 624)

Total 1,090.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

L. William Seidman, of Arizona, to be a Member of the Board of Directors of the Federal Deposit Insurance Corporation for a term of six years.

(The above nomination was reported from the Committee on Banking, Housing, and Urban Affairs with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DENTON (for himself and Mr. COCHRAN):

S. 1755. A bill to amend the Inspector General Act of 1978 to establish an Office of Inspector General in the Tennessee Valley Authority; to the Committee on Environment and Public Works.

By Mr. SIMON (for himself, Mr. HATFIELD, Mr. PELL, Mr. ROCKEFELLER, Mr. BAUCUS, Mr. DOLE, Mr. DODD, Mr. KENNEDY, Mr. CRANSTON, Mr. COCHRAN, Mr. SARBANES, Mr. KERRY, Mr. ANDREWS, Mr. COHEN and Mr. BRADLEY):

S. 1756. A bill to authorize the President to present to Sargent Shriver, on behalf of the Congress, a specially struck medal; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. LUGAR (by request):

S. 1757. A bill to authorize assistance to combat terrorism in Central America, and for other purposes; to the Committee on Foreign Relations.

By Mr. DODD.

S. 1758. A bill for the relief of Jean Claude Jasa, his wife Helene Marcelle Laurent Jasa, and their child Sylvie H. Jasa; to the Committee on the Judiciary.

By Mr. CHAFEE (for himself, Mr. COHEN, and Mr. MURKOWSKI):

S. 1759. A bill to establish a Commercial Fishing Industry Vessel Advisory Committee; to the Committee on Commerce, Science, and Transportation.

By Mr. DOLE (for Mr. STEVENS):

S. 1760. To extend the authority to compute hourly rates of basic pay of employees for the Federal Government in the manner provided in the Omnibus Reconciliation Act of 1982; considered and passed.

By Mr. STAFFORD:

S. 1761. A bill to amend the Atomic Energy Act of 1954, as amended, to establish a comprehensive, equitable reliable, and efficient mechanism for full compensation of the public in the event of an accident arising out of activities of Nuclear Regulatory Commission licenses or undertaken pursuant to the Nuclear Waste Policy Act of 1982 involving nuclear materials; to the Committee on Environment and Public Works.

By Mr. HATCH (for himself and Mr. KENNEDY):

S. 1762. A bill to amend the Public Health Service Act to revise and extend the program of assistance for health maintenance organizations; to the Committee on Labor and Human Resources.

By Mr. HEINZ (for himself, Mr. GARN, Mr. DIXON, Mr. DANFORTH, and Mr. CHAFEE).

S. 1763. A bill to eliminate foreign predatory export credit practices, establish a tied aid credit facility, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HATCH (for himself, Mr. KENNEDY, Mr. TRIBLE, Mr. THURMOND, Mr. DOLE, Mr. BAUCUS, Mr. WEICKER, Mr. WALLOP, Mr. NICKLES, Mr. INOUYE, Mr. BURDICK, Mr. ZORINSKY, Mr. ROCKEFELLER, Mr. GARN, Mr. LEVIN, Mr. QUAYLE, Mr. SIMON, Mr. GRASSLEY, Mr. SYMMS, Mr. CRANSTON, Mr. METZENBAUM, Mr. KERRY, Mr. CHAFEE, Mr. PELL, Mr. DODD, Mr. ANDREWS, Mr. BOREN, Mr. STAFFORD, Mr. BYRD, Mr. NUNN, Mr. MATSUNAGA, Mr. MURKOWSKI, Mr. RIEGLE, and Mrs. HAWKINS):

S.J. Res. 218. A joint resolution to designate November 24, 1985, as "National Day of Fasting To Raise Funds to Combat Hunger"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BRADLEY (for himself, Mr. KASTEN, and Mr. SIMON):

S. Con. Res. 78. A concurrent resolution in support of universal access to immunization by 1990 and accelerated efforts to eradicate childhood diseases; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DENTON (for himself and Mr. COCHRAN):

S. 1755. A bill to amend the Inspector General Act of 1978 to establish an Office of Inspector General in the Tennessee Valley Authority; to the Committee on Environment and Public Works.

ESTABLISHMENT OF THE OFFICE OF INSPECTOR GENERAL AT THE TENNESSEE VALLEY AUTHORITY

Mr. DENTON. Mr. President, today I am joined by my distinguished colleague from Mississippi, Senator COCHRAN, in introducing a bill to amend the Inspector General Act of 1978 to establish an Office of Inspector General at the Tennessee Valley Authority. The bill is a companion to H.R. 3464, introduced in the House of Representatives on October 1 by my distinguished colleague from Alabama, Congressman FLIPPO, and others.

The bill would create an independent Office of Inspector General, which would have the responsibility to receive complaints from TVA's workers, review the rate structure and determination of the rates, and receive complaints from the customers who pay the power bills. In other words, the Office of Inspector General would have the authority to audit and investigate the various activities of TVA. The Inspector General would also report to the Congress on a regular basis. Therefore, the Inspector General's Office would provide a greater degree of public accountability at TVA.

During the last several years, the cancellation or deferral of nuclear power plants, rising power rates, and employee and ratepayer complaints have created a loss of confidence in the management of the TVA system. I want to see public confidence restored to the agency and the problems resolved to the greatest degree possible.

I believe that the bill is a step in the right direction to alleviate the concerns of the workers and citizens of the TVA region. I also believe that the Office of Inspector General will be able greatly to assist the Board and its management by identifying specific concerns, and by providing an independent and fresh viewpoint about how TVA can become more efficient and more responsive to the people it serves.

I realize that the TVA Board of Directors is currently working to reorganize the management of its nuclear program. Some of the problems that currently exist have, however, been obvious for several years. TVA has the responsibility to ensure that its programs are run in a way that does not expose it, and its ratepayers, to unnecessary costs.

Members of the congressional delegation from the TVA region are concerned about the current situation. We share the same goals, which are to increase the accountability of the agency and to restore the confidence of its workers and ratepayers. We want the most efficiently run system that provides power at the lowest possible cost and that provides the greatest degree of economic opportunity. The legislation introduced today will contribute toward that goal.

I commend Congressman FLIPPO for his foresight and initiative on this issue, and I hope that this Senate bill will help to make an independent Inspector General a reality.

Mr. President, I ask unanimous consent that the bill be inserted in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1755

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. FINDINGS.

The Congress hereby finds and declares that the Tennessee Valley Authority is a government corporation with all the powers of the corporation vested in the Board of Directors, thus the citizens and rate payers within the service area and the employees of the corporation lack a statutory means for an indepdendent review of the corpora-

tion's policies and its actions to implement policies in such matters as direction of the corporation, changes in electric rate structure and periodic rate adjustments, personnel policies and the implementation of personnel policies, and other activities.

The economy, efficiency and effectiveness of the operations of the corporation are lessened by the loss of confidence of the citizens in the service area in the actions of the board, sometimes involving complex and technical judgements, and the poor morale of employees who have no effective avenues for review of concerns about public safety, harassment, intimidation, favoritism and other employee questions outside of the managers responsible for establishing and implementing the policies giving rise to the concerns. Support of both the public and the corporation's employees is directly related to the future wellbeing of the Tennessee Valley Authority.

Establishment of an Office of Inspector General for the Tennessee Valley Authority will provide the board, the employees and the people of the service area with an independent and objective review and appraisal of the corporation's policies and the implementation of those policies and thus strengthen the corporation by enhancing the confidence of the people in the economy, efficiency effectiveness of the corporation's activities.

SEC. 2. ESTABLISHMENT OF OFFICE.

The Inspector General Act of 1978 (hereafter in this Act referred to as the "Act") is amended—

(1) by inserting "the Tennessee Valley Authority," after "the Small Business Administration," in section 2(1);

(2) in section 11(1)—

(A) by striking out "or the Administrator" and inserting in lieu thereof "; the Administrator"; and

(B) by striking out "Veterans' Affairs," and inserting in lieu thereof "Veterans' Affairs; or the chairman of the Board of Governors of the Tennessee Valley Authority;"

(3) in section 11(2)—

(A) by striking out "or the Agency" and inserting in lieu thereof "; the Agency"; and

(B) by striking out "Veterans' Administration," and inserting in lieu thereof "Veterans' Administration; or the Tennessee Valley Authority;".

SEC. 3. SPECIAL PROVISIONS RELATING TO THE TENNESSEE VALLEY AUTHORITY

The Act is further amended by inserting after section 8A the following new section:

"SPECIAL PROVISIONS RELATING TO THE TENNESSEE VALLEY AUTHORITY

"SEC. 8B. (a) In additional to other duties and responsibilities specified in this Act, the Inspector General of the Tennessee Valley Authority shall receive public comments on the corporation's policies on electric power rates and on the corporation's periodic rate adjustments, and shall review the appropriateness of the corporation's actions under the mandates of the Tennessee Valley Authority Act and other applicable legislation, and shall report the findings to the Chairman of the Board and to the Congress.

"(b) In addition to the Assistant Inspector Generals provided for in section 3(d) of this Act, the Inspector General of the Tennessee Valley Authority shall, in accordance with applicable laws and regulations governing appointments in the Tennessee Valley Authority appoint an Assistant Inspector General for Rate Review who shall have the responsibility for review of electric power rates of the Tennessee Valley Authority. In reviewing such rates, the Assistant Inspector General shall take into account the directives of the Tennessee Valley Authority Act as to revenue requirements and other policies; the cost-of-service principle that each class of customer should bear the costs incurred by the corporation in serving that class; and the obligation to operate the electric power system so that electric energy is available to users at the lowest possible cost.

"(c) In addition to complying with the requirements of section 5, the semiannual report of the Inspector General of the Tennessee Valley Authority shall

(1) include a description of any significant problems affecting the corporation's ability to provide electric energy to consumers at the lowest possible cost.

(2) include a description of any significant problems or delays in transfers of other offices or agencies, or functions, powers or duties thereof, as are properly related to the functions of the Office and would, if so transferred, further the purposes of this Act."

SEC. 4. TRANSFERS OF FUNCTIONS.

Section 9(a)(1) of the Act is amended—

(1) by striking out "and" at the end of subparagraph (M); and

(2) by inserting after subparagraph (M) the following new subparagraph:

"(O) of the Tennessee Valley Authority, the office of that agency referred to as the 'Office of Auditing and Evaluation' and that portion of the office referred to as the 'Office of General Counsel' responsible for the evaluation of complaints concerning fraud, waste and abuse; and".

SEC. 5. EFFECTIVE DATE.

The amendments made by the Act shall take effect on 60 days after becoming a public law.

By Mr. SIMON (for himself, Mr. HATFIELD, Mr. PELL, Mr. ROCKEFELLER, Mr. BAUCUS, Mr. DODD, Mr. DOLE, Mr. KENNEDY, Mr. CRANSTON, Mr. COCHRAN, Mr. SARBANES, Mr. KERRY, Mr. ANDREWS, Mr. COHEN, and Mr. BRADLEY):

S. 1756. A bill to authorize the President to present to Sargent Shriver, on behalf of the Congress, a specially struck medal; to the Committee on Banking, Housing, and Urban Affairs.

PRESENTATION OF A SPECIAL MEDAL TO SARGENT SHRIVER

● Mr. SIMON. Mr. President, I introduce this bill on behalf of myself and Senator HATFIELD to strike a commemorative medal to celebrate the 25th anniversary of the Peace Corps and to honor its first Director, Sargent Shriver, the other past directors, and the citizens who have served in this outstanding program.

There has seldom been an occasion in the history of the United States on which the people and the Government of our country can share a greater sense of pride and satisfaction than the 25th anniversary of the establishment of the Peace Corps. Rarely has there been a program that has reached so many and done so much to enhance the quality of life in every corner of the globe. We can take great satisfaction in the fact that this undertaking has progressed from a modest beginning 25 years ago to today when more than 5,500 volunteers are serving in 62 countries, improving the quality of life, teaching, and sharing technical skills with the people in the developing nations of the world.

I would like to quote Thanat Khoman, the former Foreign Minister of Thailand.

It is indeed striking that this important idea, the most powerful idea in recent times, of a Peace Corps, of youth mingling, living, working with youth, should come from this mightiest nation on earth, the United States. Many of us who did not know about the United States thought of this great nation as a wealthy nation, a powerful nation, endowed with great material strength and many powerful weapons. But how many of us know that in the United States ideas and ideals are also powerful? This is the secret of your greatness, of your might, which is not imposing or crushing people, but is filled with the hope of future goodwill and understanding.

Not only has the Peace Corps been a remarkable success in sharing America's generosity with the world, it has enriched our own country immensely and helped our citizens to learn the languages, customs, traditions, history, and cultures of foreign lands. In fact, we in Congress now have serving in our midst a substantial and growing number of former Peace Corps volunteers, one of whom, our colleague, Senator DODD, is a cosponsor of this amendment.

We in America can be proud of the accomplishments of the men and women of the Peace Corps. We can share an ever greater pride in the generosity of our national spirit which called forth the tens of thousands of volunteers who have responded to the call of their Nation to serve their fellow citizens throughout the world. You can be sure when the history of this era is written that the Peace Corps will serve as a shining example of the very best of America.

I am especially pleased that the first Director of the Peace Corps, Sargent Shriver, who laid the firm foundation for its successful quarter of a century of service was a distinguished longtime resident of my home State of Illinois. Sarge as he is affectionately called by his friends, was a one man dynamo who provided the skills of leadership, a sense of compassion and fairness, and a vision for the future. He set the direction and established the pattern which made the Peace Corps the outstanding success that it is today. "When God designed Shriver," as George Will recently wrote, "He left out second gear."

So this medal is a salute to Sarge Shriver as well as all the other Directors including the present one, Loret Ruppe of Michigan, who continues the proud tradition established by her distinguished predecessors. This is a piece of legislation that I think we can

all join together to support. It commemorates the valiant work over the last 25 years of the men and women of the Peace Corps.

I am pleased today to introduce this bill on behalf of myself, and Senator HATFIELD; as well as Senator ROCKEFELLER, of West Virginia; Senator BAUCUS, of Montana; Senator DODD, of Connecticut; Senator DOLE, of Kansas; Senator KENNEDY, of Massachusetts; Senator CRANSTON, of California; Senator COCHRAN, of Mississippi; Senator SARBANES, of Maryland; Senator KERRY, of Massachusetts; Senator ANDREWS, of North Dakota; Senator PELL, of Rhode Island, and Senator COHEN, of Maine.●

● Mr. HATFIELD. Mr. President, today I take great pleasure in joining my distinguished colleagues from Illinois [Mr. SIMON] and others in introducing legislation which would authorize the President to present to Sargent Shriver, on behalf of Congress, a specially struck medal. This medal would commemorate the 25th anniversary of the establishment of the Peace Corps and recognize the incomparable contribution of Sargent Shriver as the first Director of the Peace Corps.

Since the Peace Corps was first established, approximately 120,000 Americans have served as Peace Corps volunteers, giving up years of their lives to promote world peace and friendship while helping to meet the basic needs of the world's poor. After weeks of intensive training, these dedicated individuals travel to all points of the globe, living and working in the communities to which they are assigned. For 25 years, Americans have been serving in the Peace Corps as coworkers and instructors of the world's poor and needy.

During those 25 years, the Peace Corps has grown in size and scope. This growth owes no small thanks to the energetic leadership of Sargent Shriver, who nurtured the program from its birth. At the direction of President Kennedy, Mr. Shriver took the establishment of the Peace Corps on with his typical enthusiasm and eagerness to meet the challenge. From 1961 to 1965, the program thrived and gained popularity. Traveling and working in more than 50 countries during his tenure as Director, Mr. Shriver constantly sought ways to improve and expand the Peace Corps' impact on the world. When he departed in 1965 to become Director of the Office of Economic Opportunity, Mr. Shriver left to his successors a tradition of leadership forged of hard work and compassion.

This legislation also honors the nine others who have served as Director of the Peace Corps: Jack H. Vaughn; Joseph Blatchford; Kevin O'Donnell; Donald Hess; Nicholas W. Craw; Dr. John Dellenback; Carolyn R. Payton; Richard F. Celeste. This tradition has continued to the present; current Director Loret Ruppe is recognized as a dynamic leader of the organization.

I cannot help but speak about my close personal friend, former Congressman John Dellenback, with whom I served in Oregon government, and joined in Washington to serve as freshmen in the 90th Congress. No location was too remote, no conditions so poor that they were able to stop John from personally visiting a Peace Corps project location. Volunteers received encouragement from a Director who was willing to bed down in a hut, having only a sleeping bag for covering. I will always remember the love and visionary leadership he put into the job of Director of the Peace Corps.

Today the Peace Corps is more popular than ever, providing an opportunity for 6,000 Americans to travel the world as ambassadors of hope and friendship. As this organization celebrates its silver anniversary, I hope every Member in this body will join me in thanking Sargent Shriver and his successors for their admirable work on behalf of the Peace Corps.●

By Mr. LUGAR (by request):

S. 1757. A bill to authorize assistance to combat terrorism in Central America, and for other purposes; to the Committee on Foreign Relations.

CENTRAL AMERICAN COUNTERTERRORISM ACT

● Mr. LUGAR. Mr. President, by request, I introduce for appropriate reference, a bill to authorize assistance to combat terrorisim in Central America. This proposed legislation has been requested by the Department of State and I am introducing it in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comment.

The purpose of this bill is twofold. First, the American people possess an abiding concern with the human rights situation in Central America which has been widely debated in Congress during recent years. One of the principal problem areas in this regard is the historical weakness of the judicial branch of Government in these nations and a corresponding lack of professionalism and effectiveness on the part of law enforcement agencies. This legislation directly addresses this important question by providing the funding to implement a prudent plan aimed at improving the administration of justice in this critical region.

Second, it has become obvious during recent months that the subversive groups in Central America, frustrated by their inability to carry classical guerrilla warfare strategies to a successful conclusion, have had increasing recourse to simple acts of terrorism. To date, the most obvious and frightful manifestations of this trend have been the murder of our marine guards and other civilians in San Salvador and the more recent kidnaping of President Duarte's daughter. The nations of the region are ill prepared to meet this specific kind of violence and its particularly odious nature demands a strong U.S. response. This legislation, by providing funds to increase the counterterrorist capabilities of our regional allies, would provide such a response.

In the recently approved foreign aid bill, the Congress clearly anticipated action in these two areas. Language outlining a new administration of justice initiative and reforming law enforcement training guidelines was approved by a broad spectrum of opinion on both sides of the aisle. It is now time to lend substance to these sentiments by approving the funds necessary for concrete action.

Assisting in the administration of justice and law enforcement capabilities of foreign lands is an admittedly ticklish matter. But it should not be beyond the capabilities of Congress to come up with appropriate measures to meet the challenges in these areas which confront us in Central America today. While pleased to introduce this measure on behalf of the administration, I reserve the right to study its provisions more carefully and to consider constructive amendments when the matter is addressed by the Committee on Foreign Relations. Toward that end, we will soon be scheduling hearings on this important piece of legislation.

I now ask unanimous consent that the bill be printed in the RECORD at this point, together with a section-by-section analysis of the bill and the letter of transmittal from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, dated September 25, 1985, to the President of the Senate.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1757

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Central American Counterterrorism Act of 1985".

MILITARY ASSISTANCE

SEC. 2. (a) In addition to the amounts otherwise authorized to be appropriated to carry out the provisions of chapter 2 of part II of the Foreign Assistance Act of 1961, there are authorized to be appropriated $27,000,000, which amount shall be available only for El Salvador, Honduras, Costa Rica, Panama, Belize, and Guatemala to enhance and strengthen the ability of their armed forces to combat terrorism.

(b) Such funds shall be made available notwithstanding any limitations or restrictions on such assistance contained in section 703 of the International Security and Development Cooperation Act of 1985.

ANTI-TERRORISM ASSISTANCE PROGRAM

SEC. 3. (a) In addition to amounts otherwise authorized to be appropriated to carry out the purposes of chapter 8 of part II of the Foreign Assistance Act of 1961, there are authorized to be appropriated $27,000,000, of which amount $26,000,000 shall be available only for El Salvador, Honduras, Costa Rica, Panama, Belize, and Guatemala, to enhance and strengthen the ability of their law enforcement instutitions to combat terrorism and not more than $1,000,000 may be used for a Counterterrorism Protection Fund to reimburse domestic and foreign persons, agencies, or governments for the protection of persons who provide assistance or information relating to terrorist incidents.

(b) Section 573(d) of the Foreign Assistance Act of 1961, as amended by section 501(b) of the International Security and Development Cooperation Act of 1985 shall not apply to the use of funds authorized by this section.

GENERAL PROVISIONS

SEC. 4. None of the funds authorized by this Act shall be used to furnish defense articles or commodites for the armed forces or law enforcement forces of Guatemala until a civilian government is elected.

SEC. 5. Amounts appropriated to carry out this Act are authorized to remain available for obligation until September 30, 1986.

U.S. DEPARTMENT OF STATE,
Washington, DC, September 25, 1985.

Hon. GEORGE BUSH,
President, U.S. Senate.

DEAR MR. PRESIDENT: The President has instructed the Department of State to submit for Congressional approval the text of a draft bill entitled "The Central American Counterterrorism Act of 1985." Secretary Shultz has asked that I convey to you his hope that the Congress will give this proposed FY 1986 Budget Amendment urgent consideration and prompt approval.

The successful return to democratic civilian government in Central America is being met with a tactical shift by marxist-led guerrilla groups from insurgency to terrorism. Terrorism is now the main component of a strategy to overthrow the non-communist governments of the region and damage U.S. interests there. What is at stake is not simply a threat to public order, but the democratic process itself.

In the past several months we have seen a rise in terrorist attacks in El Salvador, Honduras, and Guatemala, increasing threats against Costa Rica and portents of problems in Panama. In the face of mounting defeats inflicted by increasingly superior Salvadoran Armed Forces in the field, the marxist guerrillas in El Salvador on June 19 killed four U.S. Marines, two other U.S. citizens and seven other persons. On September 10 these guerrillas continued their attacks against civilian non-combatants by kidnaping President Duarte's daughter. On September 19-20 seven popularly elected mayors were kidnaped, joining 13 others who were kidnaped following municipal elections in March of this year.

Similar threats confront the other countries of the region. Since 1982 Honduras has been the scene of repeated attempts by local groups—with strong backing first from Salvadoran insurgents and more recently from Nicaraguan Sandinistas—to incite an insurgent movement and stir terrorism. The extreme left may be preparing for an escalation of attacks inside Honduras. In Guatemala, the four main insurgent groups retain the ability to carry out isolated terrorist attacks. Attempts may be made to disrupt national elections in November/December. In Costa Rica, the left's declining electoral share—along with Cuban and Nicaraguan encouragement—has led to a growing militancy and a shift toward a revolutionary strategy. Various leftist groups have established paramilitary capabilities with the help of Cuba and Nicaragua. In Panama, the canal is a convenient target both for anti-US terrorists and groups seeking to destabilize the civilian government. Relatively tranquil Belize is dependent on external forces for security and is subject to use as a safehaven by guerrillas operating in Guatemala.

The Senate (S. Con. Res. 219) and the House of Representatives (H. Con. Res. 187) have each passed resolutions condemning the kidnapping of Ms. Duarte Duran and calling for steps to be taken to bring an end to these kinds of terrorist incidents which violate international standards of human rights and the laws of armed conflict.

The current ability of the governments of the region to combat urban terrorism is limited. Significant shortfalls in counterterrorism capability exist in both police and military institutions. Between political capitulation to terrorist demands and purely military retaliation, these governments are not prepared to detect, combat and deter large, compartmented and externally supported terrorist organizations.

While we have taken steps to adequately protect and defend U.S. installations and personnel in these countries, we are dependent outside our official installations on the abilities of these local security forces. For U.S. personnel in these countries, security outside the Mission, both at home and while out on official business, is primarily a function of the local police. Militarization of police forces or reliance on military for public security is not an acceptable substitute or response under a democratic regime to the threat of politically motivated terrorist attacks.

In the absence of an effective response from these countries or a tangible indication of U.S. firmness in the face of such acts and threats, we expect that the guerrillas will indeed attempt to build on these recent perceived successes. The immediate objectives are to thwart the return to democratic government by decreasing popular confidence in the electoral process and by attempting to manipulate U.S. public opinion and the domestic consensus which has developed on U.S. interests and policy in Central America.

As the ongoing tragedy of Ms. Duarte's kidnapping illustrates, the need to deal with terrorism in Central America is urgent. Presidential elections will be held in Guatemala November 3, in Honduras November 24, and in Costa Rica February 2. By early 1986 all the countries of the region, with the glaring exception of Nicaragua, will have freely elected democratic civilian governments. This process will mark a significant step for the people of the region and for U.S. policy in the area. We expect that the various insurgent groups in the region will build on recent events in El Salvador and increase significantly terrorist attacks against these civilian governments. We anticipate that attacks which increased in El Salvador immediately after the March municipal elections will be duplicated throughout the region, unless steps are taken now to deter them.

U.S. political, economic and military assistance is currently focused on strengthening democratic institutions and processes and building adequate military strength to secure freely elected democratic governments. Communist guerrillas are most threatened by democratic elections which undermine their claims to represent the legitimate aspirations of the public at large. In between the political/economic and military programs, assistance aimed at effective police/military counterterrorism activities is limited. The governments of the region require an effective intermediate response to the terrorist threat. Professional police and military counterterrorism forces, thoroughly trained in the importance of protecting the rights of citizens, would provide this intermediate option. And, in effectively carrying out their mission, would directly support the democratic process and help ensure free and fair elections.

An inter-agency working group has travelled to the region to complete the program design, to consult with the governments involved and to respond to specific requests for assistance submitted by them. In the design of these programs reference was made to both the Congressional Research report of March 12, 1985 on "Case Studies of Counter-Insurgencies" and to the recommendations and guidance provided by the House Foreign Affairs Staff Study Mission on International Terrorism and Diplomatic Security of November 1984.

The proposed Central American Regional Counterterrorism Program will provide counterterrorism assistance to El Salvador, Panama, Costa Rica, Honduras, and Guatemala, and will involve both a law enforcement and a military counterterrorism component. While authorized, no program would be undertaken in Belize at this time. The law enforcement element of the program, the Law Enforcement Counterterrorism Assistance Program (LECTAP), will provide $26 million for training and equipment assistance to the five countries' police forces. Other U.S. Government programs are helping the countries in dealing with the terrorists threat (e.g. military assistance per se, intelligence cooperation, and the Anti-Terrorism Assistance Program). While these programs are making significant contributions to the growth of adequately defended democratic governments, it has become increasingly clear that police training and assistance aimed at establishing a basic public security bulwark against terrorism is needed.

Therefore, the LECTAP program will provide these five governments assistance in expanding the capability of their law enforcement authorities by offering training and equipment assistance. Such assistance will be limited to the type of training and equipment which is appropriate for civilian law enforcement authorities; be coordinated with other U.S. Government programs in the area of counterinsurgency, anti-terrorism, and drug enforcement; encourage the creation and development of modern law enforcement agencies who combine the use of appropriate modern techniques with concern for democratic procedures and safeguards and; be designed to support local democratic institution building.

LECTAP will be managed by the Department of State consistent with the anti-terrorism authority contained in Chapter 8 of part II of the Foreign Assistance Act of 1961. A special unit in the Department of State will be established to manage the program and to coordinate it with the ongoing Anti-terrorism Assistance Program and the RECAP element.

The military component, the Regional Enhanced Counterterrorism Program (RECAP), will provide $27 million to strengthen the countries' military capabilities to conduct specifically counterterrorism operations through the provision of specialized training distinct from that currently provided under existing programs and the procurement of specific commodities to support this training. RECAP will be managed by the Departments of State and Defense under MAP authority. RECAP will not require new DOD organization nor additional staffing, and would complement the current U.S. security assistance programs in the host countries.

The Central American Regional counterterrorism Program will also establish a Counterterrorism Protection Fund of up to $1 million to reimburse individuals, agencies, or governments for the protection of persons who provide assistance or information relating to terrorist incidents. This program will complement our rewards program and provide us with a needed tool to combat the use of fear and intimidation by the guerrillas.

The Secretary of State will be responsible for the management of LECTAP and for the overall coordination and supervision of both LECTAP, RECAP and the Counterterrorism Protection Fund. A Working Group of the Inter-departmental Group on Terrorism will be established to oversee and manage the three program elements on an ongoing basis.

Given the overriding U.S. human rights objectives in the region and the need to assure that the rule of law prevails and is a basic underpinning of such counterterrorism assistance, and in accord with the provisions of the anti-terrorism authorities in Chapter 8 of part II of the Foreign Assistance Act of 1961, the Office for Human Rights and Humanitarian Affairs of the Department of State has assisted in and approved the design of the proposed program. HA will exercise human rights policy oversight of LECTAP and RECAP program implementtation.

The military component of the program will be funded through the MAP accounts, and the law enforcement element will be authorized and funded under the anti-terrorism authorities of the Foreign Assistance Act of 1961.

A copy of the draft authorizing legislation and a section-by-section analysis are attached. The legislation further modifies the anti-terrorism authority contained in chapter 8 of part II of the Foreign Assistance Act of 1961 to construct a regional program that will best serve the needs of the region and the individual countries.

The Office of Management and Budget advises that there is no objection to the submission of this draft legislation to the Congress and that its enactment would be in accord with the program of the President.

Sincerely,

WILLIAM L. BALL III,
Assistant Secretary, Legislative and Intergovernmental Affairs.

SECTION-BY-SECTION ANALYSIS OF THE PROPOSED CENTRAL AMERICAN COUNTERTERRORISM ACT OF 1985

I. INTRODUCTION

The recent terrorist acts in El Salvador emphasize the need to enhance and strengthen the ability of the armed forces and law enforcement agencies in Central America to combat terrorism. This bill authorizes the establishment of a military counterterrorism program in Central America. In addition, it establishes a law enforcement counterterrorism program under the authorities contained in chapter 8 of part II of the Foreign Assistance Act of 1961, with minimal changes to permit us to respond most effectively to the growing terrorist threat in Central America. The program will include:

1. Additional resources for specialized military counterterrorism activities.
2. Additional resources for civil law enforcement personnel for anti-terrorism activities.
3. Coordination of these programs under the authority of the Secretary of State.
4. Funds for the protection of witnesses cooperating at the request of the USG in counterterrorism activities.

The $27 million in MAP will provide specialized training and specific articles for use in military counterterrorist and counterinsurgency operations by host countries' armed forces. It will be managed by the Departments of State and Defense under MAP funding and authority. The $27 million for civilian law enforcement component will be managed by the Department of State consistent with the anti-terrorism authority contained in chapter 8 of part II of the Foreign Assistance Act of 1961. Of that amount, up to $1,000,000 of the funds will be used for a Counterterrorism Protection Fund to reimburse domestic and foreign persons, agencies, or governments for the protection of persons who provide assistance or information relating to terrorist incidents.

PROVISIONS OF THE BILL

Section 1. Short Title

The section provides that the Bill may be cited as the Central American Counterterrorism Act of 1985.

Sec. 2. Military Assistance

This section authorizes $27,000,000 in MAP funds for use in the military counterterrorism and counterinsurgency operations in El Salvador, Honduras, Costa Rica, Panama, Belize, and Guatemala.

These funds are made available notwithstanding certain general and country-specific conditions or prohibitions contained in the International Security and Development Cooperation Act of 1985.

Sec. 3. Anti-Terrorism Assistance

The section authorizes $27,000,000 in assistance. Of that amount, $26,000,000 will be used for regional program to enhance the ability of civilian law enforcement personnel in El Salvador, Honduras, Costa Rica, Panama, Belize and Guatemala to combat terrorism. The anti-terrorism authority contained in chapter 8 of part II of the Foreign Assistance Act of 1961 has been modified to construct a regional program that will best serve the needs of the region and the individual countries. Because of some special requirements, a waiver of section 573(d) has been included to permit, *inter alia* regional or in-country training. In addition, the $325,000 ceiling on commodities and equipment contained in section 501(b) of the International Security and Development Cooperation Act of 1985 does not apply to this new authority.

The section also earmarks $1,000,000 of the anti-terrorism funds to be used for a Counterterrorism Protection Fund for the protection of persons who provide assistance or information relating to terrorist incidents.

Sec. 4. General Provisions

This section conditions both military and civilian law enforcement assistance to Guatemala on the election of a civilian government.

Funds under this Act are made available until September 30, 1986.●

By Mr. CHAFEE (for himself, Mr. COHEN, and Mr. MURKOWSKI):

S. 1759. A bill to establish a Commercial Fishing Industry Advisory Committee; to the Committee on Commerce, Science, and Transportation.

COMMERCIAL FISHING INDUSTRY ADVISORY COMMITTEE ACT

● Mr. CHAFEE. Mr. President, I am pleased to introduce legislation today with Senator COHEN and Senator MURKOWSKI to establish a commercial fishing industry vessel advisory committee.

The primary purpose of this legislation is to establish a committee to address the problem of escalating insurance rates for fishing vessels. Protection and indemnity [P&I] insurance premiums have risen from 25 percent to as much as several hundred percent for vessels in some fisheries. As insurance becomes increasingly unaffordable, fishing vessels are either going without insurance or are going out of business.

The Jones Act permits fishing vessel crewmen and seamen to sue vessel owners for negligence and unseaworthiness when an accident occurs aboard ship. Unlike most other industries in which workers are covered by workmen's compensation, fishermen are covered through the boat owner's policy. Thus, fishermen go to court to collect, resulting in expensive settlements.

The number and size of jury awards has escalated in recent years. Court settlements have been as high as several hundred thousand dollars for correctable occupational injuries. The insurance companies are no longer able to adequately predict the risks or the dollar awards in the fishing industry. The damage award for the same injury before two different juries often varies by a factor of 10. Because there can be no actuarial basis for these awards, insurance of fishing vessels has become increasingly risky and unprofitable. Some insurance companies are experiencing loss ratios which exceed 100 percent.

The causes of the marine insurance problem are complex and cannot be solely attributed to the escalating jury awards. The problem is also aggravated by inadequate vessel and crew safety, improper vessel design, personnel qualifications, fishery management regulations, and the general decline in the profitability of the insurance industry.

Many insurance companies will no longer write policies for the commer-

cial fishing industry. Last year there were 10 to 15 domestic underwriters providing marine insurance. Now, only four U.S. companies cover the Nation's maritime fleet. Many fishing vessels are either unable to obtain insurance or obtain it at such a high premium, that profitability and competitiveness are severely affected.

Despite evidence of a problem in marine insurance in the fishing industry, a comprehensive solution has not been found. Many solutions have focused on improved fishing vessel safety regulations. However, improving safety will not guarantee lower insurance premiums. The problem may be rooted in the structure of the current insurance liability and compensation system. In addition to uncertainty over the cause of the problem, there still exists a need to better understand and document the nature of casualties occurring at sea. Therefore, a comprehensive study of these problems, with active participation of all parties, is necessary in order to bring the cost of insurance to affordable levels and still provide fair compensation for injured fishermen.

The bill I am introducing today provides for a commercial fishing vessel advisory committee to address these problems. The committee will be responsible for advising and making recommendations to the Coast Guard on matters relating to fishing vessel safety and insurance. This issue falls within the Coast Guard's jurisdiction over commercial vessel safety. Their objective has been to minimize deaths, personal injuries, property loss or damage associated with design, construction, manning of merchant vessels, and handling of hazardous cargoes.

The committee will consist of 17 members, including individuals from the fishing industry and the insurance industry. Other representatives will include a naval architect/marine surveyor, a manufacturer of fishing vessel equipment, and an individual connected with education or training in vessel safety. The committee shall operate for 6 years and can be extended by Congress.

With this legislation, representatives from both the fishing and insurance industries will work together to develop a solution to the marine insurance problem. Without such a forum, it is unlikely that a comprehensive solution will be agreed upon. In a statement before the House Subcommittee on Merchant Marine, Mr. Dennis Nixon, coordinator of the Graduate Marine Affairs Program at the University of Rhode Island, said: "If the problem is allowed to simply work itself out once again, many fishermen will be facing the same grim scenario of mortgage foreclosures that family farmers presented to you."

The ones who will suffer from the increased insurance premiums will be the fishermen. Insurance companies can raise their premiums or get out of the marine insurance market. Given the current competitive market, fishermen cannot pass along the increased cost of insurance. Fishermen can choose to go without insurance or reduce their profits, perhaps to the point of bankruptcy.

This legislation is intended to result in a solution to the marine insurance problem, a more cooperative relationship between the fishing and insurance industries, and improved fishing vessel safety. The Atlantic Offshore Fishermen's Association responded to this legislation by saying: "We feel that this proposal could be a step in the right direction" and "could increase the participation of the commercial fishing industry in the formation of new policies."

Since passage of the Fisheries Conservation and Management Act of 1976, total harvests in the United States has increased 85 percent: From 5.3 billion pounds to 9.8 billion pounds. If our fishing industry is to continue to grow and prosper, we must find a way to provide adequate insurance protection at affordable rates for our fishing vessels. This legislation represents a first step toward a solution to the marine insurance problem.

I hope the Senate will give the matter expeditious and favorable consideration.●

By Mr. STAFFORD:

S. 1761. A bill to amend the Atomic Energy Act of 1954, as amended, to establish a comprehensive, equitable, reliable, and efficient mechanism for full compensation of the public in the event of an accident arising out of activities of the Nuclear Regulatory Commission licensees or undertaken pursuant to the Nuclear Waste Policy Act of 1982 involving nuclear materials; to the Committee on Environment and Public Works.

PRICE-ANDERSON IMPROVEMENT ACT

Mr. STAFFORD. Mr. President, today I am introducing the Price-Anderson Improvement Act of 1985. This bill is designed to assure that victims of nuclear accidents at commercial nuclear powerplants or accidents that occur during the course of the Department of Energy's [DOE] program for the disposal of high-level nuclear waste will receive full, timely, and equitable compensation for their injuries.

The bill provides that in the event of a nuclear accident at a large commercial nuclear powerplant, for which damages exceed the amount of available insurance, the owner of each large reactor licensed in the United States would contribute up to $10 to $15 million per year in a "retrospective premium" until all the valid claims has been satisfied.

This approach was proposed in a report submitted to Congress in 1983 by the Nuclear Regulatory Commission after extensive analysis and debate. While three of the present Commissioners are not proponents of the approach, Chairman Palladino and Commissioner Asselstine continue to support its recommendations.

In addition to dealing with commercial nuclear facilities, my bill also provides that, for nuclear incidents arising out of activities undertaken by DOE pursuant to the High-Level Waste Program, the Federal Government, through DOE, will provide complete indemnification above the amount of insurance available. The indemnification will be paid from the Nuclear Waste Fund established in the Nuclear Waste Policy Act of 1982 to fund the DOE High-Level Waste Program.

Resolving nuclear liability issues is particularly important in the context of the Department of Energy's High-Level Waste Program. The Department of Energy soon will be nominating sites for characterization for the first repository. DOE also will soon narrow the number of sites under consideration for the second repository. In order to enhance public acceptance of the repository program, there must be some assurance that citizens of repository States will not be forced to bear the risk of uncompensated damages in the event of a nuclear incident. This bill is intended to provide that assurance.

Mr. President, the Price-Anderson system involves a balancing of many goals and interests. These goals and interests include assuring speedy and full compensation for victims of an accident, and promoting the accountability and responsibility of persons involved in, or benefiting from, activities that create the risk of an accident by requiring them to pay for damages from an accident. This balancing is not easy. After considering various alternatives, I believe that the bill I am introducing represents the best accommodation I have seen yet of these interests.

Nonetheless, I would welcome ideas or suggestions as to ways in which to improve this balance. I would be particularly interested in any proposals that would increase the accountability of the utility at which a commercial accident occurred.

The Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works will be holding hearings on the Price-Anderson system later this month. By introducing this bill, I hope to add to the scope of alternative approaches the committee considers.

Mr. President, I would like at this point to give a brief description of existing law.

Under the existing Price-Anderson system, each utility operating a large nuclear reactor licensed by the Nuclear Regulatory Commission [NRC] is required to carry the maximum amount of private insurance available—$160 million is the current maximum—to cover public liability from a nuclear incident. In the event of an incident, at that reactor or at any other reactor for which damages exceed the amount available insurance, each licensee is required to contribute $5 million in a "retrospective premium" to cover public liability. The act limits the aggregate liability for any incident at a large nuclear powerplant to the amount provided by these two layers of financial protection. Since there are approximately 96 large operating reactors, aggregate liability is presently limited to $160 million plus 96 times $5 million, or a total of $640 million. In the event of an accident for which claims exceed the aggregate liability limit, the act provides that Congress will thoroughly review the situation and take whatever action it deems necessary.

A key feature of the act is omnibus coverage. This means that financial protection and the aggregate limit of liability apply to all persons who may be liable for damages, not just to the utility or the person with whom an indemnity agreement is executed.

With respect to nuclear accidents that occur during the DOE program for the disposal of high-level radioactive waste, there is general agreement that DOE's authority to indemnify contractors involved in activities for which there is a risk of a substantial nuclear incident extends to contractors in the High-level Waste Program. Indemnification is provided by DOE up to $500 million, at which point liability is limited. Again, the act's congressional review provision would apply if damages exceeded the limit on liability.

The present act expires on August 1, 1987.

Mr. President, we continue to need a Price-Anderson system. Although the probability of a major nuclear accident may be small, the possibility cannot be discounted entirely. Accordingly, it is prudent to consider and plan for the unlikely event of a major nuclear incident, and the corresponding possibility of large amounts of damage.

There should be assurance that victims of a nuclear incident will receive full, fair, and timely compensation for their injuries. Without a system in place before a major accident, years could be spent in litigation against utilities, contractors, suppliers, government agencies, and others. The terrible disaster at Bhopal and the Texas City disaster in 1947 illustrate the inadequacy of the traditional tort system to make timely determinations of fair compensation for victims in those circumstances.

I have consistently supported the principle that persons injured by another person's negligence or from exposure to abnormally dangerous materials or activities should receive full compensation for those injuries. To me this is an issue of basic fairness. Whether the injury is caused by nuclear materials, toxic chemicals, or other abnormally dangerous substances, the innocent victim should be compensated.

The current Price-Anderson system falls short of this goal. There is no assurance of any compensation for claims above the absolute and arbitrary liability limits. For those claims, compensation is dependent upon subsequent congressional action. I have no doubt that, if called upon, Members of this body would try to provide speedy and just compensation to victims of an accident. History shows, however, that even the best intentions on the part of Congress can fall short of the victims' requirements. The Texas City disaster presents, in the words of a noted study, "a discouraging example" of how the Congress would respond after an accident.

For this reason, the bill I am introducing removes the absolute and arbitrary limits on liability for commercial and high-level waste nuclear activities. Its goal is to assure full compensation to victims in the event of a nuclear incident arising from those activities.

Another principle that I have supported over the years is that the beneficiaries of an activity should bear the costs of compensating persons injured by that activity. One person's profit should not come at the price of another's injury.

The congressional intent underlying the Price-Anderson system has been that the nuclear industry should assume more responsibility for the costs of an accident as the industry becomes better able to bear those costs.

Both the 1966 amendments to the act and the 1975 amendments, which created the present system, imposed increasing financial responsibility upon the nuclear industry for compensating victims of accidents. In its report on the 1975 amendments to the Price-Anderson Act, the Joint Committee on Atomic Energy stated: "The Joint Committee has from the time of the inception of the Price-Anderson Act endorsed the concept of the assumption by the nuclear industry of the risks associated with nuclear incidents."

The Department of Energy reported to Congress in 1983 that, "It is has been a steadfast objective of the Congress, strongly reemphasized in 1975, that the burden of the indemnity should eventually shift completely to the operators of large civilian nuclear powerplants."

However, the current limits on liability mean that the direct beneficiaries of commercial and high-level waste nuclear activities are not fully responsible for the costs of compensation for persons injured by those activities.

When the Price-Anderson Act was originally enacted in 1957, there was only one operating commercial reactor. That reactor had been funded by the Federal Government. It supplied less than one-twentieth of 1 percent of this Nation's electricity.

The threat of crippling liability in the event of an accident was viewed as a major deterrent to private industrial participation in the nuclear program, and limited liability was considered necessary to encourage development of nuclear power.

Today, there are nearly 100 operating reactors supplying approximately 14 percent of this Nation's electricity. Twenty or more reactors are under construction. Nuclear power is expected to generate 20 percent of our electricity by 1990. The condition of the nuclear industry is far different from the conditions in 1957, and even in 1975, when Congress considered liability limits necessary to protect the industry.

It is therefore time to declare that in the event of an accident the nuclear industry must bear the full costs of compensation for persons injured by commercial and high-level waste nuclear activities. It is time to end the likelihood that those costs will fall either on the victims or on the Federal taxpayer. Not only is this consistent with congressional intent regarding Price-Anderson, but also with any notion of basic fairness.

The commercial nuclear industry is the beneficiary of the DOE's High-Level Radioactive Waste Disposal Program. Congress has already indicated its intention that the nuclear industry, through the Nuclear Waste Fund, should pay for the full costs of the program for the disposal of commercial high-level nuclear waste. Liabilities incurred during that program are part of the cost of the program.

It may be asked, "Is it fair to make a 'well-run' utility pay for an accident at a less well-managed company?" To answer this question, we need to look at the fairness of the alternative sources of payment.

First, payment of costs could be required only from the "responsible parties." Recovery from responsible parties would depend on principles of tort liability, and could take years. It could also develop that these parties have insufficient assets to pay for all the damages.

There are two other choices as to who should bear the costs of an acci-

dent: the victims or the Federal taxpayer. Clearly, it is most unfair to make the innocent victim pay. And, I believe, it is fairer to make the owners rather than the taxpayers the insurers of nuclear powerplants.

Thus, it appears to me that the system of making the nuclear power industry, collectively, responsible for fully compensating the victims of a serious accident is justified.

I do believe, however, that to the maximum extent possible, we should place the primary responsibility for compensation on the facility at which an accident occurs, and I will be seeking and examining proposals to achieve this end.

In this connection I am submitting an amendment to the bill, Amendment No. 770, on which I would hope there will be thoughtful comment during committee consideration of the Price-Anderson reauthorization. The amendment provides that the utilities—other than the one at which the accident occurred—that pay the retrospective premium may seek reimbursement through the judicial system from the utility at which the accident occurred and from others that may be liable under the principle of tort liability. The utility at which the accident occurred could also seek reimbursement from other parties that may be liable.

This amendment addresses the concern that all utilities should not pay equally for an accident that occurred at a facility over which they had no control. While the amendment would impose a greater degree of responsibility on the utility and other parties most closely associated with the accident causing injury, it would not impede timely compensation of victims. The approach is similar in general outline to a procedure in the existing Superfund law which permits moneys from an industry-financed fund to be used to clean up toxic wastes and recovery of those funds from responsible parties.

In addition to the amendment, I want to explore ways to increase the amount of primary financial protection required of the responsible utility, since the required level of primary protection in constant dollars has actually declined since 1957. Increases could come from private insurance, self-insurance, or other sources.

The annual retrospective premium system for NRC licensees is intended to be based on an amount that licensees can afford. Presently, this would be $10 million. The NRC reports that a $10 million annual retrospective premium would result in a 2-percent increase in the total operating of an average utility. The NRC states that, if passed on in full to the ratepayer, this would add approximately $10 per year to the average nuclear ratepayer's electric bill. Nuclear utilities already spend an average of $5 million per year for their own property insurance.

The financial burden on the utilities or the ratepayers also would be manageable in the event of a major accident involving high-level waste. The nuclear waste fund is generated by a fee of one mil—$0.001—per kilowatt-hour on electricity produced by nuclear utilities. This fee is expected to generate at least $22 billion over the next 35 years. A mil per kilowatt-hour surcharge increases the cost of producing nuclear power by approximately 2½ percent. If passed on to the consumer, it would add approximately $10 to $12 per year to the average nuclear ratepayer's electric bill. Thus, the nuclear waste fund can generate many billions of dollars to pay for damages without severe effects on the nuclear utilities or ratepayers.

Finally, while it is very likely that there will not be a major accident anywhere, and that no additional costs will be imposed on anyone, provision for full compensation for victims of nuclear accidents and full liability for the nuclear power industry should increase public confidence in nuclear power and the High-Level Waste Program.

I, therefore, believe that adoption of this bill would be a positive step for commercial nuclear power and the waste program.

I shall now turn to a brief description of the major features of the bill.

For NRC licensees, the bill replaces the one-time assessment of $5 million with annual assessments of $10 to $15 million. There would be no absolute limit on aggregate liability. However, omnibus coverage would continue. The retrospective premium pool would be the exclusive source of funds for public liability claims.

As I noted earlier, the retrospective premium system incorporated in the bill was recommended to Congress by the NRC in 1983.

It is intended that the premiums originally be fixed at $10 million. The NRC would have rulemaking authority to raise this amount if licensees could afford more and if it were necessary and fair to do so.

Because the industry would have to pay retrospective premiums until all liability has been satisfied, Federal indemnity or congressional review would not be necessary to ensure full compensation. Thus, the congressional review provision has been removed for accidents involving NRC licensees. Of course, Congress can always take any additional measures it deems necessary.

There is no provision for termination of the obligation to pay retrospective premiums for existing liabilities upon the termination of the license.

The maximum annual retrospective premium would be for all nuclear incidents. In the highly unlikely event that there is more than one incident that requires payment from the retrospective premium fund in the same year, the total amount available from the retrospective premium pool in that year would be split equally among the nuclear incidents. For example, if there were three nuclear incidents requiring payment from the pool in the same year, one-third of the pool would be available for the victims of each incident. If the claims from any one of those incidents were less than its assigned share, the difference would be split among the victims of the other incidents for which the claims were greater than an equal share.

The district court with jurisdiction over claims from an incident would have the authority to modify any payment plans in the event that a subsequent incident caused a reduction in the funds available for the prior incident.

The bill increases the amount that may be paid in any year for emergency assistance to one-third of the amount available financial protection in that year. A higher limit is justified because the retrospective premium system ensures that funds will be available in subsequent years.

The bill requires the NRC to report to the district court on a plan for compensation whenever there is an extraordinary nuclear occurrence [ENO]. Presently, the NRC is required to make such reports only when public liability claims may exceed the aggregate limit of liability. The change has been made because in an ENO the NRC will already have committed its technical resources to the incident, at least by making the ENO determination, and the NRC's expertise in radiological matters can be of great assistance to the court.

Punitive damages would be excluded from Price-Anderson coverage under the bill. For accidents either at commercial nuclear powerplants or during the High-Level Waste Program, it would be unfair for one utility and its ratepayers to have to contribute towards the punitive damages of another utility or a contractor.

The bill continues the present definition of extraordinary nuclear occurrence, but extends the waiver of defenses provision to all situations where the NRC requires financial protection or provide indemnification. It also continues the present treatment of precautionary evacuations and sabotage.

The act would be extended for 15 years. The minimum statute of limitations would be extended from 20 to 30 years.

With respect to activities involving high-level waste, the bill clarifies that DOE's authority to indemnify its contractors extends to all contract activities concerning the storage, disposal, and transportation of spent nuclear

fuel, high-level radioactive waste, and transuranic waste.

Indemnification is mandatory for contractual activities which are or may be funded through the nuclear waste fund. The Secretary of Energy would have the authority to require these contractors to carry insurance, but they would have to be indemnified for all damages above the amount of insurance required. This indemnification would also include omnibus coverage. Thus, all persons who might be liable for damages, including State and local governments, would be covered by the indemnification. A waiver of defenses provision in the event of an extraordinary nuclear occurrence would be required in the indemnification agreement.

All payments made through such indemnity agreements would come from the nuclear waste fund. Public liability resulting from the High-Level Waste Program would be treated as part of the cost of the program.

The indemnification would include the reasonable costs of settlement, investigating, and defending damage suits, to the extent that such costs were not included in the amount of insurance available.

The Secretary would be required to report to the court on a plan for compensation in the event of an extraordinary nuclear occurrence. This is similar to the requirement imposed upon the NRC.

The bill provides that for activities that are carried out by DOE itself rather than a contractor, DOE should be treated as a contractor for purposes of indemnification and liability. This is to ensure that the claimants will not encounter more difficult standards for recovery if activities are performed by DOE rather than its contractors.

The coverage regarding precautionary evacuations, and sabotage, the definition of an extraordinary nuclear occurrence, the exclusion of punitive damages, the extension of the statute of limitations, and the date of expiration of authority to enter into new indemnification agreements would be the same for high-level waste activities as for NRC licensees.

In all other major areas the present act has been left intact. The bill does not address the limits on indemnification of DOE contractors that are not paid through the nuclear waste fund, nor does it address indemnification of educational and nonprofit NRC licensees, other than extending the expiration date of the act. I would, however, support any proposals with respect to these activities and licensees that were consistent with the principles expressed in this bill.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1761

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. This Act may be cited as the "Price-Anderson Improvement Act of 1985".

SEC. 2. Section 170b. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"b. The amount of financial protection required shall be the amount of liability insurance available from private sources, except that the Commission may establish a lesser amount on the basis of criteria set forth in writing, which it may revise from time to time, taking into consideration such factors as the following: (1) the cost and terms of private insurance, (2) the type, size, and location of the licensed activity and other factors pertaining to the hazard, and (3) the nature and purpose of the licensed activity: *Provided*, That for facilities designed for producing substantial amounts of electricity and having a rated capacity of 100,000 electrical kilowatts or more, the amount of financial protection required shall be the maximum amount available at reasonable cost and on reasonable terms from private sources. Such financial protection may include private insurance, private contractual indemnities, self insurance, other proof of financial responsibility, or a combination of such measures and shall be subject to such terms and conditions as the Commission may, by rule, regulation, or order, prescribe. In prescribing such terms and conditions for licensees required to have and maintain financial protection equal to the maximum amount of liability insurance available from private sources, the Commission shall, by rule initially prescribed not later than twelve months from the date of enactment of this Act, include, in determining such maximum amount, private liability insurance available under an industry retrospective rating plan providing for annually assessed premium charges deferred in whole or major part until public liability from a nuclear incident exceeds or appears likely to exceed the level of the primary financial protection required of the licensee involved in the nuclear incident: *Provided*, That such insurance is available to, and required of, all of the licensees of such facilities without regard to the manner in which they obtain other types or amounts of such financial protection: *And provided further*, That the maximum deferred premium which may be charged for all nuclear incidents under such a plan shall be not less than $10,000,000 per year nor more than $15,000,000 per year for each facility required to maintain the maximum amount of financial protection: *And provided further*, That the annual amount which may be charged a licensee shall not exceed the licensee's pro rata share, calculated on a yearly basis, of the aggregate public liability claims and costs arising out of the nuclear incidents. Payment of any State premium taxes which may be applicable to any deferred premium provided for in this Act shall be the responsibility of the licensee and shall not be included in the retrospective premium established by the Commission. The Commission shall establish such requirements as are necessary to assure availability of funds to meet any assessment of deferred premiums within a reasonable time when due, and may provide reinsurance or shall otherwise guarantee the payment of such premiums in the event it appears that the amount of such premiums will not be available on a timely basis through the resources of private industry and insurance. Any agreement by the Commission with a licensee or indemnitor to guarantee the payment of deferred premiums may contain such terms as the Commission deems appropriate to carry out the purposes of this section and to assure reimbursement to the Commission for its payments made due to the failure of such licensee or indemnitor to meet any of its obligations arising under or in connection with financial protection required under this subsection including without limitation terms creating liens upon the licensed facility and the revenues derived therefrom or any other property or revenues of such licensee to secure such reimbursement and consent to the automatic revocation of any license."

SEC. 3. Section 170c. of the Atomic Energy Act of 1954, as amended, is amended by striking "August 1, 1987" wherever it appears, and inserting in lieu thereof "August 1, 2002".

SEC. 4. Section 170d. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"d.(1)(A) In addition to any other authority the Secretary of Energy (hereinafter in this section referred to as the Secretary) may have, the Secretary is authorized until August 1, 2002, to enter into agreements of indemnification with the contractors of the Secretary for the construction or operation of production or utilization facilities or other activities under contracts for the benefit of the United States involving activities under the risk of public liability for a substantial nuclear incident.

"(B) The authority conferred upon the Secretary pursuant to paragraph (A) to enter into agreements of indemnification with contractors shall include contracts entered into by the Secretary for the purpose of carrying out such activities as the Secretary is authorized to undertake, pursuant to this Act or any other law, involving the storage or disposal of spent nuclear fuel, high-level radioactive waste, or transuranic waste, including the transportation of such materials to or from a storage or disposal site or facility, or test and evaluation facility, the treatment or packaging of such materials to be stored in, disposed of, or used in such a site or facility, and the identification, development, licensing, construction, operation, decommissioning, and post-decommissioning maintenance and monitoring of any such site or facility. For all such activities, the authority conferred upon the Secretary pursuant to subsection d. shall be the exclusive means of indemnification under this section.

"(C) With respect to such contractual activities for which the Secretary may make expenditures from the Nuclear Waste Fund established in section 302 of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10222):

"(i) The Secretary shall enter into agreements of indemnification with each contractor of the Secretary carrying out such contractual activities under the risk of public liability for a nuclear incident. In such agreements of indemnification the Secretary may require the contractor to provide and maintain financial protection of such a type and in such amounts as the Secretary shall determine to be appropriate to cover public liability arising out of or in connection with such contractual activities, including the storage, disposal, and related transportation of high-level radioactive waste and spent nuclear fuel. The Secretary shall indemnify

the persons indemnified against such claims above the amount of financial protection required. Such indemnification shall include the reasonable costs of investigating and settling claims and defending suits to the extent that such costs are not covered by the amount of financial protection required.

"(ii) The Secretary shall make any payments required under an agreement of indemnification entered into under this subparagraph from amounts available through the Nuclear Waste Fund. The Secretary shall include the costs incurred by the Nuclear Waste Fund under this section in any review of whether the fees established to generate revenue for the Nuclear Waste Fund are sufficient to offset the costs incurred by the Nuclear Waste Fund, including the annual review by the Secretary pursuant to section 302(a)(4) of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10222(a)(4)).

"(2) In such agreements of indemnification other than specified in subsection d.(1)(C) the Secretary may require the contractor to provide and maintain financial protection of such a type and in such amounts as the Secretary shall determine to be appropriate to cover public liability arising out of or in connection with the contractual activity and shall indemnify the persons indemnified against such claims above the amount of financial protection required, in the amount of $500,000,000, excluding costs of investigating and settling claims and defending suits for damage in the aggregate for all persons indemnified in connection with such contract and for each nuclear incident: *Provided*, That this amount of indemnity shall be reduced by the amount that the financial protection required shall exceed $60,000,000.

"(3) In the case of nuclear incidents occurring outside the United States, the amount of the indemnity provided by the Secretary shall not exceed $100,000,000.

"(4) The provisions of this subsection may be applicable to lump sum as well as cost type contracts and to contracts and projects financed in whole or in part by the Secretary.

"(5) A contractor with whom an agreement of indemnification has been executed and who is engaged in activities connected with the underground detonation of a nuclear explosive device shall be liable, to the extent so indemnified under this section, for injuries or damage sustained as a result of such detonation in the same manner and to the same extent as would a private person acting as principal, and no immunity or defense founded in the Federal, State, or municipal character of the contractor or of the work to be performed under the contract shall be effective to bar such liability."

SEC. 5. Section 170e. of the atomic Energy Act of 1954, as amended, is amended to read as follows:

"e. (1) With respect to liability for one or more nuclear incidents covered by an industry retrospective rating plan required by subsection 170b., the aggregate payments in any year by or on behalf of persons indemnified, including the reasonable costs of investigating and settling claims and defending suits for damage, shall not be required to exceed the amount of financial protection provided in that year under subsection 170b. The funds provided by financial protection under subsection 170b. in any year by or on behalf of such persons indemnified, including the reasonable costs of investigating and settling claims and defending suits for damage, shall be the exclusive source of payments for public liability claims.

"(2) With respect to all other nuclear incidents, except as provided in subsection d.(1)(C), the aggregate liability for a single nuclear incident of persons indemnified, including the reasonable costs of investigating and settling claims and defending suits for damage, shall not exceed (a) the sum of $500,000,000 together with the amount of financial protection required of the licensee or contractor, or (b) if the amount of financial protection required of the licensee exceeds $60,000,000, such aggregate liability shall not exceed the sum of $560,000,000 or the amount of financial protection required of the licensee, whichever is greater: *Provided*, That in the event of a nuclear incident involving damages in excess of that amount of aggregate liability, Congress will thoroughly review the particular incident and will take whatever action is deemed necessary and appropriate to protect the public from the consequences of a disaster of such magnitude: *And provided further*, That with respect to any nuclear incident occurring outside of the United States to which an agreement of indemnification entered into under the provisions of subsection 170d. is applicable, such aggregate liability shall not exceed the amount of $100,000,000 together with the amount of financial protection required of the contractor."

SEC. 6. Section 170h. of the Atomic Energy Act of 1954, as amended, is amended—

(1) by inserting after "Commission" wherever it appears the following: "or the Secretary, as appropriate,"; and

(2) by inserting at the beginning of the last sentence the following: "Except with respect to activities indemnified under subsection d.(1)(C),".

SEC. 7. Section 170i. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"i. After any nuclear incident which will probably require payments by the United States under this section or after any extraordinary nuclear occurrence, the Commission or the Secretary, as appropriate, shall make a survey of the causes and extent of damage which shall forthwith be reported to the Congress, to the Congressmen of the affected districts, and to the Senators of the affected States, and, except for information which would cause serious damage to the national defense of the United States, all final findings shall be made available to the public, to the parties involved and to the courts. The Commission and the Secretary shall report annually to the Congress on the operations under this section."

SEC. 8. Section 170k. of the Atomic Energy Act of 1954, as amended, is amended by striking out "August 1, 1987" wherever it appears and inserting in lieu thereof "August 1, 2002".

SEC. 9. Section 170n. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"n. (1) With respect to any extraordinary nuclear occurrence to which an insurance policy or contract furnished as proof of financial protection or an indemnity agreement applies and which—

"(a) arises out of or results from or occurs in the course of the construction, possession, or operation of a production or utilization facility, or

"(b) arises out of or results from or occurs in the course of transportation of source material, byproduct material, or special nuclear material to or from a production or utilization facility, or

"(c) during the course of the contract activity arises out of or results from the possession, operation, or use by a Department of Energy contractor or subcontractor of a device utilizing special nuclear material or byproduct material, or

"(d) arises out of or results from or occurs in the course of the construction, possession, or operation of any facility licensed under section 53, 63, or 81 of this Act, for which the Commission has imposed as a condition of the license a requirement that the licensee have and maintain financial protection pursuant to subsection 170a., or for which an indemnity agreement is executed pursuant to subsection 170k., or

"(e) arises out of or results from or occurs in the course of transportation of source material, byproduct material, or special nuclear material to or from any facility licensed under section 53, 63, or 81 of this Act, for which the Commission has imposed as a condition of the license a requirement that the licensee have and maintain financial protection pursuant to section 170a., or for which an indemnity agreement is executed pursuant to subsection 170k., or

"(f) arises out of or results from or occurs in the course of activities undertaken by the Secretary, including activities undertaken by contract, in connection with the storage or disposal of high-level waste, spent fuel, or transuranic waste, including the transportation of such materials to or from a storage or disposal site or facility or test and evaluation facility, the treatment or packaging of such materials to be stored in, disposed of, or used in such a site or facility, and the identification, development, licensing, construction, operation, decommissioning, and post-decommissioning maintenance and monitoring of any such site or facility,

and which does not arise out of or result from or occur in the course of an activity for which the Secretary may make expenditures from the Nuclear Waste Fund, the Commission, or the Secretary, as appropriate, may incorporate provisions in indemnity agreements with licensees and contractors under this section, and may require provisions to be incorporated in insurance policies or contracts furnished as proof of financial protection, and, with respect to any extraordinary nuclear occurrence to which an insurance policy or contract furnished as proof of financial protection applies and which arises out of or results from or occurs in the course of an activity for which the Secretary may make expenditures from the Nuclear Waste Fund, the Secretary shall incorporate provisions in indemnity agreements and shall require provisions to be incorporated in insurance policies or contracts furnished as proof of financial protection, which waive (i) any issue of defense as to conduct of the claimant or fault of persons indemnified, (ii) any issue or defense as to charitable or governmental immunity, and (iii) any issue or defense based on any statute of limitations if suit is instituted within three years from the date on which the claimant first knew, or reasonably could have known, of his injury or damage and the cause thereof, but in no event more than thirty years after the date of the nuclear incident. The waiver of any such issue or defense shall be effective regardless of whether such issue or defense may otherwise be deemed jurisdictional or relating to an element in the cause of action. When so incorporated, such waivers shall be judicially enforceable in accordance with their terms by the claimant against the person indemnified. Such waivers shall not preclude a defense based upon a failure to take rea-

sonable steps to mitigate damages, nor shall such waivers apply to injury or damage to a claimant or to a claimant's property which is intentionally sustained by the claimant or which results from a nuclear incident intentionally and wrongfully caused by the claimant. The waivers authorized in this subsection shall, as to indemnitors, be effective only with respect to those obligations set forth in the insurance policies or the contracts furnished as proof of financial protection and in the indemnity agreements. Such waivers shall not apply to, or prejudice the prosecution of defense of, any claim or portion of claim which is not within the protection afforded under (i) the terms of insurance policies or contracts furnished as proof of financial protection, or indemnity agreements, and (ii) the limit of liability or limit of payment provisions of subsection 170e.

"(2) With respect to any public liability action arising out of or resulting from an extraordinary nuclear occurence, the United States district court in the district where the extraordinary nuclear occurrence takes place, or in the case of an extraordinary nuclear occurrence taking place outside the United States, the United States District Court for the District of Columbia, shall have original jurisdiction without regard to the citizenship of any party or the amount in controversy. Upon motion of the defendant or of the Commission or the Secretary, as appropriate, any such action pending in any State court or United States district court shall be removed or transferred to the United States district court having venue under this subsection. Process of such district court shall be effective throughout the United States.

"(3) With respect to any public liability action arising out of or resulting from any extraordinary nuclear occurrence, the Commission, or Secretary, as appropriate, shall, and any other indemnitor or other interested person may, submit to the district court having original jurisdiction pursuant to subparagraph (2), a plan for the disposition of pending claims and for the distribution of remaining funds available. Such a plan shall include an allocation of appropriate amounts for personal injury claims, property damage claims, and possible latent injury claims which may not be discovered until a later time and shall include establishment of priorities between claimants and classes of claims, as necessary to insure the most equitable allocation of available funds. Such court shall have all power necessary to approve, disapprove, or modify plans proposed, or to adopt another for each claimant. The Commission or the Secretary, as appropriate, any other indemnitor, and any person indemnified shall be entitled to such orders as may be appropriate to implement and enforce the provisions of this section, including orders limiting the liability of the persons indemnified, orders approving or modifying the plan, orders staying the payment of claims and the execution of court judgements, orders apportioning the payments to be made to claimants, and orders permitting partial payments to be made before final detemination of the total claims. The orders of such court shall be effective throughout the United States."

SEC. 10. Section 170o. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"o. Whenever the United States district court in the district where a nuclear incident occurs, or the United States district court for the District of Columbia in case of a nuclear incident occurring outside the United States, determines upon the petition of any indemnitor or other interested person that public liability from a single nuclear incident may exceed in any year the amount of financial protection available in that year under subsection 170b., or the limit of liability under subsection 170e.(2), as appropriate:

"(1) Total payments made by or for all indemnitors as a result of such nuclear incident shall not exceed thirty-three and one-third per centum of such amount of financial protection, or fifteen per centum of such limit of liability, as appropriate, without the prior approval of such court;

"(2) The court shall not authorize payments in excess of thirty-three and one-third per centum of such amount of financial protection, or fifteen per centum of such limit of liability, as appropriate, unless the court determines that such payments are or will be in accordance with a plan of distribution which has been approved by the court or such payments are not likely to prejudice the sebsequent adoption and implementation by the court of a plan of distribution pursuant to subparagraph (3) of subsection (n);

"(3) In situations where public liability is limited by the provisions of subsection 170e.(2), the Commission or the Secretary, as appropriate, shall, within ninety days after a court shall have made such determination, deliver to the Congress a supplement to the report prepared in accordance with subsection 170i. of this Act, setting forth the estimated requirements for full compensation and relief of all claimants, and recommendations as to the relief to be provided."

SEC. 11. Section 170p. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"p. In the event of two or more nuclear incidents for which public liability claims require payments from the industry retrospective rating plan under subsection 170b., and for which there are outstanding public liability claims:

"(1) The maximum amount of private insurance available in any year for all nuclear incidents under the industry retrospective rating plan shall be apportioned equally, in the manner prescribed herein, among the nuclear incidents in that year to which the industry retrospective rating plan applies. The maximum amount of private insurance available in any year under the industry retrospective rating plan to satisfy the aggregate public liability claims resulting from a single nuclear incident shall be the quotient obtained by dividing the maximum amount of private insurance available in that year by the number of nuclear incidents to which the industry retrospective rating plan applies in that year. In the event that the aggregate public liability claims resulting from any single nuclear incident(s) in any year are less than the quotient for that year, the amount of private insurance constituting the difference shall be apportioned equally, in the same manner, among the remaining nuclear incidents for which the aggregate public liability claims exceed the quotient for that year.

"(2) In the event that the amount of insurance available in any year under the industry retrospective rating plan for public liability claims for a nuclear incident is reduced, pursuant to subparagraph (1) of this subsection, from the amount specified originally in the plan of the district court prepared pursuant to subsection 170n. (3), such district court shall modify the original plan as necessary to insure the most equitable allocation of available funds. For purposes of such modifications, the district court shall have the same powers and authority as in adopting the original plan.

SEC. 12. Section 170 of the Atomic Energy Act of 1954, as amended, is amended by adding the following new subsection at the end thereof:

"q. The Commission and the Secretary shall submit to the Congress by August 1, 1998, detailed reports concerning the need for continuation or modification of the provisions of this section, taking into account the condition of the nuclear industry, availability of private insurance, and the state of knowledge concerning nuclear safety at that time, among other relevant factors, and shall include recommendations as to the repeal or modification of any of the provisions of this section."

DEFINITIONS

SEC. 13. (a) Subsection s. of section 11 of the Atomic Energy Act of 1954, as amended, is amended by adding at the end thereof the following: "For purposes of those activities that the Secretary of Energy is authorized or directed to undertake, pursuant to this Act or any other law, that involve the risk of public liability for a substantial nuclear incident as a result of the storage or disposal of spent nuclear fuel, high-level radioactive waste, or transuranic waste, including the transportation of such materials to or from a storage or disposal site or facility, or test and evaluation facility, the treatment or packaging of such materials to be stored in, disposed of, or used in such a site or facility, and the identification, development, licensing, construction, operation, decommissioning, and post-decommissioning maintenance and monitoring of any such site or facility, the Secretary shall, to the extent that such activities are not undertaken by contract, be considered as if the Secretary were a contractor with whom an indemnity agreement has been entered into pursuant to subsection d. of this Act."

(b) Subsection w. of section 11 of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"w. The term "public liability" means any legal liability arising out of or resulting from a nuclear incident, except: (i) claims under State or Federal workmen's compensation acts of employees of persons indemnified who are employed at the site of and in connection with the activity where the nuclear incident occurs; (ii) claims arising out of an act of war; (iii) whenever used in subsections 170 a., c., and k., claims for loss of, or damage to, or loss of use of property which is located at the site of and used in connection with the licensed activity where the nuclear incident occurs; and (iv) claims for punitive damages. "Public liability" also includes damage to property of persons indemnified, *Provided*, That such property is covered under the terms of the financial protection required, except property which is located at the site of and used in connection with the activity where the nuclear incident occurs."

(c) Section 11 of the Atomic Energy Act of 1954, as amended, is amended by adding the following new subsection at the end thereof:

"dd. The term "Nuclear Waste Fund" means the Nuclear Waste Fund established in section 302 of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10222)."

CONFORMING AMENDMENTS

SEC. 14. Subsections g., j., and m. of section 170 of the Atomic Energy Act of 1954,

as amended, are amended by inserting after "Commission" wherever it appears the following: "or the Secretary, as appropriate,".

SEC. 15. Section 170.a. of the Atomic Energy Act of 1954, as amended, is amended by striking in the first sentence "the Commission" and inserting in lieu thereof "the Nuclear Regulatory Commission (hereinafter in this section referred to as "the Commission").

By Mr. HATCH (for himself and Mr. KENNEDY):

S. 1762. A bill to amend the Public Health Service Act to revise and extend the program of assistance for health maintenance organizations; to the Committee on Labor and Human Resources.

HEALTH MAINTENANCE ORGANIZATION AMENDMENTS

Mr. HATCH. Mr. President, I am introducing today the Health Maintenance Organization Amendments of 1985. Designed to eliminate unnecessary and unfunded authorities and to make minor improvements to the operation of the Federal HMO certification program, these amendments are virtually identical to those passed last year by both House and Senate as title IV of S. 2574, which was a package of five separate Public Health Service reauthorization bills. That bill was pocket vetoed by the President for reasons unrelated to the HMO amendments.

There was consensus that we should try again with a separate HMO bill this year, thus the House has taken last year's conference agreement on title IV and, with one change addressed to organ transplant coverage, has sent it to the Senate as H.R. 2244. The amendments I am introducing follow the same course, with the addition of a sunset provision for the organ transplant section, a new section directed to a study by the Department of Health and Human Services and a nonsubstantive amendment giving recognition to the work of psychologists in HMO's. I am pleased to be joined in this bill by Senator KENNEDY, who has been so closely identified with the Federal HMO Act.

The rationale for the need for the bill was addressed in last year's committee report on S. 2311 and the conference report on S. 2574, which incorporated S. 2311 as its title IV. The following remarks address three provisions which were not carried over verbatim from last year's bill, trusting that the other sections are as acceptable to the Senate today as they were last year.

Section 11 of the bill amends the basic health coverage requirements for federally qualified HMO's. Under the law as currently interpreted, HMO's must add to their "basic health services"/coverage for experimental medical procedures that become accepted medical practice, that is, which are no longer experimental.

In recent years the advent of cyclosporins and of improved medical practice has resulted in the passage from "experimental" to "medically accepted" of a number of organ transplant procedures, including kidney transplants and liver transplants for children. It appears that in the near future, other procedures, such as heart-lung transplants, may become medically accepted. Because of the enormous expense involved with such procedures, federally qualified HMO's fear a crisis. They have become concerned that forced coverage of transplants in their basic benefits package will so raise their rates that they will be placed at a serious competitive disadvantage in an increasingly competitive health care marketplace. Other providers and insurers are free to offer their transplant coverage as supplemental packages, for which additional premiums are charged, allowing them to keep their basic coverage rates lower. Thus, the HMO industry has vigorously sought an amendment which would allow them to offer future transplant coverage as a supplemental benefit for an additional premium. The basic amendment included in this bill is identical to the open-ended one that the House has passed, but I am proposing to limit its duration.

According to the way this bill is drawn, transplant procedures currently required to be treated as basic health services will continue to be so—only future additions to the list would be affected. However, this organ transplant coverage exemption would expire after 30 months, at which time Congress would reconsider the situtaion. In the interim, a study of this issue and others, as I will describe in a moment, would have been completed and Congress would be in a better position to assess any appropriate long-term measures. In the event the exemption were to expire without prior action by Congress, federally qualified HMO's would, thereafter, be at risk of mandated coverage only for procedures subsequently moving from the "experimental" to "accepted" category, not for those which had become accepted during the interim.

Section 12 directs the Secretary of Health and Human Services to provide for a study assessing the operation and impact of important parts of the title XIII Federal HMO program. The study would assess employer and employee attitudes toward prepaid health plans, and HMO's in particular; it would examine the operation of the community rating approach and its impact on Federal HMO membership composition and competitiveness; and it would gauge the effect of section 1310's "dual choice" provision both for HMO's and for the health care marketplace generally. And it would assess the "medically accepted/experimental" approach to updating basic benefits coverage with particular focus on organ transplant coverage. The Secretary would be required to submit to Congress her study, including findings and legislative or regulatory recommendations, within 18 months.

These issues are important ones and, given the rapid evolution of the health care industry and the proliferation of HMO's and competitive medical plans, it has been difficult to gather and assess the data which we need in order to intelligently review the situation and decide what, if any, changes in the Federal program would be appropriate. I expect this study to be a milestone in our continuing review of the health care marketplace, as we attempt to provide the best atmosphere possible for the efficient delivery of quality health care to our people.

Section 13 contains an amendment sought particularly by Senators INOUYE and QUAYLE. This provision simply adds psychologists to the list of health professionals, such as dentists, optometrists, and podiatrists, set forth in several places in the statute. The current language, "other health care professional" encompasses psychologists in practice, and their inclusion among those specifically mentioned does not change the operation of the law in any way. Instead, it highlights the invaluable contribution of psychologists to the comprehensive treatment of the patient under title XIII.

Mr. President, I commend this legislation to my colleagues and urge their support.

● Mr. KENNEDY. Mr. President, I am pleased to join my distinguished colleague, Senator HATCH, in cosponsoring the Health Maintenance Organization Amendments of 1985. These amendments abolish currently unused authorities, limit future mandatory HMO coverage of certain experimental procedures for 3 years, and reaffirm the vitality of the basic features of the current HMO statute.

The HMO concept has proven to be an important and powerful tool in the national effort to provide quality, cost-effective health care. By all measures, the HMO program has been a success. Since 1973, when the HMO act was enacted to stimulate the growth of HMO's, HMO membership has increased from 4 million to an estimated 17 million subscribers, with an annual growth rate of more than 22 percent last year. The Congressional Budget Office predicts that HMO's will have 47 million members by 1990.

The success of the HMO concept has had even broader effects than are reflected in the phenomenal growth of HMO's.

This growth has also stimulated the traditional health care industry to explore alternative mechanisms for the delivery of health care services and to

51-059 O-86-8 (Pt. 20)

develop strategies for reducing unnecessary costs. In the past, HMO's were competing primarily with traditional fee-for-service providers for a share of the market; today, HMO's face increasing competition from other HMO's in their areas, other health care options such as preferred provider organizations, and a growing tendency by employers and insurers to impose cost sharing requirements on beneficiaries.

The maturation of the HMO movement and the increasingly competitive health care marketplace have raised questions about the need to change Federal law governing HMO's and other managed systems of care. In view of the HMO movement's remarkable success, there is clearly no reason to change the basic HMO act at this time. In view of the rapid change in the health industry, however, the future changes may be necessary. Therefore, this legislation mandates the Department of Health and Human Services to study a number of key questions, including community rating requirements, the requirement that employers offer their employees an HMO coverage option, and other features of the current law.●

By Mr. HEINZ (for himself, Mr. GARN, Mr. DIXON, Mr. DANFORTH, and Mr. CHAFEE):

S. 1763. A bill to eliminate foreign predatory export credit practices, establish a tied aid credit facility, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

FAIR EXPORT FINANCING ACT

● Mr. HEINZ. Mr. President, today I am joined by Senator GARN and others in introducing the Fair Export Financing Act of 1985. This legislation creates a $300 million war chest to combat foreign predatory export credits, which are displacing American exports in our traditional world markets.

Mr. President, I have no problem at all with the idea that American exporters should compete internationally on the basis of quality, price, delivery, and so forth. In fact, I would welcome such a situation. But the reality is that superior American products at attractive, competitive prices are often losing out in export competition. They are losing in the competition to products from foreign competitors whose governments are mixing foreign aid moneys with export credits to provide export financing at almost irresistible interest rates and repayment terms.

A significant degree of success has been achieved in limiting the subsidy element in standard official export credits, and in tying the rates of such credits to market conditions. But to this day, no meaningful progress has been made to eliminate—or even to rein in—the practice of mixing foreign aid moneys with these export credits. This mixed credit problem has persisted in spite of all of our negotiating efforts to date. In fact, as competition in the standard export credits has been neutralized, countries intent on expanding export markets through credit subsidies have increasingly relied upon mixed credits to win sales.

In my estimation, the chief reason why we have had success in reducing credit competition in the first case and utterly failed in the second has been related to our willingness to play the credit game and show that we could win it whenever we desired. With strong congressional support, we succeeded in demonstrating our serious intentions with regard to standard export credits. The unmistakable reluctance of the administration and the Eximbank in the past to offer mixed credits, however, when our exporters were faced with a foreign competitor offering mixed credits, seriously undermined our negotiators in efforts to curb this practice. We were like negotiators in arms control talks without weapons and without intentions to acquire any weapons.

The introduction of this bill, backed by the administration, is a clear signal that the policy is changing. In the past year, the Eximbank offered several mixed credits, and today we are placing before the Senate a bill that will provide the resources to counter foreign mixed credits in a more effective manner. Recognizing the need to constrain spending, this bill does not provide for a war chest adequate to do all that we might want, but it should allow us to target several critical cases and demonstrate our serious intentions in this area, so that our negotiators are no longer supplied with empty rhetoric. Our intentions are now clear. Our negotiators will no longer be disarmed.

To be effective, this authority, added to the $1.8 billion of direct credit authority provided for the Eximbank in this fiscal year's budget, must be aggressively exercised. As we begin review in the next few months of the charter of the Export-Import Bank we will look closely at how this war chest is being used and what results are being achieved.

I am heartened at the support of this legislation by the administration. As a sponsor of similar legislation, as early as 1981, I am eager to see this idea of a war chest become law. This bill recommended by the administration may need some changes, but I believe we should begin work on it right away. The export credit war is going on, and, until we do something like this to fight mixed credits, our exporters are defenseless. I do not wish to say that this is an idea whose time has come, because I believe that it is an idea whose time is long overdue, but it is one worthy of the support of all of my colleagues.

I ask that the bill, a summary of its provisions, a section-by-section analysis, and a letter from the general counsel of the Treasury, Robert M. Kimmitt, be included in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1763

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Fair Export Financing Act of 1985".

SEC. 2. CONGRESSIONAL FINDINGS.—(a) Congress finds that—

(1) Tied aid and partially untied aid credits offered by other countries are a predatory method of financing exports because of their market-distorting effects;

(2) These distortions have caused the United States to lose export sales, with resulting losses in economic growth and employment;

(3) These practices undermine export credit discipline under the Arrangement on Guidelines for Officially Supported Export Credits established through the Organization for Economic Cooperation and Development;

(4) Support of Commercial exports by donor countries with tied aid and partially untied aid credits impedes the growth of developing countries because it diverts development assistance funds from essential developmental purposes;

(5) Establishment of a temporary tied aid credit facility in the Department of the Treasury for the limited purpose of targeting the export markets of those countries which make extensive use of tied aid or partially untied aid credits for commercial purposes and which block progress toward a comprehensive arrangement restricting the use of tied aid and partially untied aid credits for commercial purposes will encourage the successful conclusion of negotiations aimed at such an arrangement.

SEC. 3. AMENDMENTS TO THE TRADE AND DEVELOPMENT ENHANCEMENT ACT OF 1983.—(a) Section 642 of the Trade and Development Enhancement Act of 1983 (12 U.S.C. 635o) is amended—

(1) by amending subsection (1) to read as follows—

"(1) to expand employment and economic growth in the United States through the elimination of predatory concessional financing in the form of tied aid or partially untied aid credits engaged in by nations whose exports compete with United States exports, and thereby restore export competition to a market basis;";

(2) by amending subsection (2) to read as follows—

"(2) to stimulate the economic development of countries in the developing world by taking measures to eliminate the misallocation of offical development assistance funds which occurs when such funds are employed in tied aid or partially untied aid credits, the primary purpose of which is the promotion of the commercial exports of the donor country rather than the development of the recipient country; and";

(3) by repealing subsection (3); and

(4) by renumbering subsection (4) as subsection (3) and amending it to read as follows—

"(3) to establish a temporary tied aid credit program to combat the predatory concessional credit program of foreign governments and thereby encourage them to enter into effective and comprehensive arrangements with the United States to restrict the use of tied aid and partially untied aid credits for commercial purposes and to limit and govern the use of export credit subsidies generally.".

(b) Section 643 of the Trade and Development Enhancement Act of 1983 (12 U.S.C. 635p) is amended—

(1) by inserting in the first sentence of the introductory paragraph the words, "or partially untied aid" after the words "the use of tied aid";

(2) by repealing subsection (1);

(3) by renumbering subsection (2) as subsection (1) and amending it to read as follows—

"(1) to restrict the use of tied aid and partially united aid credits for commercial purposes by a date certain;";

(4) by repealing subsection (3);

(5) by renumbering subsection (4) as subsection (2) and amending it to read as follows—

"(2) to raise the threshold for prior notification of the use of tied aid or partially untied aid credit to a 50 per centum level of concessionality; and";

(6) by repealing subsection (5); and

(7) by renumbering subsection (6) as subsection (3) and amending it to read as follows—

"(3) to prohibit the use of tied aid or partially untied aid credit for production facilities for goods which are in structural oversupply in the world.".

(c) Section 644 of the Trade and Development Enhancement Act of 1983 (12 U.S.C. 635q) is amended to read as follows—

"ESTABLISHMENT OF A TIED AID CREDIT PROGRAM IN THE DEPARTMENT OF THE TREASURY

"SEC. 644. (a)(1) The Secretary shall establish within the Department of the Treasury a program of tied aid credits for United States exports.

"(2) The program shall be carried out in cooperation with the Bank or with private financial institutions or entities, as appropriate.

"(3) The program may include—

"(A) the combined use of guarantees, insurance, or extensions of credit offered by the Bank with grants offered by the Department of the Treasury, by methods including blending of financings or parallel financing; and

"(B) the combination of grants offered by the Department of the Treasury with financing offered by private financial institutions or entities, by methods including blending of financings or parallel financing.

"(b) Funds appropriated under this part may be combined with financing by the Bank or private commercial financing in order to offer, or arrange for, financing for the exportation of United States goods and services to countries or in sectors which are present or likely future export markets for any country which the Secretary determines engages in predatory export financing through the use of tied aid or partially untied aid credits and which impedes progress towards the conclusion of a comprehension arrangement to restrict the use of such credits for commercial purposes.

"(c) There is hereby authorized to be appropriated to the Secretary, without fiscal year limitation, for purposes of this part, $300 million, *provided that*, notwithstanding any other provision of law, upon a declaration by the President that any portion of such funds is not required to achieve the purposes of this part, the funds so determined to be in excess of requirements shall cease to be available.".

(d) Section 645 of the Trade and Development Enhancement Act of 1983 (12 U.S.C. 635r) is repealed.

(e) Section 646 of the Trade and Development Enhancement Act of 1983 (12 U.S.C. 635s) is renumbered as section 645 and amended to read as follows—

"IMPLEMENTATION

"SEC. 645. (a) Prior to approving each financing under the tied aid credit program authorized by Section 644, the Secretary shall seek the advice of the National Advisory Council on International Monetary and Financial Policies.

"(b) Each financing made pursuant to the tied aid credit program authorized by Section 644 shall be on terms consistent with the Arrangement, as in effect at the time such financing is approved.

"(c) The Secretary may issue regulations and take such other actions as may be necessary to implement this part.

"(d) The authorities contained in this part expire on September 30, 1987.

(f) A new Section 646 is added to the Trade and Development Enhancement Act to read as follows—

"REVIEWABILITY

"SEC. 646. Actions by the Secretary and the Chairman of the Bank pursuant to this part shall not be reviewable by any court, except for abuse of discretion."

(g) Section 647 of the Trade and Development Enhancement Act of 1984 (12 U.S.C. 635t) is amended as follows—

(1) Subsection (1) is amended to read as follows—

"(1) the term "tied aid credit" means credit—

(A) which involves a grant element greater than zero percent, as determined by the Development Assistance Committee of the Organization for Economic Cooperation and Development;

(B) which is tied, in fact or in effect, to procurement of goods and services from the donor country; and

(C) which is financed either exclusively from public funds or partly from public and partly from private funds;";

(2) Subsection 647(2) is repealed and replaced by a new subsection 647(2) which reads as follows—

"(2) the term "partially untied aid credit" means credit—

(A) which involves a grant element greater than zero percent, as determined by the Development Assistance Committee of the Organization for Economic Cooperation and Development;

(B) which is tied, in fact or in effect, to procurement of goods and services from the donor country and from a restricted number of countries; and

(C) which is financed either exclusively from public funds or partly from public and partly from private funds;";

(3) Subsection 647(3) is repealed;

(4) Subsections (4), (5), and (6) are renumbered subsections (3), (4), and (5), respectively;

(5) A new subsection 657(6) is added to read as follows—

"(6) the term 'Secretary' means the Secretary of the Treasury;" and

(6) A new Subsection 647(7) is added to read as follows—

"(7) the term 'Arrangement' means the Arrangement on Guidelines for Officially Supported Export Credits established through the Organization for Economic Cooperation and Development."

SEC. 4. The amendments made by this Act shall become effective ten days after enactment of this Act.

WAR CHEST LEGISLATION

The bill would amend the Trade and Development Enhancement Act of 1983 and establish a $300 million tied aid credit facility. The objective would be to provide leverage to the Secretary of the Treasury in negotiations with 22 industrial country governments to restrict the predatory use of tied aid or partially untied aid credits for commercial purposes. To accomplsih this, the fund would be controlled by Treasury as the agency responsible for negotiations.

Predatory tied aid credits are unfair trade practices, have caused the United States to lose key export sales, and have diverted funds away from development assistance.

To maximize U.S. negotiating leverage, the Bill provides:

A credible threat by establishing a $300 million war chest to support up to $1.0 billion of credits;

Targeting the war chest in sectors and markets of particular importance to countries impeding negotiations;

Authority to initiate tied aid credits.

To avoid transforming the war chest into a permanent subsidy and entitlement program, the Bill provides:

A clearly defined purpose which ties the war chest to U.S. negotiating objectives;

Treasury control over the fund, and Presidential discretion to end the fund when sufficient negotiating progress has been achieved;

Sunset provision of September 30, 1987.

To limit the budgetary impact, the Bill authorizes:

Use of grants rather than low-interest loans (which would require higher appropriations);

Direct appropriation to Treasury to ensure the fund does not distort the objectives of Eximbank and USAID.

SECTION-BY-SECTION ANALYSIS

Section 2. This section states that Congress finds that tied aid and partially untied aid credits as currently offered by other nations are a predatory method of financing exports; that the market-distorting effects of these practices have caused the United States to lose export sales; that these practices undermine export credit discipline within the Organization for Economic Cooperation and Development; that these predatory practices impede the growth of developing countries to the extent they divert funds away from development assistance; and that a temporary tied aid credit facility in the Department of the Treasury targeted at the export markets of those countries which engage in such tied aid and partially untied aid credits and which block progress toward an arrangement to restrict tied aid credits will encourage the successful conclusion of such an arrangement.

Section 3. This section amends the Trade and Development Enhancement Act of 1983.

Section 3(a) amends section 642 of the Trade and Development Enhancement Act of 1983:

New subsection 642(1) states the goal of the United States to eliminate predatory concessional financing engaged in by other nations, and to restore export competition to a market basis.

New subsection 642(2) states the goal of the United States to stimulate economic development in the developing world by moving to eliminate tied aid and partially untied aid credits whose primary purpose is to promote commercial exports from developed countries.

New subsection 642(3) states the United States' intent to establish a temporary tied aid credit program to combat predatory credit programs of foreign governments. The purpose of this policy is to encourage those governments to enter into effective and comprehensive arrangements with the United States to restrict the use of tied aid and partially untied aid credits for commercial purposes and to limit and govern the use of export credit subsidies generally.

Section 3(b) amends section 643 of the Trade and Development Enhancement Act of 1983 to reflect the current status of negotiations aimed at restricting the use of tied aid and partially untied aid credits:

Existing subsections 643(1) and 643(3) are repealed because their objectives have already been agreed upon in negotiations.

New subsection 643(1) amends the existing negotiating mandate to call for a restriction on the use of partially untied aid credits as well as on the use of tied aid credits by a date certain.

Subsections 643(4) and 643(5) are consolidated into a new subsection 643(2). That subsection and new subsection 643(3) (formerly subsection 643(6)) are amended by adding references to partially untied aid credits.

Section 3(c) amends section 644 of the Trade and Development Enhancement Act of 1983:

New subsections 644(a)(1) and 644(a)(2) state that the Secretary of the Treasury shall establish a program of tied aid credits for U.S. exports, to be carried out in cooperation with the Export-Import Bank of the United States and with private financial institutions, as appropriate.

New subsection 644(a)(3) substitute the Department of the Treasury in place of the Agency for International Development as a source of financing in paragraph (A) and in place of the Export-Import Bank in Paragraph (B).

New subsection 644(b) authorizes funds under this Act to be combined with financing by the Export-Import Bank in order to offer financing for exportation of U.S. goods and services to countries which are export markets for nations which engage in predatory tied aid or partially untied aid export credits and block progress toward an agreement to end tied aid credits.

New subsection 644(c) authorizes a $300 million appropriation to the Secretary to carry out this Act, provided that, notwithstanding any other provision of law, the President may declare any amount of the appropriation unnecessary to carry out the purposes of the Act, at which time any excess funds will cease to be available.

Section 3(d) repeals section 645 of the Trade and Development Enhancement Act of 1983, the section establishing a tied aid credit program in the Agency for International Development.

Section 3(e) amends section 646 of the Trade and Development Enhancement Act of 1983 and renumbers it as section 645:

New subsection 645(a) deletes the requirement for unanimous consent by the National Advisory Council on International and Monetary and Fiscal Policies, and instead requires that the Secretary of the Treasury seek the advice of that Council before approving each financing under this program.

New subsection 645(b) requires that each financing be made on terms consistent with the OECD Arrangement on Guidelines for Officially Supported Export Credits.

New subsection 645(c) grants the Secretary of the Treasury authority to issue regulations and to take any other actions, which the Secretary may deem necessary to implement the Act.

New subsection 645(d) provides that all authorities under this Act expire September 30, 1987.

Section 3(f) adds a new section 646 to the Trade and Development Enhancement Act of 1983 to provide that actions taken by the Secretary of the Treasury and the Chairman of the Export-Import Bank of the United States under this Act are not reviewable by any court, except in cases of abuse of discretion.

Section 3(g) amends section 647—the definitions section—of the Trade and Development Enhancement Act of 1983:

New subsections 647(1) and 647(2) define "tied aid credit" and "partially untied aid credit" to conform to the definitions of those terms in the OECD Arrangement on Guidelines for Officially Supported Export Credits.

Subsection 647(3) is repealed and subsections (4), (5) and (6) are renumbered as subsections (3), (4) and (5).

New subsection 647(6) is added to define "Secretary" as the Secretary of the Treasury.

New subsection 647(7) is added to define the "Arrangement" as the Arrangement on Guidelines for Officially Supported Export Credits established through the Organization for Economic Cooperation and Development.

Section 4. This section provides that the amendments made by the Act shall become effective ——.

THE GENERAL COUNSEL
OF THE TREASURY,
Washington, DC, September 26, 1985.

Hon. GEORGE BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: There is transmitted herewith a draft bill, "To eliminate foreign predatory export credit practices, establish a tied aid credit facility, and for other purposes."

Tied aid and partially untied aid credits offered by the governments of other countries are a predatory means of financing exports. The market-disrupting effects of these practices have caused the United States to lose export sales. These practices also impede the growth of developing countries to the extent that they divert funds away from legitimate development assistance.

The Administration has proposed an agreement in the Organization for Economic Cooperation and Development that would require at least 50 percent of any such credit to be in the form of a grant. That minimum grant element would make these credits so expensive to use that in practice they would be limited to real foreign aid. We have succeeded in raising the minimum grant element from 20 to 25 percent, but have been blocked from imposing greater discipline over tied aid credits. Nearly all other OECD members agree that the figure should rise.

The proposed bill would amend the Trade and Development Enhancement Act of 1983 to clarify U.S. negotiating goals in seeking to eliminate predatory concessional financing in the form of tied aid and partially untied aid credits.

The proposed bill would seek to strengthen the U.S. negotiating position through the authorization of appropriations in the amount of $300 million for the creation of a temporary tied aid credit facility in the Department of the Treasury. The facility would be used to provide grants tied to Export-Import Bank and/or private credits targeted at the export markets of those countries which engage in such tied aid and partially untied aid credits and which block progress toward an arrangement to restrict tied aid credits. This facility could support up to $1.0 billion in tied aid credit authorizations.

It should be emphasized that this facility would be used selectively to provide leverage to the Secretary of the Treasury in negotiating elimination of predatory export financing by other countries—it would not be used as an entitlement program for U.S. exporters. Establishment of the fund in the Treasury, rather than in Eximbank or AID, would emphasize its purpose as a negotiating tool, rather than as an export promotion or development assistance device.

Also enclosed are an analysis explaining the provisions of the draft bill and a comparative type showing the changes that would be made in existing laws.

It will be appreciated if you will lay the enclosed draft bill before the Senate. A similar proposal has been transmitted to the Speaker of the House.

The Office of Management and Budget has advised that the proposed legislation is in accord with the President's program.

Sincerely,

ROBERT M. KIMMITT.[1]

● Mr. GARN. Mr. President, today I am pleased to join Senator HEINZ and others of my colleagues in introducing the Fair Export Financing Act of 1985.

Mr. President, for several years, American exporters, having quality goods and services at competitive prices, have been left defenseless against aggressive, predatory, foreign government export financing. France, Japan, and several other countries have been promoting their own exports by offering financing at ridiculously low interest rates and on generous terms, made possible by mixing foreign aid moneys with official credits. By means of this tactic they have gained billions of dollars of export sales, frequently at the expense of American exporters.

I am firmly opposed to subsidizing exports. But I believe that the most effective way of eliminating this practice is to make it impossible for anyone to profit by it, and then negotiate its end. When France or Japan offers a mixed credit and they find that their competition can match their credit offer, then there is no benefit. But we have been unwilling and often unable to match these mixed credits, and the French have been very grateful. Changing this situation is the purpose of the bill that we are introducing today.

This bill would provide for a $300 million warchest with which to combat

mixed credits and bring our trade competitors to the negotiating table.

Without such a warchest in the past we have had little success in even limiting this form of predatory financing. We have had success, major success, in curbing other forms of official export financing, because we have successfully demonstrated our ability to offer competitive financing in the more common forms. But it seems that success in limiting these more traditional credits has resulted in an increased reliance on mixed credits.

We must end this practice, and, just as in our military security, the best way to end a conflict is to demonstrate our ability to win it. At least with this bill, our negotiators will not negotiate empty handed and will be less likely to return empty handed.

The sums authorized are modest, in keeping with the need to control Government spending. But if vigorously used, added to the Eximbank's $1.8 billion in direct lending resources, we should be able to expect results. And action of this kind is what governments are for, to protect their citizens from the harmful practices of those beyond the borders.

I congratulate Senator HEINZ on introducing this legislation. I am happy to join with him in sponsoring the bill, as I have several times during the past 4 years on similar legislation to create an export credit warchest. The administration has recommended this legislation, and I hope that it will enjoy the support of all of my colleagues.●

By Mr. HATCH (for himself, Mr. KENNEDY, Mr. TRIBLE, Mrs. HAWKINS, Mr. THURMOND, Mr. DOLE, Mr. BAUCUS, Mr. WEICKER, Mr. WALLOP, Mr. NICKLES, Mr. INOUYE, Mr. BURDICK, Mr. ZORINSKY, Mr. ROCKEFELLER, Mr. GARN, Mr. LEVIN, Mr. QUAYLE, Mr. SIMON, Mr. GRASSLEY, Mr. SYMMS, Mr. CRANSTON, Mr. METZENBAUM, Mr. KERRY, Mr. CHAFEE, Mr. PELL, Mr. DODD, Mr. ANDREWS, Mr. BOREN, Mr. STAFFORD, Mr. BYRD, Mr. NUNN, Mr. MATSUNAGA, Mr. MURKOWSKI, and Mr. RIEGLE):

S.J. Res. 218. Joint resolution to designate November 24, 1985, as "National Day of Fasting To Raise Funds To Combat Hunger"; to the Committee on the Judiciary.

NATIONAL DAY OF FASTING TO RAISE FUNDS TO COMBAT HUNGER

Mr. HATCH. Mr. President, today Senator KENNEDY and I, are introducing a joint resolution designating November 24, 1985, the Sunday before Thanksgiving, as "National Day of Fasting to Raise Funds to Combat Hunger." Joining us as original cosponsors of this resolution are Senators TRIBLE, HAWKINS, THURMOND, DOLE, BAUCUS, WEICKER, WALLOP, NICKLES, INOUYE, BURDICK, ZORINSKY, ROCKEFELLER, GARN, LEVIN, QUAYLE, SIMON, GRASSLEY, SYMMS, CRANSTON, METZENBAUM, KERRY, CHAFEE, PELL, DODD, ANDREWS, BOREN, STAFFORD, BYRD, MATSUNAGA, MURKOWSKI, NUNN, and RIEGLE.

By the end of today, more than 35,000 men, women and children are expected to perish. They will not die because of war, nor due to automobile or industrial accidents. Their demise will not be caused by freak acts of nature or by incurable diseases. Their passing will not be chronicled by newspapers, nor will it be reported in grim detail on national television. Instead, in seeming solitude they will die of starvation.

Tomorrow, another 35,000 will die, and the same will happen the day after that and the day after that, on and on into the foreseeable future.

It is difficult to grasp this ghastly reality, perhaps because the facts are so extreme, the numbers so immense, that they strike us as somehow unbelievable. Yet Americans across the country have awakened to the hideous truth and the crisis it portends. Americans throughout this country have acted.

More than $120 million has been raised by private citizens to feed the hungry, particularly in Africa. Those who have given come from every walk of life, from every city, State, county, and village, from every conceivable political, social, and religious background. Individual Americans have stepped forward and given what they could.

During a hearing that I held last week on the subject of famine and our Nation's generous outpouring of assistance, three young women from my home State of Utah testified on behalf of their classmates from the Rowland Hall-St. Marks School. Mr. President, I would like to read from the statement of one of these witnesses, Amy Buchi. She said:

> Very few people, let alone sixth graders, get to help people they've never met, much less save some lives. This major famine was and is the first real disaster I've had to deal with in my 12 years of life. Everyday I saw mothers holding dead or dying babies and children who were too weak to eat. I had to deal with and accept death. I've experienced guilt each time we've had leftover food at home and some of it was thrown out. I knew children my own age were dying in Africa because they didn't have enough food and at the same time children in my school were throwing away the lunch they didn't finish. Anything I could do to help the starving, I did.

Amy and her classmates led a drive that raised over $160,000 for famine victims in Africa. She and her fellow witnesses typify the millions of Americans whose spirit and desire to help have literally saved thousands of lives.

Yet, despite these efforts, starvation, malnutrition and famine have not ended. The inexorable death toll continues. More must be done today, tomorrow, next year, 5 years from now to defeat hunger.

Understanding the problem is the first step. A willingness to act is the next. Having the courage to continue to give until famine is defeated is the most important but difficult step of all. We must realize that our assistance must continue long after public giving ceases to be fashionable.

Recognizing the reality of what is needed to defeat famine, my colleagues and I are introducing today a joint resolution which will designate Sunday, November 24, 1985, the Sunday before Thanksgiving, as "National Day of Fasting to Raise Funds to Combat Hunger."

Participants in the fast will be asked to forgo a meal or two on this particular Sunday and send the savings to either the charity of their choice or to a post office box here in Washington, DC, which is being established to receive the funds. Obviously, any and all contributions will be welcome and the sponsors hope every American will choose to participate in some way, even if fasting is not possible.

Contributions sent to the post office box will be processed and distributed through InterAction, the highly respected and reputable umbrella organization of groups dedicated to ending hunger throughout the world. The primary target of this fundraising will be Africa, but InterAction has agreed to reserve 15 percent of all funds raised as a result of the National Day of Fasting to Combat Hunger here in the United States. They intend to spend 45 percent of the funds on long-term assistance in Africa, 35 percent on emergency food and medical relief and the remaining 5 percent on educational needs.

I hope it is remembered that our purpose in sponsoring the fast to end famine is not to interfere, detract or diminish the panoply of events already planned for this fall, such as the upcoming World Food Day on Oxfam America's program of events. All of us recognize that several organizations have longstanding programs in this area. Instead, it is our intent the proposed day of fasting augment and support these other activities and provide another opportunity for Americans to help defeat famine, malnutrition, and starvation.

Famine knows no politics and our response to it has and should continue to transcend political beliefs and ideologies. By working together, we can end famine, feed the hungry, and enrich the lives of all mankind.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 218

Whereas the famine in Africa has caused the death of hundreds of thousands of people and has endangered the lives of millions;

Whereas the solution to such famine involves not only rushing emergency food and medical supplies to the area stricken, but also improving agricultural policies and instituting more sophisticated famine prevention practices in such areas;

Whereas people from all walks of life and every part of the United States have responded quickly and effectively to every famine which has occurred since World War II and have already raised more than $120,000,000 for emergency relief of the famine in Africa;

Whereas the generosity and compassion of the people of the United States should be recognized and commended;

Whereas twenty-four people die of starvation each minute in Africa;

Whereas more remains to be done to fight starvation in Africa and in other parts of the world;

Whereas the Nation has enough resources to save many lives;

Whereas hunger in the United States is a pressing domestic problem that must be addressed through food relief and economic development for those in need; and

Whereas fasting is one of the strongest symbolic acts by which solidarity with the plight of fellow human beings may be demonstrated: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 24, 1985, is designated as "National Day of Fasting to Raise Funds to Combat Hunger" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to fast, to contribute generously to relief organizations fighting hunger, and to observe such day with appropriate ceremonies and other activities.

Mr. KENNEDY. Mr. President, today Senator HATCH and I, along with 30 of our distinguished colleagues, are introducing a joint resolution to designate the Sunday before each Thanksgiving as a "National Day of Fasting To Raise Funds To Combat Hunger."

Tragically, hunger—both domestic and foreign—remains with us, despite our clear ability to end it. It is the most preventable of all the life threatening problems we face.

It remains as the principal challenge before us, both as a nation and as a people—to finally deal with the hunger and famine which continues to stalk our globe. It remains as one of the overriding tasks of our Government to end hunger in the United States and to help meet the needs of millions throughout the Third World. And it remains as a challenge to all of us to support the work of America's voluntary agencies in helping meet the food and relief needs of countless men, women, and children in Africa and Asia, and responding to the cries for help from needy people in communities throughout our own country.

That is the purpose of our joint resolution—to underscore and support the important work of America's voluntary agencies. I have personally witnessed their helping hand as I conducted a series of hunger hearings across our country during the Thanksgiving holiday in 1983, and when I visited the famine areas of Ethiopia and Sudan this past Christmas.

America's voluntary agencies are on the frontlines of our effort to respond to the hungry in our midst, as well as overseas. They are the lifeline of support in helping millions in the developing world achieve self-sufficiency in food production—helping to conquer famine once and for all.

Too often, however, Americans find it easier to see the problem of hunger more clearly in distant lands than we do in our own communities. The same intense commitment to alleviate famine and suffering in foreign nations must also be brought to bear to eliminate hunger here at home. The Physicians Task Force Report on Hunger released earlier this year provides indisputable evidence that hunger continues to rise dramatically in the United States. Twenty million Americans suffer from hunger every month; malnutrition among children and the elderly is increasing.

We all know that Federal budget cuts which hurt the poor are responsible for the unacceptable increase in the incidence of hunger. We also know that the proven Federal food programs are the only realistic answer. Hunger in America is a national disgrace. But it is also a problem we know how to end, and it is time this Government met its national responsibility to end it.

Mr. TRIBLE. Mr. President, I am pleased to join Senators HATCH and KENNEDY and several of our colleagues in introducing a joint resolution designating the Sunday before Thanksgiving as a "National Day of Fasting To Raise Funds To Combat Hunger."

The tragic famine in Africa has touched all our lives. The American people have responded to the call for help in an unprecedented and heroic manner—as the resolution states, the American people have given more than $120 million. Our Government has provided additional hundreds of millions of dollars in aid.

I have traveled to Ethiopia and walked through the feeding camps. I have held little children in my arms that were dying because of starvation and I have witnessed the widespread death and despair and destruction of the famine. But my most lasting memory is the life and hope in the faces of thousands that are alive because of the generosity of the American people—because they are being fed with grain from sacks bearing the stamp, "From the People of the U.S.A."

The establishment of a national day of fasting will help to ensure that the American response will continue. And it must continue. The evening news focuses on new problems, and yet the death and despair of the famine continues.

I am confident that the American people will respond to the National Day of Fasting. Indeed, earlier this year, the people of Virginia, Maryland, and District of Columbia gave well over $1 million during a 40-hour fast for world vision's relief effort; a nationwide fast, as proposed by this resolution, could raise many millions more.

Finally, I wish to note the significance of choosing the Sunday before Thanksgiving for this day of fasting. The first Thanksgiving in Virginia and Massachusetts commemorated not only the bountiful harvest, but also gave thanks to God for survival itself. Now, more than 300 years later, for most of us Thanksgiving is more likely to lead to thoughts of football, parades, and turkey. Perhaps this resolution will help to remind us of the true and lasting significance of this uniquely American holiday.

Mr. President, I look forward to working with our colleagues to enact this resolution in a timely manner and to continue the effort to feed the hungry.

ADDITIONAL COSPONSORS

S. 15

At the request of Mr. MOYNIHAN, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of S. 15, a bill to authorize the Secretary of Health and Human Services to make grants to States for the purpose of increasing the ability of States to provide drug abuse prevention, education, treatment, and rehabilitation, and for other purposes, to authorize the Attorney General to make grants to States for the purpose of increasing the level of State and local enforcement of State laws relating to production, illegal possession, and transfer of controlled substances.

S. 505

At the request of Mr. DURENBERGER, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 505, a bill entitled the "Maternal and Child Health Preventive Care Amendments of 1985".

S. 902

At the request of Mr. DECONCINI, the names of the Senator from California [Mr. CRANSTON] and the Senator from Maine [Mr. MITCHELL] were added as cosponsors of S. 902, a bill to establish Federal standards and regulations for the conduct of gaming activities within Indian country, and for other purposes.

S. 970

At the request of Mr. CRANSTON, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 970, a bill to require that fifty-dollar bills bear a portrait of

Georgia Neese Clark Gray, the first woman to serve as Treasurer of the United States.

S. 1223

At the request of Mr. ARMSTRONG, the names of the Senator from Pennsylvania [Mr. SPECTER], the Senator from Connecticut [Mr. DODD], and the Senator from Michigan [Mr. RIEGLE] were added as cosponsors of S. 1223, a bill to authorize the erection of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces of the United States who served in the Korean war.

S. 1233

At the request of Mr. DOLE, the names of the Senator from Mississippi [Mr. STENNIS] and the Senator from New Hampshire [Mr. HUMPHREY] were added as cosponsors of S. 1233, a bill to amend the Animal Welfare Act to insure the proper treatment of laboratory animals.

S. 1437

At the request of Mr. THURMOND, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of S. 1437, a bill to amend the Controlled Substances Act to create new penalties for the manufacturing with intent to distribute, the possession with intent to distribute, or the distribution of "designer drugs," and for other purposes.

S. 1446

At the request of Mr. ANDREWS, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 1446, a bill to amend title 38, United States Code, to improve veterans' benefits for former prisoners of wars.

S. 1509

At the request of Mr. CRANSTON, the name of the Senator from Arkansas [Mr. PRYOR] was added as a cosponsor of S. 1509, a bill to amend chapter 30 of title 38, United States Code, to provide for educational assistance under the All-Volunteer Force Educational Assistance Program for pursuit of a program of education by correspondence.

S. 1569

At the request of Mr. BINGAMAN, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 1569, a bill to amend title XVIII of the Public Health Service Act to encourage health promotion and disease prevention through the implementation of a coordinated national nutrition monitoring system.

S. 1570

At the request of Mr. NICKLES, the names of the Senator from Washington [Mr. GORTON] and the Senator from Maine [Mr. COHEN] were added as cosponsors of S. 1570, a bill to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours, to clarify the application of that act to volunteers, and for other purposes.

S. 1621

At the request of Mr. MELCHER, the name of the Senator from North Carolina [Mr. HELMS] was added as a cosponsor of S. 1621, a bill to amend title 25 United States Code, relating to Indian education programs, and for other purposes.

S. 1654

At the request of Mr. STEVENS, the name of the Senator from Florida [Mr. CHILES] was added as a cosponsor of S. 1654, a bill to amend title 18, United States Code, to provide for criminal forfeiture of proceeds derived from espionage activities and rewards for informants providing information leading to arrests in espionage cases.

S. 1660

At the request of Mr. DENTON, the names of the Senator from Wyoming [Mr. WALLOP], and the Senator from Alaska [Mr. MURKOWSKI] were added as cosponsors of S. 1660, a bill to grant a Federal charter to the Confederate Memorial Association.

S. 1679

At the request of Mr. GRASSLEY, the name of the Senator from Illinois [Mr. DIXON] was added as a cosponsor of S. 1679, a bill to strengthen provisions of the law that provide safeguards when imports threaten to impair the national security.

SENATE JOINT RESOLUTION 130

At the request of Mr. QUAYLE, the names of the Senator from Minnesota [Mr. BOSCHWITZ], and the Senator from Alabama [Mr. HEFLIN] were added as cosponsors of Senate Joint Resolution 130, a joint resolution designating the week beginning on November 10, 1985, as "National Blood Pressure Awareness Week."

SENATE JOINT RESOLUTION 195

At the request of Mr. KASTEN, the names of the Senator from Oklahoma [Mr. NICKLES], the Senator from Arizona [Mr. DECONCINI], the Senator from Arizona [Mr. GOLDWATER], and the Senator from Florida [Mr. CHILES] were added as cosponsors of Senate Joint Resolution 195, a joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "National Temporary Services Week."

SENATE JOINT RESOLUTION 199

At the request of Mr. MURKOWSKI, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of Senate Joint Resolution 199, a joint resolution to designate the month of November 1985 as "National Elks Veterans Rememberance Month."

SENATE JOINT RESOLUTION 202

At the request of Mr. HATCH, the names of the Senator from Georgia [Mr. NUNN], the Senator from Kansas [Mr. DOLE], the Senator from South Carolina [Mr. HOLLINGS], the Senator from North Dakota [Mr. BURDICK], the Senator from New Hampshire [Mr. HUMPHREY], and the Senator from North Dakota [Mr. ANDREWS] were added as cosponsors of Senate Joint Resolution 202, a joint resolution designating November 1985 as "American Liver Foundation National Liver Awareness Month."

SENATE JOINT RESOLUTION 205

At the request of Mr. MCCLURE, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of Senate Joint Resolution 205, a joint resolution to designate March 21, 1986, as "National Energy Education Day."

SENATE JOINT RESOLUTION 208

At the request of Mr. COCHRAN, the name of the Senator from Florida [Mr. CHILES], and the Senator from North Carolina [Mr. EAST] were added as cosponsors of Senate Joint Resolution 208, a joint resolution to designate the week of October 27, 1985, through November 2, 1985, as "National Alopecia Awareness Week."

SENATE JOINT RESOLUTION 209

At the request of Mr. D'AMATO, the names of the Senator from Pennsylvania [Mr. HEINZ] was added as cosponsor of Senate Joint Resolution 209, a joint resolution to designate the period from October 28, 1985, through October 28, 1986, as the "Centennial Year of Liberty in the United States."

SENATE JOINT RESOLUTION 210

At the request of Mr. BENTSEN, the names of the Senator from Montana [Mr. BAUCUS], the Senator from Kansas [Mr. DOLE], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Vermont [Mr. LEAHY], and the Senator from Delaware [Mr. ROTH] were added as cosponsors of Senate Joint Resolution 210, a joint resolution designating the week beginning October 20, 1985 as "Benign Essential Blepharospasm Awareness Week."

SENATE JOINT RESOLUTION 211

At the request of Mr. DURENBERGER, the names of the Senator from Alaska [Mr. MURKOWSKI], the Senator from Ohio [Mr. METZENBAUM], and the Senator from West Virginia [Mr. BYRD] were added as cosponsors of Senate Joint Resolution 211, a joint resolution to provide for the designation of the week of October 6, 1985, as "National Sudden Death Syndrome Awareness Week."

SENATE JOINT RESOLUTION 213

At the request of Mr. FORD, the names of the Senator from Michigan [Mr. RIEGLE], and the Senator from

Wisconsin [Mr. KASTEN] were added as cosponsors of Senate Joint Resolution 213, a joint resolution to designate January 19-25, 1986, "National Jaycee Week."

SENATE CONCURRENT RESOLUTION 56

At the request of Mr. METZENBAUM the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of Senate Concurrent Resolution 56, a concurrent resolution expressing the sense of the Congress that the antitrust enforcement guidelines entitled "Vermont Restraints Guidelines," published by the Department of Justice on January 23, 1985, do not have the force of law, do not accurately state current antitrust law, and should not be considered by the courts of the United States as binding or persuasive.

SENATE CONCURRENT RESOLUTION 72

At the request of Mr. SIMON, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of Senate Concurrent Resolution 72, a concurrent resolution expressing the sense of Congress concerning human rights in Poland.

SENATE CONCURRENT RESOLUTION 76

At the request of Mr. HART, the names of the Senator from Pennsylvania [Mr. HEINZ], the Senator from Illinois [Mr. SIMON], the Senator from South Carolina [Mr. THURMOND], the Senator from Michigan [Mr. RIEGLE], the Senator from Indiana [Mr. QUAYLE], the Senator from Oklahoma [Mr. NICKLES], the Senator from South Carolina [Mr. HOLLINGS], the Senator from North Dakota [Mr. ANDREWS], the Senator from Oklahoma [Mr. BOREN], and the Senator from Rhode Island [Mr. PELL] were added as cosponsors of Senate Concurrent Resolution 76, a concurrent resolution asking that the President bring the rights of the Polish people to the attention of the Soviet Government.

AMENDMENT NO. 743

At the request of Mr. RIEGLE his name was added as a cosponsor of amendment No. 743 proposed to House Joint Resolution 372, a joint resolution increasing the statutory limit on the public debt.

AMENDMENT NO. 745

At the request of Mr. RIEGLE, his name was added as a cosponsor of amendment No. 745 proposed to House Joint Resolution 372, a joint resolution increasing the statutory limit on the public debt.

AMENDMENT NO. 753

At the request of Mr. WEICKER, his name was added as a cosponsor of amendment No. 753 proposed to House Joint Resolution 372, a joint resolution increasing the statutory limit on the public debt.

SENATE CONCURRENT RESOLUTION 78—SUPPORTING UNIVERSAL ACCESS TO IMMUNIZATION BY 1990 AND ERADICATION OF CHILDHOOD DISEASES

Mr. BRADLEY (for himself, Mr. KASTEN, and Mr. SIMON) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 78

Whereas the United Nations Children's fund (UNICEF) reports that four million children die annually because they have not been immunized against the six major childhood diseases: polio, measles, whooping cough, diptheria, tetanus, and tuberculosis;

Whereas at present less than 20 percent of children in the developing world are fully immunized against these diseases;

Whereas each year more than five million additional children are permanently disabled and suffer diminished capacities to contribute to the economic, social, and political development of their countries because they have not been immunized;

Whereas ten million additional childhood deaths from immunizable and potentially immunizable diseases could be averted annually by the development of techniques in biotechnology for new and cost-effective vaccines;

Whereas the World Health Assembly, the Executive Board of the United Nations Children's Fund, and the United Nations General Assembly are calling upon the nations of the world to commit the resources necessary to meet the challenge of universal access to childhood immunization by 1990;

Whereas the United States joined in a global effort by providing political and technical leadership that made possible the eradication of smallpox during the 1970s;

Whereas the development of national immunization systems that can both be sustained and also serve as a model for a wide range of primary health care actions is a desired outcome of our foreign assistance policy;

Whereas the United States Centers for Disease control headquartered in Atlanta is uniquely qualified to provide technical assistance for a worldwide immunization and eradication effort and is universally respected;

Whereas at the 1984 "Bellagio Conference" convened by the World health Organization, the United Nations Children's Fund, the International Bank for Reconstruction and Development, the U.N. Development Program, and the Rockefeller Foundation, it was determined that the goal of universal childhood immunization by 1990 is indeed achievable;

Whereas the Congress, through authorizations and appropriations for international health research and primary health care activities and the establishment of the Child Survival Fund, has played a vital role in providing for the well-being of the world's children;

Whereas the Congress has expressed its expectation that the Agency for International Development will set as a goal the immunization by 1990 of at least 80 percent of all the children in those countries in which the Agency has a program;

Whereas the United States private sector and public at large have responded generously to appeals for support for national immunization campaigns in developing countries: Now, therefore, be it

Resolved by the Senate, (the House of Representatives concurring), That (a) Congress calls upon the President to direct the Agency for International Development, working through the Center for Disease Control and other appropriate Federal agencies, to work in a global effort to provide enhanced support toward achieving the goal of universal access to childhood immunization by 1990 as sponsored by the World Health Organization and UNICEF by—

(1) assisting in the delivery, distribution, and use of vaccines, including—

(A) the building of locally sustainable systems and technical capacities in developing countries to reach, by the appropriate age, not less than 80 percent of their annually projected target population with the full schedule of required immunizations, and

(B) the development of a sufficient network of indigenous professionals and institutions with responsibility for developing, monitoring, and assessing immunization programs and continually adapting strategies to reach the goal of preventing immunizable diseases; and

(2) performing, supporting, and encouraging research and development activities, both in the public and private sector, that will be targeted at developing new vaccines and at modifying and improving existing vaccines to make them more appropriate for use in developing countries.

(b) In support of this global effort, the President should appeal to the people of the United States and the United States private sector to support public and private efforts to provide the resources necessary to achieve universal access to childhood immunization by 1990.

Mr. BRADLEY. Mr. President, on behalf of my distinguished colleagues, the junior Senators from Wisconsin and Illinois, I send a concurrent resolution to the desk and ask that it be referred to the appropriate committee.

Mr. President, on those rare but unfortunate occasions when the world is beset by tragedy—whether caused by an earthquake in Mexico, an air disaster in Japan, a release of toxic chemicals in Bhopal, or other catastrophes—the sympathy and support of all Americans goes out to the affected people. For this we can take great pride in our own country for always being ready, willing and able to help in whatever way possible.

Yesterday, Mr. President, a tragedy struck which dwarfs all of those I've already mentioned. In 1 day, Mr. President, 11,000 children died. There are no media accounts of this international disaster, for you see Mr. President, this is a daily occurrence. Yet, 11,000 more children will die today and tomorrow and each day of this and every year. The total will be 4 million children per year. But the saddest part of this tragedy is that it is avoidable. Those children are victims of six diseases; diseases for which safe and effective immunizations exist. These diseases—polio, measles, whooping cough, diphtheria, tetanus, and tuberculosis—are virtually unknown in the developed world but they continue to

ravage children in developing countries.

The effectiveness of immunization programs, as I stated, is evident in the reduced cases of these diseases here in our own country. But the finest example of the advantages of immunization is the worldwide effort of the 1970's that resulted in the total eradication of smallpox. Estimates are that the U.S. monetary contribution to this effort has paid itself back in saved medical expenses every 9 months. The payback in human suffering avoided is impossible to assess.

Mr. President, the World Health Organization and the United Nations Children's Fund and the United Nations General Assembly are calling upon the nations of the world to commit the resources necessary to meet the challenge of universal access to childhood immunization by 1990. Heads of states from around the world will speak of this most worthy cause on the 40th anniversary of the United Nations on October 24 of this year in New York City.

Mr. President, Congress recognizes the need of these people. We have increased funding to the Agency for International Development for health purposes. We have created a Child Survival Fund for primary health care such as immunization and oral rehydration therapy. And this year, in the foreign aid authorization we mandated the Agency to provide immunization for not less than 80 percent of all the children in those countries in which they have a program. Mr. President, there have been some criticisms of the Agency's handling of its health program. At a time, when Congress has repeatedly stressed the importance of childhood immunization and international health, the Agency has reduced its health staff.

The question that we face today is not how worthy a cause is global immunization but what is the appropriate role for the United States to play in this effort. That is addressed in the resolution my colleagues and I have sent to the desk.

Clearly, global immunization is not a goal to be achieved by 1990 and then abandoned. In fact, the most important contribution the United States can make is to assist in the delivery, distribution, and use of vaccines by building locally sustainable systems with the technical capacity to provide the required immunizations. This would include training and developing a sufficient group of health professionals, indigenous to the developing country, who would in turn monitor and assess immunization programs, while continually adapting strategies so as to reach the goal of preventing immunizable diseases.

In addition, America is experiencing a revolution in the field of biotechnology. New techniques greatly enhance the prospects of development of new vaccines and significant improvements in existing vaccines. We must continue to perform, support, and encourage such research and development, both in the public and private sector.

Mr. President, our resolution calls upon the President to direct the appropriate Federal agencies to assist WHO and UNICEF as I've described. In addition, the President should appeal to the generosity of the people of the United States to support public and private efforts to achieve universal access to childhood immunization by 1990.

Mr. President, the numbers I cited earlier do not adequately reflect the magnitude of the problem. The 4 million annual deaths are the result of immunizable diseases; there are an additional 10 million childhood deaths from potentially immunizable diseases and the number of children disabled is staggering. Mr. President, in the next hour, approximately 1,500 children will die. There will be no headlines to relay the magnitude of the problem; but today we must make a statement as to the most productive and meaningful role for our Nation to play in this effort to save so many innocent children.

●Mr. SIMON. Mr. President, I am pleased to be a cosponsor of this concurrent resolution, redoubling America's public and private commitment to the goal of immunizing all the world's children by 1990. I applaud my colleague from New Jersey for his initiative and leadership in this important effort.

Yesterday, Senators BRADLEY, KASTEN and I sponsored a briefing on the international effort on child immunization. Steve Joseph, the Special Coordinator for Child Health and Survival at UNICEF, addressed the magnitude of the problem. Each year, only 20 percent of the 90 million children in the developing world are immunized against six common childhood diseases: measles, polio, tuberculosis, diphtheria, pertussis and tetanus. Of the 15 million children under the age of 5 who die each year, a third of these, 5 million, die because they were not vaccinated. In the most dramatic of terms, every minute, 10 children under 5 die and another 10 are handicapped because of these 6 diseases.

With the interrelationship between hunger, malnutrition and disease in the developing world, it is difficult to specifically diagnose causes of death, particularly among young children. But it is clear that, with increasing access to vaccinations, child mortality rates are dramatically reduced. Our own history with smallpox, polio and measles is living proof of this.

The picture is by no means bleak. With the international effort on child immunization well underway, there are spectacular success stories:

In Pakistan, where half a million children die each year from vaccine preventable diseases, the immunization rate was increased from 5 percent to 50 percent of all children.

In Colombia, where the government designated 3 national vaccination days and 120,000 health professionals and other individuals volunteered their services, over three quarters of the nation's children have been vaccinated in the past years.

In the Owo region of Nigeria, immunization has increased from less than 10 percent to almost 83 percent of the children. Nigeria is now developig a nationwide immunization campaign based on the successful program in Owo.

In El Salvador, a de facto cease-fire was declared for 3 days this year, while government officials, health care professionals and volunteers worked to achieve the goal of vaccinating 80 percent of the nation's children.

The United States has actively participated in the child immunization drive. Due to the leadership of Senator BRADLEY, AID is now involved in reaching the goal of immunizing 80 percent of all children in those countries where AID has a program by 1990. But we can and must do more.

According to Dr. Joseph, the cost of reaching the 1990 goal is $1.5 billion. He feels confident that this money will be available through public and private efforts, with or without the support and active participation of the United States. While this may be true, I believe all of us understand the need, and the benefit, for full participation by the United States in this campaign. I hope the President and his administration, as well as the Congress, will take the message of this resolution to heart and continue to provide support and leadership in the effort to immunize all the world's children by 1990.●

AMENDMENTS SUBMITTED

INCREASE IN PUBLIC DEBT LIMIT

BOREN (AND OTHERS) AMENDMENT NO. 757

Mr. BOREN (for himself, Mr. EXON, and Mr. BOSCHWITZ) proposed an amendment to the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt; as follows:

At the appropriate place in the joint resolution, insert a new section as follows:

SEC. . Notwithstanding any other provision of law, when the President, using the authorities under the Balanced Budget and Emergency Deficit Control Act of 1985, issues an order that modifies or suspends the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a

manner as to reduce by a uniform percentage the amount of increase under each such provision, the President shall also issue an order that would reduce, by the same uniform percentage, any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act: *Provided*, That any reduction in the increase of benefits payable under the old-age, survivors, and disability insurance program shall be computed in such a manner as to assure that the increase that would otherwise have been applicable is not reduced by more than 3 percentage points.

LAUTENBERG AMENDMENTS NOS. 758 THROUGH 763

(Order to lie on the table.)

Mr. LAUTENBERG submitted six amendments intended to be proposed by him to the joint resolution, House Joint Resolution 372, supra; as follows:

AMENDMENT No. 758

At the end of the amendment intended to be proposed by Senator MOYNIHAN, add the following:

SECTION 1. 45-DAY EXTENSION OF SUPERFUND TAXES.

(a) IN GENERAL.—Subsection (d) of section 4611 of the Internal Revenue Code of 1954 (relating to termination of environmental taxes) is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(b) CONFORMING AMENDMENTS.—

(1) Subparagraph (D) of section 223(c)(2) of the Hazardous Substance Response Revenue Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(2) Section 303 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on September 30, 1985.

AMENDMENT No. 759

At the end of the amendment intended to be proposed by Senator MOYNIHAN, add the following:

SECTION 1. 45-DAY EXTENSION OF SUPERFUND TAXES.

(a) IN GENERAL.—Subsection (d) of section 4611 of the Internal Revenue Code of 1954 (relating to termination of environmental taxes) is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(b) CONFORMING AMENDMENTS.—

(1) Subparagraph (D) of section 223(c)(2) of the Hazardous Substance Response Revenue Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(2) Section 303 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on September 30, 1985.

AMENDMENT No. 760

At the end of the amendment intended to be proposed by Mr. DOMENICI, add the following:

SECTION 1. 45-DAY EXTENSION OF SUPERFUND TAXES.

(a) IN GENERAL.—Subsection (d) of section 4611 of the Internal Revenue Code of 1954 (relating to termination of environmental taxes) is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(b) CONFORMING AMENDMENTS.—

(1) Subparagraph (D) of section 223(c)(2) of the Hazardous Substance Response Revenue Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(2) Section 303 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on September 30, 1985.

AMENDMENT No. 761

At the end of the amendment intended to be proposed by Mr. Domenici add the following:

SECTION 1. 45-DAY EXTENSION OF SUPERFUND TAXES.

(a) IN GENERAL.—Subsection (d) of section 4611 of the Internal Revenue Code of 1954 (relating to termination of environmental taxes) is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(b) CONFORMING AMENDMENTS.—

(1) Subparagraph (D) of section 223(c)(2) of the Hazardous Substance Response Revenue Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(2) Section 303 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on September 30, 1985.

AMENDMENT No. 762

At the end of the joint resolution, add the following:

SECTION 1. 45-DAY EXTENSION OF SUPERFUND TAXES.

(a) IN GENERAL.—Subsection (d) of section 4611 of the Internal Revenue Code of 1954 (relating to termination of environmental taxes) is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(b) CONFORMING AMENDMENTS.—

(1) Subparagraph (D) of section 223(c)(2) of the Hazardous Substance Response Revenue Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(2) Section 303 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on September 30, 1985.

AMENDMENT No. 763

At the end of the joint resolution add the following:

SECTION 1. 45-DAY EXTENSION OF SUPERFUND TAXES.

(a) IN GENERAL.—Subsection (d) of section 4611 of the Internal Revenue Code of 1954 (relating to termination of environmental taxes) is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(b) CONFORMING AMENDMENTS.—

(1) Subparagraph (D) of section 223(c)(2) of the Hazardous Substance Response Revenue Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(2) Section 303 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is amended by striking out "September 30, 1985" and inserting in lieu thereof "November 14, 1985".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on September 30, 1985.

GLENN AMENDMENT NO. 764

Mr. GLENN proposed an amendment to the joint resolution (H.J. Res. 372), supra; as follows:

At the end of the joint resolution add the following new subsection:

( ) Section 1105(c) of title 31, United States Code, is amended—

(1) by striking out "The" the first time it appears and inserting in lieu thereof "(1) Notwithstanding any other provision of law, the";

(2) by inserting "(other than action that would require an increase in borrowing authority or an increase in the limit imposed by section 3101(b) of this title by more than the applicable amount for the fiscal year for which the budget is submitted)" after "action" the first place it appears; and

(3) by adding at the end thereof the following new paragraph:

"(2) For purposes of this subsection, the term 'applicable amount' means—

"(A) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000; and

"(D) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and

"(E) with respect to the fiscal year beginning October 1, 1990, and each fiscal year thereafter, zero.".

LEAHY AMENDMENT NO. 765

Mr. LEAHY proposed an amendment to the joint resolution (H.J. Res. 372) supra; as follows:

At the end of the resolution, add the following:

( )(1) In preparing any report required under subsection (d)(1) for a fiscal year, the Directors shall comply with this subsection.

(2) The Directors shall—

(A) examine—

(i) each contract with a total amount of budget authority in excess of $20,000,000 under which outlays will be made in such fiscal year to determine whether such contract includes provisions for adjusting outlays in such fiscal year under such contract as a result of inflation; and

(ii) any other Government activity which the Directors consider appropriate under which outlays in such fiscal year will be increased as a result of inflation; and

(B) assume, in determining the total amount of outlays which will be made in such fiscal year, that the adjustments for inflation made in contracts described in clause (i) of subparagraph (A) and activities

described in clause (ii) of such subparagraph will be made on the best available estimate of inflation for such fiscal year.

(3) In the event that the Directors are unable to agree under paragraph (2) on an amount of outlays with respect to any particular contract or activity, the Directors shall use the average of the amounts proposed by each of them with respect to such contract or activity.

MOYNIHAN AMENDMENT NO. 766

Mr. MOYNIHAN proposed an amendment to the joint resolution (H.J. Res. 372) supra; as follows:

At the end of the resolution, add the following new subsection:

( ) Notwithstanding any other provision of law, amounts made available for a fiscal year to the Secretarty of Agriculture or the Commodity Credit Corporation to carry out a program to provide price support to producers of an agricultural commodity (including any program under which payments are made to producers as target price payments or for participation in a reduced acreage, acreage set-aside, or acreage diversion program) shall be reduced by the same percentage as relatively controllable expenditures are reduced under subsection (d)(2)(A)(i)(II) of this section for such fiscal year.

ZORINSKY (AND MATTINGLY) AMENDMENT NO. 767

Mr. ZORINSKY (for himself and Mr. MATTINGLY) proposed an amendment to the joint resolution (H.J. Res. 372) supra; as follows:

At the appropriate place in the joint resolution, insert the following new section:

SEC. . (a)(1) Notwithstanding any other provision of law, it shall not be in order in the Senate or the House of Representatives to consider any concurrent resolution on the budget for any fiscal year beginning after September 30, 1986, or any amendment thereto or any conference report thereon if—

(A) the adoption of such concurrent resolution as reported;

(B) the adoption of such amendment; or

(C) the adoption of the concurrent resolution in the form recommended in such conference report, would cause—

(i) the appropriate level of total budget outlays set forth in such concurrent resolution for such fiscal year to exceed the appropriate level of total budget outlays set forth for the preceding fiscal year in the most recently agreed to concurrent resolution on the budget for that preceding fiscal year;

(ii) the appropriate amount of the deficit set forth in such concurrent resolution for such fiscal year to exceed the appropriate amount of the deficit set forth for the preceding fiscal year in the most recently agreed to concurrent resolution on the budget for that preceding fiscal year.

(2) Notwithstanding section 904(b) of the Congressional Budget Act of 1974, or any other provision of law, paragraph (1) of this subsection may be waived only by a two-thirds vote of the Members of each House of Congress, duly chosen and sworn.

(b) Notwithstanding any other provision of law, the budget transmitted pursuant to section 1105 of title 31, United States Code, for the following fiscal year shall not contain—

(1) an estimate of total budget outlays for such following fiscal year that exceeds the appropriate level of total budget outlays for the current fiscal year set forth in the most recently agreed to concurrent resolution on the budget for the current fiscal year;

(2) an estimate of the deficit for such following fiscal year that exceeds the appropriate amount of the deficit set forth for the current fiscal year in the most recently agreed to concurrent resolution on the budget for the current fiscal year.

(c) For purposes of this section, no cost-of-living adjustment under any provision of Federal law shall be taken into account.

(d) For purposes of this section—

(1) the term "budget outlays" has the same meaning as in section 3(1) of the Congressional Budget and Impoundment Control Act of 1974;

(2) the term "concurrent resolution on the budget" has the same meaning as in section 3(4) of such Act; and

(3) the term "deficit" means, with respect to any concurrent resolution on the budget for a fiscal year, the amount by which the appropriate level of total budget outlays set forth for such fiscal year in such concurrent resolution exceeds the recommended level of Federal revenues set forth for such fiscal year in such concurrent resolution.

BOREN (AND GRAMM) AMENDMENT NO. 768

Mr. BOREN (for himself and Mr. GRAMM) proposed an amendment, which was subsequently modified, to the joint resolution (H.J. Res. 372) supra; as follows:

At the appropriate place in the joint resolution; insert the following:

Any contract entered into after a sequester order has been issued for the applicable fiscal year, by which the Commodity Credit Corporation and Entities providing Federal guarantees for student loans shall agree to make payments out of an entitlement account to any person, lender or guarantee entity shall be deemed to be controllable expenditures and shall be subject to reduction under the Presidential order, and any such contract shall explicity provide for such reduction for the entire contractual period: *Provided*, That in regard to commodity loans made by the Commodity Credit Corporation to producers or producer cooperatives for a commodity produced in the same crop year, those loans for the same commodity shall be subject to the same terms and conditions.

Provided, That noncontract programs supported through the Commodity Credit Corporation, shall be deemed to be controllable expenditures and shall be subject to reduction in the same fashion as other programs under the Presidential order.

Provided further, That the programs supported through the Commodity Credit Corporation shall be deemed to be the reduction in the level of commodity price support programs, supported through the Commodity Credit Corporation, shall not exceed a uniform percentage of reduction specified for those programs in the sequester order.

LAUTENBERG (AND OTHERS) AMENDMENT NO. 769

Mr. LAUTENBERG (for himself, Mr. D'AMATO, Mr. MURKOWSKI, Mr. DODD, Mr. BOSCHWITZ, Mr. MOYNIHAN, Mr. DIXON, Mr. METZENBAUM, Mr. HEFLIN, Mr. EAGLETON, Mr. BENTSEN, Mr. BYRD, Mr. EXON, Mr. KERRY, Mr. KENNEDY, Mr. SASSER, Mr. BAUCUS, Mr. BRADLEY, Mr. MCCONNELL, and Mr. FORD) proposed an amendment, which was subsequently modified, to amendment No. 768 proposed by Mr. BOREN (and Mr. GRAMM) to the joint resolution (H.J. Res. 372), supra; as follows:

At the end of the joint resolution add the following new section:

SEC. —.

(a) The Senate finds that—

(1) the four men identified as the hijackers of the *Achille Lauro* were responsible for brutally murdering an innocent American citizen, Leon Klinghoffer and for terrorizing hundreds of innocent crew members and passengers for two days;

(2) the United States urges all countries to aid in the swift apprehension, prosecution and punishment of the terrorists; and

(3) the United States should not tolerate any country providing safe harbor or safe passage to the terrorists.

(b) It is the sense of the Senate that—

(1) the United States demands that no country provide safe harbor or safe passage to these terrorists;

(2) the United States expects full cooperation of all countries in the apprehension, prosecution and punishment of these terrorists; and

(3) the United States cannot condone the release of terrorists or the making of concessions to terrorists.

(4) the United States identify those individuals responsible for the seizure of the *Achille Lauro* and the cold-blooded murder of Leon Klinghoffer, as well as those countries and groups that aid and abet such terrorist activities, and take the strongest measures to ensure that those responsible for this brutal act against an American citizen are brought to justice.

PRICE-ANDERSON IMPROVEMENT ACT

STAFFORD AMENDMENT NO. 770

(Ordered referred to the Committee on Environment and Public Works.)

Mr. STAFFORD submitted an amendment intended to be proposed by him to the bill (S. 1761) to amend the Atomic Energy Act of 1954, as amended, to establish a comprehensive, equitable, reliable, and efficient mechanism for full compensation of the public in the event of an accident arising out of the activities of Nuclear Regulatory Commission licensees or undertaken pursuant to the Nuclear Waste Policy Act of 1982 involving nuclear materials; as follows:

In section 5, after "e.(1)", insert "(A)"; and, after "source of payments for public liability claims." insert the following:

"(B) Nothing in this section shall limit the right of any person that has paid or will pay deferred premiums under the industry retrospective rating plan required in subsection 170b. to recover, under applicable state law, deferred premiums from any person who may be liable for public liability, notwithstanding any indemnification of persons indemnified under this section. The waiver of

defenses provision of subsection 170n. shall not apply to actions of such recovery.".

In section 13(b), strike "and" before "(iv)"; and after "claims for punitive damages" insert the following: "; and (v) claims for recovery of deferred premiums as provided in subsection 170e.".

INCREASE IN PUBLIC DEBT LIMIT

DOMENICI (AND CHILES) AMENDMENT NO. 771

Mr. DOMENICI (for himself and Mr. CHILES) proposed an amendment, which was subsequently modified, to the joint resolution (H.J. Res. 372) supra; as follows:

Strike all after the language added by Amdt. No. 739 and insert in lieu thereof:

SEC. —. DEFICIT REDUCTION PROCEDURES.

(a) SHORT TITLE.—This section may be cited as the "Balanced Budget and Emergency Deficit Control Act of 1985".

(b) CONGRESSIONAL BUDGET.—

(1) One concurrent resolution on the budget required annually.—

(A) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(i) by striking out all beginning with "SEC. 310. (a)" through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary,—"; and

(ii) by striking out subsection (b) and redesignating subsection (c) as subsection (b).

(B) Conforming changes.—

(i) The table of contents in subsection (b) of section 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(I) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(II) by striking our "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

III) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(ii) Paragarph (4) of section 3 of such Act is amended—

(I) by adding "and" after the semicolon at the end of subparagraph (A);

(II) by striking out subparagraph (B); and

(III) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(iii) Section 300 of the Congressional Budget Act of 1974 is amended—

(I) by striking out "first" in the item relating to April 15 and in the second item relating to May 15; and

(II) by striking out the items relating to September 15 and September 25.

(iv)(I) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION".

(II) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(III) Section 301(b) of such Act is amended—

(aa) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(bb) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(IV) Section 301(d) of such Act is amended by striking out "first" each place it appears.

(V) Section 301(e) of such Act is amended—

(aa) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth"; and

(bb) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(v) Section 302(c) of such Act is amended by striking out "or 310".

(vi)(I) The heading of section 303 of such Act is amended by striking out "FIRST".

(II) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(vii) Section 304 of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(II) by striking out "pursuant to section 301".

(viii)(I) Section 305(a)(3) is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(II) Section 305(b) of such Act is amended—

(aa) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(bb) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ix) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(x) Paragraph (1) of section 309 of such Act is amended by striking out ", and other than the reconciliation bill for such year, if required to be reported under section 310(c)".

(xi) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "301(a)".

(xii) Section 311(a) of such Act is amended—

(I) by striking out "310(a)" the first place it appears and inserting in lieu thereof "301(a)"; and

(II) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(2) MAXIMUM DEFICIT AMOUNTS.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) POINT OF ORDER.—Section 301 of the Congressional Budget Act of 1974 is amended by redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively, and inserting after subsection (b) the following new subsection:

"(c) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) CONFORMING CHANGES.—

(I) Section 301(a)(6) of such Act is amended by striking out "subsection (e)" and inserting in lieu thereof "subsection (f)".

(II) Section 301(e) of such Act, as redesignated by clause (i) of this subparagraph, is amended by inseritng "; and when so reported such concurrent resolution shall comply with the requirement described in paragraph (i) of subsection (c), unless such paragraph does not apply to such fiscal year by reason of paragraph (2) of such subsection" after "October 1 of such year" in the second sentence thereof.

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—Section 304 of such Act is amended—

(i) by inserting "(a) IN GENERAL.—" After "SEC. 304."; and

(ii) by adding at the end thereof the following new subsection:

"(b) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to consider or adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) Paragraph (1) of this subsection shall not apply to any fiscal year for which a declaration of war has been enacted.".

(C) DEFINITIONS.—Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year. For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985, the receipts of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund for a fiscal

year, and the taxes payable under section 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954 during such fiscal year, shall be included in total revenues for such fiscal year, and the disbursements of either such Trust Fund for such fiscal year shall be included in total budget outlays for such fiscal year.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985, $180,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and"

"(F) with respect to the fiscal year beginning October 1, 1990, zero.".

(3) RECONCILIATION.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(1) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 (as amended by paragraph (1)(B)(iv)(III) of this subsection) is further amended—

(I) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(II) by inserting "require " after the paragraph designation in paragraph (1);

(III) by inserting "require" after the paragraph designation in paragraph (2); and

(IV) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(ii) CONFORMING CHANGES.—

(I) Section 310(a) of such Act is amended—

(aa) by inserting "or" at the end of paragraph (2);

(bb) by stiking out "; or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(cc) by striking out paragraph (4).

(II) Section 310(d) of such Act is amended by striking out "subsection (c)"and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than June 15 of each year".

(III) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(IV) Section 300 of such Act is amended by inserting immediately after the second item relating to May 15 the following new item:

"June 15
Congress completes action on reconciliation bill or resolution, or both, implementing annual required concurrent resolution.".

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) IN GENERAL.—Section 304(a) of such Act (as redesignated by paragraph (2)(B)(i) of this subsection) is amended by adding after the period the following new sentences: "Any concurrent resolution adopted under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(ii) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by subparagraph (A)(ii)(II) of this paragraph) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(4) LIMITATION ON AMENDMENTS.—

(A) CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) HOUSE OF REPRESENTATIVES.—Section 305(a)(6) of such Act is amended—

(I) by inserting "(A)" after the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(ii) SENATE.—Section 305(b)(2) of such Act is amended—

(I) by inserting "(A)" before the paragraph designation; and

(II) by adding at the end thereof the following new subparagraph:

(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) Reconciliation bills and resolutions.—Section 310 of such Act is amended by inserting after subsection (b) (as redesignated by paragraph (1)(A)(ii) of this subsection) the following new subsection:

"(c) LIMITATION ON AMENDMENTS TO RECONCILIATION BILLS AND RESOLUTIONS.—

"(1) It shall not be in order in either the House of Representatives of the Senate to consider any amendment to a reconciliation bill or reconciliation resolution if such amendment would have the effect of increasing any specific budget outlays above the level of such outlays provided in the bill or resolution, or would have the effect of reducing any specific Federal revenues below the level of such revenues provided in the bill or resolution, unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the most recently agreed to concurrent resolution on the budget is not exceeded, by making an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof, except that a motion to strike a provision shall always be in order.

"(2) Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(5) ENFORCEMENT.—

(A) ALLOCATIONS OF BUDGET AUTHORITY AND OUTLAYS.—

(i) REPORTING DATE FOR ALLOCATIONS.—Section 302(b) of such Act is amended by striking out "Each such committee shall promptly report" in the last sentence and inserting in lieu thereof "Each such committee, within ten days of session after the concurrent resolution is agreed to, shall report".

(ii) POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider any bill or resolution, or amendment thereto, providing—

(I) new budget authority for any fiscal year;

(II) new spending authority described in section 401(c)(2)(C) of the Congressional Budget act first effective in any fiscal year; or

(III) direct loan authority, primary loan guarantee authority, or secondary loan guarantee authority for any fiscal year; within the jurisdiction of any committee which has received an allocation of budget authority or new spending authority described in section 401(c)(2)(C) pursuant to section 302(a) of the Congressional Budget Act for a fiscal year, unless and until such committee makes the allocation or subdivisions required by section 302(b) of the Congressional Budget Act, in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year.

(iii) ALLOCATIONS MADE BINDING.—Section 311 of such Act is amended by redesignating subsections (a) and (b) as subsections (b) and (c), respectively, and inserting immediately after "Sec. 311" the following new subsection:

"(a) LEGISLATION SUBJECT TO POINT OF ORDER AFTER ADOPTION OF ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

"(1) IN GENERAL.—At any time after the Congress has completed action on the concurrent resolution on the budget required to be reported under section 301(a) for a fiscal year, it shall not be in order in either the House of Representatives or the Senate—

"(A) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides for budget outlays or new budget authority in excess of the appropriate allocation of such outlays or authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year; or

"(B) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides new spending authority described in section 401(c)(2)(C) to become effective during such fiscal year, if the amount of budget outlays or new budget authority that would be required for such year if such bill or resolution were enacted without change or such amendment were adopted would exceed the appropriate allocation of budget outlays or new budget authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal

year, unless such bill, resolution, or amendment was favorably reported by the Committee on Appropriations of the House involved under section 401(b)(2) along with a certification that if such bill, resolution, or amendment is enacted or adopted, the committee will reduce appropriations or take any other actions necessary to assure that the enactment or adoption of such bill, resolution, or amendment will not result in a deficit for such fiscal year in excess of the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) ALTERATION OF 302(B) ALLOCATIONS.—At any time after a committee reports the allocations required to be made under section 302(b), such committee may report to its House an alteration of such allocations, provided that any alteration of such allocations must be consistent with any actions already taken by its House on legislation within the committee's jurisdiction.

"(3) EXCEPTION.—Paragraph (1) shall not apply to any fiscal year for which a declaration of war has been enacted.".

(B) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 311(b) of such Act, as redesignated by subparagraph (A)(ii) of this subsection, is amended by inserting before the period at the end thereof the following: "or would cause the levels of deficits set forth in such concurrent resolution to be exceeded, or would otherwise result in a deficit for such fiscal year that exceeds the maximum deficit amount specified for such fiscal year in section 3(7) (except to the extent that paragraph (1) of subsection (B) of section 310 does not apply by reason of paragraph (2) of such subsection)".

(C) REPORTING REQUIREMENT EXTENDED TO CONFERENCE REPORTS.—Section 308(a) of such Act is amended by striking out "the report accompanying that bill or resolution" in the matter preceding paragraph (1) and inserting in lieu thereof the following: "or whenever a conference report is filed in either House, the report accompanying that bill or resolution or the statement of managers accompanying that conference report".

(c) BUDGET SUBMITTED BY THE PRESIDENT.—

(1) Maximum deficit amount may not be exceeded.—Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) The budget transmitted pursuant to subsection (a) for a fiscal year shall be prepared on the basis of the best estimates then available, in such a manner as to ensure that the deficit for such fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974; and the President shall take such action under subsection (d)(2) of the Balanced Budget and Emergency Deficit Control Act of 1985 as is necessary to ensure that the deficit for such fiscal year does not exceed such maximum deficit amount.

"(2) Subject to paragraph (3) of this subsection, the deficit set forth in the budget so transmitted for any fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974, with budget outlays and Federal revenues at such levels as the President may consider most desirable and feasible.

"(3) Paragraph (2) shall not apply with respect to any fiscal year for which a declaration of war has been enacted.".

(2) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

(d) EMERGENCY POWERS TO ELIMINATE DEFICITS IN EXCESS OF MAXIMUM DEFICITS AMOUNTS.—

(1) REPORTING OF DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.—

(A) IN GENERAL.—The Director of the Office of Management and Budget and the Director of the Congressional Budget Office (hereafter in this section referred to as "the Directors") shall, with respect to any fiscal year (I) estimate the levels of total revenues and budget outlays that may be anticipated for such fiscal year, (II) determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess in statistically significant, and (III) estimate the rate of real economic growth that will occur during such fiscal year and the rate of economic growth that will occur during each quarter of such fiscal year. The Directors jointly shall report to the President and to the Congress on November 1 of such fiscal year (in the case of the fiscal year beginning October 1, 1985) and on the September 25 preceding each such fiscal year (in the case of any succeeding fiscal year), identifying the amount of any excess, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year and for each quarter of such fiscal year, and specifying the percentages by which automatic spending increases and controllable expenditures shall be reduced during such fiscal year in order to eliminate any such excess. In the event that the Directors are unable to agree on an amount to be set forth with respect to any item in any such report, the amount set forth for such item in such report shall be the average of the amounts proposed by each of them with respect to such item.

(B) EXCEPTION.—Subparagraph (A) shall not apply to any fiscal year for which a declaration of war has been enacted.

(2) PRESIDENTIAL ORDER.—

(A) CONTENTS.—

(i) IN GENERAL.—Upon receipt of any report from the Directors under paragraph (1) of this subsection which identifies a statistically signficant amount by which the deficit for a fiscal year will exceed the maximum deficit amount for such fiscal year, the President shall eliminate the full amount of the deficit excess by issuing an order that—

(I) subject to clauses (ii), (iii), and (iv) of this subparagraph, and

notwithstanding the Impoundment Control Act of 1974, eliminates one-half of such excess by modifying or suspending the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a manner as to reduce by a uniform percentage (but not below zero) the amount of outlay increases under each such provision, but

(II) subject to clauses (ii), (iii), and (iv) of this subparagraph, eliminates one-half of such excess by sequestering from each affected program, project, or activity (as defined in the most recently enacted relevant appropriations Acts and accompanying committee reports) or from each affected account if not so defined, for funds provided in annual appropriations Acts or, otherwise from each budget account, such amounts of budget authority, obligation limitation, other budgetary resources, and loan limitation, and by adjusting payments provided by the Federal Government, to the extend necessary to reduce the outlays for each controllable expenditure by a uniform percentage: *Provided*, That any periodic payments to individuals or families which are in the nature of income support supplementation, or assistance (including payments made pursuant to section 32 of the Internal Revenue Code of 1984 as amended or pursuant to chapter 11 or 13 of title 38, United States Code and which are paid to such individuals or families directly by the United States (or by a person or entity acting as an agent of the United States) shall not be reduced pursuant to this subclause to a level which is lower than the level that would be payable in the absence of this subclause. But in the case of compensation, pursuant to Chapter 11 or 13 of Title 38, United States Code, a cost-of-living adjustment enacted into law to become effective in the fiscal year that is the first fiscal year to which the order described in this clause applies shall be treated as an automatically-indexed program for purposes of subclause (i) of this clause; and shall transmit to both Houses of the Congress a message—

(III) identifying—

(aa) the total amount and the percentage by which automatic spending increases are to be reduced under subclause (I) of this clause;

(bb) the total amount of budget authority, obligation limitations, loan limitations, and other budgetary resources which is to be sequestered under subclause (II) of this clause with respect to controllable expenditures;

(cc) the amount of budget authority, obligation limitations, loan limitations, and other budgetary resources which is to be sequestered with respect to each such controllable expenditure in order to reduce it by the required percentage; and

(dd) the account, department, or establishment of the Government to which each amount of budget authority, obligation limitations, loan limitations, and other budgetary resources described in subclause (II) of this clause would be available for obligation; and

(IV) providing full supporting details with respect to each action to be taken under subclause (I) or (II) of this clause.

Upon receipt in the Senate and the House of Representatives, the message shall be referred to all committees with jurisdiction over programs, projects, or activities affected by it.

(ii) EXCEPTION.—If, in order to reduce by one-half the amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year, actions under clause (1)(I) would require the reduction of automatic spending increases below zero, then, in order not to require such reductions below zero, the remaining amount shall be achieved through further uniform reductions under clause (i)(II).

(iii) LIMITATION.—No action taken by the President under subclause (I) or (II) of clause (i) shall have the effect of eliminating any program, project, or activity of the Federal Government.

(iv) LIMITATION.—Any automatic spending increases modified or suspended, or any amounts of budget authority obligation limitation, other budgetary resources, or loan

limitations sequestered by an order of the President under this Act are permanently cancelled, and the legal rights, if any, of persons to receive such automatic spending increases shall be deemded to be extinguished to the extent that the operation of laws providing for such increases are modified or suspended by such an order.

(v) Nothing in subclause (I) or (II) of clause (i) shall be construed to give the President new authority to alter the relative priorities in the Federal budget that are established by law, and no person who is, or becomes, eligible for benefits under any provision of law shall be denied eligibility by reason of this section.

(B) DATE ISSUED.—

(i) POSITIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is zero or greater, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 14 days after transmittal of such report.

(i) NEGATIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted under paragraph (1) of this subsection is less than zero with respect to such fiscal year or with respect to each of any two consecutive quarters of such fiscal year, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 30 days after transmittal of such report.

(C) EFFECTIVE DATE.—

(i) IN GENERAL.—Except to the extent that it is superseded by a reconciliation bill or reconciliation resolution enacted or adopted under paragraph (3) of this subsection, an order issued pursuant to this paragraph shall become effective 30 days after its issuance. Any modification or suspension by such order of the operation of a provision of law that would (but for such order) require an automatic spending increase to take effect during a fiscal year shall apply for the one-year period beginning with the date on which such automatic increase would have taken effect during such fiscal year (but for such order).

(ii) WITHHOLDING OF BUDGET AUTHORITY FOR THIRTY-DAY PERIOD.—During the 30-day period referred to in clause (i), the President shall withhold from obligation the amounts that would have been suspended or sequestered under such order with respect to such 30-day period if the order issued pursuant to this paragraph had become effective on the date of its issuance. If a reconciliation bill or reconciliation resolution enacted or adopted under paragraph (3) of this subsection becomes law on or before the last day of such 30-day period, amounts withheld from obligation pursuant to the preceding sentence shall be made available for obligation to the extent permitted by such reconciliation bill or reconciliation resolution. If such a reconciliation bill or reconciliation resolution does not become law during such period, the budget authority withheld from obligation under the first sentence of this clause shall be permanently cancelled as described in paragraph (2)(A)(iv) of this subsection.

(D) PROPOSAL OF ALTERNATIVES.—A message transmitted pursuant to this paragraph with respect to a fiscal year may be accompanied by a proposal setting forth in full detail alternative ways to reduce the deficit for such fiscal year to an amount not greater than the maximum deficit amount for such fiscal year. Upon receipt in the Senate and the House of Representatives, the message and any accompanying proposal shall be referred to all committees with jurisdiction over programs, projects, or activities affected by it.

(3) CONGRESSIONAL ACTION.—

(A) REPORTING OF CONCURRENT RESOLUTIONS AND RECONCILIATION BILLS AND RESOLUTIONS.—

(i) IN GENERAL.—Not later than 10 days after issuance of an order by the President under paragraph (2) with respect to a fiscal year, the Committee on the Budget of the House of Representatives and the Senate may report to its House a concurrent resolution. The concurrent resolution may affirm the impact of the order issued under paragraph (2), in whole or in part. To the extent that any part of the order is not affirmed, the concurrent resolution shall state which parts are not affirmed and shall contain instructions to committees of the House and the Senate of the type referred to in section 310(a) of the Congressional Budget Act of 1974, sufficient to achieve at least the total level of deficit reduction contained in those sections which are not affirmed.

(ii) RESPONSE OF COMMITTEES.—Committees instructed pursuant to clause (1) of this subparagraph, or affected thereby, shall submit their responses to their respective Budget Committees no later than 10 days after the conference report on the concurrent resolution referred to in clause (i) is agreed to in both Houses, except that if in either House only one such Committee is so instructed such Committee shall, by the same date, report to its House a reconciliation bill or reconciliation resolution containing its recommendations in response to such instructions. A committee shall be considered to have complied with all instructions to it pursuant to a concurrent resolution adopted under clause (i) if it has made recommendations with respect to matters within its jurisdiction which would result in a reduction in the deficit at least equal to the total reduction directed by such instructions.

(iii) BUDGET COMMITTEE ACTION.—Upon receipt of the recommendations received in response to a concurrent resolution referred to in clause (i) of this subparagraph, the Budget Committee of each House shall report to its respective House a reconciliation bill or reconciliation resolution, or both, carrying out all such recommendations without any substantive revisions. In the event that a committee instructed in a concurrent resolution referred to in clause (i) fails to submit any recommendation (or, when only one committee is instructed, fails to report a reconciliation bill or resolution) in response to such instructions, the Budget Committee of the relevant House shall include in the reconciliation bill or reconciliation resolution reported pursuant to this clause legislative language within the jurisdiction of the noncomplying committee to achieve the amount of deficit reduction directed in such instructions.

(iv) POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider or agree to any bill or resolution reported under clause (iii) with respect to a fiscal year, any amendment thereto, or any conference report thereon if—

(I) the enactment of such bill or resolution as reported;

(II) the adoption and enactment of such amendment; or

(III) the enactment of such bill or resolution in the form recommended in such conference report;

would cause the amount of the deficit for such fiscal year to exceed the amount of the deficit set forth in the most recently agreed to concurrent resolution on the budget for such fiscal year or the maximum deficit amount for such fiscal year, unless the report submitted under paragraph (1)(A) projects negative real economic growth for such fiscal year, or for each of any two consecutive quarters during such fiscal year.

(v) TREATMENT OF CERTAIN AMENDMENTS.—An amendment which adds to a concurrent resolution reported under clause (i) an instruction of the type referred to in such clause shall be in order during the consideration of such resolution if such amendment would be in order but for the fact that it would be held to be non-germane on the basis that the instruction constitutes new matter.

(vi) DEFINITION.—For purposes of clauses (i) and (ii), the term "day" shall mean any calendar day on which either House of the Congress is in session.

(B) PROCEDURES.—

(i) IN GENERAL.—Except as provided in subclause (ii), the provisions of sections 305 and 310 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget and conference reports thereon shall also apply to consideration of concurrent resolutions, and reconciliation bills and reconciliation resolutions reported under this paragraph and conference reports thereon.

(ii) LIMIT ON DEBATE.—Debate in the Senate on any concurrent resolution reported pursuant to subclause (i) of subparagraph (A), and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to 10 hours.

(iii) LIMITATION ON AMENDMENTS.—Section 310(c) of such Act (as added by subsection (b)(4)(B) of this section) shall apply to reconciliation bills and reconciliation resolutions reported under this paragraph.

(iv) COMPLIANCE WITH INSTRUCTIONS.—Section 310 of the Congressional Budget Act of 1974 is amended by adding at the end thereof the following new subsection:

"(g) COMPLIANCE WITH RECONCILIATION DIRECTIONS.—Any committee of a House of the Congress that is directed, pursuant to a concurrent resolution on the budget to recommend changes of the type described in paragraphs (1) and (2) of subsection (a) with respect to laws within its jurisdiction, shall be deemed to have complied with such directions—

"(1) If—

"(A) the amount of the changes of the type described in paragraph (1) of such subsection recommended by such committee, and

"(B) the amount of the changes of the type described in paragraph (2) of such subsection recommended by such committee,

do not exceed or fall below the amount of the changes such committee was directed by such concurrent resolution to recommend under such paragraph by more than 20 percent of the total of the amounts of the changes such committee was directed to make under both such paragraphs; and

"(2) if the total amount of the changes recommended by such committee is not less than the total of the amounts of the changes such committee was directed to make under both such paragraphs.".

(4) DEFINITIONS.—For purposes of this subsection:

(A) The term "automatic spending increase" shall include all Federal programs

indexed directly, whether appropriated or contained in current law. This shall not include increases in Government expenditures due to changes in program participation rates. Such term shall not include any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

(B) The term "budget outlays" has the meaning given to such term in section 3(1) of the Congressional Budget and Impoundment Control Act of 1974.

(C) The term "concurrent resolution on the budget" has the meaning given to such term in section 3(4) of the congressional Budget and Impoundment Control Act of 1974.

(D) The term "deficit" has the meaning given to such term in section 3(6) of the Congressional Budget and Impoundment Control Act of 1974.

(E) The term "maximum deficit amount" has the meaning given to such term in section 3(7) of the Congressional Budget and Impoundment Contol Act of 1974.

(F) The term "real economic growth" means, with respect to a fiscal year, the nominal growth in the production of goods and services during such fiscal year, adjusted for inflation.

(G) The term "controllable expenditures" means total budget outlays for any account, or any program, project, or activity enumerated by annual appropriation Acts and by applicable committee reports, except those described in subparagraph (A) and except outlays for benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act, outlays due to increases in program participation rates, outlays for prior-year obligations, and outlays for interest on the public debt. Such term shall also include funds for existing contracts unless—

(i) penalty provisions in such contract would produce a net loss to the Government; or

(ii) reduction of the contract violates legal obligations of the Government.

(H) The term "sequester" means the permanent cancellation of budget authority, obligation limitations, other budgetary resources, or loan limitations, to the extent necessary to reduce each controllable expenditure by a uniform percentage.

(I) The term "other budgetary resources" means unobligated balances, reimbursements, receipts credited to an account, and recoveries of prior-year obligations.

(J) The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount. For purposes of the fiscal year beginning October 1, 1985, the preceding sentence shall be applied by substituting "7" for "5".

(e) BUDGETARY TREATMENT OF SOCIAL SECURITY TRUST FUNDS.—

(1) FISCAL YEARS 1986 THROUGH 1992.—

(A) IN GENERAL.—Section 710 of the Social Security Act (as added by paragraph (1) of subsection (a) of section 346 of the Social Security Amendments of 1983) is amended—

(i) by striking out all beginning with "the" the first place it appears down through "Disability Insurance Trust Fund, the" and inserting in lieu thereof "The";

(ii) by striking out "sections 1401, 3101, and 3111" and inserting in lieu thereof "1401(b), 3101(b), and 3111(b)";

(iii) by redesignating all after the section designation as subsection (b);

(iv) by inserting after the section designation the following:

"(a) The receipts and disbursements of the Federal Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund, and the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, shall not be included in the totals of the budget of the United States Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending (budget outlays) of the United States Government."; and

(v) by adding at the end thereof the following new subsection:

"(c) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, or for payments from any such Trust Fund to the general fund of the Treasury.".

(B) APPLICATION.—The amendments made by subparagraph (A) shall apply with respect to fiscal years beginning after September 30, 1985, and ending before October 1, 1992.

(2) FISCAL YEAR 1993 AND THEREAFTER.—Section 710(a) of the Social Security Act (42 U.S.C. 911 note), as amended by section 346(b) of the Social Security Amendments of 1983 (to be effective with respect to fiscal years beginning after September 30, 1992) is amended by—

(A) inserting "(1)" after the subsection designation; and

(B) adding at the end thereof the following new paragraph:

"(2) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to any Trust Fund specified in paragraph (1) or for payments from any such Trust Fund to the general fund of the Treasury.".

(f) BUDGET ACT WAIVERS.—Section 904 of the Congressional Budget Act is amended—

(1) by striking out subsection (b) and inserting in lieu thereof the following new subsection:

"(b) Except as provided in subsection (c), any provision of title III or IV may be waived or suspended in the Senate by a majority vote of the Members voting, a quorum being present, or by the unanimous consent of the Senate."; and

(2) by redesignating subsection (c) as subsection (d), and inserting after subsection (b) the following new subsection:

"(c) The provisions of section 305(b)(2) and section 306 of this Act may be waived or suspended in the Senate and the House of Representatives only by the affirmative vote of three-fifths of the members of that House duly chosen and sworn.".

(g) OTHER WAIVERS AND SUSPENSIONS.—The provisions of the Balanced Budget and Emergency Deficit Control Act of 1985 may be waived or suspended in the Senate and the House only by the affirmative vote of three-fifths of the members of that House duly chosen and sworn.

(h) SUPPLEMENTAL BUDGET ESTIMATES.—Section 1106 of title 31, United States Code, is amended by striking out "July 16" each place it appears and inserting in lieu thereof "September 16".

(i) POINT OF ORDER.—Notwithstanding any other provision of law, it shall not be in order in the Senate or House of Representatives to consider any reconciliation bill or reconciliation resolution reported pursuant to a concurrent resolution on the budget agreed to under section 301 or 304 of the Congressional Budget Act of 1974, or any amendment thereto, or conference report thereon that contains recommendations with respect to the Federal Old-Age Survivors Trust Fund or the Federal Disability Insurance Trust Fund, with respect to revenues attributable to the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, or with respect to the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

(j) APPLICATION.—

(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), this section and the amendments made by this section shall become effective on the date of the enactment of this section and shall apply with respect to fiscal years beginning after September 30, 1985, and before October 1, 1991.

(2) EXCEPTION.—The amendments made by subsections (b)(1), (b)(2)(A), (b)(3)(A), (b)(5)(A)(i), and (c) of this section shall apply with respect to fiscal years beginning after September 30, 1986, and before October 1, 1991.

(3) OASDI TRUST FUNDS.—The amendments made by subsection (e) shall apply as provided in such subsection.

(k) The provisions of this Act, other than those relating to the activities of the Executive Branch, are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

(l) SENSE OF THE SENATE.—It is the sense of the Senate that any funding reductions or sequestering of controllable expenditures implemented by the various Federal agencies as a result of this Act shall be made uniformly and shall not disaproportionately be made in the funding of programs targeted for rural and lesser populated areas.

(m) REPORT REQUIRED.—The Directors of the Office of Management and Budget and the Congressional Budget Office, and the Secretary of the Treasury, shall jointly report to the President and to the Committee on Finance and the Committee on Ways and Means on the projected level of revenues which would be raised by increased and improved tax enforcement and collection through audits, examinations, and other methods designed to eliminate tax cheating and increase revenue collections

from individuals and corporations evading Federal taxation. The report shall include an analysis of measures which can be implemented to increase voluntary compliance with tax laws, including increased staff for taxpayer assistance, speedier processing of returns, improved information processing and collection, and public education designed to increase public trust and understanding of the Internal Revenue Service enforcement efforts. The report shall also include an estimate of the level of increased expenditures for Internal Revenue Service enforcement and compliance efforts at which additional expenditures would not yield additional revenues of at least $2 of revenue for every $1 in expenditures. The report shall be issued on an annual basis no later than the date on which the President submits a proposed budget for each fiscal year to the Congress.

(n) TREATMENT OF CERTAIN COST-OF-LIVING ADJUSTMENTS.—During the time in which a sequester order is in effect, any cost of living adjustment for Social Security shall not count as income for purposes of determining Supplemental Security Income payments or payments from any other programs which are offset as a consequence of cost-of-living adjustments for Social Security.

(o) Section 1105(c) of title 31, United States Code, is amended—

(1) by striking out "The" the first place it appears and inserting in lieu thereof "(1) Notwithstanding any other provision of law, the";

(2) by inserting "(other than action that would require an increase in borrowing authority or an increase in the limit imposed by section 3101(b) of this title by more than the applicable amount for the fiscal year for which the budget is submitted)" after "action" the first place it appears; and

(3) by adding at the end thereof the following new paragraph:

"(2) For purposes of this subsection, the term 'applicable amount' means—

"(A) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and

"(E) with respect to the fiscal year beginning October 1, 1990, and each fiscal year thereafter, zero.".

(p)(1) In preparing any report required under subsection (d)(1) for a fiscal year, the Directors shall comply with this subsection.

(2) The Directors shall—

(A) examine—

(i) each contract with a total amount of budget authority in excess of $20,000,000 under which outlays will be made in such fiscal year to determine whether such contract includes provisions for adjusting outlays in such fiscal year under such contract as a result of inflation; and

(ii) any other Government activity which the Directors consider appropriate under which outlays in such fiscal year will be increased as a result of inflation; and

(B) assume, in determining the total amount of outlays which will be made in such fiscal year, that the adjustments for inflation made in contracts described in clause (i) of subparagraph (A) and activities described in clause (ii) of such subparagraph will be made on the best available estimate of inflation for such fiscal year.

(3) In the event that the Directors are unable to agree under paragraph (2) on an amount of outlays with respect to any particular contract or activity, the Directors shall use the average of the amounts proposed by each of them with respect to such contract or activity.

SEC. . Any contract entered into after a sequester order has been issued for the applicable fiscal year, by which the Commodity Credit Corporation and entities providing Federal guarantees for student loans shall agree to make payments out of an entitlement account to any person, lender or guarantee entity shall be deemed to be controllable expenditures and shall be subject to reduction under the Presidential order, and any such contract shall explicity provide for such reduction for the entire contractual period: *Provided*, That in regard to commodity loans made by the Commodity Credit Corporation to Producers or Producer Cooperatives for a commodity produced in the same crop year, those loans for the same commodity shall be subject to the same terms and conditions.

Provided, That noncontract programs supported through the Commodity Credit Corporation shall be deemed to be controllable expenditures and shall be subject to reduction in the same fashion as other programs under the Presidential order.

Provided further, That programs supported through the Commodity Credit Corporation shall be deemed to be the reduction in the level of commodity price support programs, supported through the Commodity Credit Corporation, shall not exceed a uniform percentage of reduction specified for those programs in the sequester order.

At the end of the joint resolution add the following new section:

SEC. .

(a) The Senate finds that—

(1) the four men identified as the hijackers of the *Achille Lauro* were responsible for brutally murdering an innocent American citizen, Leon Klinghoffer and for terrorizing hundreds of innocent crew members and passengers for two days;

(2) the United States urges all countries to aid in the swift apprehension, prosecution and punishment of the terrorists; and

(3) the United States should not tolerate any country providing safe harbor or safe passage to the terrorists.

(b) It is the sense of the Senate that—

(1) the United States demands that no country provide safe harbor or safe passage to these terrorists;

(2) the United States expects full cooperation of all countries in the apprehension, prosecution and punishment of these terrorists; and

(3) the United States cannot condone the release of terrorists or the making of concessions to terrorists.

(4) the United States identify those individuals responsible for the seizure of the *Achille Lauro* and the cold-blooded murder of Leon Klinghoffer, as well as those countries and groups that aid and abet such terrorist activities, and take the strongest measures to ensure that those responsible for this brutal act against an American citizen are brought to justice.

COMPACT OF FREE ASSOCIATION

HATCH (AND GARN) AMENDMENT NO. 772

(Ordered to lie on the table.)

Mr. HATCH (for himself and Mr. GARN) submitted an amendment intended to be proposed by them to the joint resolution (S.J. Res. 77) to approve the "Compact of Free Association," and for other purposes; as follows:

At the end of the resolution add the following:

TITLE II—NUCLEAR TESTING

SHORT TITLE

SEC. 201. This title may be cited as the "Atmospheric Nuclear Testing Compensation Act".

FINDINGS

SEC. 202. (a) The Congress finds that—

(1) the Federal Government bore a special duty to monitor and protect populations that were at risk of receiving substantial doses of ionizing radiation from the atmospheric nuclear tests conducted by the Government and from uranium mining when the Government directly controlled such mining;

(2) the Federal Government failed to meet such special duty;

(3) people exposed to nuclear fallout and uranium miners have been denied a fair opportunity to prove their claims that radiation caused their cancers through standard tort or workers compensation remedies; and

(4) such denial of opportunity has come about only because of the failure of the Government to meet its duty to such people.

(b) Under these circumstances, to provide a fair remedy to these people the Congress establishes, in this title, an optional administrative remedy which entails standards of proof that are more generous to claimants than those standards generally available under provisions of tort law or workes compensation law. The Congress does not expect the standards established in this Act to be extended to become standards in case dealing with general tort or workers compensation law.

PURPOSE

SEC. 203. The purposes of this title are—

(1) to provide a fair administrative remedy against the Federal Government in lieu of judicial remedy—

(A) to persons alleging that ionizing radiation from the open-air atomic bomb tests that were conducted at the Nevada test site from January 1, 1951, to July 31, 1962, caused their cancer or killed or harmed their livestock, and

(B) to uranium miners alleging that being exposed to ionizing radiation while working in a uranium mine in Colorado, New Mexico, Arizona or Utah between January 1, 1947 and December 31, 1961 caused their cancer, and

(2) to provide health screening to those people who now reside in areas which received the preponderance of the radioactive fallout from such tests and to enhance the accessibility of health care to such people.

TRUST FUND

SEC. 204. (a)(1) There shall be established in the Treasury of the United States, a trust fund known as the "Atmospheric Nuclear Testing Compensation Trust Fund" (hereinafter in this title referred to as the "Trust Fund") consisting of—

(A) the sum appropriated to the Trust Fund under section 214; and

(B) any amount credited to the Trust Fund under subsection (b)(3).

The Trust Fund shall remain available without fiscal year limitation and the amounts in the Trust Fund may be used only for appropriations authorized under subsection (c).

(2) The Secretary of the Treasury shall transfer from the general fund of the Treasury to the Trust Fund all moneys appropriated to such Fund pursuant to this title.

(3) The Secretary of the Treasury shall estimate the total of the sum appropriated to the Trust Fund and the amounts credited to the Trust Fund under subsection (b)(3) and shall allocate to the Commission, in substantially equal amounts, such total over the 15-year period of the Trust Fund.

(4) The Secretary of the Treasury shall be the trustee of the Trust Fund and shall report to the Congress not later than March 1 of each year on the operation and status of the Trust Fund during the preceding fiscal year and on the Trust Fund's expected operation and status during the five fiscal years following such fiscal year.

(b)(1) It shall be the duty of the Secretary of the Treasury to invest such portion of the Trust Fund as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States. For such purpose, such obligations may be acquired—

(A) on original issue at the issue price, or

(B) by purchase of outstanding obligations at the market price.

(2) Any obligation acquired by the Trust Fund may be sold by the Secretary of the Treasury at the market price.

(3) The interest on, and the proceeds from the sale or redemption of, any obligations held in the Trust Fund shall be credited to, and form a part of, the Trust Fund.

(c) There shall be allocated for each fiscal year for 15 consecutive fiscal years, out of amounts in the Trust Fund, such sums as are necessary up to the total amount allocated for such year, to make payments certified by the Commission to be paid for awards, grants, or other expenses authorized by this title. Amounts for such payments certified to the Treasury of the United States by the Commission shall be made available to such Commission. No funds shall be available for claims made pursuant to this title after 15 fiscal years after the date of enactment of this title.

(d) For the administrative expenses of the Commission there shall be allocated, out of the funds available for each fiscal year, not more than $1,000,000 for each of the first five fiscal years after the date of enactment, and $500,000 for each of the remaining 10 fiscal years.

ESTABLISHMENT OF COMMISSION

SEC. 205. (a) In order to carry out the purposes of this title there is established a Commission on Compensation for Atmospheric Nuclear Testing (hereinafter referred to as the "Commission").

(b) The Commission shall be composed of seven members appointed by the President, six of whom shall be appointed upon the recommendations of several States as follows:

(1) two members shall be appinted upon the recommendation of the State of Utah;

(2) two members shall be appointed upon the recommendation of the State of Nevada; and

(3) two members shall be appointed upon the recommendation of the State of Arizona.

(c)(1) All recommendations to be made by the various States as specified in subsection (b) shall be made within 60 days after the date of enactment of this title.

(2) All appointments to be made pursuant to this title shall be made by the President within 90 days after the date of enactment of this title.

(d) All members of the Commission shall be appointed for terms of three years and may be reappointed.

(e) The first meeting of the Commission shall be called by the President and shall be held within 120 days after the date of enactment of this title.

(f) At the first meeting of the Commission the Commission shall select a chairman from amongst its members. The Chairman shall serve as such for his term and may be reselected as Chairman if he is reappointed to the Commission by the President.

(g) Four members of the Commission shall constitute a quorum but a lesser number may conduct meetings.

(h)(1) A vacancy on the Commission resulting from the death or resignation of a member prior to the expiration of the term for which such person was appointed shall be filled in the same manner as the original appointment. A member appointed to fill such a vacancy shall be appointed only for the remainder of his predecessor's term but may be reappointed.

(2) All decisions to certify claims obligating funds must be made by a majority of the Commission.

(i) The principal office of the Commission shall be in the State of Utah. Whenever the Commission deems that the convenience of the public or of the parties may be promoted, or delay or expense may be minimized, it may hold hearings or conduct other proceedings at any other place it deems necessary or appropriate.

POWERS AND ADMINISTRATIVE PROVISIONS

SEC. 206. (a) The Commission is authorized to obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code.

(b) The Commission is authorized to enter into agreements with the General Services Administration for the procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Chairman and the Administrator of General Services.

(c) The Commission is authorized to procure supplies, services, and property, and make contracts in any fiscal year, only to such extent or in such amounts as are provided in appropriation Acts.

(d) The Commission is authorized to enter into contracts with Federal or State agencies, private firms, institutions, and agencies for the conduct of research or surveys, the preparation of reports, and other activities necessary to the discharge of its duties.

(e) The Commission or, on the authorization of the Commission, any member thereof, may, for the purpose of carrying out the provisions of this title, hold such hearings and sit and act at such times and places, and request the attendance and testimony of such witnesses and the production of books, records, memoranda, papers and documents as the Commission or such member deems advisable. Subpenas may be issued to any person within the jurisdiction of the United States courts, under the signature of the Chairman, or any duly designated member, and may be served by any person designated by the Chairman or any such member. In the case of the failure of any witness to comply with any subpoena, or to testify when summoned under authority of this section, the provisions of sections 102 through 104, inclusive, of the Revised Statutes (2 U.S.C. 192 et seq.), shall apply to the Commission to the same extent as such provisions apply to Congress.

(f) The Commission, or on the authorization of the Commission, any member thereof, may, for the purpose of carrying out this title, have such printing and binding done, enter into contracts and other arrangements to such extent or in such amounts as are provided in appropriation Acts, and make such expenditures as the Commission or such member deems advisable.

(g) The Commission may acquire directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality, information, suggestions, estimates, and statistics for the purpose of this title. Each such department, bureau, agency, board, commission, office, establishment, or instrumentality is authorized and directed to furnish, to the extent permitted by law, such information, suggestions, estimates, and statistics directly to the Commission, upon request by the Chairman.

(h) The Chairman of the Commission is authorized to appoint, terminate, and fix the compensation, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, of such personnel as he deems necessary, at rates not to exceed a rate equal to the maximum rate for GS-18 of the General Schedule under section 5332 of such title.

(i) Upon request of the Commission, the head of any Federal agency is authorized to make any of the facilities and services of such agency available to the Commission or to detail any of the personnel of such agency to the Commission, on a reimbursable basis, to assist the Commission in carrying out its duties under this section, unless the head of such agency determines that urgent overriding reasons will not permit the agency to make such facilities, services, or personnel available to the Commission and so notifies the Chairman in writing.

(j) The Commission may use the United States mails in the same manner and under the same conditions as departments and agencies of the United States.

(k) Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission or before such member.

(l) The Commission may expend funds made available for purposes of this title for printing and binding notwithstanding any other provision of law.

DUTIES OF THE COMMISSION

SEC. 207. (a) The Commission shall, prior to hearing any specific claims made against the United States pursuant to this title—

(1) set forth what the Commission will define as the sizable possibility necessary to allow for an award of damages to individuals covered by this title;

(2) determine how such Commission will prorate the amount of actual damages, other than damage awards made for pain and suffering, awarded for individuals with a probability of causation of less than 50 percent; and

(3) issue any rules or regulations necessary to implement the provisions of paragraphs (1) and (2).

(b) Any interested person may bring an action in the District Court of Utah to review the actions or decisions of the Commission made pursuant to subsection (a) of this section.

(c) The Commission shall make all decisions regarding grants and awards to be made each year from the annual allotment made from the Trust Fund established pursuant to this title and make certifications to request that the Treasury of the United States make disbursements from such fund.

(d) Every official act of the Commission shall be entered of record, and its hearings and records shall be open to the public. The Commission is authorized to make such rules as are necessary for the orderly transaction of its proceedings.

(e) The Commission shall hear specific claims made against the United States in accordance with the provisions of chapter 5 of title 5, United States Code, using the guidelines set forth in this title, and the Commission shall make specific findings and awards or grants. Except as otherwise provided in this title, any such findings and awards or grants shall be considered final actions subject to judicial review by the appropriate court of appeals. Such court may reverse or modify the determination of the Commission if the court finds that such action was clearly erroneous.

(f)(1) The Commission shall certify to the Treasury of the United States that actual damages be paid to claimants—

(A) who owned animals that died or were injured as a result of such exposure;

(B) for whom there is a sizable possibility that they developed cancer from receiving doses of ionizing radiation from such tests; or

(c) for whom there is a sizable possibility that they developed cancer from receiving doses of ionizing radiation from working in a uranium mine in Colorado, New Mexico, Arizona or Utah between January 1, 1947 and December 31, 1961.

(2) The Commission may obligate for awards or grants, in any year, an amount greater than the total allotment for such year, but shall not—

(A) certify payments for awards or grants for any year in an amount in excess of the allotment for such year,

(B) certify or obligate amounts in excess of the total amount of the Trust Fund, or

(C) obligate any amounts, or make any payments after the date of the expiration of such Trust Fund.

(g) At the end of any fiscal year if any funds allotted to the Trust Fund for such year have not been spent or obligated for damages or the administrative expenses of the Commission, the Commission may use part or all of the remainder of such allotment to—

(1) provide medical screening, especially screening for cancer, to residents of the areas determined by the Commission to have received the greatest fallout from the Nevada tests;

(2) improve accessibility to health care for the people of such areas, especially health care for the treatment of cancer; and

(3) the Commission may use such funds which are allotted annually to endow existing programs which provide the services listed in this subsection.

The services mandated by paragraphs (1) and (2) shall be provided through a program that is operated in cooperation with health care professionals and services available in the areas to be served.

ELECTION PROVISIONS

SEC. 208. (a) Subject to the limitations of this title, but notwithstanding any other provision of law, any person who has sustained damages covered by this title (or the parent or legal guardian of such person in the case of a minor) may elect to seek compensation under this title as an alternative to filing an action for damages in a State or Federal court.

(b)(1) Any person covered by the provisions of this title who has filed an action with the Commission pursuant to this title, may at any time prior to the time the Commission has decided such claim, file an action for damages in the appropriate State or Federal court. Such filing in the State or Federal court shall constitute a permanent bar against the filing with, or further consideration of the claim by the Commission for damages arising out of the same incident for which compensation is sought from the court.

(2) Any person covered by the provisions of this title who has filed an action in the appropriate State or Federal court, for damages covered by the provisions of this title, may, at any time before the court of original jurisdiction first hearing such case has decided such claim, file a petition with the Commission pursuant to the provisions of this title, such filing shall constitute a permanent bar against the filing or further consideration of any civil action in a State of Federal court by, or on behalf of, such person for damages arising out of the same incident for which compensation was sought under this title.

(3) Any person who has a claim that has been decided by a court prior to the date of enactment of this title, for damages covered by the provisions of this title, may elect to seek compensation under this title by filing a petition with the Commission. Such filing with the Commission shall constitute a permanent bar against the further consideration or filing of any civil action in any court, by or on behalf of such person for damages arising out of the same incident for which compensation was sought in the court.

(c) Nothing in this title shall affect the legal standards, burdens of proof, statutes of limitations, court jurisdiction, allowable damages, or any other aspect of State or Federal actions for damages for any injury or loss covered by this title, except the awards made for pain and suffering, as provided in section 209(c).

(d) It shall be the ethical obligation of any attorney who represents a client in connection with an action relating to any injury or loss covered by this title for which compensation may be available under this title to advise the client of his rights under this title.

RULES FOR ASSESSING CLAIMS

SEC. 209. (a) In assessing claims for radiogenic cancer, the Commission shall rely upon the preponderance of current scientific opinion regarding the causal link between ionizing radiation and cancer, and the relationship between a given prior dose of radiation and the likelihood that a given cancer resulted from such dose. As guides to this scientific opinion, the Commission shall use only the relevant publications of authoritative scientific agencies and societies such as the National Institutes of Health, the National Academy of Sciences, the National Cancer Institute, the National Council on Radiation Protection and Measurements, the International Council on Radiation Protection, and the Health Physics Society. The Commission shall take into account the uncertainties that are entailed in determining whether a given dose of radiation caused a given cancer when those uncertainties are described in such publications. The Commission shall give claimants the benefit of the doubt regarding such uncertainties.

(b) The Commission shall give the claimants who were at the Nevada test site, or immediately downwind of such site, when radioactive fallout was being precipitated from the atmospheric nuclear tests, or who worked in a uranium mine in Colorado, New Mexico, Arizona, or Utah between January 1, 1947 and December 31, 1961, the benefit of the doubt when assessing the ionizing radiation doses received by such claimants.

(c)(1) In making awards, the Commission shall determine the amount of actual damages to be awarded to any individual claimant. If the Commission determines that the probability that the claimant developed cancer as a result of the testing or mining activities covered by this title is less than 50 percent, but is sufficient to allow for an award of damages pursuant to subsections (a) and (f) of section 207, the amount of such award, other than any award made for pain and suffering, shall be prorated by such probability.

(2) The Commission shall limit the amount of any award paid to any individual claimant as compensation for pain and suffering to no more than $100,000. Such awards shall not be prorated.

(d) The Commission shall award damages to any claimant who alleges injury to his livestock when the Commission, after giving such claimant the benefit of the doubt, determines that such claimant has demonstrated that his livestock was harmed by the fallout.

(e) During the fifteen-year period that this title is in effect, if an authoritative scientific agency or society issues a new report indicating a probability that a claimant developed cancer from the fallout or the uranium mining, and such probability is significantly increased over such probability the Commission previously determined, the Commission may reopen and reconsider such claimant's case notwithstanding the fact that such determination may have become final. In determining whether to reconsider a case, the Commission shall pay particular attention to the updating of the Radiation Effect Research Foundation studies of Hiroshima and Nagasaki survivors.

STANDING TO PETITION THE COMMISSION

SEC. 210. (a) Any person who alleges that, as a result of ionizing radiation from the fallout from the Nevada atmospheric nuclear tests, he lost livestock that was immediately downwind of the Nevada test site, may petition the Commission for redress.

(b) Any person who alleges that he has or has had cancer caused by exposure to ionizing radiation from nuclear tests at the Nevada test site or from working in a uranium mine in Colorado, New Mexico, Arizona, or Utah between January 1, 1947 and December 31, 1961 may petition the Commission for redress.

(c) Any claim for cancer related damages to an individual must be made by an individual who has or has had cancer, or on behalf of a deceased individual if the cancer was diagnosed or manifest prior to the death of such person.

MISUSE OF INFORMATION BY EMPLOYEES

SEC. 211. (a) Neither a member of the Commission, nor the Director or any other employee of the Commission may—

(1) use any information furnished under the provisions of this title for any purpose other than the specific purposes for which it is supplied; or

(2) permit anyone other than officers or employees of the Commission to examine any information submitted to the Commission except the information printed in the reports submitted to the Congress and to the President.

(b) Whoever, being or having been an employee or member of the Commission referred to in subsection (a) publishes or communicates any information, the disclosure of which is prohibited by subsection (a), and which comes into his possession by reason of his being employed or providing services under this title shall be fined not more than $500 or imprisoned not more than 1 year, or both.

(c) Whoever, being or having been an employee or member of the Commission, with unlawful or fraudulent intent uses, sells or falsely obtains information which comes into his possession by reason of his being employed or providing services under this title shall be fined not more than $1,000, or imprisoned not more than 2 years, or both.

ATTORNEY FEES

SEC. 212. (a) No attorney shall charge, demand, receive, or collect for services rendered pursuant to an action brought under this title, fees in excess of 10 per centum of the first $100,000 of any judgment rendered under this title, and 5 per centum of any excess.

(b) Any attorney who charges, demands, receives, or collects, for services rendered in connection with such claim, any amount in excess of that allowed under this section shall be required to make restitution of any such excess and may be fined not more than $5,000, or imprisoned not more than one year, or both.

INSURANCE COMPANIES

SEC. 213. An award of damages made in accordance with this title shall not be considered as any form of compensation of reimbursement for a loss for purposes of making any individual receiving such an award liable, on the basis of such receipt, to repay such insurance company; nor shall an award or claim affect any future or pending insurance claim.

AUTHORIZATION OF APPROPRIATIONS

SEC. 214. There are authorized to be appropriated to carry out the purposes of the title, $150,000,000.

TERMINATION

SEC. 215. The Commission and the provisions of this title shall cease to be effective on October 1, of the year 15 years after the date of enactment of this title.

Mr. HATCH. Mr. President, I send to the desk for introduction an amendment to Senate Joint Resolution 77, a resolution to approve the Compact of Free Association with Micronesia. I propose to establish a trust fund that will grant a remedy to American citizens who were injured or who suffered damage to their property or businesses as a result of our Nation's testing of nuclear weapons in the atmosphere over the Nevada testsite. My amendment closely parallels the Reagan administration proposal to compensate citizens of Micronesia for injuries and damage as a result of United States nuclear weapons tests in the Pacific, although it has been tailored to fit the specific situation in the United States.

I am pleased that my colleague, Mr. GARN, the senior Senator from Utah, joins me as cosponsor of this amendment.

It is my hope that we may soon return to the debate on the compact itself and that we may quickly pass the Compact of Free Association with my amendment attached.

Earlier I informed the majority leader, Mr. DOLE, and the chairman of the Energy and Natural Resources Committee, Mr. MCCLURE, of my intentions to propose this amendment. I submit it now so that it may be disseminated more widely, and so that my colleagues in the Senate and our counterparts in the House of Representatives may have a greater opportunity to study it. Already copies of this amendment have been distributed to each Senator, and copies of supporting information have been distributed to the staff of each Senator.

CONGRESS SHOULD IMPOSE A FAIR REMEDY

The atmospheric nuclear testing compensation trust fund will provide a fair administrative remedy for a problem that has vexed the courts and the executive branch for more than 30 years. The White House, through a letter from Mr. Max Friedersdorf to the majority leader on July 26, 1985, urged that we delay consideration of this proposal until the courts had time to deal with injury claims through the Federal Tort Claims Act. Since Mr. Friedersdorf's letter, there have been two closely related developments which indicate Congress should act now: The courts said it is time for Congress to act, in language about as clear as a court can get and still keep the branches separated, and the Justice Department recognized that it will cost a lot of money to continue litigating these claims in court.

First, the U.S. Court of Appeals for the Ninth Circuit, in San Francisco, issued a decision on August 13, 1985, dismissing a case brought by 10 uranium miners and their families against the Government for damages the miners suffered when they mined uranium ore—under Government direction, for Government use—without adequate safeguards to protect them from lung cancer. This decision in Begay versus U.S. may yet be appealed to the U.S. Supreme Court, but in the opinion of many observers it effectively puts an end to the hope that uranium miners who contracted lung cancers as a result of their work can sue anybody for relief. These men, many of them Navajo Indians, gave their best efforts in our Nation's drive to develop a nuclear deterrent. This Nation owes them a mighty debt. It is unbecoming of our American tradition that we would deny them help in their time of great need.

In defending this case, the United States argued that it knew in 1951 that miners would be injured, and an extensive study proved by 1959 that the injuries would be serious, and fatal to some. Yet, lawyers for our Government argued that it is within the discretionary powers of our Government to decide to sacrifice our citizens in this manner without warning. And, though many years passed, the Federal Government never did warn these miners of the dangers of which it was aware. When the Public Health Service confirmed the injuries in the miners, the Government decided not to tell the miners. The three judge panel in the ninth circuit which decided this case was not happy with this argument, although the court sustained it. I personally find the argument repugnant. It is even more repugnant, however, that the Government—now having sustained its position in court—would continue to deny aid to these patriots.

The court said it is now time for Congress to act. I quote:

> We agree with the district court that this is the type of case that cries out for redress, but the courts are not able to give it; Congress is the appropriate source in this instance.

EXPENSIVE INJUSTICE

Despite this unfortunate, technical victory of the Government against the people in San Francisco, the Justice Department concerns grow about the expense of this policy. Richard K. Willard, Assistant Attorney General of the United States who is acting Chief of the Civil Division of the U.S. Department of Justice, recently made a speech noting that the Government paid $429 million in judgments and settlements last year, and saying that the system is out of control. He says that, in several of these radiation suits including Allen versus United States in Salt Lake City, the courts have placed what he calls an impossible burden on the Government, to prove that the fallout did not harm these people. Mr. Willard apparently fears that the U.S. Treasury cannot afford the jury awards that may yet come down in more than 1,000 other radiation-injury cases pending. Considering that one court has already determined that the Justice Department perpetrated a fraud upon the court, covering up the incriminating evidence in an early suit involving the deaths of thousands of sheep from fallout, this fear has some basis.

One clear message of Mr. Willard's speech is that the current policy of the U.S. Department of Justice is to avoid settling these radiation claims under the terms of the Federal Tort Claims Act, contrary to the policy Mr.

Friedersdorf urged in this July letter. This policy means taxpayers will continue to pay millions of dollars to defend these cases, and if the Government loses—as one would be led to expect from Mr. Willard's statement—taxpayers will then pay many more millions of dollars in claims. Of course, some of the most meritorious claims—those of the uranium miners—may be left unpaid; so we will pay millions of dollars to achieve a glaring injustice.

It will be less expensive in the long run and maybe in the short run as well if we impose a fair administrative remedy.

The courts tell us that Congress must act, and the Justice Department now worries about the expense of defending and paying these claims. In the new light of October, the remedy proposed in my amendment shows new appeal. It provides a remedy to the uranium miners as well as the downwind residents and sheep ranchers, and it limits the Government's liability to about one-third of what the Government paid to settle claims and judgments in 1984 alone. I suggest that both the victims and the Government gain a lot in this amendment, and it should be passed for that reason alone. But there are other compelling reasons we should pass this amendment.

There are nearly 4,000 pages of hearings relating to this trust fund amendment, before three different committees of the Senate: the Energy and Natural Resources Committee, the Judiciary Committee, and the Labor and Human Resources Committee. Several hundred pages point to this trust fund proposal as the rest way to settle the claims of American citizens, including the hearings Mr. McCLURE held on the compact itself. My friend from Idaho was gracious enough to let me raise this issue at the hearings with Ambassador Fred Zeder.

I asked Ambassador Zeder to distinguish why the Reagan administration proposal to compensate Micronesians should not apply to Americans in the same situation. It may have been an unfair question, since Ambassador Zeder negotiated this proposal with the Micronesians. In any case, no one has yet suggested a better way to deal with these fallout and radiation injury claims. This method is simple, fair, relatively inexpensive, but quick. It would be manifestly and monstrously unfair for the U.S. Government to settle the claims of the Micronesians and deny any settlement of identical claims from Americans.

The Federal Government had a special duty to monitor and protect people who lived downwind of the bomb tests from receiving injurious doses of radiation from the bomb tests and from the uranium mining. Our hearing records and Federal court decisions show the Government failed to live up to that duty. So far, people exposed to fallout and uranium miners have been denied a fair opportunity to prove their claims through standard tort remedies or workers compensation remedies, and the Government has shielded itself from action under the Federal Tort Claims Act by claiming the immunity allowed by that law.

My amendment provides a fair remedy to these people which is at the same time fair to the Government. The amendment sets up an optional administrative remedy. The amendment states in its findings that Congress does not expect any standards established in the settling of these claims to become standards in cases dealing with general tort or workers compensation law.

I hope the Senate will soon take up the compact for debate again. I urge my colleagues to support this amendment, for fairness sake, for the sake of those Americans who contributed to our defense efforts and were injured but have not won compensation, for the sake of our Federal tort law, and in the name of the rest of the citizens of the United States, in gratitude for the roles these victims played in the development of our nuclear deterrent forces.

INCREASE IN PUBLIC DEBT LIMIT

EAGELTON (AND OTHERS) AMENDMENT NO. 773

Mr. EAGLETON (for himself, Mr. EXON, and Mr. KERRY) proposed an amendment to the joint resolution (H.J. Res. 372) supra, as follows:

At the end, add the following new subsection:

( ) (1) Notwithstanding the second sentence of subsection (d)(1) of this section, the Directors shall jointly report to the President and the Congress the matters described in such subsection on October 1, February 15, and May 1 of each fiscal year, except that with respect to fiscal year 1986, the Directors shall jointly report to the President and the Congress the matters described in such subsection on November 1, February 15, and May 1 of such fiscal year.

(2) Notwithstanding any other provision of this section or of the amendments made by this section, the term "maximum deficit amount" shall mean, with respect to the fiscal year beginning October 1, 1985, $175,000,000,000.

(3) Notwithstanding the second sentence of subsection (d)(1)(H) of this section, the amount by which the deficit for the fiscal year beginning October 1, 1985, exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount.

DEFENSE ACQUISITION FUND

LUGAR AMENDMENT NO. 774

Mr. DOLE (for Mr. LUGAR) proposed an amendment to the bill (S. 1726) to repeal section 121(b) of the International Security and Development Cooperation Act of 1985 (Public Law 99-83), relating to funding for the Special Defense Acquisition Fund, as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SEC. 1. FUNDING FOR THE SPECIAL DEFENSE ACQUISITION FUND.

(a) AMENDMENT TO SECTION 51(b) OF THE ARMS EXPORT CONTROL ACT.—Subsection (b) of section 51 of the Arms Export Control Act (22 U.S.C. 2795(b)) is amended to read as follows:

"(b) The fund shall consist of—

"(1) collections from sales made under letters of offer issued pursuant to section 21(a)(1)(A) of this Act representing the actual value of defense articles not intended to be replaced in stock.

"(2) collections from sales representing the value of asset use charges (including contractor rental payments for United States Government-owned plant and production equipment) and charges for the proportionate recoupment of nonrecurring research, development, and production costs, and

"(3) collections from sales made under letters of offer (or transfers made under the Foreign Assistance Act of 1961) of defense articles and defense services acquired under this chapter, representing the value of such items calculated in accordance with subparagraph (B) or (C) of section 21(a)(1) or section 22 of this Act or section 644(m) of the Foreign Assistance Act of 1961, as appropriate.

together with such funds as may be authorized and appropriated or otherwise made available for the purposes of the Fund.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect as of October 1, 1985.

Amend the title so as to read: "A Bill to amend section 51(b) of the Arms Export Control Act, relating to the funding of the Special Defense Acquisition Fund.".

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a hearing before the Energy and Natural Resources Committee.

The hearing is scheduled on Thursday, November 14, 1985, beginning at 10 a.m. in room SD-366, Dirksen Senate Office Building in Washington, DC. Testimony is invited regarding the President's July 8, 1985, national defense stockpile modernization proposal and its potential impacts on the domestic mining industry.

For further information regarding this hearing, you may wish to contact Mr. Robert Terrell of the committee staff at 224-5205. Those wishing to

testify or who wish to submit written testimony for the hearing should write to the Committee on Energy and Natural Resources, U.S. Senate, room SD-306, Dirksen Senate Office Building, Washington, DC 20510.

SUBCOMMITTEE ON PUBLIC LANDS, RESERVED WATER AND RESOURCE CONSERVATION

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public that the Public Lands, Reserved Water and Resource Conservation Subcommittee of the Energy and Natural Resources Committee will conduct a hearing on Monday, October 21, 1985, at 10 a.m. in room SD-366 of the Senate Dirksen Office Building, Washington, DC. The subcommittee will receive testimony on the following bill:

S. 1558, to settle certain claims affecting Pyramid Lake Paiute Indian Tribe of Nevada, and for other purposes.

Those wishing to testify should contact the Subcommittee on Public Lands, Reserved Water and Resource Conservation of the Committee on Energy and Natural Resources, room SD-308, Dirksen Senate Office Building, Washington, DC 20510. Oral testimony may be limited to 5 minutes per witness. Written statements may be longer. Witnesses may be placed in panels, and are requested to submit 25 copies of their testimony 24 hours in advance of the hearing, and 50 copies on the day of the hearing. For further information, please contact Terri Sneider of the subcommittee staff at (202) 224-0613.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, October 10, 1985, in closed executive session, to receive a briefing on the political and military aspects of the proposed sale of arms to Jordan, and also to consider routine military nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON MERCHANT MARINE

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Merchant Marine Subcommittee of the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Thursday, October 10, to conduct a meeting on fishing vessel safety.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PUBLIC LANDS, RESERVED WATER AND RESOURCE CONSERVATION

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Subcommittee on Public Lands, Reserved Water and Resource Conservation, of the Committee on Energy and Natural Resources, be authorized to meet during the session of the Senate on Thursday, October 10, 1985, in order to conduct a hearing on the following four bills: Senate Joint Resolution 187, S. 1596, H.R. 2776, S. 1116 (District of Columbia property bills).

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

MINORITY ENTERPRISE DEVELOPMENT [MED] WEEK

● Mr. WEICKER. Mr. President, I would like to bring to my colleagues attention that this week, October 6-12, 1985, has been designated by President Reagan as "Minority Enterprise Development [MED] Week." This is the third annual observance of MED Week since the President proclaimed in 1982 that the first full week in October would be so designated. During this week, the Small Business Administration [SBA] and the Minority Business Development Agency [MBDA] are holding events honoring distinguished minority entrepreneurs from around the Nation.

I would like to offer my congratulations to all of the local and national award winners who have been chosen for recognition from among the minority business community. Minority businesses make a significant contribution to our Nation's economy and our local communities. I would like to take this occasion to express my own admiration and gratitude to the minority business community for the strides they have made and the essential role they have played in our daily lives.

Throughout the history of this Nation, ownership of a business has been a traditional part of the American dream. It is the essence of our independent spirit, the attainment of a goal that brings with it self-sufficiency, self-determination and the personal joy and satisfaction of making it on your own.

Unfortunately, for many years minorities did not share in that dream. In terms of our free enterprise system, members of the minority community were still forced to ride in the back of the economic bus. Well, Mr. President, I am proud to say that we are making strides toward reversing that harsh reality. Today, minority-owned firms are emerging as some of the most glowing success stories our Nation has to offer. In all walks of business, we are seeing increasing numbers of minority entrepreneurs taking their place and staking their claim on their own piece of the free enterprise system.

This is the real American dream, Mr. President—the dream that any man or woman, no matter how humble their beginnings, can, through their own hard work and effort, become a success in this country.

The minority business owners we pay tribute to this week stand as shining examples of the best qualities our Nation has to offer. They dared to dream that they could make it; they dared to believe that they had a right to success; they dared to think that they could be more than spectators at the business game—they could be players themselves.

I believe it is appropriate that we set aside a week to pay tribute to these entrepreneurs, Mr. President. But I would urge my colleagues to use this week to do more than simply recognize the achievements that have been made. Let us take this opportunity to rededicate ourselves to the goal of increasing minority business participation. Strides have been made, yes, but in the flush of celebration, we must not forget that much more remains to be done. The recently released Commerce Department Bureau of the Census survey of minority-owned businesses, focusing on black-owned businesses, conclusions are examples of this point.

According to a Bureau of Census survey on minority businesses released this week, from 1977-82 the total number of black-owned businesses grew by more than 100,000 from 231,203 businesses in 1977 to 339,239 firms in 1982—a 47-percent increase. During the same time period gross receipts for black firms rose from $8.6 billion to $12.4 billion. In fiscal year 1984 alone, Federal procurement awards to all minority-owned businesses totaled $6 billion. There is another side to the story, however.

The fact still remains that of the roughly 14.5 million small- and medium-sized businesses in this country, only about 600,000 are owned by minorities. What that means is that while recognized minority groups—blacks, Hispanics, Asian-Pacificans, Eskimos, Aleuts, and American Indians—make up about 25 percent of our population, they own less than 5 percent of the businesses.

Of those 600,000 minority-owned businesses, over 90 percent are small, sole proprietorships. Two out of every three of them are in the retail trade and service industries, and the vast majority of these businesses have no paid employees. With minority unemployment continuing at unbearable rates, clearly promoting the growth and expansion of minority businesses is one of the key resolutions to this problem.

Mr. President, for the past 15 years, through both Republican and Democratic administrations, the Federal Government has played an active role in promoting minority business development. Our efforts must not only continue, but increase greatly. Let us

use MED Week, therefore, to both honor the achievements of our Nation's minority businesses, and rededicate ourselves to the goal of helping minority businesses help themselves by insuring their participation on our Nation's rich economic opportunities.●

THE U.S. NAVY

● Mr. INOUYE. Mr. President, this Sunday, October 13, the U.S. Navy will celebrate its 210th birthday. It was on that date in 1775 that the Continental Congress first enacted naval legislation, authorizing the "fitting out of ships" for the Continental Navy.

In those early days, the Navy consisted of a handful of sailing ships. Today, our Navy numbers almost 600 ships. Since its inception, our Navy has performed valiantly in countless battles the world over for the cause of freedom: The great battles of the American Revolution; the War of 1812; the great global mastery of the seas in our 20th century conflicts.

It is certainly appropriate that we in the U.S. Senate join with the men and women of our Navy as they celebrate their birthday all around the world this weekend.

In my home State of Hawaii, more than 23,000 Navy men and women continue in the Navy's great tradition of service. But this is not all of the Navy's community there. Their number is expanded by some 18,000 dependents, more than 15,000 civilian workers and almost 900 naval reservists. They are proudly celebrating the Navy's birthday with many events, including a sunset parade, birthday balls and dinners, Navy Sabbath weekends, Navy League awards luncheons, Navy uniform days, and Blue Angels air shows.

Therefore, in honor of the Navy's 210th birthday, I would like to publicly commend this distinguished branch of our Armed Forces for its outstanding performance in defense of our great Nation.●

MINORITY CONSTRUCTION FIRM OF THE YEAR

● Mr. DOMENICI. Mr. President, minority business owners have an advantage over their more established competitors because they have developed early on a sense of the hard work it takes to get anywhere in this society. Nothing is handed to them on a silver platter. They know from the time they are children that anything worth having—a job, an education, a good home—requires hard work and perseverance. That's the edge, the hunger for making the best of any opportunity, no matter how small it is, that puts minority business owners on the right track heading for success.

Many have said that Horatio Alger is dead, that the days of the individual or their family starting a business from scratch and making a successful enterprise went out with flappers and the Roaring Twenties. They are wrong, and Mathew Lucero proves that they are wrong.

Mr. President, I am pleased to report that Mathew Lucero Construction, owned and operated by Mathew Lucero of Los Lunas, NM, has been selected as "Minority Construction Firm of the Year" by the U.S. Department of Commerce. This honor was announced in conjunction with the designation by the President of this week as "Minority Enterprise Development Week." Later this week, Mr. Lucero will also be honored as one of the outstanding New Mexico minority business owners.

Mathew Lucero, a Native American, established his construction business on the Isleta Pueblo. Despite the tremendous obstacles and barriers to establishing a successful business on an Indian reservation, Mathew has taken his construction company on an aggressive path that saw his annual sales rise from just $27,000 to $1.5 million in just 3 short years. He has sought out other minorities to work in his company, providing these individuals with the opportunity to work and the ability to participate first hand in a successful minority business enterprise.

Mathew Lucero demonstrates that the entrepreneural spirit is alive and well in America and that our Nation is still the land of opportunity. It is a great pleasure to join in applauding his achievements and to congratulate him on the awards which have been bestowed upon him.●

● Mr. LAUTENBERG. Mr. President, the month of October has been designated "Minority Enterprise Development Month" in New Jersey. This coincides with the national designation of the first week in October as Minority Enterprise Development Week.

I am pleased to take note of the importance of the contributions of minority entrepreneurs to our economy. Many Americans aspire to own and develop their own businesses. As I know from my own experience, no feeling of pride and self-esteem can be more exhilarating than the feeling that comes from starting a business and watching it grow. Many doubts, many pitfalls, many problems await the aspiring business man or woman. But, when it works when the marketplace accepts your ideas and gives them value, the feeling of accomplishment is well deserved.

Mr. President, economic growth in our country comes through the success of business activity. The economic vitality of the minority communities in our country will flourish as members of those communities take on more and more responsibility for business development, Much has already been done, but there is room for a great deal more growth and initiative.

The challenge for Government today is to provide technical and other assistance to the many talented and ambitious minority citizens who want to establish and enlarge their own businesses. This assistance can range from sharing information about market opportunities to providing access to capital to assuring fair and open competition.

I am pleased to salute the minority entrepreneurs in New Jersey and around the country. I stand ready to do everything I can to help them flourish and to increase their numbers.●

TRIBUTE TO SIMON KONOVER

● Mr. DODD. Mr. President, allow me to offer a tribute to one of Connecticut's great citizens.

Mr. Simon Konover, immediate past president of the Greater Hartford Jewish Federation and chairman of Simon Konover and Associates, will be honored on October 20 at a dinner hosted by Beth El Temple of West Harford, CT, and State of Israel Bonds of West Hartford.

Mr. Konover is truly a pillar in Connecticut's Jewish community. A noted humanitarian, philanthropist, and communal leader, his contributions and dedication have earned him tremendous respect and admiration—and appropriately so.

Simon first stepped ashore in America in 1948. He was 26 years old. His one ambition was "to eventually open up a gasoline station and maybe a used car dealership." Well, he exceeded that goal long ago, and since that time, he has never stopped striving.
